MOONSHEEGUNGE SUB-DIVISION.

63. The peculiarity of this sub-division is that it contains the pergunnah of Bikrampore, which is probably the home of more of the educated Baboo class, from which are taken pleaders, clerks, and officials than any other place in Bengal.

64. Appendix K is the Sub-Divisional Deputy Magistrate's reply* to my first letter; appendix A and appendix L are his report on meetings held at five different places after receipt of my second letter, appendix F. He sent me a separate report respecting each meeting; but those I do not think it necessary to submit, considering his abstract report sufficient.

No. 136 of 25th July 1882.

65. The five meetings were attended by 391 substantial persons, of whom I am glad to see that 65 were Mahomedans, while 274 were traders, so that there were a number of persons present in addition to the educated Baboos It was the opinion of these latter, however, that the bulk of the people followed. The Deputy Magistrate's estimate of the number of qualified electors cannot be accepted, because I see that he has included in it a great number of non-resident persons to whom I do not think the franchise should be extended.

66. The desire to elect representatives for a local board appears to be unanimous.

There were various opinions as to the number of representatives. There are only two thanas in the sub-division, and I think it would be enough if each thana sent up five representatives As I said in the case of Manikgunge, I will not discuss the question whether Government should nominate any portion of them or not; but I may say, what I omitted to say before, that I think in case of failure to elect with the record of a certain proportion of the available votes Government should nominate representatives, as I recommended in the case of municipalities.

67. The opposition to making the sub-divisional officer Chairman was very strong, some even wishing that the board should be debarred from asking for his services in any case. As in the case of Manikgunge, I am desirous of allowing the board to elect any one they like as Chairman, and shall be very glad if they can find a person qualified for the post other than the sub-divisional officer. Should they fail they should certainly have an opportunity of securing the services of that officer.

68. A majority wish to elect the members of the board for three years. I do not think the matter important, but am inclined to think two years enough.

69. All think that Moonsheegunge, the sub-divisional head-quarters, should be the place of meeting.

The numbers 30, 50, and 100 were suggested as suitable for the number of members on the board. I think no work could possibly be done by so large a board, and have already suggested ten.

70. As at Manikgunge, the people are ready to undertake any branch of administration that they can get hold of; but as the Sub-Divisional Deputy Magistrate remarks, they have very little idea how the business is to be conducted, and he thinks much of what they propose will be too arduous for them - a sentiment in which I fully concur.

NARAINGUNGE SUB-DIVISION.

71. I have already, in appendix C, given the Deputy Magistrate's answer to my first letter, but have hitherto discussed so much of it only as refers to the municipality.

72. I have not yet received a full reply to my second letter, appendix F, as Mr. Fraser is still in the interior convening meetings on the subject; but he has sent me lists of persons qualified to be electors according to the standard suggested by Government, shewing in thana Roypura 154, thana Reopgunge 148, thana Naraingunge 157. Among these, however, I observe that he has included several non-resident persons whom I know to be in service or employment in other districts.

I observed that a great many of the persons qualified as electors are also qualified to be representatives.

73 The Sub-Divisional Deputy Magistrate names three non official natives, each of whom he thinks well qualified to be Chairman of a local board, and I shall be glad if one of them is elected.

74. I have heard from non-official persons that there is a strong wish throughout the sub-division for the introduction of an elected local board, the members of which should elect their own Chairman.

SUDDER SUB-DIVISION.

75. I have entrusted the enquiries in the head-quarters sub-division to Deputy Magistrate Baboo Krishna Chandra Rai, a sensible and experienced officer, who is also a landowner and old resident.

As his replies to my first letter (appendix A) contained little more than his personal opinion I have not appended them, classifying them with opinions which I have myself gathered in conversation with individuals.

76. Appendix M, however, contains his reply* to my second letter, appendix F, after holding meetings at three places selected by me. He is now on his way to hold other meetings.

No. B, dated 1st September 1882.

He estimates the number of qualified electors in the sub-division at 652 as follows:—

Thana Lalbagh	...	...	...	174
,, Kapasya	...	...	...	65
,, Sabhar	...	..	...	234
,, Nowabgunge	...	...	...	179
				652

taking into consideration the payment of road cess and license tax only. Of those possessing the third qualification, that of income, he gives me no estimate.

77. The number of persons attending the meetings seems to have been much larger than in the other sub-divisions. My questions, however, have not been by any means clearly answered.

I gather that the people want an elected local board and a non-official Chairman, and it is also suggested that there should be more than one board in the sub-division, which is divided by large rivers.

78. At this stage of the experiment, I am not prepared to propose a local board for each thana; but there are certainly physical difficulties of communication which may render the administration of this sub-division less easy than that of the others.

I should allow each thana to send up representatives as follows:—

Sabhar ...	...	...	...	4
Lalbagh	...	...	...	3
Nowabgunge	...	...	...	3
Kapasya	...	...	...	2
				12

and if Government reserves any power of nomination, I would suggest one nominee for each thana, the other eight members being elected.

GENERAL REMARKS ON LOCAL BOARDS NOT MUNICIPAL.

79. Having thus commented on such information as has as yet been collected for each sub-division, I will now proceed to make some general remarks on the subject of local boards other than municipal.

I think one should be constituted for each of the four sub-divisions for the district, or if there be any doubt respecting the sudder sub-division, certainly for the other three; and

I think each board should be allowed to elect any one they please as Chairman, Government giving the services of an official if required.

80. Should rate-payers of the city of Dacca and the municipality of Naraingunge be allowed votes if duly qualified by the Sudder and Naraingunge sub-divisional local boards respectively, or not? I am inclined to think that it is undesirable that they should do so unless resident in the interior and not in the municipality of which they may be rate-payers. I am not, however, sure upon this point, and must consider it further.

81. For qualifications of candidates I can suggest no improvement on those suggested by His Honor the Lieutenant-Governor.

82. For voters, I would reduce the road cess qualification to the payment of Rs. 5, and any payer of license tax should be qualified; but the question of income requires consideration. Rs. 500 means about Rs. 41 per month, and many people are desirous of reducing the qualification to Rs. 200. This represents a monthly income of Rs. 16 only, and looking to the class of persons who hold clerkships on such pay, I think it too low a qualification, especially as His Honor has suggested no condition of residence, so that in such a constituency as that of Moonsheegunge the representation would be controlled by non-residents, comprising probably a third of all the clerks, pleaders, and native officials in Bengal. I think residence in the sub-division for at least ten months in the year should be an essential condition to qualify an elector. There is much agitation as to allowing education, such as a university degree, to qualify. This I have considered very fully, and do not see the necessity for it. I would reduce the income-qualification to Rs. 240, or Rs. 20 per month, and if a Bachelor or Master of Arts cannot shew an income of Rs. 20 per month in the sub-division in which he is resident, I would look on him as an unproductive idler and unworthy of a vote. The only question is as to the heirs of qualified electors, living with their fathers, expecting to succeed to the estate, and possessing a university degree, and I think some provision might be made for extending the franchise to them. I am not yet, however, prepared to propose definitely what the qualifications of electors shall be, and have directed the several Sub-Divisional Deputy Magistrates to invite all persons wishing to be electors to apply stating their qualifications, and I think that when I have a number of such applications before me, I shall be able to judge what classess of persons desire the franchise, and to consider to what classes of them it should be extended.

83. Regarding qualification of shareholders in joint holdings or concerns, the possession of more votes than one, and cognate matters, my remarks respecting the municipalities will apply equally to sub-divisional boards.

84. Where an official is chairman, I do not think it necessary that he should have a vote except a casting vote, whenever the votes of the other members of the board are equally divided.

85. The polling should be taken at each thana, and perhaps at other places in exactly the same way as I have proposed for the municipality, the sub-divisional officer presiding and the presence of the elector being insisted upon as essential.

86. The registrations of the qualifications of electors must, I think, be left for the first election in the hands of the sub-divisional officer with an appeal from his decision to the Magistrate of the district. In future I hope the people may be found capable of managing their own elections.

87. I am decidedly of opinion that to give the district officer any power of control over the local boards will destroy all their independence, and I quite accept the proposal of a central board of control as preferable.

88. I object quite as much to the existence of a district board as I do to the interference of the District Magistrate; but I think occasional conferences of delegates from various local boards may be desirable and perhaps necessary.

89. In discussing the question as to the funds which may be made over to local boards other than municipal, I do not find so much difficulty in deciding what matters there are, the control of which may be transferred from Government officials to local bodies, as in deciding what may be better left in the hands of village punchayets than in those of the local sub-divisional board.

90. In fact the scheme of giving power to local boards, which I am directed to discuss, militates against a scheme of my own, which I have long had under consideration, of developing local self-government by adding to the function, emoluments, dignity, and usefulness of the village punchayets.

91. With reference to pounds, I think the utility of these institutions is rendered much less than it might be by the great distances from which trespassing cattle have to be brought, and that the gross income of pounds might be enormously increased if they were brought more within reach of the people for whose convenience they exist. I am therefore proposing that every punchayet should be allowed to maintain a pound, from the proceeds of which it would support the village school, and possibly a dispensary, village post-office, and other institutions, the loss which Government would sustain from giving up the income from pounds being met by a corresponding deduction from the grant for primary education.

But while I would make the village punchayet a local committee for their school and dispensary, I would give the local sub-divisional board the duty of controlling their educational work by proper inspection, by giving grants to more advanced schools, by giving rewards on examination under what is known as Mr. Harrison's Midnapore system, and by

giving scholarships. For these purposes educational funds must be made over to the local board, and I see no objection to giving them the proceeds of the license tax within their jurisdiction.

From this also may be met the necessary expenditure on their office establishments.

92. As regards roads I think extreme caution necessary to prevent funds being frittered away upon bye-roads of merely local importance to the detriment of the communications of the district generally. For this latter purpose, I think a certain proportion of the proceeds of the road cess must always be reserved, especially where a district is so destitute of main lines of road as is the case with Dacca. I do not think local boards can take a sufficiently broad and statesmanlike view of district or provincial requirements, and I believe that if the district road fund were left entirely in their hands, the district would, after the lapse of a certain number of years, be found well supplied with footpaths, each of a mile or two in length, converging to the several markets, with perhaps a few cart-roads of equally limited value, while it would be impossible to drive a cart a dozen miles in any direction.

93. I think, however, the local board may be entrusted with all funds for the maintenance and repair of existing roads, with the trees thereon, and bridges of minor importance, such work as can be done without a trained Engineer, and also with any money it may be considered advisable to allow for village roads; but I think the actual expenditure should be entrusted as far as may be to village punchayets.

94. Local boards might suggest new lines of roads; but I do not think the final selection of new roads should be left to them I think, however, it might be possible for them to undertake the construction of new roads under proper supervision and after full specification of requirements as efficiently and much more economically than is found practicable with the existing district staff. The repair and construction of large bridges would be left in professional hands. I think the local board would absolutely fail in collecting the road cess for themselves; that must be done by the State.

95. The licensing of outstills and drug shops and the letting of ferries might be very well left to local boards; and the only question would be how to compensate the Government for the loss of the income now derived therefrom by throwing upon the boards equivalent expenditure. It might perhaps be balanced in distributing the educational funds.

96. As regards the public works cess, I do not quite understand what is proposed, and doubt whether it is advisable to make over to a local board the sub-divisional cutcherries, residences, and subsidiary jails, moonsif's courts, and the like.

97. It remains to consider what safeguard there should be against waste of money, abuse of patronage, and neglect of necessary work on the part of the local board. They might even occasionally occur instances of still graver need for interference. Some form of watching their administration would be necessary, and some form of control.

98. I have already said that the interference of the District Magistrate, if permitted, may at any time reduce the system of local self government to a sham; but though the accounts of the boards may be scrutinized elsewhere, I do not see how their executive work pan be examined and checked otherwise than by the local authorities. The Magistrate may point out defects and remonstrate; but when the necessity for actual supersession or interference arises, it will be better if the independence of the local board is to be maintained, that the Magistrate should not himself interfere, but should report the case, invoking the interfence of some external authority, and I do not see what better form such external authority can take than such a central board as the Government of Bengal has suggested.

APPENDIX B.

Note on self-government as applied to the Dacca Municipality.

THERE can be no question that if any Bengal community is fit to be entrusted with an elective franchise, that of the city of Dacca is. It is the leading city in Eastern Bengal, and contains a population of men of education, wealth, and intelligence far beyond that contained in any municipality of which I have had any experience in India, not even excepting the two large towns in the Madras Presidency—Trichinopoly and Salem—of which I have had some slight experience.

Queries Nos. 1 & 2.—The most suitable method of election for members of a Municipal Committee, and the rules proposed for election.—The present Committee consists, between officials and non-officials, of 17 members.

I would fix the number of Commissioners to be elected under the new system at the same number—17.

To these I would add two *ex-officio* members, who would not, however, have a vote, viz., the Executive Engineer and the Civil Surgeon. It is true that Government have announced their willingness to place the services of these officers at the disposal of the Committee; but I consider that it would be far more satisfactory for these officers to be able to attend and speak at meetings on subjects which concern their departments. It would save endless correspondence and possible friction. At the same time it could not be said that the presence of these officers would cast the shadow of officialism over the general proceedings of the meeting,

for they are both men whose own work is far too pressing to allow them to attend municipal meetings, unless the subject under discussion were one which intimately concerned their own departments; and I am sure that once that subject was discussed and over, they would not seek to interfere in the discussion of others with which they had professionally no concern. For the purposes of conservancy the town is divided into seven blocks. I consider that, for the purposes of electing a Municipal Committee, we could not make a better division. It has the merit of being familiar to the people, and by the time that the local self-government scheme will have come into operation, it will have been rendered still more familiar by the experience of an election for Ward Commissioners which is now going on.

When the day of election has been fixed, as it would be, by the Magistrate, each intending candidate should give six weeks' notice of his intention to stand for the ward for which he seeks election; and every person seeking to be registered as an elector should do so two months before the day of election. Thus, if the system comes into force, as doubtless it will, on the 1st of April, each candidate should have notified his intention, and should take care that he has duly qualified himself by application for registration on the 15th February; the lists for voters, however, would remain open only until the 1st February. A strong committee of revision should meantime be appointed under the presidency of a responsible officer, such as the Vice-Chairman of the existing Municipal Committee. I should say that the members of this committee should be remunerated for their trouble. It is true we are getting this work done gratuitously for the Ward Committees; but it must be remembered that the work of revision in the Ward Committees is very light compared to what it will be for an election to a seat at the Municipal Board, and still more that the Ward Revision Committee is working a scheme under which there is no apprehension of the position of its members being assailed; whereas in the municipal revision, the revision status is about to pass away altogether, or to remain after the trouble of, it may be, a contested election. The work of revision should be concluded 10 days before the date of election to enable voters to obtain their voting papers and to have the lists properly drawn out. With the registration of a voter's name in the register, a voting paper should be given to him bearing a number corresponding to the number opposite his name in the register, and that must be handed in on the day of election. When it is so handed in, the presiding officer at the booth should make a mark against the name in the register, and thus prevent two votes being given in the same name.

I have said that there are seven wards or blocks in Dacca. Of these some are in every way, both by population and wealth, more important than the others. I would therefore allow Wards 1, 2, and 5, which are by far the most important, to return three members each, and Wards 3, 4, 6, and 7 to return only two. If the committee is properly to look after the interests of the town, I should say that both for candidates and electors residence in the ward should be a *sine quâ non*. I should also limit the privilege of plumping, and compel every voter to record in his voting paper the names of at least two candidates. This will tend to mitigate any undue influence which might be brought to bear on electors by their zemindars or creditors.

The actual number of election according to the house rate would be—

		Electors.
Ward 1	...	321
" 2	...	472
" 5	...	310
" 3	...	112
" 4	...	176
" 6	...	104
" 7	...	141

Query No. 3.—*The qualifications proposed for electors, and the approximate number of persons so qualified.*—The general theory of qualification for a municipal franchise in England is the payment of municipal taxes. Whilst this is quite applicable to a city like Dacca, it is not, I consider, wide enough. Several of the most intelligent men in Dacca, such as pleaders at the local bar, medical men and Government servants and pensioners, do not live in houses for which they would pay a rate entitling them to a vote; many live in lodgings, and not a few in houses of a poor description. On the other hand, in the older parts of the town many of the better class of houses are occupied by men to whom their fathers have left, as their only legacy, the house and the ancestral load of debt which burdens them. It would therefore be obviously unwise to exclude the former and include the latter. The true course would be to devise a franchise embracing both classes. I would therefore propose the following franchise as one which would obtain for us the most intelligent body of electors, and would include at the same time a sufficient number to make the municipal body a fairly representative one:—

(1) The payment of eight annas monthly as house tax, exclusive of any other impost, such as latrine tax, &c. This will give a constituency of 1,636 electors, who will represent a fair amount of intelligence and prosperity in business, or otherwise going below that would not be safe, as I do not think that householders, as householders paying four annas a month, would be proper persons to entrust with the franchise. We have made four annas the limit for our Ward Committees—the electors to the Municipal Committee require a higher household suffrage. I would then suggest the introduction of the franchise which, as I said before, will include persons who should be, but would not be, included in a mere household suffrage, and I would here adopt the lines laid down by the Government of Bengal in its resolution, and give a vote to every man paying Rs. 10 license tax, or of private income from untaxable sources of not less than Rs. 500 per annum. I do not think that the payment of road cess should enter as factor into a suffrage that is purely municipal.

The license tax franchise would give a total of about 360 persons, that of income would total about 250 persons. It may be readily imagined that the latter figure is but approximate. I have derived it, however, by taking figures furnished to me by the leading men in various professions and by consulting native gentlemen who would know as well as most men what persons enjoyed incomes derived from the interest on Government promissory notes and other sources. We should then have an elective body of 246 persons. This, out of an adult male population of about 25,000 persons, would, I think, fairly represent the proportion of the population who could reasonably be entrusted with the franchise. The cumulative vote would increase this number, and I would propose here to give an extra vote up to four for every Rs. 3 house tax, and for every Rs. 50 license tax, and for every Rs. 200 independent income. It may be said that undue prominence is here given to house tax; but the higher we go in household rating the nearer we come to a class of men who ought to be, if they are not capable of exercising the franchise intelligently. These cumulative suffrages would give us an extra number of votes as follows:—

Giving a total number of possible votes, 2,565.	Under house tax	...	...	205
	License tax	...	...	114

Qualification from income may be disregarded; the numbers would be very few, and it is almost impossible until those who seek registration come forward to estimate the numbers with anything approaching accuracy.

Query No. 4.—Qualifications for candidates, and the approximate number so qualified.—The choice of persons to be qualified as candidates for a municipality like Dacca is one of the most important parts of this scheme, and I consider that it is safer to take too high than too low a level in deciding to what men we shall practically hand over the disposal of a sum of money amounting to about a lakh and a quarter of rupees annually, and still more, to whom we shall entrust the settlement of the very important questions of sanitation and other municipal requirements upon which depend the health and well-being of a population of 82,000 souls. We shall have to ensure that only men with a considerable stake in the town be allowed to stand as candidates We must select men whose interests are bound up in the well-being of the town, and not mere needy adventurers whose sole object is their own aggrandisement. To gain this end I would propose that—

(1) Every person occupying a house, the annual value of which is Rs. 400 or upwards, should be entitled to stand as a candidate for the ward in which he resides;
(2) Every person paying house tax to the value of Rs. 3 or upwards;
(3) Every person paying Rs. 50 license tax;
(4) Every person enjoying an income, not derived from any taxable source, of Rs. 2,000 or upwards.

The first class would furnish about 250 possible candidates, the second 150, the third 60, the fourth approximately about 100 persons; but this is a mere approximation to the real number. We should have here an ample number of possible candidates, and would ensure that all of them were at any rate men who have a substantial stake in the municipality, and who might fairly be supposed to be capable of managing municipal funds in an intelligent manner.

Queries Nos. 5, 6, 7, 8, 9.—As to the election of Chairman.—This is a question which has given me much anxiety and thought. I have consulted several native gentlemen of experience on that point, and briefly the result I have arrived at is that it would be impossible, at any rate at the outset, to carry on the business of the municipality unless the Magistrate or some official were at the head of it. My reasons are many. In the first place, although we could get several non-officials willing, nay eager, to take the chair and preside at meetings, and generally assume the dignity of the Chairmanship, I do not think there is a single non-official in Dacca who without remuneration would undertake the drudgery and work connected with the office. There is not a non-official who, without remuneration, would spend his mornings on the roads looking after repairs, and who would give some hours of his day to office work, as the Chairman is obliged to do. It may be that in course of time we may get men educated up to that pitch of self-abnegation, but at present I am sure they do not exist in Dacca. The executive work of this municipality is unusually heavy, and by no means easy to learn. There is the water-works establishment to supervise, a number of unruly imported sweepers to keep in order, and a state of insanitation to cope with that requires a very strong and unfettered hand. Dacca is passing throughout a transition state of sanitation. Within my time (three years) here the conservancy establishment has been got together, and after much toil and difficulty the conservancy arrangements that exist—and they are as yet sadly inefficient—have been put into practice.

I have had a tolerably long experience of the municipality now, and the result of my observations has been that, whilst the members of the Committee are willing enough to acknowledge the blessings of sanitation and to vote when they are at a meeting and away from their surroundings for most sweeping sanitary reforms, they are very reluctant personally to make themselves obnoxious to their neighbours and report or take action upon any breach of sanitary law of which they may be guilty. Unpleasant though the admission may be, the people of Dacca, advanced though they are in education, are apathetic to the most rudimentary requirements of sanitation; and although they might call out and complain loudly if their own privy was neglected by the municipal sweepers, they would view

with the utmost indifference an accumulation of filth in that of their next-door neighbour but one. I have said that the present Commissioners are reluctant to make themselves obnoxious to their neighbours, yet they are men nominated. Their seats are secure. If such things are done in the green tree, what will be done in the dry, when the very existence of the Municipal Commissioners, as such, depends upon the good-will and favour of those very neighbours, with whom, if they do their duty, they are bound to render themselves unpopular.

Besides this, the routine work of a municipality, such as that of Dacca, is no easy matter to learn, and it would be simply impossible for any non-official to take up the reins when the present Chairman lays them down and drive the municipal coach. I do not think it necessarry that the Chairman should have a vote; but he should certainly wield the executive power of the municipality. Were that power now to pass out of responsible and experienced hands into those of some non-official who knows nothing of the routine, and still less of the difficulties with which the municipality have to contend, I am convinced that Dacca would relapse from even the small advance it has made. Well-privies and other abominations that have been closed would be re-opened, and sanitation become a thing of the past. This, too, is the opinion of almost all the men of intelligence with whom I have spoken on the subject. They at first were all for a native Chairman, assuming, as I said at the beginning, that the Chairman's duties began and ended with taking the Chair at meetings. On putting the questions discussed above practically before them, they all admitted, some without reserve, and all that for the first few years at any rate the Committee would require guidance; added to this the people of Dacca, who are most in favour of local self-government, are men who are constantly asserting their independence. Such men as these would not be likely to be unduly terrified by the presence of an official in the chair. As a matter of fact the *nominated* Commissioners are by no means *ap-ke-waste* men. They state their opinions fairly and independently, and I am sure an elected body of men would do so in the same manner. For these reasons I strongly advocate that, for the present at any rate, the Magistrate of the district should be the Chairman and chief executive authority of the municipality of Dacca.

Queries 10 *up to* 13 have been answered in the body of this report.

Query 13.—One would scarcely like to assume that, as a body, elected Municipal Commissioners in Dacca would entirely neglect their duty regarding sanitation, education, roads, conservancy, and drainage as I have already said. The Commissioners will, I consider, be ready enough to vote for intelligent scheme of sanitation, &c., and if the executive authority be left with the Chairman, there is but little fear of anything like a collapse regarding these subjects. It is of course, however, necessary to guard against all contingencies, and I would propose that in cases when the Committee passed resolution contravening the laws of sanitation or militating against the proper repair of roads, drains, &c., or detrimental to the interests of education, a reference similar in its nature to that made by a Judge to the High Court against the verdict of a jury should be allowed to be made by the Chairman to the Central Board of Control, or whatever body is to be appointed generally to supervise the proceedings of municipalities and local boards; and I would allow the Chairman the right of suspending his action upon the vote of the Committee until such reference had been made and a ruling thereon had been obtained. In cases of presistent *neglect* on the part of the Committee of its duties regarding sanitation, &c., I would allow a similar report to be made on the part of the Chairman, and I would empower the Central Board to authorize him to spend a certain amount of money requisite for the due performance of these duties without any reference to the Committee whatever.

In individual cases of omission, I would propose that every member of the Committee who, without leave from the Committee, absented himself from four consecutive meetings, or from 8 meetings out of the 12 held in the year, should be deemed to have ceased to be a Commissioner by this fact, and that a new election should be held to supply his place. Similarly, every member who refused to act on or neglected the duties devolving upon him as a member of two consecutive special sub-committees, should *ipso facto* cease to be a member of the committee. This last clause is one upon which I would insist, as the duties of sub-committees are those which will show whether the Commissioners really care for their work, or have sought election merely for the honour of the position and as an opportunity for putting themselves forward. Men who are willing to serve on sub-committees are the sort of men we want, for all these sub-committees presuppose a certain amount of unostentatious work.

These are briefly my views on the question of local self-government as applied to the city of Dacca. In formulating them, I have endeavoured to bear in mind that the object of Goverment is not to thrust power upon a body of men who are quite unprepared for it, but to educate the most *capable* amongst the inhabitants of the city into the habit of self-government. I have tried by the adoption of a fairly high franchise to ensure that those elected shall be capable men. and that the electors should be men of fair intelligence, and who have shewn, by attention to their own affairs, that they are capable of exercising a business-like understanding.

I consider that by this we shall get the best set of candidates, men who under proper guidance can be gradually educated to the proper use of the privileges conferred upon them.

A. C. TUTE,
Offg. Joint-Magistrate.

No. 23MG, dated Alipore, the 16th October 1882.

From—J. MONRO, Esq., Officiating Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Medical and Municipal Dept.

WITH reference to your circular No. 5T—M of 5th July last, on the question of local self-government, I have the honour to submit the report therein called for.

2. On the general principle of local self-government no remarks are needed. That principle has already been affirmed by the Government of India. It is the desire of Government that the elective system should be introduced, and that non-officials should be chairman of local boards wherever practicable, and I am now called on to report how far the wishes of the Government of India can be carried into effect in the various districts of the Presidency Division. The question really comes to be—Can the people of the Presidency Division be trusted to carry out the principle of local government themselves without the guidance of local officials; if so, in what places in the division is the development of this principle to be so entrusted to the people themselves?

3. Leaving the application of the principle to municipalities to be discussed further on, I proceed to consider the question as affecting the districts of the division generally.

4. I do not consider that, whether the elective system be introduced or not, the local boards can carry out any system of self-government without guidance in the shape of an official chairman. I am of opinion that the people of the Presidency Division are not sufficiently advanced to be allowed the system of self-government without such guidance. I base my opinion on the following grounds.

5. It is an undoubted fact, as shown in the history and progress of all nations, that, except in the case of slaves or serfs, freedom is not a matter of gift on the part of a ruling power; the attainment of political freedom is the result, not of generosity from without, but of discipline and effort from within, a nation, otherwise the gift of political freedom to a people unprepared for it is but as a present of edged tools to children—a thing to be played with to the ultimate injury of the recipients of the boon.

6. The introduction of democracy, or a democratic feeling into the management of local affairs, implies, first, the existence of a *Demos*; secondly, indications on the part of the *Demos* of fitness to rule.

7. Has there therefore been, historically considered, or is there now, a *Demos* in the Presidency Division, and what indications of the *Demos* being prepared for rule have been manifested in the various districts of the division?

8. Democracy starts with the fullest recognition of the fact that all men are free and equal. It is well known that the religious tenets of the Hindoos contain a distinct enunciation of the opposite principle. Nothing can be clearer from the laws of Manu than that all Hindoos are not only not free, and not equal, but can never become so.

"Whatever exists in the universe is all in effect the wealth of the Brahman since the Brahman is entitled to it all by his primogeniture and eminence of birth.

One principal duty the supreme ruler assigned to a Sudra, viz. to serve the beforementioned classes (Brahmans, Kshatriyas and Vaisyas) without depreciating their worth."

9. This is the constitution of Manu, and the doctrine of religious, social and political inequality pervades the whole of his laws. The duties and privileges of Brahmans, Kshatriyas and Vaisyas are given in detail; the whole duty of the Sudras, the vast majority of the population, is summed up in two slokes, and made to consist in servile attendance on, and subjection to, the other castes.

10. The government of Manu, as laid down in the books on the duties of the Brahmanical and Kshatriya class, is a military, subject to a priestly, despotism of the most stringent character, and in every detail, with reference to every relation of life, the excellence and divinity of the Brahmans are most strictly insisted on.

11. For democracy or democratic tendencies there is no place found in such a polity. Manu knew nothing of the *Demos* and its rights; and any elevation of the *Demos*, and assertion of democratic principle, is directly opposed to his teaching and that of all commentators on his books. The idea of democracy is absolutely and utterly opposed to the existence and exercise of caste as laid down in the religious books of the Hindoos. No Hindoo of the times of Manu could by any possibility have started or believed in the doctrine of social or political equality; and any heterodox assertor of such irreligious opinions would assuredly have been consigned to the lowest hell in any transmigration.

12. The doctrines of Manu, as regards caste, are to this day the religious tenets of the vast majority of the Hindoo people. There have been attempts made to resist the tyranny of caste, and to a small extent these have succeeded. The great Buddhistic revolt against caste has for many centuries been suppressed by Brahmanical influence, and the fact remains that, amongst the vast majority of Hindoos, the tenets of Manu, are still the basis of all the relations of life, and the doctrine of religious and social and political inequality which he preached is still acquiesced in by all classes. Education may have in many instances undermined belief in the Hindoo *religion*, but it has not destroyed the system of Hindoo *caste*, and the educated Brahman is still as arrogant with reference to his own inherent excellence, and as contemptuous towards those of low caste, as were his ancestors in the days of old.

13. Education has not yet penetrated to the level of the lower classes: when it does so extend, the results with reference to caste may be very startling, but at present education is confined to the higher castes, and amongst such educated classes the power of caste is still enormous. The touch of the Chandal is still as abhorrent to the Brahman as in

former days, and an educated barber is looked on with derision and dislike. *Chota lokke briddhi hoile, bapke bole shala* is a proverb which still most faithfully represents the feeling of educated men of high caste with reference to the elevation—political, educational, or otherwise—of the lower classes. I have known an instance in this division, where a jury acquitted a Brahman because it was the day of the full moon, and convicted his servants, low caste men, against whom there was precisely the same evidence as against the Brahman. I have known another instance in which it was considered a disgrace for a Brahman to visit one of the most influential low caste landholders in the division. I can point to a third case in which the usefulness and influence of a public officer was seriously injured on account of his being a low caste Hindoo. I have known a fourth case in which, at the Imperial Assemblage of 1877, in one of these districts, a low caste man, selected for the honour of a sunnud, was not allowed to sit amongst the *bhodro lok* on account of his caste. I am aware of another case in which the contractor for a school building was objected to on account of his low caste But I need not multiply instances, and content myself with a repetition of the remark that in spite of all attacks upon it, the power of caste amongst the people of the Presidency Division is still enormous, not to say overwhelming.

14. It seems to me therefore that the existence of democratic feeling and democratic development are impossible amongst people whose polity is based on the doctrine of political inequality. In the present day there is no *Demos* in Bengal; there is only an educated aristocracy of birth, most jealous of their position, and most unsympathetic as regards the interests of the lower classes. To vest such men with power of local self-government is not to develope or advance democracy, but to create an oligarchy, the most tyrannous of all forms of government. Until the people of the Presidency Division emancipate themselves from the despotism of caste, any real political progress is impossible, and any attempt at representative government without control impracticable. A local board of educated high caste men would in no respect be representative of the *Demos* of the division; on the contrary, as far as any such board could be called representative at all, it would represent interests inconsistent with, and, owing to the religious requirements of caste, hostile to, those of the mass of the population.

15. In connection with this aspect of the question, I would call attention to the fact that, while educated men are deceiving themselves into the belief that they are possessed with democratic feelings in demanding self-government, they are deliberately, and as a matter of practice, denying to millions of the inhabitants of India rights which, under the old despotic system of Manu, they possessed, and of which they have only been deprived in times comparatively recent. I allude to the women of India, who are condemned to life-long imprisonment by both Hindoos and Mussulmans, who have been deprived of the right which they undoubtedly possessed in former times of appearing in public, and the recognition of whose claims to individual and social freedom would undoubtedly be resisted by all educated men, including those who clamour for self-government and talk of constitutional principles as a gross infraction of the right of every Hindoo to practically imprison the females of his family behind the *purdah*. How can it be said that democratic feeling can exist, and self-government without guidance be possible, amongst a people who deny to their females the exercise of the most elementary right of any class professing to be free, viz. the right of personal liberty.

16. From the above then it follows :—(*a*) That a despotic form of government is that which has been laid down by authority believed to be divine as most suitable for Hindoos, including those in Lower Bengal and this division; (*b*) that any approach to democracy is only possible in direct opposition to the principles of the system believed to be divinely inspired; (*c*) that so long as caste, involving as it does the maintenance of religious, social, and political inequality amongst Hindoos, is not done away with, the elements of democratic feeling must necessarily be wanting amongst the Hindoos; (*d*) that there has never been a *Demos* in India; (*e*) that any government by the *Demos* which is now supposed to exist must, in consequence of caste, and in spite of educational advancement, be a government by, and in the interests of, the few, not in any way representative of, or in harmony with, the interests of the masses.

17. I proceed now to enquire in what respects the people of the Presidency Division, whose government from time immemorial has been despotic, have shown themselves fit to emerge from such a form of administration of their affairs, and to be allowed to manage them for themselves and by themselves without guidance.

18. The character of the Bengalees for ages has been that of a dependent and parasitic people. While in many provinces of India other tribes have maintained their independence to a greater or less degree, ruling themselves by Chiefs sprung from amongst themselves, the Bengalees have been distinguished as being always in a state of subjection and subjugation. There are no Chiefs amongst them, and the landed aristocracy is a creation of less than a century.

19. The idea of dependence pervades almost all the relations of life amongst people in these provinces, including this division. In their families, the master of the house is not the master, he is the servant of the *Ma Thakurani*; in the management of their estates they are tools in the hands of their amlah, in their very quarrels they have to depend upon the services of hired latials or mercenaries of a more warlike or turbulent spirit than they.

20. Amongst them there has been no lack of quarrels and oppression. Whenever a landlord dies leaving more than one heir, division, faction fighting, litigation, is the invaria-

ble course of events amongst the members of the family; the fight is carried on for generations, the people are oppressed, the combatants in the end are ruined, and their places taken by their dependents upon whom they have throughout relied, and whose elevation involves destruction of their masters.

21. Have, then, the educated class shown themselves in any way fit to walk alone by manifesting practical signs of self-dependence or independence? Have the educated class of landlords shown themselves better zemindars than their forefathers—less quarrelsome, more law-abiding, more inclined to support the law? Have they shown any real desire to help themselves and help their poorer neighbours? Have they ceased to oppress their ryots by vexatious enhancements of rent and illegal exaction of cesses? Have they shown any increased and practical desire to extend education to the masses, and to raise those masses to some higher position socially, intellectually, or politically than what they now occupy? Have they shown any real desire for sanitation, and made any strenuous efforts to carry it out? Have they done anything practically to manifest their belief in the possibility and reality of self-government, and in the responsibilities of those who undertake it?

22. Looking at the matter from the stand-point of practical experience, I am compelled to answer most, if not all, of these queries in the negative with reference to the landholders of the Presidency Division.

23. With the state of the people in three of the districts of the division I have minute personal acquaintance, and from what I know, I can without fear of contradiction assert that the educated zemindars of the division have made little or no practical progress in the way of administering their estates for the benefit or advancement of the interests of their tenants, or in the way of becoming themselves, or teaching those connected with them to become, better or more useful public citizens. Family quarrels are just as rife amongst educated zemindars as they were amongst their forefathers. The imposition and collection of illegal cesses is just as common in the estates of zemindars who speak English as in the zemindaris of representatives of the old school; vexatious enhancements of rent are resorted to by literate landholders as freely as by those who do not profess to be highly educated; the *régime* of the English-speaking landlord is as despotic towards the ryot as was the system of administration fifty years ago, and his exactions are just as keenly felt by the ryot, although these are now made to a large extent through the agency of the law courts instead of bands of burkundazes or latials. In this respect, viz. the diminution of forcible and violent proceedings, there has been of late years a great change, owing to the improvement in criminal administration; but this change is visible with reference to the proceedings both of educated and non-educated zemindars, and is not peculiar to one class more than the other

24. Of sanitation in the interests of ryots there is now less than there used to be. In former times nothing was more common than for zemindars to dig tanks in their estates which served to perpetuate their memory and do good to the people. This form of displaying interest in the welfare of their people has disappeared. Old tanks have remained unrepaired No new ones have taken their places, and villages have year by year become more insanitary as to their condition, owing to the increase of population and the absence of all efforts on the part either of zemindars or ryots to do anything in the way of removing the very obvious causes of unhealthiness and disease.

25. In paragraph 50 of the report of the Nuddea Fever Commission, I find these remarks recorded:—

"The old class of men who used to dig tanks, sometimes for the benefit of the public, but chiefly for the good of their own souls, are gone. They have been succeeded by a generation who lack their faith, but are ignorant of the sanitary code of modern civilization. The consequence is that most of the old tanks are in ruins and overgrown with noxious vegetation, and the number of new ones is very small."

26. Schools have been established in many places, chiefly for the education of children of the *bhadro lok*, and many landholders have not hesitated to tax the people for the means of education thus apparently bestowed upon them as a gift. Dispensaries too have been brought into existence by landholders, but dharmsalas have disappeared along with the declining influence of the *dhurma* which gave them birth. The memorials of the old piety, and pity for the poor pilgrim, of the Hindoos of former times still exist along the road to Jagernath in ruins, and the spirit which dictated the erection of these charitable institutions has not descended to the heirs of the founders. At the bottom of the establishment of such institutions as dispensaries of modern times lies no desire for the benefit of the public or the poor, but a wish to obtain the favourable notice of Government, to secure the services of an experienced native doctor as a family attendant, or the hope of the bestowal of a title.

27. In short of public spirit properly so called there has in my experience been no development amongst the zemindars of the division; they remain as despotic, as disregardful of the interests of their tenants, and as selfish as were their forefathers.

28. Amongst the masses there has been, so far as I am aware, no development of political life, of democratic feeling, of independent tendencies. So long as they are left alone to reap their crops and till their lands, they are quite indifferent as to the mode of Government under which the country is ruled, and they certainly evince no desire to be associated with the governing body in either a democratic or a despotic form.

29. Between the landed aristocracy and the masses comes the large and influential educated class of pleaders, educationists, and professional men generally. For them education has done much, and it is amongst them that we must look for any signs of fitness for that political education which the bestowal of self-governing powers is to confer. I fully recognize the importance of this class; I thoroughly acknowledge the advances which they have made within the last fifty years; I confidently anticipate that they will advance further and further, but I cannot admit that they have as yet sufficiently advanced to be entrusted with self-governing powers without guidance and direction, and I believe that the bestowal upon them of such powers, without further training and guidance, would in the end prove to be neither a benefit to them nor to the people at large.

30. Amongst this large and influential class I find much agitation for benefits to be conferred on themselves, but little sympathy with the great body of the people; much discontent with circumstances over which they have no control, but little discontent with their own failings and shortcomings; much clamour for their supposed rights, but little performance of their admitted duties; much public speaking, but very little public spirit; much grasping at power and position, but little inclination to accept the responsibilities which the attainment of such power and position involves; much talk of constitutional principles, but no development of "constitutional morality."

31. That these defects of character will be remedied after long years of trial and of effort, I well believe; but these shortcomings are at present most conspicuous, and I cannot but hesitate to say that the educated classes of this division, under such circumstances, are fit to be entrusted with self-governing powers without guidance or direction. It seems to me that we are bound to be just towards the great mass of the people before being generous to a particular class, and the bestowal of such self-governing powers without guidance upon the educated could not be effected without a sacrifice of the interests of the masses whom the educated classes do not represent, of whose advancement they are most intolerant, and to whose real welfare they are indifferent

32. I fully admit that the bestowal of political privileges under certain circumstances tends to beget and create the feeling of political responsibilities; I am quite willing that a beginning of political education should be made, but all that I contend for is that it should be a beginning made under proper guidance and direction. The bestowal of self-governing powers without guidance and direction on the people of this division, who are devoid of real democratic feeling, will no more make them fit to govern themselves than will the wholesale gift of arms make efficient soldiers of a population who are destitute of warlike instincts.

33. Looking therefore at the subject from a general point of view, I feel compelled to report that the people of this division are not yet sufficiently advanced to be entrusted with powers of self-government without guidance and direction.

34. I proceed now to consider the question with reference to practical details. *Firstly.*—I have to consider the feelings and wishes of the people themselves on the question. I have taken considerable pains to ascertain this, and I have lost no opportunity of trying to find out what is the real opinion of all classes on the subject.

35. I am not inclined to attribute much weight to the fact of many public meetings having been held on the subject. There has been a unanimity of opinion and a sameness of proceedings on the part of those who have attended such meetings which diminish their value as exponents of real public feeling, and point to such gatherings as not having an independent origin, but as springing from some common source.

36. With reference to more than one district of this division, I know that there has been such a common source of these gatherings, and that emissaries have been despatched far and wide to stimulate the enthusiasm of the people, and make it appear that all classes are longing with impatience to receive the boon which has been promised to them. I am also aware that inducements and delusive promises have been held out as to the result of the introduction of self-government measures, and, in consequence, a ductile enthusiasm has been in many parts of the country revoked.

37. But from enquiries which I have made, I am convinced that such enthusiasm is not real, and that the public meetings which have been convened have been the result of instructions from a *census* of agitators and the operations of their emissaries, or of that imitative tendency on the part of natives to follow a lead, without being specially aware of the objects of the leaders, or the subject of the movement in which they join.

38. The class of local pleaders, educationists, newspaper editors and professional men generally are in favour of the principle; but the great bulk of those who have local and landed interests, and many educated men whom I have consulted, are decidedly opposed to the introduction of the scheme, on the ground that the people are not yet sufficiently advanced to receive it.

39. The great mass of the people are incapable of understanding either the meaning or the application of the principle of the scheme.

40. The opinion of officials, both European and Native, is decidedly against the adoption of the scheme in its entirety; and I cannot help remarking here on the intolerance which has characterized the proceedings of the supporters of the measure with reference to the free expression of their opinions by officials. From the commencement of the agitation it has been assumed in an ungenerous manner that officials would oppose the scheme from the meanest motives, and any native official who has ventured to moderate the zeal of the adherents of the movement has at once been stigmatized as a sycophant and traitor to the national cause.

41. It has been assumed and asserted that officials would oppose the movement solely and entirely from interested motives, from a fear of loss of power and local influence.

42. Without touching here upon this ungenerous aspersion upon the characters of hundreds of native officials who, amid many difficulties and unsupported by the classes who ought to give them valuable assistance, have carried on the administration of their sub-divisions in a manner which entitles them to consideration and not to contempt, passing over this ungenerous aspersion on the characters of these gentlemen, I wish to point out that the assumption of loss of power on the part of the district and sub-divisional officers by the introduction of the scheme has absolutely no foundation. The *power* of each district and sub-divisional officer lies in the fact that he is the head of the criminal administration of the district or sub-division, and that power is left absolutely untouched by the adoption of the self-government scheme either in whole or in part. Whether the usefulness of the local officers may not be impaired, when their interest in local affairs is limited or restricted, is another question; but their *power*, which I have no hesitation in saying is to the native mind represented by the *foujdar*, remains practically untouched. I do not for a moment mean to say that a Magistrate in a district or sub-division ought to be nothing more than a policeman; far from it: but the root of every Magistrate's power in any district or sub-division is the fact that he is *foujdar*, and so long as he remains *foujdar*, so long will his power and the belief of the native inhabitants in his power remain untouched and unshaken. This is a narrow basis of influence I fully admit; I can only say that in the present circumstances of the country it is a fact.

43. As to the reasons which have been given by those non-officials whom I have consulted for not wishing to have local interests made over to undirected local boards, they are various, and I shall have occasion to deal with some of them further on; but the chief grounds put forward by the objectors are, first of all, that competent members of such local boards could not be obtained; and, secondly, that they could not trust to such boards for the conscientious and impartial discharge of those duties which are now performed by local and disinterested officials.

44. On the whole, the result of my enquiries has been to lead me to the conclusion that the introduction of the measure is not wished for by the bulk of the people who have local interests to be cared for, and that those who desire it are a comparatively small body of educated people who have no local interests in the districts where they reside, and who have advocated the introduction of the system without any real regard for, or understanding of, the welfare of the people at large, whom they do not represent, and whose interests are not indentical with theirs.

Secondly.—The introduction of the elective principle in the constitution of local boards in the district of this division is, in my opinion, inexpedient with reference to the habits of the people.

45. It is proposed that there should be a local board for each sub-division or for each thana. Taking the thana as the smaller unit, it must be borne in mind that the habits of the people of this country are essentially local. The great mass of the people know nothing of the various localities in a thana beyond their own village, and those villages on the road to their hat which they frequent, and even landholders and educated men know little or nothing of the country beyond the immediate vicinity of their own villages. Bengalees are naturally lazy and apathetic. It is not in accordance with their nature or customs to travel and visit localities other than those in which they reside, and as a rule landholders and educated men are surprisingly ignorant of the topography of the districts, or sub-divisions, or thanas in which they live.

46. Electors therefore will know absolutely nothing of those whom they are called on to elect, and those to be elected will know nothing of the wants or requirements of the electors. Electors will vote entirely in the dark, and election will be simply a sham. Any such elective system will simply develope in every village the spirit of faction-fighting and disunion which is now only far too prevalent, and the consequences of which are even now disastrous. The electors will not vote for the man or men who will represent their public interest: they will vote under pressure of their local zemindar, or under delusive promises of reduction of their rents and cesses, and a door will be opened wide for the exercise of corruption in every form It is only to-day that I read of the elections in the capital of India that the elective system is new to the people of Calcutta; that savages do not conduct civilized warfare; and that, with respect to elections, the electors are savages to this extent, that they battle upon rules new to them, and have not had an opportunity of judging as to what is right and fair in the matter. If this can be said without contradiction of the working of the elective principle in Calcutta, it can easily be understood how unsuitable such a principle will be for even comparatively advanced districts or sub-divisions in the mofussil.

47. In connection with this part of the subject I have to notice one almost certain result of the adoption of the elective principle in mofussil districts, and that is the exclusion from local boards, and the neglect of the interests, of Mahomedans. To anyone who knows the country, and has watched the progress of the present movement, it is very evident that the agitators in this matter are Hindoos, and that local boards constituted as proposed will be comprised almost entirely of Hindoos, to the exclusion of Mahomedans. Whether the Mahomedans may or may not have themselves to blame for this state of things is another question; but the fact remains as I have stated above, and this fact goes very far to show how non-representative the character and constitution of local boards

on the elective principle will be. The exclusion from administrative posts of Mahomedans in favour of Hindoos is not unfelt by the former, and public expression has only lately been given to the feeling by an able Mahomedan gentleman in the pages of the *Nineteenth Century*. "The Mahomedans," he remarks, "have simply been 'crowded off,' to use an expressive Americanism, from the public service and the independent professions. The entire government of the country, so far as it affects the natives of India, is virtually in the hands of the Hindoos. Their influence is all powerful in every department of State, and their influence is almost invariably exercised to exclude the Mahomedans, whom they regard as aliens, from their proper and legitimate share in official preferment."

48. I entirely agree with the writer of these remarks as regards the facts which he records. They are undisputed and cannot be gainsaid Is it then just, or wise, or prudent to introduce a system of local government which will undoubtedly have the effect of more and more "crowding of" Mahomedans in favour of Hindoos from any share in the exercise of political privileges to be conferred, and which will practically leave more or less unrepresented the local interests of above fifty millions of the population of India? Such a policy would be as unjust as it would be unwise. "If then," writes the Editor of the *Amrita Bazar Patrika*, "it is essential to the stability of British rule in India that the Indian people should be admitted into a share in the administration of the country, it is no less necessary that the people should be represented properly. The admission of this class or that class of one particular section of the community to power in matters relating to administration will not do. Such a course will not meet the requirements of the case It will be a half measure. The Government must be the Government of all parties, of all sections of the people." With these remarks I entirely agree, and I argue against the introduction of self-government through local boards composed of elected members, because boards so constituted will only represent a small section of the community; will not represent all sections and all classes; and, notably, will practically exclude from representation the interests of fifty millions of the population of India.

Thirdly.—Present experience shows us how difficult it is to procure the attendance of members of district or branch road committees or school committees, or dispensary committees, even when such meetings are held once a quarter. This is a patent fact and admits of no dispute. It is said that the want of interest shown by members of such committees is due to the fact of the excess of interest displayed by local officials in such matters, and that, as all the executive work is done by such officers, the consultative functions of the members of the boards are but sparingly exercised.

49. I can quite understand that to a certain extent this may be the case. Want of interest in public affairs, and reliance on the executive for the performance of executive duties, are characteristic of the people. But another very strong reason for the apathy shown in matters of local administration lies in the fact that every occasion of attendance involves a certain expenditure of time, trouble, and money which the members of such boards are unwilling and, it may be, unable to incur.

50. Is it then likely, when members of local boards have to meet very much oftener than at present, and when they have to attend at least weekly, if not oftener, for the despatch of business, that men will be found who are able and willing to incur largely increased expenditure from public spirit? My experience of the people of this division leads me to believe that such men will not be found, and indeed this is not to be wondered at. Taking the thana as the unit, and supposing that two delegates from each thana become members of the local board, the calls upon the time and purses of such members will be by no means inconsiderable, and I cannot therefore believe that men will be found who will be able or willing to make the necessary sacrifice of time and money from motives of public spirit.

Fourthly.—Supposing, for the sake of argument, that the local board for each subdivision has been constituted, so far as regards members, how is it likely to discharge the duties entrusted to it?

51. I have had many conversations with educated men who are promoters and antagonists of the self-government scheme, and I have been very much struck with the ignorance which prevails as to the duties and responsibilities which will devolve upon members of local boards. Nearly all of those whom I have consulted, and who have professed their willingness to serve as members, fail to realize that, when the control of local finances is made over to local boards, the members of such boards will have to perform real work, the work which is now performed by the executive officers of Government in the several departments to be made over to local boards. It is supposed that the assumption and performance of these duties mean nothing more than attending meetings at not very frequent intervals, and the fact that all the details of work which is at present done executively will now have to be arranged for by the members of local boards themselves, seems never to have made itself clear to the minds of those who are ardent advocates of the introduction of the new system. I am quite convinced, from what I have seen and heard, that when this fact is realized the enthusiasm of many candidates will wax cold, and their eagerness after office, which will involve serious responsibility and real exertion, beyond attending occasional meetings, will very sensibly diminish.

52. Further, I cannot blind myself to the fact that local boards left to themselves will almost certainly become the means of developing faction feeling to an alarming extent. In every village this exists already; in almost every municipality this feeling is developed; and in every local board it will most certainly prevail and act most injuriously on the various

interests committed to the charge of members. In each board there will be a *dal*, which will be opposed in every act by another *dal*. I fully appreciate the advantages which arise from the criticism of a party in opposition; and were the opposition at local boards likely to be healthy, I would be the last to say a word against it, or do anything to discourage it. But such opposition is not likely to be healthy. No opposition of such factions as will certainly appear is ever confined to *public* matters; it invariably extends to *private* affairs, simply because there is no development of public spirit, and because all differences on public matters invariably begin or end with personal disagreements between the parties.

53. Such disagreements will never beget healthy opposition. On the contrary, bickerings and disputes will constantly arise, which will have a most injurious and disastrous effect on the conduct of public business.

54 I am also not prepared to make over to local boards without check or control, such as is afforded by the presence of an official chairman, the distribution and administration of the local funds which would form the subject of their management. I do not in any way wish to be ungenerous; but supposing the local boards to be representative institutions, I cannot say that the experience which we have had of the manner in which local funds have hitherto been administered by local bodies is such as to inspire confidence as to the way in which they will be dealt with by local boards who represent the people.

55. It is not unfrequently the custom to point to the village punchayets as the germ of municipal and local self-government. This view I regard as mistaken, for in ancient times the punchayet was nothing more than a social institution, devised by the Brahmans for maintaining uniformity in questions of caste in each village. But when the punchayet has gone beyond the scope of its original institution, and meddled with questions of local finance, what has been the result? No other than what was to have been expected—the sacrifice of the interests of the poor and low caste men to those of the higher castes—assessments which we call iniquitous and unfair, but which are the natural exposition of the Hindu feeling that the lower castes were made to pay for the Brahmans, and to consider that they were exercising a privilege in doing so.

56. This feeling pervades all classes still. The expression of it is found in the assessments made by punchayets, and it will, in my opinion, most certainly be displayed amongst the members of local boards, when, left to themselves, they are allowed to have the management and distribution of local funds. Class interests and caste interests will undoubtedly be subserved, and the welfare of the masses will not be regarded. The poor Brahman will be exempted as a matter of right from bearing his share of the burden of taxation. The poor Sudra will be taxed as unfeelingly as he is now.

57. But it may be said that the necessary control of local boards may be exercised by district and sub-divisional officers from without, and not from within, the board. This can be done; but such control will be the control of unfriendly friction, not of friendly guidance and direction. That this will be the case I am only too sure of from the conduct of those who advocate the introduction of the measure, and who, from the very commencement, have manifested a most vehement, not to say virulent, desire to get rid of all connection with the sub-divisional officer with reference to local boards. The spirit which has been manifested in this direction destroys, in my opinion, any hope that the control to be exercised by the sub-divisional officer will be met in any other way than by constant and injurious friction between him and the local boards. These boards will not regard him in any other light than a hostile mentor, always on the watch to catch them tripping, and no amount of tact or forbearance on the part of the sub-divisional officer will in my opinion, save in very exceptional instances, suffice to prevent constant friction and frequent collisions between him and the board. Where the members of the board, as I have pointed out, probably deal with local matters in the interests of certain classes and sections of the community, the public spirit of the local officer will undoubtedly check them, and the result will as undoubtedly be friction and collision, to the detriment of the public administration, through no fault on the part of local officers, but from impatience of legitimate control on the part of members of the board.

58. With the sub-divisional officer in his, as I venture to think, proper position as chairman of any local board such friction would probably not occur. He would check faction feeling, direct and guide the boards to look at matters from a public point of view, and train them gradually to deal fairly and impartially with the interests of all classes.

59. I have said very little regarding the question of a non-official chairman, for, from the remarks which I have made above, it may be gathered that if there be great difficulty in getting competent and impartial members of the board, there will be much greater difficulty in procuring a non-official chairman who has any acquaintance with the tract made over to the board, who can spare time to perform the important duties of the office, who will command the confidence of the people, who will be free from party feeling, who will deal fairly and impartially with the interests of all classes. It does not therefore appear to me that the powers of local self-government can be conferred upon the people of the districts of the Presidency Division, except under responsible guidance and direction. They are not yet fit to exercise such powers as a means of political education without official tutors and instructors; and to confer on them, uncontrolled and unguided, such powers would, in my opinion, bestow on them no real benefit in the way of a sound political education; would lead to the sacrifice of the local interests of the great mass of the people; and would seriously impair the efficiency of the administration.

60. Summing up, I am of opinion—

(a) That the history of the nation affords no ground for believing that, so long as caste inequality exists, self-government on a democratic basis can be introduced amongst the people;

(b) That admitting the progress made by education, the people of the Presidency Division, whether educated or uneducated, are not yet sufficiently advanced to be entrusted with powers of local self-government without direction and guidance;

(c) That the great mass of the people do not wish for the introduction of any such system, and that the desire for self-government has been manifested by a small class of the community, who have very little stake in the country;

(d) That the introduction of the elective principle in the constitution of local boards is unsuited to the people and practically unworkable;

(e) That any local board at present constituted will in no way be a representative institution, will be nothing but an oligarchy, and will specially deny representation of Mahomedan interests;

(f) That it will be impossible to constitute a board of really working members, who will receive no remuneration;

(g) That local boards left to themselves will simply be the means of developing faction feeling to the detriment of public interests;

(h) That in the hands of such boards the impartial administration of local funds is not likely to be effected;

(i) That no real or healthy control can be exercised by the sub-divisional or district officer from without the board, and that such control will simply degenerate into constant friction, and collisions between local officers and local boards;

(j) That the presence of the district or sub-divisional officer on the board as chairman is necessary

61. While therefore I think that the people of the districts of this division are not sufficiently advanced to be entrusted, uncontrolled and unguided, with the powers of local self-government, a beginning of political education may safely and advantageously be made by handing over to local boards constituted otherwise than on the elective principle, the management of local affairs.

62. Such local boards I would recommend being appointed at the head-quarters of each district (for the Sudder sub-division), and of each sub-division. The members of such boards should be nominated by local officers, two members being taken from each thana, the chairman of each board being the sub-divisional officer, and power being given to the members to elect their own vice-chairman, who should be a non-official.

63. The travelling expenses of all members, except those at head-quarters, should be paid, otherwise I am convinced that members from distant places will not attend, and indeed cannot be expected to attend meetings of the board.

64. From each of such local boards delegates selected by the local boards should be sent to constitute a district board presided over by the District Magistrate, and consisting, in addition to such local delegates, of a certain number of official and non-official members, care being taken that the non-official element should largely preponderate, and that officials should only be included as members for the purpose of guiding and directing the operations of the board generally. The vice-chairman of the district board should be elected by the members, and should be a non-official.

65. The district board should determine and decide all questions of local administration affecting the district as distinguished from the sub-divisions; should receive and allot to local boards the funds made available by Government for local administration, after reserving a certain amount for district purposes; and should, subject to Government sanction, have the power of imposing local rates, and providing ways and means for local administration.

66. All delegates from local boards should receive their travelling and legitimate expenses, and the proceedings of all district and local boards should be submitted to the Divisional Commissioner through the District Magistrate.

67. I am not prepared to go further than is implied in the above remarks in the way of conferring powers of local self-government upon local bodies in the districts of the Presidency Division at present. Local officers I would retain as at present necessary to instruct members in matters of local administration, and to ensure efficient and harmonious working of local boards in the interests of the public; but as soon as the benefits of local administration by representatives of the people are appreciated, and the discharge of the functions of political instructors is no longer necessary, local officers may be dispensed with, and the local boards left to manage their own affairs. When such period of fitness may arrive depends upon the people themselves; but at present they stand in need of instruction and control, and the presence of local officers at boards in the capacity of chairmen, with power of voting, is, in my opinion, indispensable. Much may be left, and ought to be left, to be done by the elected vice-chairmen of local boards, but the whole of the management of local affairs cannot, in my opinion, at present be safely or advantageously made over to such local boards in this division without an official chairman.

68. I have now to consider what sources of revenue should be made available to district and sub-divisional boards for the purposes of local administration. I would begin by giving

the boards limited, although sufficient, funds. As they acquire experience, their financial control and income may be increased. On this principle I would make over to them receipts from pounds, ferries, road cess, educational grants, license tax collections, and any medical receipts. I would not at first make over any part of the Public Works Cess; that may be transferred afterwards. The license tax collections I would make over in lump sums, to be allotted by the district board, who would be able to decide on the claims of sub-divisional boards and municipalities to their shares of the tax. I think it will be advisable to adopt the principle of allotment of specific sums, rather than of making over to boards the power of realizing assessments made under the License Tax Act.

69. With reference to the control to be exercised over local boards, I have already indicated that, in my opinion, there should be a district board to which delegates from local boards should be sent, and with which would rest the responsibility of providing ways and means for local administration. The proceedings of such district boards would be controlled by Government through its local officers and Commissioner. I am not in favour of the proposal to establish a central board of control. Such a board would take little or no interest in the local administration of districts; would be very far removed from the inhabitants of out-of-the-way districts who might wish to make representations to it; could only work through local officers, who, in many respects, would not be subordinate to the central board; would be expensive, and would not, by the efficiency of its supervision, satisfactorily replace the local officer, who, in my opinion, cannot, for purposes of control, be ignored with safety or advantage to the administration.

70. I proceed now to give the opinions of local officers regarding the establishment of local boards, and the application of the elective principle *in places other than municipalities.* I forward the reports with their enclosures in original, so that it may be seen how the orders of Government regarding the ascertainment of the views of the people generally have been carried out.

71. 24-*Pergunnahs.*—The Magistrate is generally of opinion that in the rural parts of the district, as distinguished from those to which the Municipal Act has been extended, the people are not yet sufficiently advanced to have the elective system introduced into the constitution of local boards. In all of the sub-divisions, except Baraset, Mr. Stevens proposes having a board of nominated members, to whom, in all places except Baripore, he would give the privilege of electing their own chairman. His proposals are as follow:—

72. *Sudder Sub-division.*—A local board of nominated members, two members from each thana, chairman and vice-chairman, to be chosen by members.

Diamond Harbour.—A nominee board on the same principle as for the Sudder.

Busseerhat.—As Diamond Harbour.

Baripore.—A small nominee board with the sub-divisional officer as chairman.

Barrackpore.—A very small nominee board, electing their own chairman.

Dum-Dum.—Owing to the smallness of the population, a separate local board impossible. The suggestion is made that it might be possible to combine Barrackpore with Dum-Dum, and have one small local board for both places.

73. *Baraset.*—In this sub-division the Magistrate proposes to introduce the elective system as an experiment, and I quote his remarks *in extenso*:—

"With regard to local boards, the sub-divisional officer thinks that two ought to be established in the sub-division (one at Halishahar and another at Baraset) if the limits of the municipalities are circumscribed as he wishes. If they remain as they are, he would have a central board of not less than 12, or more than 20, with head-quarters either at Nebaudh or Chota Jagulea. The chairman should be elected by the members, and the qualifications for voters and members should be those proposed by Government. He would not have any members nominated. At the same time he draws so gloomy a picture of the state of the people that it might well make Government hesitate before introducing an elective local board into this sub-division. I am not in favour of the proposal to have two local boards, for I do not think that there is work enough for them, and the sub-division is sufficiently compact, and its several parts accessible. The board in this sub-division would have under their care over 45 miles of metalled and 66 miles of unmetalled roads, costing on an average annually Rs. 8,892 and Rs. 3,107 respectively to keep in repair. He would also have 69 village roads, costing Rs. 1,465 a year in repairs, five pounds, no ferry, no dispensaries.

"I have no statistics with regard to the road cess payment of Rs. 25 and upwards, but under the license tax test 96 people would be qualified for the commissionership.

"There would be 186 persons qualified as voters under the road cess qualification, and 1,468 under the license tax, including inhabitants of municipalities. The Deputy Magistrate has not supplied a list of persons likely to be qualified under the *income test*, suggested by Government for those who would not be qualified under the other two But the number of such would be very small: the great majority of such persons would be pleaders and doctors, or Government servants and pensioners. Few of the last two classes drawing qualifying incomes would be found, and there would be no pleaders out of Baraset. There may perhaps be a few doctors, but altogether I should question whether there would be a dozen persons who would qualify. For my own part, I would prefer not introducing an income qualification to Government.

"There is, however, one qualification which has occurred to me, and is perhaps worth consideration. I am disposed to recommend that the experiment may be tried of giving a vote to the collecting member of each village punchayet. This office is a somewhat irksome one and is not sought with much avidity. Possibly the bestowal of a vote would attach an

additional attraction to it, but the chief advantage would be that a connection would be established between the village organization and the local board, and it seems possible that eventually this might become more intimate. There are punchayets in the sub-division, and my suggestion would add as many voters.

"From what has been said above, it will be gathered that I propose to make a trial of the elective system in Baraset. That sub-division on the whole is more advanced, and it is certainly more homogeneous than any other in the district; and if the system is to succeed anywhere in the rural portions of the 24-Pergunnahs, it will be in Baraset. Even in this sub-division, however, the Municipal Act has been extended to the more populous and advanced portions, and I would not restrict membership of the board to persons actually resident in the mofussil parts, but would admit persons residing in the municipalities of the sub-division. The sub-division contains four thanas. For each of these I would propose three members, of whom two should be elected and one nominated. I should propose that at first the sub-divisional officer should be chairman, though the vice-chairman should be elected In order to prevent the vice-chairman being overshadowed by the chairman, I would assign him certain definite functions by law, though empowering the chairman to make over to him any part of his own duties. This system would be to a certain extent elective, and would pave the way to the more complete measure of permitting the local board to elect its own chairman.

"There is no special mode of voting which I think is called for by the local circumstances of Baraset, the only sub-division in which I propose to try the experiment of an elective board. I confess my entire inability to devise a system of election which would be free from all difficulty. If votes are given in person, they can only be given at the thanas, since there is no other machinery available which can be deemed in the least degree trustworthy. Such an arrangement would be inconvenient to most of the electors, and probably a large proportion of them would not take the trouble to vote. If the election be conducted by means of voting papers, there is no doubt that, in case of a contest, it would be impossible to prevent malpractices. Upon the whole I think the latter would be the better plan. The voting papers might be issued and collected through the chowkidars; and, as a slight protection, each vote might be attested by the signatures of two witnesses, inhabitants of the same village as the voters. It has been suggested to me that the witnesses might be members of the punchayets. This would afford a check in scrutinizing the votes.

"I am strongly of opinion that it would be better to give the local boards and municipalities fixed grants than to give them the license tax assessments and collections."

74. On the general question, Mr. Stevens first remarks on the desire of the people for self-government in the following terms:—

"Especially do I wish to repeat my conviction that there is great danger of overrating the importance and extent of the agitation for self-government. Notwithstanding all that has been written and spoken on the subject during the last few months, I am firmly of opinion that the vast majority of the people do not take the slightest interest in it, and that a considerable number, even of the more intelligent and well educated, are opposed to it, while the number of those who hold extreme views is not really large. There are, however, localities in which I believe there is a genuine and comparatively general wish for the exercise of wider political authority than is now enjoyed by non-official persons, and I admit that in such places there are indications that a system of self-government is called for, and is even likely to be more efficient than the system which it will supplant. I regard the establishment of 'people's associations' and 'rate-payers' associations,' of which there are now so many, especially in the metropolitan districts, as indications of political activity, and it would be unjust to deny that such societies have done good.

"Wherever there exists a body of men fit to work a system of self-government, I am anxious to introduce such a system; but to throw heavy responsibilities on men unable or unwilling to sustain them will only bring discredit on the liberal policy of Government."

75. The bulk of Mr. Stevens' report is taken up with discussion of the application of the principles laid down by Government with reference to municipalities—a question which will be dealt with further on.

76. The proposals referred to in paragraph show that in Mr. Stevens' opinion the extension of the elective principle beyond municipalities is for all sub-divisions of the districts, except Baraset, unadvisable. The method in which he proposes to deal with the electoral experiment in Baraset has also been detailed at length.

77. With reference to the allotment of funds to local boards, Mr. Stevens is of opinion that it would be better to give local boards fixed grants than to give them the license tax assessments and collections.

"It must never be forgotten that in Bengal violent party feeling prevails almost universally, and that the power of making assessments of license tax is certain to be seriously abused. The grant to different localities would be most unequal, in some cases greatly exceeding the local wants, while in others they would be insufficient. If shares only should be given, a different rule would have to be made for each municipality."

"A system under which Government makes grants according to the necessities of each locality at the time se ms to me to possess the advantages of elasticity and economy, while it gives the Government an opportunity of retaining greater control than it otherwise could will exercise over the more important extraordinary works which the local committee might undertake I see really no advantage in the proposition to give over the license-tax to local bodies. My objection to give them the public works cess is simply that I think Gov[illegible]n-

ment ought to keep this as a reserve fund, and to deal it out to localities where it might be most required."

78. With reference to the control to be exercised over local boards, Mr. Stevens records his opinion as follows:—

"It is said in paragraph 13 of Government circular No. 5T—M, dated the 5th July last, that there is to be no general district council. Evidently Government must have under consideration some other method by which questions affecting whole districts may be settled. It will be necessary for some authority to arrange for the distribution of the services of the engineer and other higher establishments, and to provide for the construction and maintenance of works affecting areas more extensive than the jurisdictions of the local boards. I have heard (I know not how far the information is correct) that the Government of India has declined to accept the proposal to establish a central board in Calcutta. If this be so, it will be necessary to substitute some other authority. To make over the control to the local officers would apparently be inconsistent with the views of Government. Under these circumstances I see no solution of the difficulty before us. My own individual opinion is strongly in favour of the original scheme, under which the general management should be in the hands of a district board, while the arrangement of purely local affairs should be made over to purely local boards.

"It is extremely difficult to make any definite suggestions with regard to the control to be reserved to the executive authorities until we know exactly by whom, and over whom, this control is to be exercised. If we knew these particulars, there would be no great difficulty in suggesting a scheme for trial. Some of the principles which I would recommend for adoption are the following:—

"(1) Nothing should be done, without sanction, which is likely to affect any other locality than the jurisdiction of the local committee.

"(2) No new work should be done, without sanction, which is likely to have an injurious effect, whether within or without the jurisdiction.

"(3) No new work should be undertaken, without sanction, which will cost more than a certain sum.

"(4) No repairs should be executed, without sanction, in excess of certain scales laid down by Government, either generally or with reference to the locality.

"(5) Limits may be laid down by law defining the proportion of income which may be expended on this or that department (as, for instance, *establishment*, so much per cent, *education*, so much per cent, &c.), and expenditure in excess of these limits should require sanction.

"(6) The appointment of the superior members of establishments should require sanction.

"(7) The banking arrangements of the boards should require sanction.

"(8) The issue of the debentures should require sanction.

"It is also necessary that powers analogous to those of the local Government Board in England, to compel the execution of necessary works, must be given to some authority. I am sorry to express myself so vaguely on these topics. It is unavoidable in the present stage of the discussion. Hereafter, when the main principles have been clearly and finally settled, it will be possible to make detailed proposals. This, however, would be best done by a committee empowered to draft a scheme. The isolated opinion of individuals may have some value as suggestions, but what is really required is a committee acquainted with the final opinion of Government, and able to proceed, step by step, so as to prepare a consistent and practicable scheme in harmony with their opinion."

79. Mr. Stevens concludes his report as follows:—

"I wish it to be understood that in the detailed recommendations which I have given regarding the several localities under consideration, I have gone as far as I think it is possible to go without great risk; but I have felt myself bound by the orders of Government to go so far as I have done. My own views of the general policy to be pursued are very nearly those which were given in my former report, and these differ but little from those expressed in Sir Ashley Eden's letter to Government, and indeed but little from the first intentions of the Government of India. I am decidedly in favour of giving the people more and more power by degrees, but I would do so more gradually and tentatively than the Supreme Government appears to think expedient. In writing this report I have, however, endeavoured to bear in mind that it is my duty to carry out the wishes of Government rather than my own views of general policy, and I am prepared to do this to the best of my ability.

80. My opinion on the general questions at issue has been given in another part of this report. I need only here deal with the recommendation of the Magistrate with regard to local boards in sub-divisions.

81. With regard to the sub-division of the Sudder, Diamond Harbour, Buseerhat, Baripore, I see no reason why a local board, consisting of nominated members, selected as proposed in paragraph of this report, and presided over by the sub-divisional officer, should not work efficiently and form a means of guiding the people in their political education I am not prepared to grant to the members of such boards the power of electing their own chairman, for reasons which I have already given.

82. As regards Barrackpore and Dum-Dum, I feel inclined to adopt the suggestions that they should be amalgamated under one local board, presided over by the sub-divisional officer, either of Barrackpore or Dum-Dum, as might seem most expedient.

83. I regret that I cannot feel justified in recommending the extension of the elective principle to Baraset, as proposed by Mr. Stevens. The same difficulties which beset the question elsewhere are conspicuous in Baraset, and I am constrained to agree with the opinion of a valued native friend, who has personal experience of the sub-division to guide him, and who wrote to me as follows :—"The physical, intellectual, and moral condition of the country requires further amelioration before the people can be entrusted with the independent management of its public affairs, and Baraset is no exception to this rule."

84. I can only recommend that Baraset should be treated like other sub-divisions, getting a local board of nominated members, presided over by the sub-divisional officer as chairman.

85. *Jessore.*—Mr. Barton, the Collector, would class Jessore amongst those districts which contain no sub-division, where a really useful local board can be formed.

86. At the same time, if boards are to be introduced at all, Mr. Barton would have the members nominated, not elected, the elective system being, in Mr. Barton's opinion, entirely unsuited to the people of Jessore. I gather from the general tenor of the report that Mr Barton would have one such board at each sub-division, presided over by the sub-divisional officer, and a district board, of which the Magistrate should be chairman.

87. The control over such boards would be vested in the district officers, and to the establishment of a central board Mr. Barton has very strong objections.

88. As to the duties to be performed, and the funds to be managed by the boards, Mr. Barton reports as follows :—

"I see no objections to making over to the boards (provided the members are not appointed by election, but nomination) the management of the following funds :—Pound, ferry, road cess, provincial rates, education, license tax, municipal cesses and medical receipts, as subscriptions, donations, &c. The local proceeds should be fully expended on local wants.

"As regards the transfer of public works cess to the board, I think it might be tried, provided the board is, as I suggest, under the official control of the executive head of the district. If all the charges connected with the funds transferred be made over to the boards, a certain amount will have also to be allowed by Government to defray expenses of works, including establishment, contingencies, and travelling. Public works buildings, as suggested by Government, may be made over to the boards also.

"All municipal charges of education, provincial roads, works tending towards improvement of village sanitation, village drainage, village water-supply, management of ferries and of pounds, embankment, irrigation, bridges, dispensaries, primary, aided vernacular and circle schools.

"The Government assignment to the zillah school is Rs. 200 per mensem. This amount could not possibly be met from the funds of the poor municipality at Jessore, which has already been made responsible for all the hospital charges, and in which no increase of cess is possible. The zillah school can only be taken over by the municipality, if Government makes a special assignment for it, or if Government includes an allowance on this account on the proposed annual grant from the provincial revenues."

89. There is no doubt that Mr. Barton is right when he says that Jessore, although a rich and prosperous district, is one of the most backward in the division. I entirely agree with Mr Barton in considering the introduction of the elective system as impracticable; and although I do not think that work will be better done by local boards than by the present executive staff, I think that we are bound to try the experiment as a means of commencing the political education of the people. I would therefore, as in other districts, have a local board at each sub-division, consisting of nominated members from each thana, presided over by the sub-divisional officer, and working in connection with the district board.

90. It is to my mind a recommendation of this system of local boards that it is suitable both for districts which are backward and those which are more advanced, but not yet sufficiently advanced to be allowed complete independence.

91. In both cases the means of political education is afforded by the presence of the sub-divisional officer. In backward districts, no doubt, the personal influence of the officer will be more felt on such boards than in more advanced sub-divisions. But this is as it should be, and in accordance with the wishes of Government. In more advanced districts, members of local boards will not slavishly follow the lead of the local officers while they can reap benefit from his experience and instructions, and gradually, after a course of training under such officers, the members will be able to do without the sub-divisional officer at all, and render themselves fit for the introduction of the elective system, and independence in the management of their local affairs.

92. *Moorshedabad.*—The district report from Moorshedabad is very much the same as that from Jessore. Mr. Mosley, the Collector, alludes to the difficulty which he found in obtaining the real opinions of all classes whom he consulted, inasmuch as the agents of agitators had been at work, and the opinions expressed had been formed and been influenced by the operations of such men. The feeling generally is in favour of the introduction of the elective system, but Mr. Mosley does not share this feeling, and would not have a local board at any sub-division.

"From all the above it may be gathered that, in my opinion, the answer to paragraph 8 of the Government No. 5T—M, as regards this district, is that all sub-divisions, including that of the sudder, come under the first head.

"I regret to come to this determination. The scheme is one which I should be, above all things, delighted to see carried out if it were possible. It would be good for the people, and would relieve district and sub-divisional officers of work—a very desirable thing. But it is one that, however admirable, is too much in advance of the present state of the district, and could only end, I fear, in lamentable and disastrous failure."

93 I would, at each sub-division of this backward district, have a local board on the same principle as that recommended for Jessore.

94. *Khoolna.*—The report of the district officer is short, and on some points not very clear.

95. Mr. Clay would class his district in No. 3, as one in all of the sub-divisions of which local boards might be formed. In their capacity for supplying a serviceable board, he thinks the three sub-divisions are about equal. Mr. Clay adds :—

"Similarly, I think that no distinction among the sub-divisions is required in the matter of the election of members of the board, or in the principle upon which the chairmen are to be selected."

Further on, after stating that the general feeling was in favour of election, he says :—

"My own feelings are against the immediate introduction of the system of election in this district. I should have preferred that the boards in the first instance should have been composed of persons selected by lot from among such as appeared to the local officials as suitable representatives of the classes who will hereafter be entitled to vote, and that the system of election should have followed the establishment in working order of the boards so formed."

96. From my own experience of the district, I can say that it is entirely unsuited at present for the introduction of the elective system. Khoolna and Bagirhat were the two most backward sub-divisions of the backward district of Jessore, neither of them having a municipality even of the lowest class, and the introduction of the elective principle would be simply a farce. Satkhira is more advanced than either of these sub-divisions, but by no means so advanced as to warrant me in recommending the introduction of the elective system.

97. It is doubtful whether a working board, even on the nomination system, will be procured for some parts of Khoolna and Bagirhat; but I think the experiment may be tried in the same way as proposed for Jessore.

98. Mr. Tayler, the Magistrate of Nuddea, reports generally that he is unable to recommend the introduction of the measure as a whole :—

"It seems to me that those who support the scheme, in asking for entire independence, and for the non-interference of Government officials in any form, are acting inadvisedly, and will, I fear, find in the end, if their wishes are granted, that they have been the worst enemies to the scheme. I do not believe that they realize all the responsibility, labour, and trouble which will be thrown upon them; the difficulties against which they will have to contend; and the time which it will be necessary for them to devote in order to carry out their duties efficiently.

"I am very strongly of opinion that, if the scheme is to be a success, it should be introduced by degrees, and the members of local boards should, at least for a time, be associated with officials as their chairmen, under whose guidance they may not only acquire an insight into the requirements of self-government, but may by experience realize what are its difficulties, and thereby be in a better position to judge whether they really can undertake its duties independently.

"That there are many persons, especially in this district, who, if they give their time to it, are capable for the duties, I doubt not; but I very much doubt whether such persons can be found to represent all the different parts of it. Indeed, from the report submitted by the sub-divisional officers of Meherpore and Bongong, I do not see how it is possible to have a local board at these sub-divisions.

"The above view is more or less shared by all my subordinates, and was, till the late resolutions of Government were circulated, concurred in by all native gentlemen with whom I have conversed on the subject. Now, however, as far as the latter is concerned, there has been a complete change, and nothing will suit those who have taken any active part in the several meetings which have been held throughout the district but a full introduction of self-government, unrestrained by official interference, but, as a general rule, without the power of taxation."

99. Mr. Tayler is of opinion that, owing to the backward state of the people at Meherpore and Bongong, no local board can be established at those sub-divisions, and that at other sub-divisions of Kooshtea, Ranaghat, and Chooadanga local boards may be established, two-thirds of the members being elected, and one-third nominated by Government, the sub-divisional officer being chairman at least for the first year or two.

100. With reference to this latter point, Mr. Tayler writes as follows :—

"The general desire of the educated and higher classes is to elect their own chairman, but I am of opinion that this is chiefly confined to those classes, the lower orders being quite ignorant of the advantages or disadvantages of any change of this kind in the administration of affairs. If, however, the Government are desirous of making the attempt, the boards at Kishnaghur and Ranaghat may be granted the power; for, if the measure succeeds anywhere, it ought to do so at those two places. At Kooshtea and Chooadanga success is more doubtful. The sub-divisional officers are, however, prepared to make the attempt; and if the desire of the people is acceded to, the failure, if such turns out to be the case, will, I am sure, not be

due to any unwillingness on the part of the Government officials. At Bongong the sub-divisional officer reports that there are not persons fit to represent all the thanas within the sub-division. At Meherpore it is evident that very little real interest is taken, except by a few, in the schemet. It will therefore, I consider, be necessary to establish at these sub-divisions a committee corresponding to a branch committee under the existing road cess, as can be formed by an amalgamation of the road, education and dispensary committees, with the sub-divisional officer as chairman thereof."

101. With reference to rules for election, Mr. Tayler shares the general opinion that the standard of electoral qualification is too high, and he makes the following proposals :—

"That all drawing Rs. 500 per annum, salaried or otherwise, or paying road cess of Rs. 5, or license tax of Rs. 10, as well as all pleaders, school sub-inspectors, postal inspectors and superintendents, graduates in arts, medicines, science, civil engineering and law, should be qualified as members; while those drawing Rs. 200, salaried or otherwise, or paying road cess of Rs. 2-8, with all certified mukhtears, pundits, licensed doctors, teachers, post masters, university graduates, and titled pundits of tolls, might have a vote.

"The recording of votes should be carried on at each of the police stations, a trustworthy officer being deputed for the purpose. It will be for the candidates to induce voters to go to the stations; but if the sections are carried out only at head-quarters, I doubt whether the greater number of voters will care to attend."

102. With regard to funds to be allotted to boards and control, Mr. Tayler continues :—

"It is unanimously proposed that a fixed grant from provincial funds should be given by Government to supplement the receipts from pounds, ferries, &c. Indeed, the general desire is that the boards should have as little as possible to do with taxes of any kind; and hence it is suggested that such a fixed grant is preferable to a portion of the license tax, and to the power of levying a local rate for purposes of sanitation, &c. The idea which prevails is that the scheme should be made as popular as possible, and apparently that the members of the board should avoid everything which may make them obnoxious to the masses.

"In this I cannot concur. Indeed, this view is one of those which makes me think that even the educated, who so strongly support the introduction of self-government, are scarcely alive to the duties which they will have to perform. The boards should certainly have at least the power of taxation; but, as regards the license tax, whatever portion of it the Government can spare, may be added to any grant which would otherwise have been assigned.

"Lastly, in regard to the matter of control. If official chairmen are appointed, the power of supervision by the Magistrate, and of suggesting improvements or modifications which may appear to him to be necessary, and finally of referring the question, if such suggestions are not carried out, will, I consider, be quite sufficient. Of course, however, to render any such supervision possible, copies of all proceedings and resolutions must be forwarded to the District Magistrate, and no work performed which has not been duly recorded by the committee, who should meet at least once every month.

"If the chairman, on the other hand, be elected by the members, and especially if a non-official, the responsibility of the District Magistrate must be much restricted; for, with the strong feelings which appear to exist everywhere against official interference, it will, I think, be easy for the board to carry out some measures which they are greatly in favour of, but which the District Magistrate would, if fully cognizant of, be averse to, by so recording their resolutions as to prevent the matter coming prominently to his notice, till at last it was too late to interfere. I do not mean to insinuate that the board will resort to such doings as a rule; but since it will be in their power, it will be only just to District Magistrate, who will gradually at the time that the measures are being adopted have nothing but the proceedings to guide him, that he should be relieved of much of the responsibility which would otherwise attach to him.

"There is some difference of opinion as regards the boards of control For the passing of estimates, the distribution of grants, and indeed for the consideration of all duties in which the boards and District Magistrate agree, a central board, composed of specially selected representative members at the provincial head-quarters, would, I am of opinion, answer well; but unless these members have a thorough knowledge of the district, it seems to me that their control would be absolutely *nil* in matters in which there was a conflict of opinion between the district authorities. To be of any real use there must be a central board for each division at the least, each district being represented by several members well acquainted with the whole district."

103. I regret that I cannot see my way to recommending the introduction of the elective system in any of the more advanced sub-divisions of Nuddea. There is not amongst the people any more real capacity for the development of self-governing principles than elsewhere, and in Nuddea, as well as in the other districts of the division, it seems to me that political education can be best commenced by a system of local boards consisting of nominated members, and presided over by the sub divisional officers as recommended for other districts. I can quite imagine that in Nuddea the first advance to independence of local officers will be made; but I do not think that the people are sufficiently advanced to be entrusted with such independence as yet. For the grounds on which I base my opinion I refer to the body of my report.

104. The same system, for reasons elsewhere given, would work in the backward sub-divisions of Bongong and Meherpore.

105. The second question which requires an answer is with reference to the introduction of self-government in municipalities. The difficulties which beset the consideration of the question of self-government, with reference to the extension of self-government in the districts at large, do not present themselves in discussing the subject with regard to municipalities. In these places there has already been for the last 18 years a certain amount of local government; educated men, possessing as tax-payers local interests, are to be found wherever municipal institutions have been introduced. Attention can be given to public matters by rate-payers without that sacrifice of time and expenditure of money which must attend the presence of members of local boards in the mofussil. The area in most cases being limited, the wants and requirements of rate-payers can be ascertained without difficulty, and without Commissioner being required to travel long distances In short, in municipalities local self-government is possible, and not, as in the case of sub-divisions, impracticable at present.

106. The questions which, in discussing this subject, require an answer are—

(*a*) To what class or classes of municipalities can the self-government principle on the elective system be applied?

(*b*) How far is the introduction of the elective system advisable with reference – (*a*) to the members of municipal boards being appointed entirely by election, or partly by election and partly by nomination; (*b*) with reference to the chairman being an official or not?

(*c*) What qualifications should be required in the case of voters and members of boards?

(*d*) Under what rules should elections be carried out?

(*e*) What connection should exist between municipal and local and district boards?

(*f*) To what control should municipal boards be subject, and what funds should they manage?

(*a*) The answer to this question has been indicated in paragraph 4 of the Government of Bengal circular, and I consider that the proposal therein made to extend the elective system to first and some second class municipalities is good.

(*b*) I do not think that it would be wise to have all the members of municipal boards elected, and I consider that for many reasons it will be sufficient if two-thirds of the members are elected and one-third nominated by Government.

107. As to the chairman being an official or non-official, this must depend upon the circumstances of each municipality. My recommendations upon this point will be found in the remarks against each municipality in the various districts of the division. Whether the chairman be an official or not, he ought to have a vote.

(*c*) As to the qualifications required for electors and members, it is very difficult to lay down any hard-and-fast rule as to degree; but I am of opinion that *residence* and *payment of rates* ought to be insisted on as necessary qualifications in any one seeking to be elected, or to elect. The amount of payment of rates which would confer on residents the necessary qualifications need not be strictly defined at present, and I think, as recommended by the Collector of the 24-Pergunnahs, this might fairly be left to be determined by executive order, it being understood that the standard ought to be low, rather than high. I do not consider that any educational qualification is required, or that educational acquirements should be allowed to confer qualification in the absence of payment of rates. The more educated rate-payers we can include amongst the number of voters and members, the better; but rate-payers alone, whether educated or not, should be allowed to manage their local affairs.

108. Voters should be males, adults, and persons who have not been convicted of any non-bailable offence. I do not think that women who, in the cases of females of the higher classes, are debarred from the exercise of the right of personal liberty, should be allowed to vote. For obvious reasons it would be unwise to confer on women of the lower orders, or of loose character, who pay rates, a privilege which is denied to those of higher position and more restricted liberties. It would obviously be anomalous that a prostitute should have more political rights than a *purdah nashin*.

109. In connection with this part of the subject I reproduce some very pertinent remarks of the Collector of the 24-Pergunnahs, in most, but not in all, of which I entirely concur:—

"A general question of some importance is whether any tests, except property tests, for electors or for members should be required. A large number, in fact the majority, of the persons consulted, are in favour of educational tests in substitution for, or in addition to, property tests. The cases of electors and candidates seem to me to differ. In the case of electors I am not of opinion that any but rate-payers should have votes. I would fix the qualifying rate low enough to prevent the monopoly of a single class; but I would insist rigidly on the payment of rates as a qualification. I do not know that in wisdom and discretion a young gentleman, who has recently passed the Entrance examination, is likely to be in any very marked degree superior to a shrewd, but uneducated, shop-keeper or workman of double his age. No doubt he will have fewer prejudices, but he will be far inferior in experience of practical life. But I think that it is unnecessary to found our judgment on such considerations. If the question were of a parliamentary franchise, I should by no means object to education as a qualification, though I should fix a high standard. There are many subjects which come before the Legislature in which all alike are directly interested, whether they do or do not possess property to a certain value. But the immediate purpose of a

committee for local self-government is the expenditure for local purpose of taxes locally raised, and it appears to me that those who pay should exercise the control.

"It has been suggested that a certain amount of education should be required in addition to the property qualification. The suggestion is plausible and easy to make, but in practice it would be difficult to work out. By what process would the qualification of this man or that be ascertained? The standard must be low, and who is to fix it? Besides, I do not think that the mere possession of the arts of reading and writing necessarily implies fitness for the franchise, or the want of them unfitness. The assumption seems to be sufficiently safe for practical purposes, that the head of a household contributing a certain amount of taxes is fit to exercise the franchise. I would allow women to vote.

If we had, or could reasonably expect to have, a thoroughly intelligent body of electors, perfectly sensible of their own true interests, and not liable to be drawn away by prejudice, by the persuasions of designing men, or by party feeling, I should say that it would be unnecessary to lay down any qualification for candidates. But we are not so sanguine as to expect this, and therefore I think that it is necessary to limit the choice of the electors to a body of men who may be presumed to be the most fit to be chosen. Doubtless, whatever mode of limitation we adopt, we shall find unfit persons who will be eligible under our law and rules, and also fit persons who will be ineligible. This is an unavoidable difficulty. To reduce it as far as possible it is necessary to have regard to local circumstances, and for this reason I would not lay down in the law any rigid limit, either in the case of candidates or in that of electors. I would let the limit be fixed by executive order of Government in the first instance, and I would give power to revise the orders as occasion might require.

"If there is to be separate qualification for candidates, it seems to me that the same reasons exist for a property qualification as in the case of electors. It has been suggested that educational qualification should also be insisted on. Some even go so far as to say that every candidate should have a competent knowledge of English. In some cases, for example in the Suburban Municipality, this is no doubt necessary; but in others it is not, and I would not make it the subject of a general rule. Perhaps it is hardly necessary to lay down any rules at all on this head, for matters will certainly adjust themselves. In a few instances incompetent men may get into the committees whom rules might have kept out; but if our electors are to be held to be fit to choose their representatives, we must trust them to some extent, though not absolutely. It is certain that no perfectly illiterate person will ever be elected.

"I would retain for candidates the restriction which is at present in existence, that they shall not have been convicted of a non-bailable offence, but I am disposed to think that it would be better to substitute "imprisoned on conviction" for "convicted" A suggestion has reached me that any person who has been convicted of a non-bailable offence during the past three years should be disqualified. But a considerable proportion of our jail population, not to speak of undesirable persons now at large, would thus be pronounced fit for service, and there would seem to be little ground for making an invidious distinction between these persons and others, whose felonies may have been committed or discovered more lately."

(*d*) I am not prepared to extend the elective system unless one-third of the rate-payers apply for the privilege, and I would place the same restriction on the bestowal of the power of electing a chairman. It is alleged that the imposition of such a restriction will give rise to all kinds of machinations in municipalities, and that fictitious agitation will be created. This is very likely to be the case, but still I do not think that on this account the restriction should be removed. I would reserve to Government the right of selecting the municipalities in which the experiment is to be tried, and I would not make it compulsory on Government to introduce the system, simply because, apparently, one-third of the rate-payers wish it. Both conditions I would require to be present before the introduction of the system could take effect, *viz.*, the application of the rate-payers, and the consent of Government.

110. It is hardly necessary to decide now as to the procedure to be observed in voting. The principle which regulates any of the rules in force in Kishnaghur, Serampore, or Burdwan can easily be made applicable to any locality in which the elective system is introduced.

(*e*) The municipal boards should be entirely separate from the local boards, and the only matters in which co-operation would be required between the two would be in connection with maintenance or contribution to zillah schools, district roads connected with municipal roads, ferries partially district and partially municipal, allotment of funds to be partially enjoyed by municipalities and district boards, &c.

111. Such questions might, it seems to me, be arranged between the district and municipal boards, subject to the confirmation or, in case of disagreement, the decision of the Divisional Commissioner.

(*f*) The funds to be made over to municipalities would be those which they now have, plus any contribution which might be made from district funds, which they might have an equitable right to share in, or any allotment by Government of moneys, such as license tax collections.

112. I would give as much freedom as possible to municipal boards. They would be under the general control of the Divisional Commissioner, and their proceedings should be sent to that officer through the District Magistrate. No new taxes should be imposed, and no

existing taxation should be discontinued, without the consent of Government. Similarly, without such consent no loans should be contracted, nor municipal property permanently alienated No new works should be undertaken beyond a certain scale without the sanction of Government, such scale being fixed with reference to each locality and the income of each municipality. The proportion of municipal funds to be spent on establishment should be regulated by Government, and beyond a certain percentage of income, no such expenditure should be incurred without sanction.

113. I proceed now to consider the application of those general principles to the various municipalities in the several districts of the division.

114. 24-*Pergunnahs*.—The only first class municipality in the district is the Suburban Municipality, and the question as regards the board here may be left out of the discussion, as its constitution is under separate consideration by Government.

In the sudder sub-division there are three second class municipalities—

1.—South Suburban.
2.—Baranagore.
3.—Rajpore.

1.—SOUTH SUBURBAN.

115. With reference to this municipality, the recommendations of the Collector, after consultation with his advisers, are briefly—

(*a*) That the elective system should be introduced, two members being elected and one nominated by Government for each ward.

(*b*) That the qualifications for the voters should be—

(1) Residence.
(2) Non-conviction of non-bailable offence.
(3) Full age.
(4) Payment of rates up to Rs. 3 per annum.

(*c*) That there should be no property or educational qualification.

(*d*) That the qualifications for a member of the board should be—

(1) Residence
(2) Non-conviction as above.
(3) Age of 30 years.
(4) Payment of yearly rates to amount of Rs. 12.

(*e*) That the chairman should be elected, the Commissioner having the option of electing an official or non-official.

(*f*) That the chairman should have a vote. (This I gather from Mr. Stevens' general observations.)

(*g*) That elections should be triennial.

2.—BARANAGORE.

The recommendations of Mr. Stevens for this municipality are very much the same in principle as those made for the South Suburban Municipality.

3.—RAJPORE.

So also for Rajpore; the principle of the recommendations is the same. There is a little difference in the qualification proposed for members of boards.

116. Taking the recommendations for these three municipalities together, the recommendations amount to these—

(*a*) That the elective system should be introduced on the principle of two-thirds of the members for each ward being elected and one-third nominated.

(*b*) That the chairman should be elected by the Commissioners themselves, the option of electing an official or non-official being left to them.

(*c*) That the qualifications for voters and Commissioners should be residence, non-conviction of unbailable offence, full age, and payment of a certain amount of rates.

Under the qualification proposed, the number of voters in each of the municipalities would be—

					Population.
South Suburban	..	..	..	1,530	51,658
Baranagore	..	..	..	942	29,962
Rajpore	..	..	..	415	10,576

117 I accept the recommendations made as regards Baranagore and Rajpore, and I think that a commencement of the elective system, with an elected chairman, may be made in these two municipalities as an experiment, the election of chairman in each case being subject to the sanction of Government. I may note here that introduction of the elective system in any place, both as regards voters and chairman, would be subject to the conditions as to the wishes of the rate-payers referred to in my paragraph number

118. The amount of payment of rates necessary to give a vote has been fixed at Rs. 3 per annum, and this may be adopted to begin with, although this might remain for subsequent consideration and modification when the principle of rate-paying as a qualification has been definitely decided Similarly, I have no objection to the amount of Rs. 12 payment of rates suggested, as the qualification necessary for a Commissioner, being accepted to start with. I would far rather have a low qualification than a high one.

119. As regards the South Suburban Municipality, I agree in all the recommendations made, with the exception of that regarding the chairman being elected.

120. Party feeling runs very high in this municipality, there is a very strong minority who are opposed to the elective principle being applied to the appointment of chairman, and I think it would be safer to start the elective system under an official chairman for a year or two at all events.

121. *Buseerhat sub-division.*—In this sub-division there are four municipalities with a union—

	Population.
Busseerhat	14 843
Baduria	12,981
Goberdanga	6,154
Taki	5,120
Etenda	5,607

122. The Collector, while hesitating as to the expediency of adopting the elective principle in the three smaller municipalities, ultimately adopts the suggestion of the sub-divisional officer that the experiment should be tried in all of them.

123. The recommendations then made are—

(*a*) That the elective principle should be introduced.

(*b*) That the qualification for voters should be payment of rates to the amount of Rs. 3 annually by residents. The qualification in the case of Commissioners being payment of rates not below Rs 4 8 per annum by residents of full age, who have never been convicted of any non-bailable offence.

(*c*) That two-thirds of the Commissioners should be elected and one-third nominated.

(*d*) That the chairman should be elected by the Commissioners themselves.

124. The number of persons who would be entitled to vote under the qualification above laid down is not given.

125. I do not think that it would be advisable to extend the elective system to either Taki or Etenda. From what I know of the people, I am not prepared to say that they are advanced enough to appreciate the system.

126. In the three larger municipalities of Buseerhat, Baduria, and Goberdanga, I would introduce the elective system, but I would not start this self-governing principle, except under an official chairman for some time at least. The people of these places are not, in my opinion, fit to be left to themselves without such guidance or direction.

127. *Barripore sub-division*—In this sub division there are two municipalities—Baripore and Joynagore

128. With reference to these two the Collector writes as follows:—

"There is a general consensus of opinion that Baripore is not fit for the elective system. It is a small town, containing only 3,742 inhabitants, who are divided into two factions, led by the contending parties among the zemindars. I am informed that the violence of the party feeling in this locality was the cause of the establishment of the sub-divisional head-quarters at Baripore. Now, however, the peace is kept, but still there is great irritation. There is no third party and no middle class. The people have not the least desire for the elective system, and it is clear that it ought not to be introduced."

129. From these remarks, and my own knowledge of the state of matters at Baripore, I have no doubt that in that municipality the elective system should not be introduced.

130. I have also considerable hesitation as to recommending the introduction of election into Joynagore, but I have no objection to try it as an experiment. I would not, however, have an elected chairman. The people are certainly not fit to be left entirely to themselves; and although great latitude would be left them by the appointment of an elected vice-chairman, I am not prepared to leave them without the wholesome supervision of an official chairman.

131. *Barrackpore.*—In this sub-division there are two municipalities, regarding each of which the Magistrate writes as follows:—

"The more important, and by far the more advanced, of the two municipalities is that of South Barrackpore, containing 30,317 inhabitants. Mr. Bright, who had charge of this sub-division formerly, and is well acquainted with it, informs me that, in his opinion, this municipality is well fitted to have the elective system. The municipal commissioners are active, intelligent men, most of them possessing a good knowledge of English, and many of them showing marked activity and interest in the conduct of municipal affairs. If the experiment of a non-official chairman is eventually determined on, there are certainly one or two gentlemen who are probably quite equal to the post. The inhabitants too are to a

large extent clerks of offices in Calcutta, and take perhaps a more real active interest in municipal matters than the residents of other places. From the large grants, amounting to Rs. 1 700, which are now made to education, it is clearly shown that they are energetic and zealous in the service of the public.

"The case of North Barrackpore is not so strong. The municipality in question does not contain nearly the same number of educated natives as that of South Barrackpore, and does not include nearly such populous villages (the population being only 17,702, as compared with 30,317 in South Barrackpore), and many of the present municipal commissioners possess absolutely no, or at any rate a very limited, knowledge of English. There are, however, marked indications of progress. An excellent school has been founded by Baboos Sridhur and Bansidhur Mundle of Nawabgunge, which will very probably supersede the Government school at Barrackpore, and must in time exercise a powerful influence on the locality. I would introduce the elective system, and would allow the commissioners to choose their own chairman. It is doubtful whether a suitable non-official chairman could be readily found, and no doubt the Cantonment Magistrate would be elected. The town should be divided into wards, each with three commissioners, two of whom should be elected and one nominated. I would propose the same qualifications as elsewhere."

132. It seems to me that in South Barrackpore the elective principle, with an elected chairman, under the same conditions as proposed for Baranagore and Rajpore, should be fully introduced. In North Barrackpore I would introduce the elective principle, however, an official chairman to begin with. It will be interesting to notice how the two systems work in localities which are close to one another; and if the people of North Barrackpore progress as they are doing, they may soon be in a position to have the privilege of electing their own chairman conceded to them.

133. *Dum-Dum.*—In this sub-division there are two municipalities—North Dum-Dum with a population of 14,108, and South Dum-Dum with 5,201 inhabitants.

134. Concerning these places the Collector writes as follows:—

"It may perhaps be thought advisable to introduce the elective system into so small a place as South Dum-Dum, but I should not object to it in both municipalities. A committee of nine members in the one case, and six in the other, would seem to be sufficient. The sub-divisional officer submits some extremely vague resolutions passed by certain people at a public meeting, which afford no accurate data on which a judgment can be framed.

"The qualifications for a municipal voter proposed by them are the possession of property, education or social position, or the payment of a rate of not less than Re. 1-8 per annum.

"The commissioners should have not less than Rs. 500 annual income, or should pay not less than Rs 3 per year rates.

"This last qualification seems an extremely low one, and would not, I think, be an advisable one to adopt. They also propose that the tenure of office should be two years, and not three, as suggested by nearly everyone else. The chairman might, they think, be either official or non-official: he should be elected by the commissioners; and if an official, should not have a vote.

"They at the same time considered it advisable that a separate local board should be established for the sub-division, and that no junction should be made with Barrackpore.

"Members of the board should be men possessing property, education and social position, or paying a cess of not less than Rs. 2 per annum, or possess an income of not less than Rs. 300 per annum.

"It will be seen that it will be extremely difficult to draw a line where the status of a man of social position begins or ends: the standards suggested are very much too low."

135. It seems to me that in the municipality of South Dum-Dum the elective principle should not be introduced, and that, in the municipality of North Dum-Dum, it may be tried as an experiment under the guidance of an official chairman. The qualifications for voters and commissioners to be as proposed for other similar places in the district.

136. *Baraset.*—In this sub-division there are two municipalities at Baraset and Nyehati. I gather from the Collector's remarks that he approves of the introduction of the elective system, but I do not find special recommendation regarding elected chairman.

137. I reproduce the remarks at length:—

"Baraset contains two municipalities—(1) Nyehati with 21,533 inhabitants; (2) Baraset with 10,533, while the rural population amounts to 240,508. The sub-divisional officer recommends the introduction of the elective system into both these municipalities without any application being made under section 16 of the Municipal Act. He recommends that the franchise for a voter shall be given to—(1) payers of Rs. 4 a year house-rate, or possession of an annual income of Rs. 500 or over; (2) pleaders, school-masters, &c. At the same time he considers that commissioners should possess an income of at least Rs. 1,000 per annum. The commissioners would hold office for three years, and should elect their own chairman, who should be remunerated. In my opinion it is quite impossible, and at the same time extremely inadvisable, to carry out this proposal of the sub-divisional officer; impossible, because in most municipalities the funds at disposal would not be sufficient to allow of an adequate salary being given to the chairman without hopelessly crippling the resources of the municipality; inadvisable, because it would probably give rise to a large amount of scheming amongst needy men, who would be only too glad to act as chairman of any municipality if they could receive a sufficient amount of pay. Both these objections are to my mind fatal to the chances of success of this scheme. I should be inclined to allow the payment of Rs. 3 house-tax to constitute the voting qualification.

"The sub-divisional officer appends to his report proceedings of three public meetings held in his sub-division. The chief points insisted on by the first meeting are the following:—

"(1)—That the chairman shall be elected; and if he be an official, he shall be denied the privilege of a vote.

"(2)—That all persons and rate-payers residing permanently within the jurisdiction of the local board and of the municipality, having an income of Rs. 300 a year, and teachers, pleaders, muktears, licensed doctors, titled pundits, moulvies, moonshees, akurjis, university graduates, and educated men of integrity and honesty, shall have votes; and in the case of municipalities a rate-payer, paying not less than Re. 1 per quarter, shall have a vote.

"(3)—That all residents possessing an income of Rs. 500, payment of Rs. 5 per annum road cess, or Rs. 10 license tax, and all licensed doctors, pleaders, and teachers, whose annual income is not less than Rs. 1,000, be eligible for membership of the local and municipal boards.

"(4)—A somewhat complete emancipation from official control. No official of lower rank than that of Commissioner is to interfere at all, and he only when moved by the '*bonâ fide* application' of 50 voters, and in the case of expenditure of not less than Rs. 5,000.

"(5)—The license tax, ferries and pounds, road cess and public works cess are to be made over entirely, and the committee is to have the power of raising money by local rates.

"This is certainly a very liberal programme, and argues no little self-confidence on the part of its framers. I do not, however, discuss it at length, as I have already declined to recommend the introduction of the educational test apart from property, and the remaining propositions are not likely to meet with the entire approval of Government. With regard to the resolutions of the second public meeting, I consider that the qualifications proposed for voters (12 annas yearly house rate) and commissioners (Rs. 3 a year house rate) are much too low.

"The proceedings of the third meeting, held at Duttapooker, which commenced, as we are told, 'with several speeches,' are too vague to be of much value. The special point to be noticed is that it is proposed that, in addition to the property qualification suggested by Government, there shall be a 'merit qualification,' *i.e.*, 'all men of education, honesty, and integrity be allowed to be voters, and men of profound education and known honesty and integrity be allowed to represent at the board.' It would be extremely difficult to work such a system practically. I confess myself unable to distinguish practically between the 'men of education, honesty, and integrity,' who are to be voters, and the 'men of profound education and known honesty and integrity,' who are to represent them on the board, but it would appear that the framers of the resolution had some distinction in their minds.

"It is suggested in the resolutions that 'official control should be conferred to sanction certain acts and interferences when the educated men of ten villages make a representation against the board.' Another resolution permits the sub-divisional officer 'to prepare lists of electors and representations according to the qualifications proposed, and to convene a meeting of the electors for the election of the members of the Baraset board." I might well have left these resolutions in the appendix to the Deputy Magistrate's report, had my object been merely to consider such proposals as are likely to be of any practical use. But I have thought it right to reproduce them here, because I think they will serve as warnings to anyone who may desire to throw the administration of local affairs too much into the hands of what are sometimes termed the 'educated classes.' It may well be doubted whether the persons who could frame these vague and unpractical suggestions are likely to prove efficient administrators. I do not say that in time they may not, and I am not about to propose that they shall not, have the opportunity; but I do think the necessity for caution is clearly apparent."

138. I consider that the elective system may be introduced into both these municipalities, but I do not consider that at either place should the experiment be tried without an official chairman. If it is desired to introduce the system under an elected chairman in one or other of these places, then it might be tried at Baraset, but I do not recommend this being done.

139. *Nuddea.*—The Magistrate of Nuddea has not treated the subject as regards each municipality in detail, and definite proposals regarding each locality have not been submitted. I gather, however, that the Magistrate is in favour of the general introduction of the elective system in municipalities, and thinks that a beginning of self-government might be made in Kishnaghur and Ranaghat by allowing the chairman of the municipal board at these places to be also elected.

140. In this district there are three first class municipalities at—

Kishnaghur, | Ranaghat,
Santipore,

and six of the second class at—

Nuddea, | Beernugger,
Kooshtea, | Moheshpore,
Meherpore, | Coomercolly.

I think the elective system might be introduced in all these places, with perhaps the exception of Moheshpore, Coomercolly, and Beernugger. But even in these localities I am not averse to the experiment being tried.

141. I would have the same qualifications as in similar places in Nuddea, viz. payment of rates by resident male adults, who have not been convicted of any non-bailable offence, the amount of such payment to be determined afterwards, but to be about Rs. 3 for a voter and Rs. 12 per annum for a Commissioner.

142. I am strongly of opinion that it would be very unwise to commence the introduction of the experiment otherwise than under the supervision of an official chairman at any place in the district, except at Kishnaghur itself. At Ranaghat I do not think that any non-official would be found competent to perform the duties efficiently, and at Santipore the election of a non-official would in my opinion be impracticable, owing to the bitter faction feeling which has always prevailed, and still prevails, in that miscalled city of *Peace*.

143. At none of the second class municipalities are the people advanced enough to be allowed to have independent charge of the affairs without the direction and guidance of an official chairman.

144. At Kishnaghur the experiment may be tried, for the people are intelligent and have been accustomed for some time to municipal institutions. There is still a good deal of party feeling, and not much real public spirit properly so called; but a beginning must be made, and such beginning I would make at Kishnaghur.

145. *Jessore.*—There is in the district of Jessore but one municipality at the head-quarters of the district. The Magistrate is strongly opposed to the introduction of the elective system in the municipality, and points out that the so-called town of Jessore is in reality nothing but a series of villages, the majority of the rate-payers in which are ignorant agriculturists, and that the town part has simply been brought into existence by the cutcherries and courts.

146. There is, no doubt, much weight in the Magistrate's remarks. The population of Jessore is composed principally of pleaders and mukhtears, amlah of the courts, some shop-keepers, and a large number of prostitutes. The bulk of the official and pleader class do not belong to the district or locality, but remain at Jessore in the exercise of their profession. They have always been distinguished for apathy in municipal matters even when left to themselves, and I do not believe that of late years there has been any improvement in this respect. I am convinced that the shop-keepers, and those who really have local interests in the place, do not wish for the elective system to be introduced, and I do not consider that the introduction of this system would, under the peculiar circumstances of Jessore, be of any advantage to the people.

147. If, however, on enquiry made, it is found that the necessary number of male rate-payers wish that the elective system should be introduced, I am prepared to give it a full and fair trial. If the system is introduced, the presence of an official chairman on the board is indispensable.

148. The only other places in Jessore, where there is an approach to municipal institutions, are Kotechandpore and Keshubpore. At both of these places the introduction of the elective system is hopeless, and no change in their present constitution is required.

149. *Khoolnah.*—In two of the sub-divisions of Khoolnah—Khoolnah and Bagirhat—there is no municipality.

150. With reference to Satkhira, the information given in the district and sub-divisional report is of the most meagre description, and affords me very little grounds for making any recommendations.

151. Of the municipalities in the sub-divisions I have very little personal knowledge, and beyond saying that I think the elective system under an official chairman might be introduced at Satkhira itself, I do not at present wish to make any definite recommendations until I have some more knowledge of the circumstances of the other municipalities in the sub-divisions.

152. *Moorshedabad.*—In Moorshedabad there are no first class municipalities, and four of the second class at Berhampore itself, Lalbagh, Jungipore, and Kandi.

153. The Collector considers that the elective principle can be introduced in all these municipalities except Kandi, where the backward state of the people, and the dissension which reigns among them, preclude the idea of the elective system being worked with any chance of success. In these recommendations I entirely agree.

154. The Collector does not consider that it would be advisable to have elected chairmen in the boards, and in this view I also agree. At Berhampore there is very decided party feeling, and I do not think it would be wise to start the system at first without the presence of an official chairman. If the elective principle answers satisfactorily, it may be extended to the appointment of a chairman afterwards, but it has much more chance of having a fair trial, and showing satisfactory results if introduced under the supervision of an official chairman than if brought into force under the influence of uncontrolled party feeling, and under the direction and guidance of a chairman who cannot fail to be a partizan.

155. I would have the same principle as to qualification for voters and Commissioners as recommended in other districts.

156. In two of the districts of the division, therefore, I propose to introduce the elective system under elected chairmen, and the places which I think suitable for the experiment are—Baranagore, Rajpore, South Barrackpore, in the district of the 24-Pergunnahs, and Kishnaghur in the district of Nuddea.

157. In the following municipalities I would introduce the elective system under an official chairman :—

South Suburban Municipality,
Joynagore,
North Barrackpore,
Baraset,
Nyehati,
Buseerhat,
Baduria,
Goberdanga,
in the 24-Pergunnahs;
Satkhira,
in the district of Khoolna;
Ranaghat,
Santipore,
Nuddea,
Kooshtea,
Meherpore,
Beernugger, } doubtful
Moheshpore, } doubtful
Coomercolly, } doubtful
in the district of Nuddea;
Berhampore,
Lalbagh,
Jungipore,
in the district of Moorshedabad;
Jessore (doubtful),
in the district of Jessore.

158. In submitting this report, I am fully aware of the imperfect sketch which I have been able to present of the system which I think might be introduced. When the principle of the system to be followed has been laid down, it will be easy to fill up details in points of procedure which are now wanting, and it seemed to me premature to elaborate details, when the extent to which the principle of local self-government may be applied in this division has not yet been fully determined.

No. 811G, dated Alipore, the 10th October 1882.

From—C. C. STEVENS, ESQ., Collector of the 28-Pergunnahs,
To—The Commissioner of the Presidency Division.

IN reply to your Circular No. 4MG, dated 12th July last, I have the honour to make the following report.

2. I do not understand that the question of general policy is to be considered as now open any longer for discussion, and I do not propose, therefore, to discuss it further than may be absolutely necessary and called for in connection with details.

3. At the same time I wish to say that all the facts on which, in my former report, I based my recommendation that great caution should be exercised in the introduction of the great changes proposed by Government, must still have their due weight in the discussion of practical measures.

4. Especially do I wish to repeat my conviction that there is great danger of overrating the importance and extent of the agitation for self-government. Notwithstanding all that has been written and spoken on the subject during the last few months, I am firmly of opinion that the vast majority of the people do not take the slightest interest in it, and that a considerable number even of the more intelligent and well-educated are opposed to it, while the number of those who hold extreme views is not really large. There are, however, localities in which I believe there is a genuine and comparatively general wish for the exercise of wider political authority than is now enjoyed by non-official persons, and I admit that in such places there are indications that a system of self-government is called for, and is even likely to be more efficient than the system which it will supplant. I regard the establishment of "People's Associations" and "Rate-payers' Associations," of which there are now so many, especially in the metropolitan districts, as indications of political activity, and it would be unjust to deny that such societies have done good.

Wherever there exist a body of men fit to work a system of self-government, I am anxious to introduce such a system; but to throw heavy responsibilities on men unable or unwilling to sustain them will only bring discredit on the liberal policy of Government.

5. I have made these observations because I am desirous that the spirit in which I approach the subject may be understood. I shall throughout this report assume that the policy of the Government of India is to be universally carried out, and I shall specify such limitations as appear to me to be necessary, whether arising from peculiar local conditions or from other considerations.

6. The first limitation of a general character which I should propose is that whenever the elective system is introduced, a certain proportion of the committee, whether municipal or otherwise, should still be nominated. The propriety of this is admitted even by the majority of those who are in favour of introducing a system of election. The advantages are that while the elections give the rate-payers an opportunity of securing representation on the committee, the reservation of a certain number of seats for nominees will enable Government to prevent the monopoly of particular classes, and also to provide for the representation of the interests of Government itself. Further it is generally allowed that there are not a few native gentlemen of position and education who are willing to give their time to honorary public work, but are not willing to suffer the labour and unpleasantness attending a popular election. Even in our own country, and still more, I believe, in the United States of America, the position of a candidate for a contested seat is not altogether dignified or pleasant, and there are many persons eminently fit for the discharge of business who shrink from the toils and degradations (if this be not too strong a word) involved in the election. No wonder is it that native gentlemen, whose sense of personal dignity is not exceeded in any other country in the world, should feel reluctant to contest a seat. But there are many such persons whose services would be of great value to

our committees, and whose absence from our committees would even be a distinct source of weakness. They will serve as a counterpoise to the class of political adventurers, which is small indeed now, but which is certain to increase in the future; and they will confer a certain status on the committees. It may be suggested that such members, being nominees of Government, would feel themselves dependent. To this objection I assign no weight, for in the first place they would everywhere be in a minority in the committees in all cases in which it might be considered that Government was exercising undue pressure, and in the second, I do not think that experience has shown (as, for example, in Calcutta) that the nominated are in any way less independent than the elected members. As I believe then that the reservation of a certain proportion of the seats for nominees is likely to add to the efficiency and dignity of the committees; as it would be desired by a considerable and important section of the public as a necessary check on the elective system; and as it would be accepted by the great majority of even those who are in favor of the elective system, and as it would be opposed only by the few who hold extreme views, I have no hesitation in recommending it in all cases.

7. The next point for consideration is the proportion of members to be nominated. I think it will be well to make the rule that for every two members to be elected there shall be one nominated; this is the proportion subsisting in the Calcutta Municipality, and I believe it would meet with general approval. The number of nominated members should be sufficient to give them weight in the committees, but they should nevertheless be a minority. I would have no absentee ex-officio members, such as the Commissioner of the Division or the Sanitary Commissioner; and any Government officers whom Government might wish to appoint either personally or ex-officio should be among the one-third nominated. I would permit the electors to choose any one, whether a Government servant or not, and I would also leave it to the committees to elect their chairman, leaving it in their option to choose either Government servants or private persons. I would only say in both cases that the election of a Government servant should require the sanction of his official superior.

8. I would strongly urge the reconsideration of the determination that an official chairman shall not have a vote at meetings. It does not appear possible to avoid his having a casting vote under any circumstances. I have no objection to allow the chairman to be elected every where except in the three metropolitan municipalities; * but whether he be an official or not, he should have a vote like any other member. I am aware that this is not in harmony with the most advanced views, but I would point out that the motives and objects of the extreme party are by no means the same as those of the Government of India. The Government fears least the influence and example of the official chairman should lead the other members of the committee to vote with him against their own convictions, but I am certain that the object of the agitators is perfectly different. They know very well that in the more advanced municipalities, such as those of which they themselves would be members, the chairman has no such influence as is ascribed to him, and they wish, not so much to relieve the ordinary members of official pressure, as to tie the hands of the official, and to make invidious distinctions. When I say that in the advanced municipalities the chairman does not prevent the Commissioners from expressing their own opinions and voting accordingly, I may speak with some confidence, as I have been chairman to the Krishnagur, Burdwan, Dacca, and Suburban municipalities; and though I am not prepared to say that no individual member of any one of these would vote to please me, I do believe that I could not carry any measure which did not really commend itself to the majority.

* Calcutta, Howrah, and the Suburbs.

9. In a committtee, the members of which are weak and easily let to vote against their convictions, the fact that the chairman has or has not a vote will be perfectly immaterial. If the chairman is known to have a strong bias in one direction or the other, the mere act of voting, or abstaining from voting, will be immaterial. Indeed I am of opinion that a chairman who is inclined to be overbearing and to force his own views on the committee is more likely to exert himself for this purpose if he has no vote than if he has one: he will be an unseen puller of wires, and not the less powerful because he is unseen. On the other hand, a chairman who endeavours to ascertain the real wishes of the members, and to confine himself in the main to the prevention of mistakes, is not a person whom it is either necessary or even wise to deprive of the legitimate expression of his opinion by his vote.

I object therefore to the proposal, because I think that in the more advanced committees the diminution of the prestige of the executive officers will not be counterbalanced by any advantage, and that in the less advanced the rule suggested would defeat its own objects, especially in the very cases which it is designed to meet.

10. There is one respect in which I should be disposed to go beyond the proposals of Government. I do not think that either the introduction of the system of election of members or the bestowal of the power to elect a chairman should be made to depend upon the presentation of a petition signed by one-third of the rate-payers. It is not generally proposed that all rate-payers, irrespective of the amount of tax paid, shall have votes; and it is not reasonable to expect that rate-payers who will not have votes will care to petition that other people shall have them. Even in cases in which one-third of the rate-payers sign the petition, it is to be feared that very questionable means will often be employed to procure the signatures, and that the petition will not really be an expression of the deliberate and intelligent opinion of so large a proportion of the rate-payers. It is a fact not without significance that though my subordinates and I have taken every opportunity of making known the provisions of section 16 of the Municipal Act, and though in one important case I have

expressly said that I would support an application made in accordance with the terms of the law, not one petition has yet been received. In some cases efforts have been, and are being made: in others it is admittedly hopeless to expect compliance with the provisions of the Act. Why should the hands of Government be tied? Why should Government not be allowed to decide whether the elective system should or should not be tried? If it is really desired to extend this system, the restriction should be removed, and Government permitted to act on the best information available.

11. A general question of some importance is whether any tests except property tests for electors or for members should be required. A large number, in fact the majority of the persons consulted, are in favour of educational tests in substitution for or in addition to property tests. The cases of electors and candidates seem to me to differ. In the case of electors I am not of opinion that any but rate-payers should have votes. I would fix the qualifying rate low enough to prevent the monopoly of a single class, but I would insist rigidly on the payment of rates as a qualification. I do not know that in wisdom and discretion a young gentleman, who has recently passed the entrance examination, is likely to be in any very marked degree superior to a shrewd but uneducated shopkeeper or workman of double his age. No doubt he will have fewer prejudices, but he will be far inferior in experience of practical life. But I think that it is unnecessary to found our judgment on such considerations. If the question were of a parliamentary franchise, I should by no means object to education as a qualification, though I should fix a high standard. There are many subjects which come before the legislature, in which all alike are directly interested, whether they do or do not possess property to a certain value; but the immediate purpose of a committee for local self-government is the expenditure for local purpose of taxes locally raised, and it appears to me that those who pay should exercise the control.

12. It has been suggested that a certain amount of education should be required in addition to the property qualification. The suggestion is plausible and easy to make, but in practice it would be difficult to work out. By what process would the qualification of this man or that be ascertained? The standard must be low, and who is to fix it? Besides I do not think that the mere possession of the arts of reading and writing necessarily implies fitness for the franchise, or the want of them unfitness The assumption seems to be sufficiently safe for practical purposes, that the head of a household, contributing a certain amount of taxes, is fit to exercise the franchise. I would allow women to vote.

13. If we had, or could reasonably expect to have, a thoroughly intelligent body of electors, perfectly sensible of their own true interests, and not liable to be drawn away by prejudice, by the persuasions of designing men, or by party-feeling, I should say that it would be unnecessary to lay down any qualification for candidates. But we are not so sanguine as to expect this, and therefore I think that it is necessary to limit the choice of the electors to a body of men who may be presumed to be the most fit to be chosen. Doubtless whatever mode of limitation we adopt, we shall find unfit persons who will be eligible under our law and rules, and also fit persons who will be ineligible. This is an unavoidable difficulty; to reduce it as far as possible, it is necessary to have regard to local circumstances, and for this reason I would not lay down in the law any rigid limit either in the case of candidates or in that of electors. I would let the limit be fixed by executive order of Government in the first instance, and I would give power to revise the orders as occasion might require.

14 If there is to be a separate qualification for candidates, it seems to me that the same reasons exist for a property qualification as in the case of electors It has been suggested that educational qualification should also be insisted on; some even go so far as to say that every candidate should have a competent knowledge of English. In some cases, for example in the Suburban Municipality, this is no doubt necessary; but in others it is not, and I would not make it the subject of a general rule. Perhaps it is hardly necessary to lay down any rules at all on this head, for matters will certainly adjust themselves. In a few instances incompetent men may get into the committees, whom rules might have kept out; but if our electors are to be held to be fit to choose their representatives, we must trust them to some extent, though not absolutely. It is certain that no perfectly illiterate person will ever be elected.

I would retain for candidates the restriction which is at present in existence, that they shall not have been convicted of a non-bailable offence; but I am disposed to think that it would be better to substitute "imprisoned on conviction" for "convicted." A suggestion has reached me that any person who has been convicted of a non-bailable offence during the past three years should be disqualified But a considerable proportion of our jail population, not to speak of undesirable persons now at large, would thus be pronounced fit for service, and there would seem to be little ground for making an invidious distinction between these persons and others whose felonies may have been committed or discovered more lately.

15. Having thus briefly discussed a few of the more prominent matters of general importance, I now proceed to consider this district in particular. In doing so I feel that I am at a great disadvantage, for I have been in charge for a very short time, and the exigencies of work at head-quarters have prevented me from obtaining even the local knowledge and experience which might have been acquired in this brief space. I have done all in my power to compensate for this want of personal knowledge by referring to other people, but yet I am sensible that it must detract from the value of my report. I know enough, however, to be thoroughly aware that the problem before me is much more difficult than hat which is to be solved in any other district of which I have had experience. One is

apt to think of the 24 Pergunnahs as the metropolitan district, and to imagine it a tract subjected for some generations to the civilizing influences of the great city of Calcutta, and therefore ripe for political experiments of the most advanced nature. Where is "local self-government" (one might ask) to take root and flourish, if not within a circle whose radius does not exceed some 50 miles from the head-quarters of Government, of commerce, of education, and generally of all civilization in Bengal? In fact, however, the district contains tracts in all stages of development, from impassable forest and marshes up to the Suburbs of Calcutta, which, except in the maps, are not to be distinguished from the city itself. The western portion from Garden Reach to the northern extremity of the district, a distance of 30 miles, is one continued line of towns inhabited by educated and enterprising communities, while, on the east, the population is almost purely agricultural, and, on the south, what population exists is occupied in reclaiming lands which have been waste for centuries. In the first of these tracts there is a school in almost every village; in the whole of the last there is not a single important school aided by Government. It is sufficiently clear that it is no easy task to deal with these gradations; to lay down uniform systems of self-government is impossible: lines of demarcation must be drawn, and the question is, where these lines are to be drawn, so that we may carry out the policy of Government so far as may be possible, and yet abstain from pressing advanced institutions into regions to which they are unadapted? It will be necessary to consider each portion of the district in detail, and to deal with it separately, and this I now proceed to do.

Suburban municipality.

16. *Sudder sub-division.*—It is said that Government is separately considering the constitution of the Suburban Municipality, but I am not aware what changes it is proposed to introduce. I have, however, asked the Municipal Commissioners for reports. There is considerable difference of opinion amongst the Commissioners as to the advisability of the introduction of the elective system into this municipality. The majority are in favour of its adoption, but there is a somewhat strong minority, headed by the Vice-Chairman, Mr. Sterndale, who consider that the present system works much better than the elective system ever would.

17. For a long time an attempt has been made to obtain the necessary signatures to a petition asking for the elective system; but up to the present this has not been successful I am informed that the promoters of the petition made the mistake of attacking the Commissioners under the existing system, with the obvious result of raising some opposition on the part of persons who would otherwise have been content to remain neutral or even friendly. A petition is again in circulation, and I am told that there is some chance that one third of the rate-payers may sign it; but this is doubtful. In connection with this matter I may mention that I was invited to preside at a public meeting of rate-payers at Kidderpore. It was satisfactory to me to find that an official chairman was not distasteful to the promoters of a meeting of this kind; but I thought it best to decline. It appeared to me that it was wiser for me to take no active part in the movement, and that I could do no good by simply putting to the meeting a series of resolutions in the form which has become stereotyped. In declining the invitation, however, I said that if the petition required by law could be submitted, I would recommend the introduction of the elective system in some form, and I think that this system should be introduced into this municipality. The area is very large, and contains many persons perfectly fit to be Municipal Commissioners; the conditions are not those of a mofussil town, where the officers of Government are well acquainted with all the prominent citizens; and there seems to me to be a special danger that the nominees of Government may not perfectly represent the rate-payers. In such a municipality it is to be feared that there is little chance than an able and ambitious man of no very high position can obtain a nomination; but there are men of this class who would be useful members, as I have mentioned above. I regard the establishment of "Rate-payers' Associations" as an indication that there are interests of importance which are not sufficiently represented in the existing institutions. The municipality itself should be the "Rate-payers' Association," and where there is an organized opposition outside, possessing any strength, I think it is clear that some modifications are required.

18. It will not, I hope, be understood that I wish to disparage, even in the smallest degree, the able and the experienced gentlemen of rank and position in society who are now Municipal Commissioners. They have much impressed me, during the short time that I have had the honor of being their Chairman, with their aptitude for, and devotion to public business, and I should hope that if the election were substituted for nomination, we should find many of them restored by the votes of the rate-payers to the office which they have so well filled. For reasons which I have already given, I would have two-thirds of the Commissioners elected and one-third nominated.

19. On the subject of the respective qualifications necessary for voters and for candidates there are great varieties of opinion. Universal suffrage is advised by one gentleman, a qualifying amount of income by others, while others fix the payment of rates to certain amounts as their standards. I will not now, as there is not before us at present any direct proposal to introduce the elective system, discuss at length these various suggestions. I will content myself by saying that in my opinion the condition of our society is not ripe for universal suffrage, and that there would be grave practical difficulties in the way of the adoption of *income* as a test. The payment of rates is a comparatively simple and satisfactory test. As to the amount to be taken as the standard, my advisers suggest amounts varying from Rs. 2-4 to Rs. 25 per annum. It is obvious that perfectly different constituencies would be obtained by adopting these respective standards; for my own part I should prefer a low

standard to a high one. I do not propose to discuss the question whether the chairman should or should not be elected. The Government, I believe, has determined not to change the existing system in that respect. I shall enclose in this report the votes of the Suburban Commissioners, who have been so good as to favour me with their advice. I will, however, ask for their return, for they will be very useful if hereafter it may be necessary for me to report on or to devise a detailed scheme for the municipality.

20. I now come to consider the sudder sub-division apart from the suburban municipality. This tract comprises an area of 420 square miles and a population of 384,972, and includes three municipalities, viz. (1) the South Suburban with 51,658 inhabitants, (2) Baranagore with 29,982, and (3) Rajpore with 10,576. Subtracting these from the total population it will be seen that the rural population amounts to 292,756.

21. The Commissioners of each of the different municipalities propose that the elective system be introduced, and in truth it is probable that in these localities the probability of success is at least as great as in any other part of Bengal. At the same time, here as elsewhere there is no indication whatever of any real popular movement in favour of the introduction of the system, and in no instance has a petition in accordance with the provisions of the Municipal Act been presented. I will briefly discuss each municipality separately.

22. *South Suburban.*—At a meeting held by the Chairman, at which the Municipal Commissioners and a number of other leading gentlemen of the locality were present, the following resolutions were adopted:—

I.—The elective system should be introduced, but the municipality remain a second class one.

II.—That the system of voting should not be by ballot, but openly.

III.—That the qualifications for a voter should be—

(1) that he be a resident of the place;
(2) that he should be able to read and write;
(3) that he should have an income from whatever source, amounting to not less than Rs. 200 a year;
(4) that he should not have been convicted of any non-bailable offence;
(5) that he should be above the age of 18 years, *i.e.*, legal majority.

IV.—That the essential qualifications to be possessed by a Municipal Commissioner should be—

(1) actual residence;
(2) above the age of 30 years;
(3) non-conviction of any non-bailable offence;
(4) either (*a*) that he should be able to read and write, and at the same time should be able to understand English, and that he should in addition be in possession of a gross income from any source amounting to not less than Rs. 1,000 a year; or (*b*) that he should have property sufficient to entitle him to vote, and in addition should either be a B.A., a higher grade pleader, a qualified engineer, an engineer already in Government employ, or a deplomaed doctor.

V.—That there should be no representation of the minority.

VI.—That there should be a general election every three years, but that the Commissioner should be liable to removal by the local Government on good and sufficient cause being shewn.

23. With regard to the chairman, the majority were of opinion that the Commissioners should have the option of electing their own chairman, whether official or non-official; but a strong minority, with whom the present Chairman agrees, would have an official chairman for the present. I have no objection to an elected chairman. They are unanimously of opinion that the chairman should only have a casting vote.

24. In resolutions I and II I concur; in the case of resolution II, I should hold the opposite view if I could see any practical method of managing an election by ballot. I fear, however, it would be exceedingly difficult to secure secrecy. In the case of resolution III, I agree in clauses (1), (4), and (5), but not in (2) or (3). I need not repeat the objection to an educational test which I have already given above I do not think that it will be satisfactory to take income as a test, because I believe it will be impossible to ascertain the amount in many cases. Very difficult enquiries would sometimes be involved, and in the case of a hot contest innumerable attempts would be made by each party to gain strength by exaggerating the income of friends and by understating that of enemies. The rate is open to much less objection. The Russapugla Improvement Association suggests Rs. 3 as a limit, and to this I would agree. The number of voters so qualified would be 1,530.

24. In the case of Resolution IV, I approve clauses 1 and 3, and have no objection to clause 2. I would omit the income provision from clause IV (*a*), and would substitute for it the payment of a rate of not less that Rs. 12 per annum. I am disinclined to adopt 4 (*b*), though I have no very strong objection to it. For the present, till further experience is gained, I would accept Resolution V; to VI, I agree. The municipality now consists of 12 wards, and there are 17 members besides those who are *ex-officio*. I should be disposed to have two elected members for each ward, and half as many nominated members.

25. *Baranagore.*—The Commissioners and others wish the elective system to be introduced, but they wish that the present municipality should be split up into one first class one including the town of Baranagore, and two second class ones including the outskirts which are merely

villages. I have not local knowledge enough to offer an opinion. Probably what is really wanted is to exclude some of these villages from the municipality, but I would make no change at present. As regards voting qualifications, they are opposed to any sole educational qualification, and I consider that a resident, in order to be entitled to a vote, should pay Rs. 6 house-tax a year, and that a candidate for the commissionership should pay at least Rs. 25 in rates and taxes. This would give a total number of 438 eligible as voters and 107 eligible as Commissioners. They would prefer an elected chairman—a recommendation which is backed up by the late chairman, Mr. Badcock. I have received votes from the Baranagore Rate-payers' Association and the Areadaha Rate-payers' Association, to both of which I attach considerable importance. Both these associations advise the introduction of the elective system into the municipality, and to this I would agree. I would divide the municipality into blocks or wards, say six in number, and allow two elected members for each; for every two elected members on the committee I would have one nominated. On this latter point the associations are silent, but from the moderation with which they have expressed their views, I do not think that they would object. On the subject of qualification for voters they make the following proposals:—

Attainment of the age of 21 years.
Residence or ownership, provided that the voter—

(1) pays an annual house tax of Rs. 3, or
(2) pays Rs. 10 license tax, or
(3) has an annual income from any source of Rs. 300, or
(4) has passed the vernacular scholarship or university entrance, or is a registered mooktear, a certified native doctor or kabiraj, and a teacher or a pundit in any English school or pathsala or tole.

A second vote to be given to a qualified voter paying an annual house tax of Rs. 12 and upwards or having an income from any source of Rs. 1,000; but no voter to have more than two votes, whatever may be the number of his holdings.

Areadaha.

Adult age.
Also to be resident in the municipality.

(1) Payment of at least Rs. 2-4 house-rate.
(2) Having passed the Entrance Examination, being a mukhtear, pleader, a passed medical practitioner, licentiate in civil engineering, or pundit, or a school-master.

26. Of all these qualifications I would adopt three only, viz. adult age, residence, and payment of municipal taxes, of which I would fix the amount at Rs. 3, which would give a total number of 942 electors. Of the educational tests I do not approve, and I would point to these two examples of the difficulty of making an exhaustive list of educational qualifications which should be exempted. Obviously some trouble has been taken in framing these suggestions, but further consideration would have shown that there are serious omissions. For candidates neither Association proposes any property qualification. I have above shown my reasons for not accepting this suggestion. The qualification might be the payment of house tax to the amount of Rs. 12 yearly. Both Associations propose that the chairman should be elected by the committee, which should be free to choose either an official or a private person, and that in either case he should have a vote. With all this I agree.

27. *Rajpore.*—Here, too, although the municipality contains only 10,576 inhabitants the Commissioners wish for the introduction of the elective system.

They propose that the qualification for voters should be the payment of Rs. 3 house-rate yearly, or the possession of an income of Rs. 250 a year. The former test would give the franchise to 415 individuals.

The Commissioners' qualification is placed at the payment of Rs. 6 a month house-rate, or possession of at least Rs. 500 annual income.

They at the same time propose that an education qualification should entitle a man to vote, and a graduateship in either arts, law, medicine or engineering, or the passing of the First Arts Examination, should make a man eligible for a commissionership. Under the house tax qualification only 150 would be eligible for election. I would adopt the qualification of payment of house-rates as suggested; but for reasons which I need not recapitulate, I would reject the educational tests, as also the tests of income.

At a meeting of the inhabitants it was proposed that the chairman should be non-official, and that he should have votes. I would allow the Commissioners the option of choosing an official.

28. *Sudder Sub-Division, Rural Tracts.*—The sub-division contains four thanas outside municipal limits—Sonapur, Bistoopur, Acheepur, and Bhangur. Assuming the qualification for voters proposed in the Government circular, there would be 231 persons qualified under the road cess qualification, 332 under the license tax (this would include many residents within municipal limits). Under the same circular there would be 180 qualified by payment of road cess, 88 by payment of license tax, to sit in the board.

29. *Sudder Sub-Division.*—If the local board be established, it will have under its control—metalled roads, 26 miles, almost; unmetalled roads, 50 miles—costing annually Rs. 17,869 and Rs. 3,498 respectively. There are also village roads, the annual repairs of which cost Rs 2,006.

The rural pounds produce an annual income of Rs. 1,720, and there is an annual expenditure of Rs. 539. The annual aid to education throughout the sub-division amounts to Rs. 4,575. The work to be done in this sub-division is therefore somewhat important; but unless persons resident outside the limits of the rural tracts were admitted to the board, I think there would be considerable difficulty in obtaining suitable members. The municipal system has been so extended in this sub-division as to include almost all the town population, and with it the great bulk of the non-agriculturists. It is the opinion of many natives, even among those who wish to see elective municipalities, that an elective local board in this tract is not likely to be feasible. I agree with this view, and would allow the appointment of a board of nominated members. I would not insist on their being actual residents of the rural tracts, but would be content if they were residents of some one of the municipalities, provided they were in some way interested in the rural tracts. I would allow these nominated members to choose their own chairman and vice-chairman. I would not have a large number of members—not more than two for each thana; and in making the nominations, care should be taken to select for each thana representatives of the local interests.

30. It may be thought that this is a timid suggestion, but I am satisfied that, on the whole, the rural portions of this sub-division are backward—parts of it are very much so, and generally I should say that it is far less suited for the experiment of an election than any of the sub-divisions of Dacca, Burdwan, or Nuddea. I would, therefore, while giving those interested a large share in the Government of this tract, postpone the elective system till experience had been gained of that system in more favourable localities, and also of the working in this of the nominated committee which I am now proposing.

31. *Diamond Harbour.*—This sub-division is situated on the left bank of the Hoghly, and extends from the sudder sub division to Sagar Point It is to a great extent made up of small villages in a very backward state, and contains not one town, unless Diamond Harbour (into which, however, municipal institutions have not been introduced) be deemed to deserve that name. The area is about 417 square miles, and the population (by the last census returns) 344,330. It is divided into five thanas—Culpe, Bankipore, Davepore, Diamond Harbour, and Sultanpore. There is one charitable dispensary, no Government school, and only one aided higher English school in this sub-division.

32. The Sub-divisional Officer reports that at a meeting attended by at least 100 people out of a population of 350,000, it was resolved, on the motion of two non-resident gentlemen, to introduce the elective system and a local board without any Government official necessarily connected with it. This, however, in the opinion of the Sub divisional Officer himself, and in that of the moonsifs and other experienced men, would be an unwise step to take; and they would prefer a local board to be established with the Sub divisional Officer as chairman, a vice-chairman elected by the members of the board, one-third of whom should be nominated by Government, and two-thirds elected by the people. This is no doubt a counter view to that of the meeting quoted above; but the report of the Sub-divisional Officer seems to me to show clearly that to introduce the elective system, even with any modifications or restrictions which could be devised, would be simply to court failure.

In the *first* place the people are extremely backward in civilization, and the Sub-divisional Officer thinks would take but little interest in the work. In the *second* place, education does not seem to have made any progress at all in the sub-division. There is only one aided higher English school, and out of the whole population there are not three graduates or 30 under-graduates. *Thirdly*, the people are in a very backward state as regards trade. There are only 258 who pay any license tax at all, and out of these 216 are in class 6 and 42 in classes 3, 4, and 5. Assuming for a moment that the local board is established, and the qualifications proposed by the Sub-divisional Officer introduced (Rs. 10 license tax), there would be only 258 persons entitled to vote as possessing the qualification in this respect.

Fourthly, there are no resident zemindars of any substance; the greatest zemindars are non-resident, and the resident zemindars mere peasant proprietors. The real backbone, therefore, of the local board is conspicuous by its absence. For all these reasons it seems advisable to pause before introducing the elective system into this sub-divison. The number of those who would be entitled to the franchise is extremely small, and there seems no probability of the people taking any interest in the proposed scheme. Better reasons than these can scarcely be found for waiting a few years until education is advanced and the actual method in which the elective system can be wisely worked has been discovered by experience elsewhere. If, however, it be introduced, the Sub-divisional Officer proposes that the qualifications for voting should be the payment of Rs. 10 license tax, Rs. 10 road cess, or the possession of Rs. 300 income, and the qualification for membership should be the payment of Rs. 20 road cess, Rs 10 license tax, or the possession of Rs. 600 annual income. Under-graduates in arts, medicines, law and science, should also be eli ible. At the same time only two-thirds of the members should be elected, one-third being nominated by Government; the total number being regulated by the Sub-divisional Officer with reference to the number of thanas. Within the whole sub-division there are only 62 people who pay Rs. 10 road cess. Adding this to the number qualified by payment of Rs. 10 license tax, it will be seen that the total number of qualified voters for the local board elections amounts to 320.

33. Though every consideration points to the conclusion that Diamond Harbour is not yet fit to receive the elective system, I have no objection to attempt the introduction of a

nominated board. Such a board might eventually be supplanted by elected members when the sub-division is thought to be ripe for this change. I shall propose that the constitution of the board should resemble that which I have proposed for the rural tracts of the Sudder sub-division.

34. The following statistics will indicate generally the work to be done by the board :—They will have under their control metalled roads (1¾ miles), costing annually Rs. 548 to repair, and unmetalled roads (79 miles), costing Rs. 4,491 annually. At the same time the village roads cost Rs. 2,208 annually. The total expenditure on road repair is therefore Rs. 7,247 annually.

The grant to education amounts to Rs. 3,970. The income from pounds amounts to Rs. 2,185 annually, and the expenditure to Rs. 358.

35. *Bussirhat.*—This sub-division, which is 363 square miles in extent, contains a larger number of inhabitants than any other sub-division except the Sudder. It includes five municipalities within its boundaries—

(1) Bussirhat	...	...	...	...	14,843
(2) Baduria	...	...	...	...	12,981
(3) Gobardanga	...	...	...	...	6,154
(4) Etenda Union	...	...	...	...	5,607
(5) Taki	...	...	...	...	5,120

The last three may perhaps be considered too small to have the elective system introduced into them ; but the Sub-divisional Officer himself reports in favour of the extension of the scheme to all five municipalities, and I should be disposed to accept the suggestion. The Sub-divisional Officer considers that a certain amount of nomination by Government would be advisable, and recommends that two out of the 12 Commissioners of each municipality should be nominated, and that the remaining 10 should be elected by the rate-payers.

36. The qualifications for voters should be residence or holding property within the municipality, and the payment of an annual rate of not less than Rs. 3 ; 386 persons would be qualified in Bussirhat, 302 in Baduria, 203 in Gobardanga, 189 in Taki, and 93 in Etenda.

37. The qualifications for Commissioners should be residence and the payment of Rs. 4½ as rate, combined with ability to read and write. A Commissioner should also be of full age, and should never have been convicted of a non-bailable offence. The Commissioner should be allowed to elect their own chairman, who should have the usual votes whether he be an official or not. All these proposals I should accept except that I think a board of 12 Commissioners, eight elected and four nominated, would be suitable to the largest two municipalities, and one of nine (elected and nominated in the same ratio) for the small ones.

The Sub-divisional Officer is of opinion that it would be useless to attempt to introduce the local board into the sub-division, inasmuch as all the men who possess any education within the sub-division are residents of municipalities. Should it be determined, however, that a local board must be introduced, he suggests that it should be formed of two members from each municipality. This is plainly an untenable view. The local board is constituted for the purpose of managing the affairs of places outside municipal limits, and its members should be distinct from those of the municipal committees. Inasmuch, however, as there are no fewer than 278,356 people residing outside the municipalities, and as the country will shortly be opened up by railway, it will probably be thought advisable to establish a local board.

The elective system would probably not work here. The country apart from the municipalities is purely agricultural ; much of the sub-division is made up of reclaimed Sunderbuns ; there are few large villages, and communication with the more civilized parts of the country has hitherto been difficult. If any local board were established, it would be better to have a board of Government nominees, whose places could be taken by elected members at any future time, when the sub-division might be thought ripe for such an innovation.

The following information is given regarding the matters which would fall within the scope of the board's supervision :—The annual expenditure in road repairs amounts to Rs. 10,866, Rs. 7,200 being spent on 12½ miles of metalled roads, 1,576 or 44¾ miles of unmetalled, and Rs. 2,002 on village roads. The total annual grant to education amounts to Rs. 2,875.

The total annual income from pounds amounts to Rs 690, and the total annual expenditure to Rs. 146.

38. *Barripore.*—The sub-division of Barripore contains a population of 188,061 people, distributed among the jurisdictions of three thanas. The inhabitants of one of these thanas (Canning) are engaged simply in reclaiming jungle lands. Of the rest of the sub-division also, much is in an equally early stage of development. There are scarcely any persons of education and intelligence to be found outside the small towns of Barripore and Joynuggur. The materials for the formation of an elective local board are wanting, and there is no chance of success should an attempt be made to form such a board. I should be prepared to suggest, however, that a small nominee board might be appointed with the Sub-divisional Officer as chairman. It is under consideration whether the sub-division should not be abolished; if it be abolished, the local board might still remain, and the experiment be tried of appointing a local chairman.

The following statistics will indicate the work which the board would supervise :—

The pounds produce an income of about Rs. 900 with an expenditure of about Rs. 162. The board will have under their control metalled roads, 40½ miles, costing Rs. 15,546 annually to repair ; unmetalled roads, 21¼ miles, costing Rs. 981 ; and village roads, costing

annually Rs. 2,187, to repair. The total amount, therefore, annually expended on roads amounts to Rs. 18,714. There are no Government schools within this sub-division, but there are two aided English schools with a total annual grant of Rs. 105, and there are other schools also aided by Government. The total amount of the annual grants to education is Rs. 3,553.

39. The sub-division now includes two municipalities, Barripore and Joynuggur. There is a general consensus of opinion that Barripore is not fit for the elective system. It is a small town containing only 3,742 inhabitants, who are divided into two factions led by the contending parties among the zemindars. I am informed that the violence of the party-feeling in this locality was the cause of the establishment of the sub-divisional head-quarters at Barripore. Now, however, the peace is kept, but still there is great irritation. There is no third party and no middle class. The people have not the least desire for the elective system, and it is clear that it ought not to be introduced.

40. Joynaggur contains 7,685 inhabitants. Its conditions differ materially from those of Barripore. It is a place of trade, and has attracted a number of intelligent and enterprising persons. Party-feeling is not entirely absent, but there is probably not a town in Bengal of which this might not be said, and in Joynuggur it is perhaps less violent than usual. There appears to be a strong party in Joynuggur in favour of the elective system. A petition under section 16 of the Act is being prepared, and I believe the promoters expect to obtain the requisite number of signatures. The Sub-divisional Officer supports the proposal to make this municipality elective; he would propose that either a property or an educational qualification should be possessed by residents. The property qualification for voters would be payment of Rs. 3 per year as taxes. There would be 228 people within the municipality who could qualify on these terms. The qualification for Commissioners would be the payment of not less than Rs. 12 per year as rates. If this qualification were approved, 46 people would be eligible for election as Commissioners.

The educational qualification suggested for voters and Commissioners is the same, *i.e.* the passing of the University Entrance or any higher examination. This would probably make some small addition to the numbers mentioned above, but altogether they would probably not be more than 250 people eligible as voters, or 70 eligible as Commissioners. I would introduce the elective system into Joynugger, and would accept the property qualifications suggested above. The educational qualifications I would not admit. The town is small, and it would not be well to have so large a committee that there would be few qualified persons, or none, in reserve. It would probably be sufficient to divide the municipality into three wards, and have two elected and one nominated member for each ward. The chairman should be elected by the Municipal Commissioners; and as Joynugger is an outlying place, I have no doubt that a non-official chairman would always be elected.

41. *Barrackpore.*—This sub-division, which is 42 square miles in area, is one of the most advanced sub-divisions in the district. It consists of a long and somewhat narrow strip of country, traversed throughout its length by the Eastern Bengal Railway. On the west or riverside of the railway, the country is thickly populated, and contains several large and flourishing villages in which there is a considerable local trade. On the opposite side of the railway is one continuous expanse of paddy fields intersected by belts of jungle, and with few villages of any importance. How large a proportion the municipalities bear to the total area may be judged from the fact that out of a population of 62,417, only 14,398, or less than 25 per cent., live in places outside municipal limits.

The more important, and by far the more advanced, of the two municipalities, is that of south Barrackpore, containing 30,317 inhabitants. Mr. Bright, who had charge of this sub-division formerly, and is well acquainted with it, informs me that, in his opinion, this municipality is well fitted to have the elective system. The Municipal Commissioners are active, intelligent men, most of them possessing a good knowledge of English, and many of them showing marked activity and interest in the conduct of municipal affairs. If the experiment of a non-official chairman is eventually determined on, there are certainly one or two gentlemen who are probably quite equal to the post. The inhabitants, too, are to a large extent clerks of offices in Calcutta, and take perhaps a more real active interest in municipal matters than the residents in other places. From the large grants amounting to Rs. 1,700, which are now made to education, it is clearly shewn that they are energetic and zealous in the service of the public.

42. The case for North Barrackpore is not so strong. The municipality in question does not contain nearly the same number of educated natives as that of South Barrackpore, and does not include nearly such populous villages (the population being only 17,702 as compared with 30,317 in South Barrackpore), and many of the present Municipal Commissioners possess absolutely no, or at any rate a very limited, knowledge of English. There are, however, marked indications of progress; an excellent school has been founded by Baboos Sridhar and Bansidhar Mundle at Nawabgunge, which will very probably supersede the Government school at Barrackpore, and must in time exercise a powerful influence on the locality. I would introduce the elective system, and would allow the Commissioners to choose their own chairman. It is doubtful whether a suitable non-official chairman could be readily found, and no doubt the Cantonment Magistrate would be elected. The town should be divided into wards, each with three Commissioners, two of whom should be elected and one nominated. I would propose the same qualifications as elsewhere.

43. The sub divisional officer, agreeing in all points with the resolutions passed at a public meeting held at Barrackpore, recommends that the elective system should be introduced

with a non-official chairman, and would restrict the proportion of Government nominees (if any) to one-fourth of the whole number of Commissioners. He then proposes that the qualification of voters at municipal election should be the payment of Rs. 1-8 per year as tax, or the possession of Rs. 250 a year income. They must at the same time be residents, and in full possession of their senses. In order to be eligible for election as a Commissioner, a man must be a resident, must pay rates and taxes to the extent of Rs. 3 per year, or must be proved to be in possession of an income of not less than Rs 500 a year. From the lists furnished by him, it will be seen that there are in North Barrackpore and in south Barrackpore qualified voters and 424 and 555 persons qualified as Commissioners respectively. At the same time he proposes an alternative test to that of payment of rates and taxes, viz. the educational one. All residents who have passed the minor or vernacular scholarship examination or the Calcutta entrance examination, and all resident muktears and certificated native doctors, should be deemed eligible for a vote.

All resident graduates in arts, law and medicine, and engineering, and all residents who have passed the First Arts examination, should be eligible for election as Commissioners. This principle of educational franchise has never been favoured by Government, and would probably have a disastrous effect by enabling needy men with a smattering of education, who have no monetary stake in the municipality, to control its finances. I have already in several instances expressed my disapproval of the introduction of an educational test, and I have given reasons for not adopting the income test. I think the standard of property qualification suggested is somewhat low; it is certainly below the amount suggested by the great majority of opinions which I have received.

44. With regard to local boards, the sub-divisional officer proposes that the qualification for a voter should be residence and the payment of road cess of Rs. 2 per year, or the possession of income of Rs. 200 a year, and that the qualification for a member should be residence and the payment of road cess of Rs. 5 a year, license tax of Rs. 10 a year, or possession of an income amounting to at least Rs. 500 a year. These qualifications appear to me to be too low.

45. It is a matter well worth considering whether the parts of Dum-Dum and Barrackpore, outside the limits of the municipalities, might not be formed into one local board. The total number of people who would come under a joint local board only amount to 26,667, which is a very small number compared with the next lowest rural tract population (*i.e.* Barrackpore), 188,061. The Dum-Dum Commissioners have indeed recorded their opinion in opposition to this view, but their objection (viz. that the proposed amalgamation would unnecessarily increase the jurisdiction of the board) is evidently not entitled to much weight. So much of the population of both these little sub-divisions is contained within municipalities, that the work left for a local board would be insignificant. The number of electors would be extremely small, and if a board must be appointed, I should say that a very small nominee board—say of five members—would be ample. They might elect their own chairman.

46. *Dum-Dum.*—This sub-division, the smallest in the district, contains only 31,578 inhabitants, of whom 14,108 live in North Dum-Dum, 5,201 in south Dum-Dum, and 12,269 in the outlying tracts.

47. It may perhaps be thought advisable to introduce the elective system into so small a place as south Dum-Dum, but I should not object to it in both municipalities. A committee of nine members in the one case and six in the other would seem to be sufficient. The sub-divisional officer submits some extremely vague resolutions passed by certan people at a public meeting, which afford no accurate data on which a judgment can be framed.

The qualifications for a municipal voter proposed by them are the possession of property, education or social positson, or the payment of a rate of not less than Re. 1-8 per annum.

The Commissioners should have not less than Rs. 500 annual income, or should pay not less than Rs. 3 per year rates.

This last qualification seems an extremely low one, and would not, I think, be an advisable one to adopt.

They also propose that the terms of office should be two years, and not three, as suggested by nearly everyone else. The chairman might, they think, be either official or non-official; he should be elected by the Commissioners, and, if an official, should not have a vote.

They at the same time considered it advisable that a separate local board should be established for the sub-division, and that no junction should be made with Barrackpore.

Members of the board should be men possessing property, education and social position, or paying a cess of not less than Rs. 2 per annum, or possess an income of not less than Rs. 300 per annum.

It will be seen that it will be extremely difficult to draw a line where the status of a man of social position begins or ends; the standard suggested are very much too low.

48. With reference to the establishment of a local board, it may be noted that only 12 people within the sub-division pay road cess of Rs. 10 or upwards; such being the state of the case, a separate local board would seem to be an absurdity.

49. *Baraset.*—I now come to consider the Baraset sub-division. Baraset contains two municipalities—(1) Nyehati with 21,533 inhabitants, (2) Baraset with 10,533, while the rural population amounts to 240,508. The sub divisional officer recommends the introduction of the elective system into both these municipalities without any application being made under section 16 of the Municipal Act. He recommends that the franchise for a voter shall be given to (1) payers of Rs. 4 a year house-rate, or possession of an annual income of Rs. 500 or over; (2) pleaders, school-masters, &c. At the same time he considers that

Commissioners should posses an income of at least Rs. 1,000 per annum. The Commissioners would hold office for three years, and should elect their own chairman, who should be remunerated. In my opinion it is quite impossible, and at the same time extremely inadvisable, to carry out this proposal of the sub-divisional officer—impossible because in most municipalities the funds at disposal would not be sufficient to allow of an adequate salary being given to the chairman without hoplessly crippling the resources of the municipality; inadvisable because it would probably give rise to a large amount of scheming amongst needy men, who would be only too glad to act as chairman of any municipaiity if they could receive a sufficient amount of pay. Both these objections are to my mind fatal to the chances of success of this scheme. I should be inclined to allow the payments of Rs. 3 house-tax to constitute the voting qualification.

50. The sub-divisional officer appends to his report proceedings of three public meetings held in his sub-division. The chief points insisted on by the first meeting are the following :—

(1) That the chairman shall be elected, and if he be an official, he shall be denied the privileges of a vote.

(2) That all persons and rate-payers residing permanently within the jurisdiction of the local board and of the municipality, having an income of Rs. 300 a year, and teachers, pleaders, mukhtears, licensed doctors, titled pundits, moulvies, moonshees, akunjis, university graduates, and educated men of integrity and honesty, shall have votes, and in the case of municipalities a rate-payer paying not less than Re. 1 per quarter shall have a vote.

(3) That all residents possessing an income of Rs. 500, payment of Rs. 5 per annum road cess or Rs. 10 license tax, and all licensed doctors, pleaders, and teachers whose annual income is not less than Rs. 1,000, be eligible for membership of the local and municipal boards.

(4) A somewhat complete emancipation from official control. No official of lower rank than that of Commissioner is to interfere at all, and he only when moved by the "*bona fide* application" of 50 voters, and in the case of expenditure of not less than Rs. 5,000.

(5) The license tax, ferries and pounds, road-cess and public works cess, are to be made over entirely, and the committee is to have the power of raising money by local rates.

51. This is certainly a very liberal programme, and argues no little self-confidence on the part of its framers. I do not, however, discuss it at length, as I have already declined to recommend the introduction of the educational test apart from property, and the remaining propositions are not likely to meet with the entire approval of Government. With regard to the resolutions of the second public meeting, I consider that the qualification proposed for voters (12 annas as yearly house-rate) and Commissioners (Rs. 3 a year house-rate) are much too low.

52. The proceedings of the 3rd meeting held at Duttapooker, which commenced, as we are told, "with several speeches," are too vague to be of much value. The special point to be noticed is that it is proposed that in addition to the property qualification suggested by Government, there shall be a "merit qualification," *i.e.* "all men of education, honesty, and integrity be allowed to be voters, and men of profound education, honesty and integrity be allowed to represent at the board." It would be extremely difficult to work such a system practically. I confess myself unable to distinguish practically between the "men of education, honesty and integrity," who are to be voters, and the "men of profound education and known honesty and integrity" who are to represent them on the board; but it would appear that the framers of the resolution had some distinction in their minds.

53. It is suggested in the resolution that "official control should be confined to sanction certain acts and interferences when the educated men of 10 villages make a representation against the board." Another resolution permits the sub-divisional officer "to prepare lists of electors and representatives according to the qualifications proposed, and to convene a meeting of the electors for the election of the members of the Baraset board." I might well have left these resolutions in the appendix to the Deputy Magistrate's report had my object been merely to consider such proposals as are likely to be of any practical use. But I have thought it right to reproduce them here, because I think they will serve as warnings to any one who may desire to throw the administration of local affairs too much into the hands of what are sometimes termed the "educated classes." It may well be doubted whether the persons who could frame these vague and unpractical suggestions are likely to prove efficient administrators. I do not say that in time they may not, and I am not about to propose that they shall not have the opportunity; but I do think the necessity for caution is clearly apparent.

54. With regard to local boards, that sub-divisional officer thinks that two ought to be established in the sub-division (one at Halisahar and another at Baraset), if the limits of the municipalities were circumscribed as he wished. If they remain as they are, he would have a central board of not less than 12 or more than 20, with head-quarters either at Nebaudh or Chotajagulia. The chairman should be elected by the members, and the qualifications for voters and members should be those proposed by Government. He would not have any members nominated. At the same time he draws so gloomy a picture of the state of the people that it might well make Government hesitate before introducing an elective local board

into this sub-division. I am not in favour of the proposal to have two local boards, for I do not think that there is work enough for them, and the sub-division is sufficiently compact and its several parts accessible. The board in this sub-division would have under their charge over 45 miles of metalled and 66 miles of unmetalled roads, costing on an average annually Rs. 8,892 and Rs 3,107 respectively to keep in repair. They would also have 69 village roads, costing Rs. 1,465 a year, in repairs, five pounds, no ferry, no dispensaries.

I have no statistics with regard to the road-cess payment of Rs. 25 and upwards, but under the license tax test 96 people would be qualified for the Commissionership

There would be 186 persons qualified as voters under the road cess qualification, and 1,468 under the license tax, including inhabitants of municipalities. The Deputy Magistrate has not supplied a list of persons likely to be qualified under the *income test* suggested by Government for those who would not be qualified under the other two. But the number of such would be very small; the great majority of such persons would be pleaders and doctors, or Government servants and pensioners. Few of the last two classes drawing qualifying incomes would be found, and there would be no pleaders out of Baraset. There may perhaps be a few doctors, but altogether I should question whether there would be a dozen persons who would qualify. For my own part, I would prefer not introducing an income qualification at all.

55. There is, however, one qualification which has occurred to me, and is perhaps worth consideration. I am disposed to recommend that the experiment may be tried of giving a vote to the collecting member of each village punchayet. This office is a somewhat irksome one, and is not sought with much avidity. Possibly the bestowal of a vote would attach an additional attraction to it, but the chief advantage would be that a connection would be established between the village organization and the local board, and it seems possible that eventually this might become more intimate. There are 404 punchayets in the sub-division, and my suggestion would add as many voters

56. From what has been said above, it will be gathered that I propose to make a trial of the elective system in Baraset. That sub-division, on the whole, is more advanced, and it is certainly more homogeneous than any other in the district; and if the system is to succeed anywhere in the rural portions of the 24-Pergunnahs, it will be in Baraset. Even in this sub-division, however, the Municipal Act has been extended to the more populous and advanced portions, and I would not restrict membership of the board to persons actually resident in the mofussil parts, but would admit persons residing in the municipalities of the sub-division. The sub-division contains four thanas; for each of these I would propose three members, of whom two should be elected and one nominated. I should propose that at first the sub-divisional officer should be Chairman, though the Vice-Chairman should be elected. In order to prevent the Vice-Chairman being over-shadowed by the Chairman, I would assign him certain definite functions by law, though empowering the Chairman to make over to him any part of his own duties. This system would be to a certain extent elective, and would pave the way to the more complete measure of permitting the local board to elect its own chairman.

57. I have now considered the whole district, taking each portion separately; and though I am fully sensible how incomplete the review has been, I trust it may still be of service. As I have already stated, no petition in accordance with the existing law has been presented to me, and it is therefore not necessary for me at present to report regarding methods of election, and the rules by which they should be guided in individual cases. If I should hereafter receive such a petition, I will deal with it separately and in detail. If the legislature should think fit to abolish the restriction requiring a petition of one-third of the rate-payers, and the Government should agree with my proposal to try the experiments of election in municipalities somewhat freely, I will then go more minutely into the case of each such institution. By that time I hope I shall have acquired local knowledge enough to enable me to deal with the question more efficiently than I can now do. In the matter of the appointment of an official or a non-official chairman, it will have been seen that I am in favour generally of allowing the committee to make its own selections if possible. In any law which may be passed, I think it will be well to give Government authority to declare that the committee shall have the power of electing its own chairman. In some instances, the committees may decline to avail themselves of this privilege, or there may be really no suitable person. In this case Government must make the appointment. As a rule I should prefer a resident non-official chairman in outlying municipalities, because I think the fact of his being resident and able to look after work is a valuable qualification.

48. There is no special mode of voting which I think is called for by the local circumstances of Baraset, the only sub-division in which I propose to try the experiment of an elective board. I confess my entire inability to devise a system of election which would be free from all difficulty. If votes are given in person, they can only be given at the thanas, since there is no other machinery available which can be deemed in the least degree trustworthy. Such an arrangement would be inconvenient to most of the electors, and probably a large proportion of them would not take the trouble to vote. If the election be conducted by means of voting papers, there is no doubt that, in case of a contest, it would be impossible to prevent malpractices. Upon the whole, I think the latter would be the better plan; the voting papers might be issued and collected through the chowkidars, and as a slight protection, each vote might be attested by the signatures of two witnesses, inhabitants of the same village as the voters. It has been suggested to me that the witnesses might be members of the punchayets. This would afford a check in scrutinizing the votes.

59. I am strongly of opinion that it would be better to give the local boards and municipalities fixed grants than to give them the license-tax assessments and collections.

It must never be forgotten that in Bengal violent party-feeling prevails almost universally, and that the power of making assessments of license-tax is certain to be seriously abused. The grant to different localities would be most unequal—in some cases greatly exceeding the local wants, while in others they would be insufficient. If shares only should be given, a different rule would have to be made for each municipality.

60. A system under which Government makes grants according to the necessities of each locality at the time, seems to me to possess the advantages of elasti ity and economy, while it gives the Government an opportunity of retaining greater control than it otherwise could well exercise over the more important extraordinary works which the local committee might undertake. I see really no advantage in the proposition to give over the license-tax to local bodies. My objection to give them the public works cess is simply that I think Government ought to keep this as a reserve fund, and to deal it out to localities where it might be most required.

61. It is said in paragraph 31 of Government circular No. 5T—M, dated 5th July, that there is to be no general district council. Evidently Government must have under consideration some other method by which questions affecting whole districts may be settled. It will be necessary for some authority to arrange for the distribution of the services of the engineer and other higher establishments, and to provide for the construction and maintenance of works affecting areas more extensive than the jurisdictions of the local boards. I have heard (I know not how far the information is correct) that the Government of India has declined to accept the proposal to establish a central board in Calcutta. If this be so, it will be necessary to substitute some other authority. To make over the control to the local officers would apparently be inconsistent with the views of Government. Under these circumstances I see no solution of the difficulty before us. My own individual opinion is strongly in favour of the original scheme under which the general management should be in the hands of a district board, while the arrangement of purely local affairs should be made over to purely local boards.

62. It is extremely difficult to make any definite suggestions with regard to the control to be reserved to the executive authorities, until we know exactly by whom and over whom the control is to be exercised. If we knew these particulars, there would be no great difficulty in suggesting a scheme for trial. Some of the principles which I would recommend for adoption are the following:—

(1) Nothing should be done without sanction, which is likely to affect any other locality than the jurisdiction of the local committee.
(2) No new work should be done without sanction, which is likely to have an injurious effect, whether within or without the jurisdiction.
(3.) No new work should be undertaken without sanction, which will cost more than a certain sum.
(4) No repairs should be executed without sanction in excess of certain scales laid down by Government either generally or with reference to the locality.
(5) Limits may be laid down by law defining the proportion of income which may be expended on this or that department, (as for instance, *Establishment*, so much per cent., *Education*, so much per cent., &c.) and expenditure in excess of these limits should require sanction.
(6) The appointment of the superior members of establishments should require sanction.
(7) The banking arrangements of the boards should require sanction.
(8) The issue of debentures should require sanction.

It is also necessary that powers analogous to those of the local government board in England, to compel the execution of necessary works, must be given to some authority. I am sorry to express myself so vaguely on these topics; it is unavoidable in the present stage of the discussion; hereafter when main principles have been clearly and finally settled, it will be possible to make detailed proposals. This, however, would be best done by a committee empowered to draft a scheme. The isolated opinions of individuals may have some value as suggestions, but what is really required is a committee acquainted with the final opinion of Government, and able to proceed from step to step, so as to prepare a consistent and practicable scheme in harmony with their opinion.

63. I wish it to be understood that in the detailed recommendation which I have given regarding the several localities under consideration, I have gone as far as I think it is possible to go without great risk, but I have felt myself bound by the orders of Government to go so far as I have done. My own views of the general policy to be pursued are very nearly those which were given in my former report, and these differ but little from those expressed in Sir Ashley Eden's letter to Government, and indeed but little from the first intentions of the Government of India I am decidedly in favour of giving the people more and more power by degrees, but I would do so more gradually and tentatively than the Supreme Government appears to think expedient In writing this report, I have, however, endeavoured to bear in mind that it is my duty to carry out the wishes of Government rather than my own views of general policy; and I am prepared to do this to the best of my ability.

64. I have been very materially assisted by the opinions and advice which I have received both from my own subordinates and from gentlemen not in the service of Government. Public meetings have been held in various parts of the district, and I have collected a considerable mass of individual opinions, to which I attach more weight than to the resolutions of quasi-popular assemblies. I forward for your purusal those noted in the margin, besides the report of the sub-divisional officers and their enclosures. I also enclose statements bringing together some details of the district administration, which I think will be of use to you. In conclusion, I wish to bring to your notice the great assistance which, in compiling this report, I have derived from the industry and intelligence of the Assistant Magistrate, Mr. Bright

No. 1784JG, dated Kishnaghur, the 20th September 1882.

From—W. V. G. TAYLER, ESQ., Magistrate of Nuddea,

To—The Commissioner of the Presidency Division.

WITH reference to your No. 4MG, dated the 12th July 1882, forwarding the resolution of the Bengal Government on the proposed introduction of the scheme of local self-government, I have the honor to repeat that, with every wish for the success of the scheme, I am not in favour of its introduction as a whole. It seems to me that those who support the scheme in asking for entire independence, and for the non-interference of Government officials in any form, are acting unadvisedly, and will, I fear, find in the end, if their wishes are granted, that they have been the worst enemies to the scheme. I do not believe that they realize all the responsibility, labour, and trouble which will be thrown upon them; the difficulties against which they will have to contend; and the time which it will be necessary for them to devote in order to carry out their duties efficiently.

2. I am very strongly of opinion that, if the scheme is to be a success, it should be introduced by degrees, and the members of local boards should at least for a time be associated with officials as their Chairman, under whose guidance they may not only acquire an insight into the requirements of self-government, but may by experience realize what are its difficulties, and thereby be in a better position to judge whether they really can undertake its duties independently.

3. That there are many persons especially in this district who, if they give their time to it, are capable for the duties, I doubt not; but I very much doubt whether such persons can be found to represent all the different parts of it. Indeed, from the report submitted by the sub-divisional officers of Meherpore and Bongong, I do not see how it is possible to have a local board at those sub-divisions.

4. The above view is more or less shared by all my subordinates, and was, till the late resolutions of Government were circulated, concurred in by all native gentlemen with whom I have conversed on the subject. Now, however, as far as the latter is concerned, there has been a complete change, and nothing will suit those who have taken any active part in the several meetings which have been held throughout the district but a full introduction of self-government, unrestrained by official interfence, but, as a general rule, without the power of taxation.

5. As before stated, I have every desire to see the scheme succeed, and hence it is that I would suggest that, as a preliminary step, existing municipal commissioners should be invited to obtain the signatures of the required number of rate-payers to applications for the introduction of the elective system within their municipalities; and that, when such applications are made and granted, the power to elect their own chairman should be given, the rules for election of members being framed on the basis of those already existing at Kishnaghur. In a limited area, and in towns where intelligent native gentlemen are generally to be had, there is not the same chances of failure, and therefore the introduction of the scheme may be safely attempted.

6. In regard to the local boards, I am of opinion that, except at Meherpore and Bongong, where a branch committee can alone be established, one may be formed at each of the sub-divisions of this district, one-third of the members being nominated and two-thirds elected, the sub-divisional officers and Joint Magistrate at the Sudder being made, at least for the first year or two, chairman. Applications for a board at Santipore and Gosai Durgapore have been made, but it seems to me that the applicants have been prompted more by the desire to obtain power than with any idea of furthering the scheme.

7. The general desire of the educated and higher classes is to elect their own chairman, but I am of opinion that this is chiefly confined to those classes, the lower orders being quite ignorant of the advantages or disadvantages of any change of this kind in the administration of affairs. If, however, the Government are desirous of making the attempt, the boards at Kishnaghur and Ranaghat may be granted the power; for, if the measure succeeds anywhere, it ought to do so at these two places. At Kooshtea and Chooadangah success is more doubtful. The sub-divisional officers are, however, prepared to make the attempt; and if the desire of the people is acceded to, the failure, if such turns out to be the case, will, I am sure, not be due to any unwillingness on the part of the Government officials. At Bongong the sub-divisional officer reports that there are not persons fit to represent all the thanas within the sub-division At Meherpore it is evident that very little real interest is taken, except by a few, in the scheme. It will therefore, I consider, be necessary to establish at these sub-divisions a committee corresponding to a branch committee under the existing road cess, as can be formed by an amalgamation of the road, education, and dispensary committees with the sub-divisional officer as chairman thereof.

8. There is some conflict of opinion in regard to the rules for election. All, however, are agreed that the standard laid down in the Government resolution is too high, and in this I concur. There can, I think, be little doubt that many useful members, who would be otherwise eligible, will thereby be debarred from election. The same objection applies to the voters.

9. I would therefore beg to suggest that there should be four elected to two nominated for each thana.

That all drawing Rs. 500 per annum, salaried or otherwise, or paying road cess of Rs. 5, or license tax of Rs 10, as well as all pleaders, school sub-inspectors, postal inspectors, and superintendents, graduates in arts, medicines, science, civil engineering, and law should be qualified as members; while those drawing Rs. 200, salaried or otherwise, or paying

road cess of Rs. 2-8, with all certified mukhtears, pandits, licensed doctors, teachers, post-masters, university graduates, and titled pandits of tolls might have a vote.

10. The recording of votes should be carried on at each of the police stations, a trustworthy officer being deputed for the purpose. It will be for the candidates to induce voters to go to the stations; but if the elections are carried out only at head-quarters, I doubt whether the greater number of voters will care to attend.

11. It is unanimously proposed that a fixed grant from provincial funds should be given by Government to supplement the receipts from pounds, ferries, &c. Indeed, the general desire is that the boards should have as little as possible to do with taxes of any kind, and hence it is suggested that such a fixed grant is preferable to a portion of the license tax, and to the power of levying a local rate for purposes of sanitation, &c. The idea which prevails is that the scheme should be made as popular as possible, and apparently that the members of the board should avoid everything which may make them obnoxious to the masses.

12. In this I cannot concur. Indeed, this view is one of those which makes me think that even the educated, who so strongly support the introduction of self-government, are scarcely alive to the duties which they will have to perform. The boards should certainly have at least the power of taxation; but as regards the license tax, whatever portion of it the Government can spare, may be added to any grant which would otherwise have been assigned.

13. Lastly, in regard to the matter of control. If official chairman are appointed, the power of supervision by the Magistrate, and of suggesting improvements or modifications which may appear to him to be necessary, and finally of referring the question, if such suggestions are not carried out, will, I consider, be quite sufficient. Of course, however, to render any such supervision possible, copies of all proceedings and resolutions must be forwarded to the District Magistrate, and no work performed which has not been duly recorded by the committee, who should meet at least once every month.

14. If the chairman, on the other hand, be elected by the members, and especially if a non-official, the responsibility of the District Magistrate must be much restricted; for, with the strong feelings which appear to exist everywhere against official interference, it will, I think, be easy for the board to carry out some measures which they are greatly in favour of, but which the District Magistrate would, if fully cognizant of, be averse to, by so recording their resolutions as to prevent the matter coming prominently to his notice till at least it was too late to interfere. I do not mean to insinuate that the board will resort to such doings as a rule; but since it will be in their power, it will be only just to District Magistrate, who will generally at the time that the measures are being adopted have nothing but the proceedings to guide him, that he should be relieved of much of the responsibility which would otherwise attach to him.

15. There is some difference of opinion as regards the boards of control. For the passing of estimates, the distribution of grants, and indeed for the consideration of all duties in which the boards and District Magistrate agree, a central board, composed of specially selected representative members at the provincial head-quarters, would, I am of opinion, answer well; but unless these members have a thorough knowledge of the district, it seems to me that their control would be absolutely nil in matters in which there was a conflict of opinion between the district authorities. To be of any real use there must be a central board for each division at the least, each district being represented by several members well acquainted with the whole district.

16. I enclose for your perusal the several communications received from sub-divisional officers and others on this subject.

Among these is an address which was presented to His Honor the Lieutenant-Governor during his visit to Kishnaghur, and which was made over to me for consideration when submitting this report. There is, however, nothing therein which requires any special notice.

No. 1694G, dated Jessore, the 7th September 1882.

From—E. J. BARTON, Esq., Magistrate of Jessore,
To—The Commissioner of the Presidency Division.

I BEG to inform you that there was, on the 17th August 1882, a meeting of a body calling themselves "The Jessore Indian Association" at Jessore, on the subject of self-government. I was at the time on tour in the mofussil. The meeting was presided over by Mr. Peterson, the Judge. The following resolutions were passed, and a copy has been sent to me by Mr. Peterson as Chairman of a special meeting of the Jessore Indian Association. The movers and seconders of the resolutions were pleaders, and pleaders were the chief, if not sole, organizers of the meeting. I presume another copy of the resolutions has been sent direct by Mr. Peterson to His Honor the Lieutenant-Governor of Bengal. The resolutions are as follows:—

I.—Records the sense of gratitude of the meeting to His Honor the Lieutenant-Governor of Bengal.

II.—As a rule elective system be introduced in the constitution of the local boards.

III.—Local boards be formed in all the sub-divisions, including the head-quarters sub-division. A district board be formed in the town of Jessore, composed of two delegates from each local board; it will be responsible to Government for its actions.

IV.—Boards will select their own Chairman from non-officials of the place.

V.—Persons paying Rs. 5 as road cess, or Rs. 10 as license tax, having income of Rs. 100 from landed property, or Rs. 200 from other sources, or persons passed in the vernacular or minor examination, shall be electors.

Persons paying Rs. 10 as road cess, or Rs. 20 as license tax, having annual income of Rs. 500 from landed property, or Rs. 1,000 from other sources, persons passed in the Entrance examination, shall be entitled to be members in the case of a joint family, every individual possessing the required property qualification by his share shall be eligible

VI.—A copy of the resolutions signed by the Chairman be sent to His Honor the Lieutenant-Governor of Bengal.

2. Not being at Jessore myself, I have received the following information regarding the meeting on good authority. The meeting was got up by a few pleaders. A man intimately connected with a native paper of indifferent repute came up here from Calcutta twice, and arranged with the pleaders the form the resolutions were to take. The meeting was extensively advertised, and pressure was brought to bear on shopkeepers and others to attend. About 700 did attend—a mixed crowd of all kinds and sorts,—mostly from motives of curiosity. The body of the people here are absolutely indifferent on the subject, and content with the present *regimé*. The speeches at the meeting were wholly by pleaders and mukhtears, with the exception of a few words from Mr. Peterson.

3. Another European gentleman, who was present, states as follows:—

"There was no spontaneity about the meeting. The resolutions were not discused, but simply proposed and recorded. All the speeches expressed a great desire that the board should be completely independent of the Collector."

4. You are aware that the majority of the inhabitants of Jessore are people connected directly or indirectly with the cutcheries; shopkeepers and prostitutes also form a large percentage of the population. Most of the pleaders and mukhtears and others, who are connected with the cutcheries, have not their permanent residence here; many of them come from other districts. It is they who have been chiefly active all over the district in organizing and carrying on the agitation about local self-government. They seem very anxious to get the power of spending and controlling the municipal road cess and provincial funds of the district, most of which are contributed by ryots, tenure-holders, zemindars and others, who were not represented at the meeting. I content myself with merely recording these facts, and I make no comment on them.

5. As an illustration of the manner in which these meetings are got up, and of the way in which this agitation is being worked, I send herewith, in an appendix to this letter, a translation of a petition (with all the signatures attached) which was presented by a large number of the signers to me in cutchery on the 2nd instant. I may say that, so far as I have been able to test the statements made in the petition, there is truth in them. Also, I do not see any reason why the petitioners should deliberately state what is false about a matter inwhich there personal interests are not intimately concerned. When they presented the petition, I asked them if they had been put up to it by any one, and they said no. I asked them to be careful and tell me if what was written in the petition was true. I then had it read to them and they said it was true. They were deceived, they said, by an unscrupulous agent, and they simply came forward to say so.

6. The petition is from more than 50 of the principal and most intelligent among the rate-payers in the bazar who are able to read and write. They say in their petition that a pleader, Aditya Chandra Sen, came to them with a paper, and said to them—"Sign it; your conservancy tax will be discontinued, and your other taxes will be reduced, and in future good will be done to you." They say that the pleaders further assured them that "the *Magistrate wanted them to sign* the paper," and so they signed the paper. The paper they refer to is a petition which the Government requires to be from at least one-third of the rate-payers that want the elective system.

7. They proceed to say that they now understand that this is all false. They do not want any charge of the municipality to be given to any native in Jessore, as there is none fit for the duty They prefer to let things remain as they are. I called on the pleader for an explanation he had to make, and I send you a copy of his statement; of course he denies it. But I may say I think there is much truth in what the rate-payers say.

8. Also some women, prostitutes and ratepayers, too, came before me and said as follows:—

"Aditya Baboo sent for us sitting at the Rajah's cutchery, and told us that conservancy tax will be abolished, and good will come to you; sign this paper, that is by marking dots. We accordingly put dots. The paper was a written paper, and no one read it to us. *Every one of our quarter, about 20 in number, was present there.*" That is, Aditya Chandra Sen, a pleader, who seems to have been an ostensible leader throughout in this matter (though I believe he is only the tool of people behind him) was allowed by the zemindar of Jessore to use his cutchery for the purpose of canvassing votes, and in order to get votes, promised the abolition of the conservancy tax. Any one acquainted with the natives of Bengal knows what calling them to the zemindar's cutchery means.

9. I may observe that people have also met me on the streets and have asked me if it was true what the pleaders and mukhtears told them. They said the pleaders and mukhtears told them—"Sign our paper; your taxes will be taken off. It will be good for you. It is the order of the Magistrate."

10. It further would seem that the rate-payers in a *para* have been called in a body to the zemindar's cutchery or some other place of authority. They are told if they sign the taxes will be lessened. Of the rate-payers, most cannot read or write, and do not know what they sign. They make a *fota* (dot) or mark, and it would appear that the real contents of the paper are not read to them; and this farce is what is locally called an election.

11. I know not in how many municipalities and districts in Bengal a similar *procedure* is followed. That it is followed elsewhere, I have little doubt, though there may be a difficulty in detecting it through the local influence of those who lead the movement for meetings and memorials.

12. Mr. Skrine, the late Officiating Magistrate and Collector, and now the Joint-Magistrate of this district, says that he entertains "a strong opinion that, whatever may be the case as regards more advanced districts, Jessore is not, and will not be for many years to come, ripe for any comprehensive measure of local self-government. Nothing would be easier than to earn a little cheap popularity by pandering to the wild and foolish aspirations of ignorant and ambitious demagogues; but no one who loves this country and wishes it well can wait to see an experiment tried which must end in an ignominious failure, and disorganize every branch of the administration. I repeat that the people of this district are satisfied that the present *regimé* do not wish for local government, and would not know what to do with the 'boon' were they to obtain it."

13. I may say in conclusion that, if I saw any reasonable hope of working self-government on the elective principle efficiently here, and so as not to injure the people or endanger valuable public works, institutions, and interests, I should be willing to give it all the aid and assistance I can; but I think you will agree that, so far as Jessore is concerned, the project would not be a hopeful one.

APPENDIX.

TRANSLATION.

To—The Chairman of the Jessore Municipality.

"We the undersiged municipal rate-payers, do hereby inform you that some time ago a pleader at Jessore, Baboo Aditya Chandra Sen, informed us that our signatures are required with a view to abolish the conservancy tax and reduce other extant cesses, and to obtain other goods ultimately; that we accordingly signed our names, and that the said Baboo said that the matter had the Magistrate's approval. But now we come to learn that the above is a false rumour only; we are by no means prepared to entrust the management of the municipality to the Bengali Baboos, because there is none in this district fit to take upon himself the responsibility of such important affairs, and who can carry on the onerous work properly. Under these circumstances, we pray that the present mode of management of the municipal affairs be permitted to continue."

The above was read in the presence of the pleader Aditya Chandra Sen

1. He does not deny all the statements in the petition, and admits he canvassed for signatures, but he does not remember exactly. He says he sat in Darih Da's dispensary in the bazar, and in other places, and called the adjoining rate-payers there and explained to them that the status of the municipality would be improved by the elective system, and the elected commissioners* would do their work well, and they would cause improper taxation to cease. He denies he promised the abolition of the conservancy tax.

* NOTE.—With regard to this, the pleaders who are taking the chief part in the agitation are already on the municipal committee in Jessore, and I do not think the fact of their being elected would make them do their municipal work any better than they are doing it at present.

E. J. B.

2. He admits he called to the zemindar's cutcherry the prostitutes of the *paras* adjoining the cutcherry, but denies he promised to take off the conservancy tax if they would give their names.

The above was read to the pleader and admitted by him to be correct.

E. J. BARTON,

Magistrate.

No. 1705G, dated Jessore, the 9th September 1882.

From—E. J. BARTON, Esq., Magistrate of Jessore,

To—The Commissioner of the Presidency Division.

WITH reference to your No. 4MG of the 12th July last, forwarding copy, with enclosures, of Bengal Government circular No. 5T—M of the 5th July last on local self-government, I have the honour to submit a report. I have already addressed you on this subject in my letter No. 1694G of the 7th instant, and beg you will consider it as a continuation of this report.

2. In drawing out my report, the following persons have been consulted:—Mr. Skrine, the Joint-Magistrate; Mr. Carlyle, the Assistant Magistrate; Baboo Shyama Pado Chowdhury, the Deputy Magistrate and Collector at Sudder; the Municipal Commissioners one by one; Baboos Ishur Chunder Bose and Panchanon Bose, zemindars of Sreedhurpore, and the sub-divisional officers of Jhenidah, Magura, and Narail; most of the officials named above consulted non-officials, before sending their own replies. I have also asked opinions from many other non-officials, both Native and European.

3. As requested, I beg to send herewith the reports in original received from the sub-divisional officers, and the Sudder Joint and Assistant Magistrates and Deputy Magistrate, Baboo Shyama Pado Chowdhury, and Sreedhurpore Baboos.

4. In dealing with the subject, I shall confine my remarks to the district of Jessore, with which only I have concern.

I have to consider the following points:—

(*a*) Whether the elective system should be adopted in the municipalities here on signatures being obtained from one-third of the rate-payers.

(*b*) Whether the Magistrate or an official or non-official should be the Chairman of the municipality.

(*c*) Whether the municipality should remain a distinct institution, or should be amalgamated with the district board.

(*d*) Under which of the three classes of districts Jessore falls, as enumerated in paragraph 8, page 4 of the Bengal Government circular No. 5T—M, dated 5th July 1882.

(*e*) Whether the elective or nomination system should be adopted in the formation of these local and district boards.

(*f*) Whether an official, a Magistrate, or a non-official or sub-divisional officer should be Chairman; should he have a vote.

(*g*) Who should be Vice-Chairman.

(*h*) Tenure of office of each.

(*i*) Who should be voters if the elective system be adopted.

(*j*) Who should be members.

(*k*) Tenure of office of the members.

(*l*) Multiplication of boards whether advisable.

(*m*) What funds should be made over to the board's management.

(*n*) What works should be made over to the management of the boards.

(*o*) How the zillah school should be managed.

(*p*) Efficiency of the central controlling board.

(*q*) Whole machinery of the constitution of the boards.

5. (*a*) *Whether the elective system should be adopted in the municipality here.*—There is only one first class municipality here, viz. that in the Jessore town. The municipality of Jessore really consists of several detached villages, and it must not be supposed that we have here a continuous town in the European sense. Proposals have also been submitted to raise

the Kotechandpore union to a second class municipality—*vide* this office No. 56LM, dated 15th July 1882. The views of Government on the subject of election have thus been laid down in their printed resolutions:—"The Government of India lay down no rigid rule. They desire that the elective system may be introduced, and that non-officials may be Chairmen of the local boards, *wherever these measures may be practicable*;" paragraph 2 of the Bengal Government circular No. 5T—M, dated 5th July 1882. The resolution further says:—"The suggestions of Government of India on these two principal points have even more direct reference to town or municipal boards than the district and local boards." The Bengal Government circular No. 921½ of the 8th April last says:—"In a province like Bengal, which contains districts representing many different stages of development and education, no single system of local self-government could be administered with success. In the Lieutenant-Governor's opinion we should provide for the gradual advance of backward districts by *improving existing machinery* and enlarging the powers of local bodies, *as far as may be considered advisable*, by executive order." Before districts are subjected to the larger measure, the Lieutenant-Governor considers that, meanwhile "the following policy should be adopted:—The committees constituted under the Cess Act should be carefully revised and strengthened, inactive members being eliminated, and members added who will consent to take a genuine interest in the administration of district affairs."

6. I have quoted above the general views of the Bengal Government in regard to the extension of the elective system to municipalities and the proposed boards, and the policy to be adopted in order to confer a substantial share of self-government upon the people of the country.

7. I am not, after mature consideration, prepared to recommend that the elective system should for the present be applied to the Jessore municipality. As I have said, Jessore is really a collection of villages, and is not a town in the European sense; also there are in the constitution and composition of the inhabitants of this part of the country, elements which will, in my opinion, render the elective system futile and in no way representative of the community. The majority of the population are Mussulman agriculturists, between whom and the amlah and pleader class, what may be called the Anglified Baboos, there is little or no sympathy. I also doubt if there is much sympathy or community of interest between them and the low castes of Hindus, the Chandals and others, who form the bulk of the Hindu agriculturists and of the Hindu inhabitants of the rural villages. These persons are for the most part utterly uneducated, unable to read and write, and I doubt if it would be possible to work the machinery of an election among them in their remote and isolated villages. These Hindu and Mussulman ryots pay most of the road and provincial cesses, and if there is to be an elective system, they are the persons who are quite as much interested as the zemindars and talukdars. After considering the whole matter, I think it impracticable to get a genuine election in which the bulk of those interested would take an intelligent and genuine part. I am afraid any election we might attempt would be a mere farce, and in this opinion I am unanimously supported by intelligent men who have a thorough knowledge of the inhabitants of rural Bengal, acquired by many years' intimate personal experience.

8. I am told that an application signed by some bazaar people, &c, calling themselves one-third of the rate-payers in the Jessore municipality has been submitted to Government. From my No. 1694G, dated 7th September 1882, to your address, it will appear how the application was got up and how signatures were obtained. It seems that persons subscribed their marks (most of them can neither read nor write) without knowing the contents of the paper they signed. The ordinary Bengali rate-payer is a mere passive tool in the hands of organizers and Anglified Baboos, who, in Jessore, are pleaders who aspire to take the entire government into their own hands, and to exclude practical men and the entire body of experienced officials. I have little hope that the rate-payers for years to come will be anything but tools. The result in Jessore would be that the whole management of these important and responsible public matters would devolve upon a few pleaders and mukhtears, very many of whom belong to different districts altogether, and are, I am afraid, actuated by party feelings and prejudices, and self-interested motives and a love of power. If these persons were to constitute the municipality, and if they were not properly and continually controlled by Government officials, but checked only at random and on accidental information by the District Magistrate or by a distant central board, I apprehend that the machinery of the municipality would be bad, inefficient, and untrustworthy, and would only be rectified after much harm had been done. An administration of this kind would not have the confidence of the great body of the people.

9. A meeting was held at Jessore. I have already submitted to you a report about it in a separate letter. It was attended by mukhtears and pleaders and others connected with the courts' amlah, school-masters, school-boys, and their friends. The leaders and sole speakers were pleaders. There were three or four who had shares in zemindaries. The organizers of the meeting were pleaders most of whom live in *bashas* and have not permanent residences in the town of Jessore; many belong to different districts altogether. These men aspire to have the independent and uncontrolled management of public affairs. *Most of the leaders in the recent agitations are already on Municipal Boards and have ample opportunities to do public good if they wished it.* But *pleaders will not neglect their own business for which they are paid for municipal business which is gratuitous.*

10. If they were elected to-morrow they would do no better work than they do now as Municipal Commissioners.

11. The speakers at the said meeting were the pleaders noted in the margin. They were specially anxious that neither the Magistrate nor any official should have anything to do with municipal matters.

1. Umesh Chundro Ghose, pleader.
2. Ambica Churndro Sen "
3. Grish Chundro Sen "
4. Sashi Bhusan Mittro "
5. Chand Mohan Banerji "
6. Peary Mohan Guha "
7. Rajani Nath Gangooly "
8. Aditya Chandro Sen "
9. Binoy Gopal Bose "

12. I am of opinion that the elective principles cannot be usefully applied anywhere in the district of Jessore. Though the district is a large one, we have no large towns. With the exception of Jessore itself, no place rises above the rank of a large village. The town of Jessore has been created by the cutcheries and courts, and the inhabitants are supported directly and indirectly for the most part by court or Government work, or by those whose subsistence is derived from court or Government work. Most of the male inhabitants have not their permanent homes or their families in Jessore. Government officials, amlah, pleaders, mukhtears, school-masters, school-boys, and even the shop-keepers live in Jessore for the sake of their business, but have their families elsewhere. The majority of them belong to other districts. The consequence is that the place is abundantly supplied with professional prostitutes and a large number of secret prostitutes, many of whom pay municipal rates and would have a vote. The population is also to some extent migratory and shifting. The pleaders and mukhtears have been most active in the recent agitation, have been the leaders of it, and it is from them chiefly that the cry comes that no Government officials should be on the municipality. It does not seem to occur to them that a man ought not to lose his municipal status because he is a Government official, and it would be rather hard and unjust to place Government officials in this respect below pleaders and mukhtears or shop-keepers.

13. If Jessore were a large town with a permanent community, and if there were in it respectable men of sufficient intelligence, social position, and honesty for places on the board, with ability and sufficient leisure to do the work, I should have no objection to giving self-government by election a full and fair trial. It is because we have not men of this kind here that I pronounce the elective system completely unsuited to the district.

14. (*b*) *Whether the Magistrate, official or non-official, should be the chairman.*—Under the present laws the Magistrate is *ex-officio* chairman. He in his capacity as Magistrate has an amount of experience and influence not within the reach of any one who is at present a resident in Jessore Out of the ranks of officials there is absolutely no one in Jessore fit to be entrusted with the duties and responsibilities of chairman. Your own local knowledge of Jessore will, I have little doubt, confirm my opinion.

15. On the general question it seems to me inexpedient and dangerous to declare the Magistrate or any official disqualified as chairman. Officials possess practical experience of business, have local knowledge, and are acquainted with the character, habits, and circumstances of the people. No sufficient reason is assignable why they should be excluded from the management. If rajahs, zemindar, or large talukdars were available as members of boards in Jessore, as they are not, it would often happen that their interests would clash with those of their tenants and of each other. The Magistrate hitherto has acted the part of arbitrator amid conflicting claims.

16. Most of the zemindars of Jessore are absentees, and could not always attend meetings or look after business. The zemindars here as a class are also ill-educated. From the bad management of their own estates it seems pretty clear that these zemindars are not as a rule fit for a great public trust. The people at large have very little faith in them, or in their impartiality and disinterestedness Pleaders and mukhtears such as we have here are not exactly the men whom I should like to see at the head of a municipality, with uncontrolled power over all municipal business and municipal funds If a leading pleader were appointed chairman and another leading pleader vice-chairman, I doubt if either would neglect his own business for which he gets paid for municipal business for which he gets nothing. If a man who was not in good practice were appointed, I must say that some grave neglect or laches might be apprehended.

17. I am not aware of any one in Jessore out of the ranks of officials with sufficient ability, leisure, and social position to manage a municipality, or one who ought to be trusted with the important duties of chairman or vice-chairman.

18. I am therefore forced to the conclusion that an official chairman of the municipality is a necessity, and that no change in the present constitution of the municipality is desirable (at least till the residents are sufficiently advanced to be fit for the work).

19. The fitness of the Jessore people in point of education may to some extent be inferred from the fact that the Jessore Government English school educated only 1,276 boys from 31st March 1872, giving an annual average of 127½ boys. This figure is almost nil in comparison with the total population of the district, viz, 2,210,898. Of the above 127,626 were zemindars' sons, 259 talukdars and gantidars, 146 pleaders, 374 Government servants. Only 61 boys passed the Entrance Examination within these 10 years, giving an average of six boys annually.

20. An experienced official, with whom I agree, says that the standard of public spirit is too low in this district to admit of the experiment being tried with any chance of success. In point of intelligence, education, and political enlightenment, Jessore lags far behind her sister districts in the Presidency Division; and though some progress is perceptible in all these essentials, years must elapse before the people can be trusted with a two edged weapon such as local self-government admits.

21. With regard to the chairman, he says: "The District and Sub-divisional Magistrates should in any case be chairman of their respective boards, and the great bulk

of the members must necessarily be nominees of Government, as the extension of the electoral privilege to the rural portions of this district would be for a long time to come the merest farce" "I would not, however, be disinclined to give the principle a fair trial in the case of the district head quarters, which might be allowed to elect three members of the district board." "The number of unions might be gradually increased as the community rose in intelligence and political knowledge, the elected members thus grudually superseding the nominees of Government. In the course of a generation or two, with a reasonable degree of tact on the part of official chairman, the body so constituted might form a really useful part of the Gevernment machine." With these remarks I agree.

22. Another official gentleman says: "I must confess to the difficulties which would be experienced in selecting a chairman from the non-official members of the community, unless a man who has the ability and willingness to work, who has sufficient time at his disposal, who would identify himself with the interest of his country, be selected as chairman, the scheme will not, I am afraid, attain that success which it is the desire of Government of India to secure to each board. *In Jessore such a man can scarcely be found.*

23. I have also forwarded to you under cover of my memorandum No. 620t.—G of the 24th August last, an extract from the tour diary of Mr. Deare (who is an officer of long service, great experience, and intimate knowledge of the district of Jessore). Mr. Deare is the sub-divisional officer of Jhenida He says he "met some of the leading men of this part of the sub-division, talked on self-government; one, an old man, an old servant of Government, declared the scheme would prove a failure. 'The Bengali mind is not right,' a literal translation. He and a younger man, a B. A of the Calcutta University, thought the member of the board would seek his own interest. The first question would be how can this business be made profitable to me Those I consulted vary in opinion; but I am inclined to agree with the old man and the B. A. that the movement is premature; most natives think that Government officers must hold the leading strings. They seem timid to walk quite alone; but if the success or failure of the experiment is to be proved, the local board must be allowed a considerable degree of independence

24. During my recent tour at Jhenidah I made enquiries and remarked as follows:—

"The agitation about local self-government is confined chiefly to Anglified aboos, to the hangers-on about the courts, pleaders, mukhtears, amlah, school-boys, and their friends. These people think they will get all the power into their own hands, and are very unanimous about the necessity of having a non-official as chairman. To my mind this unanimity and suspicious anxiety form a most cogent reason why the chairman should be an official, not only in order that abuses may be prevented, but to see that the work to be done is done, and that the money to be spent is not wasted. There is also a belief among the same class that this partial scheme of self-government will be followed by a larger scheme entrusting the entire management of business and the government of the country to the very small section of people, who have got a smattering of English education. I am certain that this is a state of things in which the people at large have no confidence. The amlah, mukhtears, vakeels, school-masters, and their dependents, who form the chief body of the inhabitants in cutchery towns in the Jessore district, are not for the most part permanent residents of the place, nor have they their homes there, nor do they possess landed property or permanent interests in the district or cutchery towns where they live.'

25. I annex another extract from the tour diary of the sub-divisional officer of Jhenidah for the month of August 1882:-

"While at Gilapole, the Gossami, a respectable landholder, called on me: we talked on self-government. He said it would not work; matters were better managed by a Government, through respectable officers. He and his naib, a respectable old man, thought the experiment would break down in a year or two; that the natives were not to be trusted with large sums of money. The first idea would be how to benefit by the position in which members of boards would find themselves placed, and relatives would be provided for and contracts given to them. Then party disputes would follow, and Government would have to interfere. With the exception of the Baboos, with a smattering of English, of vakeels and mukhtears, the respectable landholders and residents, men who have an interest in the land, are of opinion that self-government is not a wise measure, and will not benefit the country."

26. (*c*) *Whether the municipality should remain a separate body?*—I distinctly think the municipality should remain a separate body, and I would, as an experiment, allow the rate-payers to elect three members.

27. Government holds that "if the experiment is really to promote local self-government, it is essential that both the voters and the candidates here, as in England, should have some stake in the locality." "Residence within the local Government district represented, or within five miles of its boundary, would be an essential condition of membership." "I am to point out that the elective system need not necessarily be extended to the whole of a local Government district." "There may be sub-divisions where it would be preferable to maintain the local executive officer as chairman of the local board in order to avoid a certainty of failure."

28. (*d*) *What class of district Jessore is?*—Government divided districts into three classes, *viz.*, (1) those which contain no sub-division in which local boards can be formed; (2) those which contain some sub-divisions fit and some unfit for local boards; (3) those which contain sub-divisions all fit for local boards. I would count Jessore in the first class, as a district which contains no sub-division, where a really useful local board can be formed

29. The provision contemplated by Government of making boards independent, and restricting official control merely to supervision and report on the part of the district Magistrate and Collector, seems to me insufficient and inefficacious It would not answer the purpose, nor would it properly and fully defend and secure the public interests. The boards would and could neglect their work before they were scrutinized by any controlling authority. It would be too late for a Government official to inspect or report after public money had been spent or wasted on works badly done, and after measures had been carried out in an unjudicious, partial, and improper manner; moreover, the position of an official would be difficult if he were to have the responsibility of supervision and report, but not the means and opportunity of ascertaining and controlling the details in time.

30. Government itself admits that there has been failure in the districts of Moorshedabad, Krishnaghur, and Srirampore. Jessore is a comparatively backward district. The want of able men is so much felt here that even the jury system has not been extended to this district.

31. Section 16 of Act V of 1876 (the Municipal Act) lays down that "the elective system shall not be introduced into any municipality *unless the Magistrate certifies* that at least one-third of the rate-payers residing therein have signed a petition praying for its introduction." In connection with this, I have to say that the organizers of the late meeting have drawn out a petition without ever consulting me; also in some instances they have induced the rate-payers to sign it by false promises, &c. I have not seen the application, nor has it come to me, and from what I know I am not prepared to certify that the signers did actually understand what they signed.

32. A common and well-ground complaint everywhere now is the non-attendance by members of committees. They say "we have business of our own to do," or "we live too far away," or some other excuse. It is only the influence of the District Magistrate or Sub-Divisional Officer which secures the attendance of quorums. Also it is that influence which gets the people in the interior to do much which they would not do.

33. In considering the question of district boards, attention ought to be devoted to the question how the work to be done can best be done? Is it likely that the members of the board would personally visit district roads, bridges, canals, and other communications to see that work of various kinds is properly done before it is paid for? Would they possess the necessary technical knowledge to understand these works? Would they go into the interior and inspect schools? Would they see that money of all kinds is properly spent? Would they decide public questions impartially on their merits and without being actuated by extraneous influence? Would they be as impartial in the allotment of funds in matters effecting others as in matters affecting themselves?

34. A few meetings have been held at the head-quarters of sub-divisions attended mostly by pleaders, mukhtears, amlah, cutchery people, who passed resolutions that they (*i.e.*, those present) wanted self-government; they demanded sole and uncontrolled charge of funds devoted to education, municipality, road cess, provincial works. They particularly demanded that in managing these large sums and important interests they should not be interfered with by any Government official, and in some places the pleaders inveigled, I am told, against official control in terms which might almost be called objectionable. The persons who attended these meetings formed a very small percentage of a total population of more than two millions. These did not represent every section of the community. There is no means to judge what are the real opinions of the people at large. For example, tens of thousands of ryots and tenure-holders pay road and provincial cesses, and they have a better right to say how and under whose superintendence their money shall be spent, than a mukhtear or pleader who does not pay any cess.

35. (*e*) *Whether the elective or nominative system should be adopted in the formation of the proposed boards at sub-divisions, &c.*—If the elective system is not yet suited to the municipality at head-quarters, it is far less suited to sub-divisions. At present the nomination system should continue, and we might gradually introduce the elective system as the district advances in fitness for the measure.

36. (*f*) *Who should be chairman of the boards?* The Magistrate and Sub-Divisional Officers, as a rule, should be chairman of the district and local boards respectively.

37. *Should chairmen have a vote?*—As to the chairman's having a vote, I am quite in favour of it, as otherwise his position in the body of management would be very awkward and nominal, and he would have no active share in the business, though he will be saddled with responsibilities. Many of the persons consulted support me in this view.

38. (*h*), (*k*) *Tenure of office of each.*—As regards the tenure of office by the chairman and his *vice*, I beg to submit that all appointments from the official class as an official should be *ex-officio*, and those of non-officials either by nomination or election when the time for election will have come. In the latter case none should be allowed to remain beyond one year.

39. (*i*) *Who should be voters when the elective system is adopted?*—Government on this point says that "for voters the qualification might be placed at Rs. 10 road cess, Rs. 10 license tax, or Rs. 500 other income. It would also appear desirable, as in the English law, to increase the number of votes to be given by one individual up to five or six according to the extent of his property." I agree with those views. Some of the persons whom I consulted wish to extend the privilege to persons who passed the minor scholarship examination, but to this I entirely object, and consider such a qualification not only unsound but absurd. Some say that persons having a rental of Rs. 100 for lands within the jurisdiction of any

board, or having an income of Rs. 200 from other sources, may be permitted to vote. Some say that pleaders, certified mukhtears, licensed medical men, teachers, university graduates, and other well educated men should be added to the number of voters. I consider these views thoroughly impracticable, and hold there should be a property qualification within the district, such as is recommended in the Government resolution.

40. (*i*) *Who should be members?*—As regards the qualification of members, the Government proposes the payment of Rs. 25 road cess, or Rs. 20 license tax, or proof of income from other sources than land amounting to not less than Rs. 1,000 per annum. Residence within the local Government district represented, or within five miles of its boundary, would be an essential condition of membership. I concur in this view.

41. (*l*) *Multiplication of boards whether advisable?*—Government contemplates the increasing of the number of local boards in a sub-division as much as practicable. It says "each local Government district would be divided, for purpose of election into wards corresponding with thanas, or, in very thickly populated tracts, smaller areas. The number of members for each would be separately settled, and they would be taken in the proportion of two elected to one nominated. A local Government dist ict might be entirely divided into elective wards, or one part might be so divided, the members for the other part being nominated by Government in the proportion of not more than one official to two non-official members." With reference to the above I do not recommend any change in the number of boards which we at present have. I consider the principle of election to be unsuited to this district; and if you agree with me, it hardly seems necessary for me to discuss the above suggestions in detail.

42. Government says further that "if the work is exceptionally heavy, the sub-division will probably be very populous, and separate local boards may be appointed for one or more thanas. At the same time, with the restricted area under each local board, it would seem unnecessary to grant travelling allowances for attending meetings." On this point I beg to submit that no sub-division in this district requires the establishment of more than one local board. The business of the committee will be to guide the hull and inspect the works done, the details being worked out by the subordinate office staff.

43. The district board will similarly consist of two delegates from each sub-divisional board, including the sudder; this will give eight members, and some other members may be nominated or taken from the head-quarters for the district board. These members would all be required to meet and deliberate on points of general interest. I do not think that the delegates from sub-divisions would attend, judging from past experience, and there would be difficulty in getting a quorum.

44. (*m*) *What funds should be made over to the boards.*—I see no objections to making over to the boards (provided the members are not appointed by election, but nomination) the management of the following funds:—Pound, ferry, road cess, provincial rates, education, license tax, municipal cesses, and medical receipts as subscriptions, donations, &c. The local proceeds should be fully expended on local wants.

45. As regards the transfer of public works cess to the board, I think it might be tried, provided the board is, as I suggest, under the official control of the executive head of the district. If all the charges connected with the funds tansferred be made over to the boards, a certain amount will have also to be allowed by Government to defray expenses of works, including establishment, contingencies, and travelling; public works buildings as suggested by Government may be made over to the boards also.

46. (*n*) *What works should be made over to the boards.*—All municipal works, charges of education, provincial roads, works tending towards improvement of village santitation, village drainage, village water-supply, management of ferries and of pounds, embankment, irrigation, bridges, dispensaries, primary, aided, vernacular, and circle schools.

47. (*o*) *How the zillah school should be managed.*—The Government assignment to the zillah school is Rs. 200 per mensem. This amount could not possibly be met from the funds of the poor municipality at Jessore, which has already been made responsible for all the hospital charges, and in which no increase of cess is possible. The zillah school can only be taken over by the municipality, if Government makes a special assignment for it, or if Government includes an allowance on this account in the proposed annual grant from the provincial revenues.

48. (*p*) *Efficiency of central board.*—The objection to a central board is that it will be far away from the boards whose work it will have to supervise. It would be impossible for a central board to see local deficiencies and apply remedies in time so as to be effectual: a central board is not wanted, if the Magistrate and Collector, who is on the spot, is allowed to retain his controling power. *In my opinion the Government should hesitate before weakening or withdrawing the power and influence of the district officer. As it is, his power and influence have been so seriously impaired that the administration of public affairs in the interior is becoming more difficult every year, and as a consequence is more imperfectly done.* It seems to me self-evident that the more the authority of the district officer is weakened the worse it will be for the administration, for the Government, and for the people at large, and the worse will public work be done. It would be intolerable for people with appeals to have to go from all parts of Bengal to a central board in Calcutta. As long as the District Magistrate is at the place, I see no necessity for any central controlling board. The measure will neutralize and destroy the powers of the District Magistrate.

49. (*q*) *Whole machinery of the constitution of the boards.*—I have thus recommended the continuation of the nomination system in the district of Jessore. I think that the District

Magistrate and sub-divisional officers should be the chairmen of the boards. I need not therefore advert to the detailed mode of supervision and control which the Government proposes to retain in the hands of the district officials in cases where boards are formed by election, and possess independent powers of management.

E. J. BARTON,

Magistrate.

No. 753, dated Khulna, the 25th September 1882.

From—W. M. CLAY, Esq., Magistrate of Khulna,
To—The Commissioner of the Presidency Division, Alipore.

I HAVE the honour to reply as follows to your circular No. 4MG, dated the 12th July last, on the subject of local self-government.

2. The circumstances of this new district being well-known to you, it is scarcely necessary to mention that it consists of three sub divisions, of which Satkhira is the most forward in education and the largest in population, in which respects Bagirhat and Khulna are about equal, but after the opening of communication with Calcutta by railway the Khulna sub-division is likely to make the greater progress of the two. The respective populations by the census of 1881 are—Satkhira 434,766, Khulna 344,389, and Bagirhat 300,793.

3. In the sub-division of Satkhira there are three towns which have municipal institutions of the second class, but there are none at all in the other two sub-divisions, which are therefore without any experience in those elements of self-government which are supposed to be first learnt in such institutions.

4. From these circumstances there is no occasion, as regards two-thirds of the district, for me to discuss any of the questions in the circular of the Bengal Government relating to the extension of the elective system, the method of election, and the appointment of Chairman in municipalities.

5. As regards these questions, in the sub-division of Satkhira no mention of them at all has been made by the sub divisional officer in his report.

6. It might be inferred from this that the inhabitants of the Satkhira municipalities have no wishes on the subject, but possibly the sub-divisional officer omitted to take their opinion.

7. I have pointed out to him the omission, but meantime I am not sure whether my own opinion should be given on the question of introducing a system of election in the municipalities of Satkhira. However, unless the rate-payers distinctly objected to its introduction, I should recommend that at least a trial should be made as a commencement for the introduction of the system for the purposes of local committees.

8. I consider that in municipalities all rate-payers should be entitled to vote without reference to the amount of their tax, and that any rate-payer should be qualified to be a member of the Committee, provided all parts of the town were evenly represented.

9. I also consider that the members of the Committee should elect their own Chairman without any reference to Government.

10. I have not had any opportunity of ascertaining the views of persons interested in these matters for the reasons already stated.

11. Coming to the consideration of local boards, the first question for report is within which, out of three classes, this district should be placed (paragraph 8 of the Government circular), and I have no hesitation in placing the Khulna district among those included in heading (3) as containing sub-divisions in all of which local boards can be formed. In their capacities for supplying a serviceable board, I think the three sub-divisions about equal.

12. Similarly, I think that no distinction among the sub-divisions is required in the matter of the election of the members of the board (paragraph 9, Government circular) or in the principle upon which the chairmen are to be selected,

13. As regards the qualification of voters, it will be seen that the sub-divisional officer of Bagirhat thinks that the system of election is not suitable for his sub-division, and that the members should be selected by Government upon the nomination of the sub-divisional officer, for which purpose he prepared a list of competent persons, which I have not forwarded with his report.

14. The sub-divisional officer of Satkhira adopts the resolution of a "general meeting of the respectable inhabitants of the sub-division," at which about 90 persons were present.

15. The members of that meeting expressed an opinion that the election of members of local boards should be by votes, and that the following classes should be entitled to vote :—

1. All persons with an income of Rs. 200 a year.
2. All who pay road cess of Rs. 5.
3. Pleaders.
4. Mukhtears.
5. Licensed Doctors.
6. Pundits.
7. Teachers.
8. Titled pundits.
9. School Sub-Inspectors.
10. Post-Masters.
11. Postal Inspectors.
12. Postal Superintendents.
13. University graduates in Arts.
14. Ditto in Medicines.
15. Ditto in Science.
16. Ditto in Law.
17. Ditto in Civil Engineering.
18. All well-educated new residents of the locality.

16. The opinions of those whom I consulted on the subject at the sudder sub-division were very much in accordance with the qualifications suggested at Satkhira. Some persons also were opposed to any test but that of education.

17. There was of course a disinclination of several persons to any property test, and the general opinion is inclined to place the property qualification at a lower level than that suggested in paragraph 10 of the Government circular, substituting Rs. 5 for Rs. 10 of road cess, or land owner annual, say, value of Rs. 210, in place of Rs. 420, and substituting an income of Rs. 200 for Rs 500 ; but I would prefer to take the qualification in this respect as suggested in the Government circular.

18. There is also a prevalent feeling that property should not be the only qualification, but that education, as represented by university degrees and scientific professions, should be included, and I should be willing to meet this by allowing eligible persons of these classes to be elected so long as the Board consisted of a certain proportion of persons qualified by "ownership or occupancy of some kind of property in the direction of some trade or business."

19. The general feeling as respects the question of appointment of chairmen of local boards is clearly that an official should preside, but have no vote. It is admitted that business would not be carried on smoothly by an inexperienced chairman. The wish is that the chief local executive officer should preside for the purpose of keeping order only.

20. I do not approve of this suggestion, and I think that, unless the chairman is allowed to have a voice in the proceedings (to which those whom I have consulted will never consent), the boards should choose their own chairman and conduct their own business.

21. My own feelings are against the immediate introduction in this district of the system of election. I should have preferred that the boards, in the first instance, should have been composed of persons selected by lot from among such as appeared to the local officials as suitable representatives of the classes who will hereafter be entitled to vote, and that the system of election should have followed the establishment in working order of the boards so formed.

22. I have not as yet prepared any rough list of voters according to the scale suggested in paragraph 10 of the Government circular. The papers to which reference is required have not, as you are aware, yet been transferred to this office, and I thought it better to push on the separation of our records so that the list may be prepared here after their arrival.

23. On the subject of the mode of voting, no suggestions have been made on any side, nor has any special system for the purpose been put forward by any of the numerous persons consulted. It seems to be expected that all these arrangements will be matured by the Government.

24. When the lists of voters have been prepared and published, I should suppose that it will be convenient to fix certain dates upon which the voters shall record their votes, either personally or by a responsible agent, at the different thanas, for recording which an official of the grade of a Deputy Collector would be deputed at the cost of the boards.

25. What the income of the board of the three sub-divisions will be I am not able to state, for the reasons given just above ; but on the point mentioned in paragraph 12 of the Government circular, as to whether it is advisable to give up license tax collection (with the duties of assessing) to the board, I find that the total income from this tax in this district is Rs. 8,000.

26. The sum is so small that it might well be made over to the boards, together with the cost and duties of assessing and collecting it ; but I think that work of this kind is not suitable to members of a board, many of whom are very much interested, either by themselves or their friends, as being liable to the tax ; besides which this is an obnoxious duty, and would certainly make the boards more or less unpopular.

27. The last question on which an opinion is asked for is as to the amount of control to be reserved over the local Boards, the Government of India proposing to reserve to the executive authorities control "by sanction to certain acts."

28. The powers of boards will be defined by law, as in the case of municipalities, and I presume that they will have the power to make bye-laws in their several departments, which will be submitted for the approval of the Government. I am not able now to specify any matter in which it is desirable to reserve a controlling power, except the particular one mentioned in the circular—the limitation of expenditure of money in certain works.

29. Until it is definitely known what duties the boards will have to perform, I am not able to say more on this point.

30. Some control is of course necessary, but I am not much in favour of control by means of a central board, unless the services of such a board should be available whenever wanted. Control might be urgently required on some objectionable resolution come to by a local board ; but if the members of the controlling board are scattered all over the district, the opportunity for control might be lost before the board could assemble, and possibly (as in the case of some committees now) several meetings might be arranged before a quorum is got.

31. I fully agree in the opinion that, if a full trial is to be given to the institution of local boards, the controlling authority should not be vested in district officers; but I think that they should be made acquainted with all the proceedings of local boards, and should have the opportunity of representing to some controlling authority any matter which they might think necessary.

32. I cannot recommend any course except that the Commissioner of the division should have the power to set aside the proceedings of local boards, and to vest their powers, in cases of neglect to act, in the district officers.

33. The reports of the sub-divisional officers of Bagirhat and Satkhira are annexed.

No A—SG, dated Camp, the 12th September 1882.

From—H. MOSLEY, Esq., Officiating Magistrate and Collector, Moorshedabad,
To—The Commissioner of the Presidency Division.

I HAVE now the honor to reply to your circular No. 4MG of 12th July 1882. The delay has been owing primarily to the difficulty in collecting materials, and also to the late visit of His Honor the Lieutenant-Governor of Bengal.

2. The first question is as regards municipalities, and on this point the answer to Government enquiries seems very clear.

3. There are four municipalities in this district, viz., Berhampore, City Moorshedabad, Jungipore, and Kandi, all of the second class. In Berhampore I have for some time past been trying the experiment of leaving the vice-chairman and the members of the committee to manage affairs as far as possible without my interference. The experiment has been very satisfactory, but there would, I think, be danger in altering the present state of things by which the District Magistrate is chairman. I have already reported to you a case in which some of the Municipal Commissioners, carried away by their eagerness, attempted the rather high-handed procedure of characterising as illegal (by a special vote) my conduct in writing to the vice-chairman, pointing out an illegality in a resolution passed some time back.

4. The resolution referred to was one conferring on ward commissioners the power of appointing conservancy overseers. I was present when the resolution was passed, but the illegality of it did not strike me, and the question never arose till an extremely improper appointment was made of a man who had lost a former place for improper conduct. The necessity of control being thus established, the letter referred to above was written.

5. It is of course perfectly clear that the resolution was illegal, for the law vests the power of appointing in the chairman, who can, however, by an order in writing, give a similar power to the vice-chairman. The Commissioners have no such power, and can give no such power to the vice-chairman, much less can they give it to individual Commissioners, to whom the chairman even cannot delegate it. The episode shows how little trust can be reposed in the power of following the law possessed by the most enlightened committee in the whole district. The Berhampore Municipal Committee possesses more uncontrolled power than most Commissioners in the province; their vice-chairman is a native (non official I think I may say, he being a vakeel, the Government pleader); and I have, as I said, left them almost entirely to themselves, the result being an arrogance of what was partially given as an indulgence, and an attempt which, after I had shown them so practically my wishes to leave them to govern, may fairly and moderately be characterized as ungracious.

6. I may add, as regards this municipality, that the vice-chairman complains very bitterly that, with the exception of himself and one or two others, there are no working members. The rest of the Commissioners are as a rule regular in attending meetings and talking, but never assist in the practical work of the municipality.

7. As regards the municipality of City Moorshedabad, there can be no doubt whatever that without an energetic chairman everything would be left to be done, or let alone, by the overseer. The municipality is fortunate in its vice-chairman, Baboo Bangsidhur Rai, but he takes principally the work of office supervision; and if he was to leave, I cannot see a man in the whole municipality who could take up even this.

8. Taking Jungipore, I entirely agree with the opinion expressed by the sub-divisional officer in his paragraph 7. The result of delegating full powers to a non-official here would cause a greater collapse than at City Moorshedabad.

9. And at Kandi the experiment has already been tried, for in the interregnum between the abolition of Kandi as the head-quarters of a sub-division and its re-establishment as such, the chairman was necessarily a non-official, and the result was neglect and confusion that even now are not entirely remedied.

10. As regards election of members, I see no particular objection to the introduction of the elective system in all the municipalities except Kandi, which is not yet fit for it, not having got out of the childish stage of incapacity of viewing even the most important public question except through party spectacles. I do not say that others are free from party spirit. In fact Berhampore is very much divided (though the avowed origin of such division is not creditable to one side); but in these other places there is not quite the same blindness and incapacity to unite when necessary.

11. Berhampore has already submitted a petition for the elective system, which, has been forwarded, and Jungipore has done the same. The latter's petition was irregularly forwarded direct, and not through the sub-divisional officer, and consequently had to be sent to him for the purpose of testing the names. City Moorshedabad, I believe, will ask also to have the elective system.

12. I have said that I see no particular objection to the introduction of this elective system into the three first municipalities, though at the same time I can see little good. The aim hitherto has been to select men who will work and who will form a body fairly representative of the different parts of the towns, and as an almost universal rule these selections have been made by the committees themselves, the chairman being only too glad to help in performing what is always a difficult, and often an impossible, task. The result of the introduction of the elective system, if, as should be done, the choice of electors be confined to candidates who actually and habitually dwell in the wards for which they stand, will be principally to enforce what has always been done as far as possible. Many wards will elect repre-

sentatives who already represent them; others will have to do what the chairman and members have found impossible, viz., to find representatives, and I am afraid the result will not be thoroughly satisfactory.

13. As regards rules for election, &c., opinions differ as to qualification. Some think no qualification should be required, either as candidate or elector, except that of being a rate-payer and untainted by (convicted) crime, whilst others advocate what is in effect a property qualification.

14. The sub-divisional officer of Jungipore gives a reason for proposing such qualification, which is most reasonable: he wishes thereby to exclude those who can never be made to understand what election means. It would, I think, be more fair to the experiment to exclude as far as possible these ignorant persons, and for this purpose I would steer between the proposals of the sub-divisional officers of Jungipore and Kandi, making the qualification for electors payment at the rate at least of two annas municipal tax per month. This would exclude those who would be blindly led, if not bribed—an element which would be most likely to bring discredit on the system.

15. Any qualified elector might also be eligible as a candidate. It is true that members of the committees should be educated men, but introduction of rules to ensure this would be cumbrous and might lead to difficulties, and I do not imagine that any but educated men would present themselves.

16. Rules for election should be as simple as possible. Perhaps the very simplest would be to print for each ward the names of the candidates and post a copy to each elector; the list being on a single sheet, with one side blank, on which, after folding, the address of the elector should be written. The elector would mark the selected candidate and sign his own name, which would thus correspond with the name on the address. Those who cannot write would have to get their marks attested by two respectable persons. The voting papers would then be deposited by the electors in locked boxes (of which the keys would be with the chairman or vice-chairman only), which would be distributed throughout the town, and which on a certain date would be collected and taken to the municipal office for examination in presence of the vice-chairman.

17. Opinions differ as to whether the elective system should be introduced in its entirety, or whether it should be blended with nomination. It would never do in the mofussil to allow Government servants to canvas for election, and therefore no such servant would be available on the entirely elective system. If therefore, and for myself I think the course advisable, any Government servants are to be members of any committees, it will be necessary to retain the power of at least appointing *ex-officio* members. The proportion of one-third nominated to two-thirds elected members would, I think, be sufficient to allow of this, as well as of power to correct glaring non or misrepresentation, while it would leave sufficient to prevent any suspicion of swamping.

18. As regards local boards, there are I think the same objections to the chairman being other than the District or Sub-divisional Magistrate, as in the case of municipalities. But there would be another, and it seems to me an insuperable, objection. Personal acquaintance with the whole district or sub-division under a committee seems to be absolutely necessary in the chairman of that committee, and I scarcely see (in this district at any rate) any single man in any sub-division who has either of these qualifications, want of which would prevent his keeping the committee to a consideration of Government as a whole, the tendency of course being to individual and very local points of view.

19. As regards those who would be qualified as electors under the proposed scheme, I find that the whole district, which has a population of twelve lakhs, with an area of nearly thirteen lakhs of acres, would produce but 2,200 (of course this is approximate). If the thana system be adopted, one would have a snug little constituency of 14, while another, which from its size the Moorshedabad Association thinks should be doubly represented, would have 81. So far, therefore, I go entirely with this Association, that if the elective system be introduced, the property qualification must be reduced. But it would scarcely, I think, be safe to reduce the qualification for membership lower than that proposed, and the choice would therefore be limited. In fact I doubt whether some thanas could be represented at all, for, as the very essence of the scheme is that the different parts of the district or local areas should be fairly and adequately represented, it will be an essential that none should be elected for any thana but those who are qualified, not only by possessing in that thana the necessary land or income, but also by such knowledge of the local area as would be a result of actual and permanent residence therein.

20. Hitherto we have endeavoured as far as possible to make our road and education committees as representative as possible; but as a general rule mofussil members do not attend, and we have therefore, in order to secure quorums, been forced to have, as the majority of members, gentlemen residing in the sudder stations (of sudder and other sub-divisions), and even then we have sometimes failed. I much fear, therefore, in case of the establishment of fairly representative local boards, that after the first excitement is over, there would be a danger of collapse from utter inability to secure a quorum—an opinion that is shared in by some natives of position who live at a distance, and whom I have been able to consult before the arrival of vakeels and others, who were deputed to the principal places to get signatures, and advocate the views of the Association.

21. One of the most enthusiastic supporters of local self-government living outside sudder stations was unable to meet this argument, for he had sad experience of its truth. He is a member of the Choa Branch Road Cess Committee, which, as you are aware, can

hardly be induced to meet at all, and whose only native member that attends with any regularity is the young zemindar in question. This is a purely representative body with no Government official at all connected with it, and the chairman has just written to say that it is utterly impossible to work the branch committee any longer, as, with the exception of the gentlemen spoken of above, it is impossible to get the native members to attend, though the greatest efforts have been made by electing new ones, to make up a really working committee.

22. I may remark that Choa is one of the places where the Moorshedabad Association wishes to locate a local board, and the above remarks are significant as to this point. Another division of the head-quarters sub-division also is proposed, having its centre at Azimgunge, about nine miles north-east of Choa, the only recommendation I can see for which is that there is there a moonsiff, and consequently several vakeels.

23. And mentioning vakeels impels me to say that it seems to me that the movement on this question is almost entirely one of vakeels. With one or two exceptions, meetings were organized by them, they were the speakers and they produced the resolutions really for passing. No deliberative meeting has been held. At the large Berhampore meeting which was held during my absence from the station, it was thought necessary to have a band of music to amuse the masses, whilst those who could find room remained inside the hall to go through a settled programme, and at Lalbagh, where the Berhampore pleaders appeared again, the only check was a slight murmuring on the part of some "Kaya" merchants of Azimgunge, who objected to the dictation of Bengalis, who did not belong to the sub-division, and who, therefore, they thought had no right at the meeting. These and other Kayas subsequently held another meeting at Azimgunge (not the Azimgunge referred to in a previous paragraph as a proposed local board station), where, however, they confined themselves principally to the advocacy of a separate municipality for themselves.

24. From all the above it may be gathered that in my opinion the answer to paragraph 8 of the Government No. 5TM, as regards this district, is that all sub-divisions, including that of the sudder, come under the first head.

25. I regret to come to this determination. The scheme is one which I should be above all things delighted to see carried out; if it were possible it would be good for the people, and would relieve district and sub-divisional officers of work—a very desirable thing. But it is one that, however admirable, is too much in advance of the present state of the district, and could only end, I fear, in lamentable and disastrous failure.

26. As regards the mode of election, if the system be introduced, I should think that what I have sketched out for municipalities would do here also, the boxes being at the police stations or outposts, to which voters could send their papers by servants or chowkidars. There would have to be provision made for getting a list of voters; perhaps the best way would be to require all qualified persons to apply with necessary particulars to the Magistrate before he could be put on the list. Voters need not be resident, but for membership actual and permanent residence should be a *sine qua non*.

27. I think it my duty to note here a very unpleasing fact. At Jungipore a dispensary has long been kept up, and for this a certain amount of subscriptions was necessary; a large part of this amount was, I believe, promised in order that sufficient might be raised to entertain an Assistant Surgeon, the subscribers wishing to have such a man available for their own use. No sooner was the dispensary taken over by the municipality than many subscribers retired, induced, I am sorry to believe, by the fact that the Government rule requiring subscriptions no longer held, and that they would have all the benefit they wished at the expense of the municipal tax payers. This comes with bad grace from the supporters of local self-government (and one at least of those I speak of is amongst the strongest advocates of the movement), for it shows how little they are swayed by consideration for the public good when any self-interests also are concerned.

28. I may also note a case which shows how unfair a committee can be. This is not of much consequence now, but if local boards had been established it might have led to great injustice.

29. For many years there has been a native school kept up by the London Missionary Society in Berhampore, whose large numbers sufficiently show the necessity for its existence. A short time ago a grant was applied for, and the Director of Public Instruction asked me to lay the application before the Committee, who, by a majority of six to four, resolved that no grant should be given. The avowed objection was that the school was likely to injure the collegiate school and by thus reducing its numbers, and so raising its cost to Government, lead to its abolition or reduction. Seeing that the collegiate school draws at the rate of Rs. 3 a head, it was unfair to refuse a grant of only four annas per head to the other school. And the objectors forgot that the missionary school would, under any circumstances, be kept up, and that Government always keeps up a district school.

30. They were also most short-sighted. All of them are particularly anxious that the college should be kept up, and for years have been agitating, though, when the pinch came, they were not willing to help pecuniarily At present the retention of the college classes depends to a great extent on reduction of cost per student, and nothing but increase in numbers can lead to this The missionary school supplies to these classes double the number the collegiate school does, and therefore its retention or aiding is an absolute aid to the gratification of their dearest wishes.

31. There remains one point which I think requires consideration from a much wider point of view than that connected with the subject of local boards.

32. I allude to the proposal that District Magistrates and sub-divisional officers shall be without votes.

33. I have given my reason for thinking they should be Chairmen, but, except that disaster may ensue, do not object to their being utterly unconnected with the boards, except as controlling officers.

34. But on general grounds of policy, I object to the highest executive officers of Government being placed at the head of semi-independent boards, with the distinct intimation that they are to have no voice in the decisions of such boards. As a matter of State policy it seems to me that this course is unadvisable. It would fall on the chairman to see that the orders of the board were carried out, and thus there would (seemingly at any rate) be the head of the district or sub-division sitting with the board without any voice in it, and whose only duty would be to obey the board's orders.

35. It is true he might influence the board; but still the rumour that his power was gone, and that he was subordinated to the boards would spread; and as people are not as a rule able to discriminate, it would be concluded that he was powerless in all ways, and so would go his only power of ruling, viz., the respect of the people.

36. You will see from the reports of the sub-divisional officers that those of Jungipore and Kandi personally consulted with as many gentlemen as possible, whilst Mr. Beames at City Moorshedabad contented himself with calling a meeting—perhaps the worst possible way of arriving at the true sentiments of the people.

37. I myself have been about, and have asked many opinions. Some are very much in favour of the movement, though their ideas about it are hazy; some confess their inability to see what advantage is to be gained by it, they thinking that things go on very well as they are; and one or two profess their opinion that the scheme would end in failure, simply because outside members would not attend.

38. It was difficult, if not impossible, to get at real opinions, for vakeels deputed by the association had often been before me, teaching the people what they should say.

39 As I am now on tour with but limited means of copying letters, &c., I send this alone. From the sudder station the following papers will be sent in continuation :—

Copy of reports by the three sub-divisional officers.

Copy of reports by the Moorshedabad Association.

Copy of letter from Mr. Pope, the principal indigo-planter in the district.

Copy of proceedings of meeting at Azimgunge.

Copy of address presented to His Honor the Lieutenant-Governor of Bengal at Berhampore.

No. 303Met., dated Camp Dinagepore, the 21st November 1882.

From—LORD H. ULICK BROWNE, Commissioner of the Rajshahye and Cooch Behar Division,

To—The Secretary to the Government of Bengal, Medical and Municipal Dept.

IN continuation of my letter No. 294Met., dated 6th November 1882, on the subject of the extension of local self-government to municipalities, I have the honour to report on the question of local boards for districts or portions of districts.

2. After all that has been said by two Lieutenant-Governors in your letter No. 92[illegible], dated 8th April, and circular No. 5T—M, dated 5th July 1882, as to the difficulties of the problem and the absolute need of introducing and extending self-government tentatively and by degrees, especially in the matter of local boards, which seems to me necessary as much in the interests of local self-government as of those of the general interests of the administration, I need scarcely repeat what is written in paragraph 5 of my letter No. 294Met., viz. that I hope I may not be considered disloyal if I do not recommend as much as the Government of India would desire in the case of this division. It will be remembered that some of its districts were considered by Sir Ashley Eden to be so backward that he recommended their being excluded from any new Act for the extension of self-government, and that they should be treated for the present in another manner. Though this proposal has not been accepted by the Government of India, it will, I trust, be taken as an indication that much cannot be attempted at present with the slightest chance of success.

3. On a consideration of the reports I have received of the results of my own enquiries, and of the very different circumstances of districts and portions of districts in this division, the opinion expressed in my two previous reports on the general question as to necessity of drawing any Act for self-government, so as to allow the Lieutenant-Governor a wide discretion as to the introduction of its various provisions, and to allow of working as much as possible through rules to be passed under the Act, has been strongly confirmed.

4. The first question—is where local or district boards or committees should be constituted? In answering it, I bear in mind that the Government of India are prepared for some failures as a necessary consequence of the important step now to be taken, but there must be a limit to failure. To recommend what is, in my opinion, certain to result in failure, would injure the cause that Government are so anxious to advance; and it is because I wish to avoid that consequence that I do not advise the constitution of local boards in some sub-divisions or portions of districts. In the tracts referred to, an attempt to establish a local board would result in nothing less than egregious failure. For membership of a local board, two qualifications are indispensable—viz. that a man shall be fit and shall be really willing to act as a member. I do not here adopt a high standard of fitness; but I think willingness should be so far sought that there will be a probability of occasional attendance at meetings of the local board At the instance of district officers zemindars often consent to join a road cess

or other committee, but on being appointed fail to attend meetings or do any duty whatever as members; such members are of no use and would give no aid in extending self-government. I doubt if twelve zemindars or other native gentlemen, willing to drive in as many miles once a month to attend a meeting called by a district officer, will be found in the whole division for some years to come; and not six such gentlemen would do so to attend meetings, each in one of six sub-divisions, unless there were some special business to be done, and each zemindar was certain to have his own way about it. I should here say that, though the first announcement of Government was received with some enthusiasm by a limited number of the educated and higher classes, from all I have learnt while on tour I gather that the enthusiasm is already subsiding to a certain extent, while it never meant that all the enthusiasts were ready to work as members of boards. In fact, in this division, *real* interest in self-government, such as would stand the one small test of going a little distance to attend meetings, seems to be confined, with rare exceptions, to pleaders and mooktears with a few Government officers, especially officers of the Education Department. Even among these few, however, I should expect to find very few willing to work in an outdoor committee or in an office.

5. Turning now to the districts one after another, I proceed to make specific proposals in the matter of boards.

Dinagepore.—There are no sub-divisions in this district, and the Magistrate and I agree in thinking it impossible to constitute a local board for any particular tracts of it. This district will therefore come under the first of the three classes mentioned in paragraph 8 of the circular No. 5T—M, and will have a district committee.

Rajshahye.—The Magistrate writes as follows:—

"I am of opinion that this district may be brought under class (3), in which local boards can be formed in all sub-divisions. A glance at tables A and B, which are appended to this letter, will show that, both in regard to the road cess revenue derived from the sub-divisions, and in regard to the number of qualified candidates, the new sub-division of Nowgong stands far behind the Sudder and Nattore sub-divisions. Still I am of opinion that a local board can be formed in this sub-division, though at first it will have to be on a different footing as to election of its members and its chairman to that of the local boards in the other two sub-divisions."

I agree with the Magistrate in thinking that local boards may be constituted at Rampore Beauleah and Nattore, but I think it safer to constitute at Nowgong a branch committee under the sub-divisional officer, such as is contemplated in the case of districts placed in class (2) of paragraph 8 of circular No. 5T. Here are the figures relating to Nowgong, taken from the Magistrate's statements A and B:—

TABLE A.

No.	Name of Station.	Amount of road cess.	Total of each sub-division.
		Rs.	Rs.
1	Nowgong	3,933	
2	Panchoopore	5,423	
3	Mandah	2,672	
	Total ...	.....	12,028

TABLE B.

Road cess.

Name of Thana.	Over Rs. 8 and under Rs. 16.	Rs. 16 to Rs. 50.	Rs. 50 to Rs. 100.	Rs. 100 to Rs. 200.	Rs. 200 to Rs. 500.	Rs. 500 and upwards.	I Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Nowgong	16	12	8	1	1	1	39
Mandah	13	20	1	4	5	1	44
Panchoopore	11	5	2	2	2	3	25
Total ...	40	37	11	7	8	5	108

	LICENSE-TAX.							INCOMES.		
	Pay Rs. 10.	Rs. 20.	Rs. 50.	Rs. 100.	Rs. 200	Rs. 500.	II Total.	III Over Rs. 500 and under Rs. 1,000.	IV Over Rs. 1,000.	Total of I—IV.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Nowgong	58	10	5	.....	.....	.....	53	.....	.....	92
Mandah	16	4	1	.....	.....	.....	21	6	2	73
Panchoopore	62	11	2	1	1	.....	77	9	4	115
Total ...	116	25	8	1	1	.....	151	15	6	280

I do not say it is impossible to constitute a local board at Nowgong, but I think it a case for leaving the people to petition Government as contemplated at the end of paragraph 8 of circular No 5T, and on the whole I would place Rajshahye in class (2).

7. *Pubna.*—The Magistrate says nothing as to the classification of his district, but the whole of his report is based on the assumption that there will be local boards at Pubna and Serajgunge.

There should of course be one at Pubna, and perhaps at Serajgunge also, though I fear it will be difficult to find any one willing to be a member, and to attend meetings, who is not living at Serajgunge itself. Serajgunge is a great trade mart with some very capable residents, but the interior of the sub-division is backward. Two or three zemindars, however, live not very far away, and, on the whole, this district may be placed in class 3, with local boards at Pubna and Serajgunge.

8. *Bogra.*—The Magistrate says that, as far as he has been able to ascertain public opinion, it is in favour of a single district committee or board. Mr Livesay agrees, and observes that the district is a backward one There is no sub-division, nor could any other tract be separated with any prospect of constituting a tolerable board. In all this I entirely concur; Bogra should be placed in class (1).

9. *Rungpore.*—The question has been well considered by the Magistrate and the sub-divisional officers, and meetings have been held. At these latter there was what amounts to some difference of opinion as to whether there should be at the sub-divisions what are described in your paragraph 8 as local boards or a committee with the sub-divisional officer as chairman. Mr. Mendes, of Koorigram, has given no opinion on the point; but the Magistrate and the other two sub divisional officers have no doubt that the only suitable arrangement will be to have at the three sub divisions committees with the sub-divisional officer as chairman, while the Magistrate recommends a local board for the sudder sub-division, which he would place under a gazetted officer, selected by the Magistrate and Collector as chairman. As regards the three sub divisions of this backward district, I entirely agree that there should be branch committees with the sub-divisional officer as chairman, and I see no reason why a local board should not be constituted at Rungpore. I would thus place Rungpore in class (2).

10. *Julpigoree.*—The Deputy Commissioner thinks he has elicited native public opinion very satisfactorily, but, with one exception, the European tea-planters have taken no interest in, and expressed no opinion about, any question connected with local self-government. The Deputy Commissioner concurs with all whose views he has ascertained in thinking there should be a local board at Julpigoree to include the town union, and that the sub-division of Alipore is quite unfit for such a board. In this I agree, and would therefore place Julpigoree in class (2).

11. *Darjeeling.*—The circumstances of this district are peculiar, and are well described and discussed in paragraphs 9 to 15 of the enclosed printed letter from the Deputy Commissioner, No 1003G, dated 29th July 1882. I consulted several tea-planters, and they entirely agree with Mr. Wace. as do I also, in recommending three local boards for the Darjeeling thana, the Kurseong thana, and the Terai; the Kalimpong tract being altogether excluded, and the Kurseong Municipality being absorbed in the local board for the Kurseong thana. This district will therefore come under class (3).

12. I see that the present Lieutenant-Governor not only agrees with Sir Ashley Eden as to local boards forming the unit, but goes further in the matter of a general district board, doubting if one is necessary at all. I think there should be a district board to exercise the powers and discharge the duties suggested by Sir Ashley Eden in your letter No. 921½, and I think that matters which are sure to arise concerning more than one sub-division, such as road from Nattore to Rampore Beauleah, for instance, can only be dealt with satisfactorily by a district board. I do not think the plan contemplated in paragraph 7 of circular No. 5T M, of an union of boards or delegates to sit together, will answer in practice, and in addition there is, it seems to me, another and a very important reason for having a district board, provided that the district officer is the chairman of it, and that is, that the proceedings and working of the local boards may be watched and checked by that officer, which I think most necessary for more than one reason. If it is not done by him, I think it will be very difficult to do it at all. Rules and sections of laws may otherwise be disregarded quietly without any one hearing of it. and above all, there is the all-important ground of public policy. In the interests of the general administration, I think it would be a grave error to introduce so great a change as to entirely put aside the backbone of our system—the district officer—and especially at a time when an important step is being taken in administration.

Concurring in all that Sir Ashley said on that point, I earnestly hope there will be a district board with the district officer as chairman.

13. The next questions are connected with the election or appointment of members and chairmen of local boards. The former question is, in what sub-divisions to be created "local Government districts," or in other words coming under class (3), the elective system can be introduced as regards a portion of the local boards. I understand that the application of the system is also in contemplation (notwithstanding the mention of "local Government districts" in paragraph 8, and what is said in the second sentence of paragraph 9 of your No 5T) in any sub-divisions coming under class (2) considered fit for a local board. I think the system would be quite out of place in all districts coming under class (1), and in all sub-divisions unfit for a local board.

On this basis the Dinagepore and Bogra districts, the three mofussil sub-divisions in Rungpore and the sub-division of Alipore may be considered outside the elective system, and in the propriety of this I have no doubt. These districts and sub-divisions are entirely unfit for such a system, and on this point there is scarcely any difference of opinion among district and sub-divisional officers where they express one, though natives who have not thought over the matter, and are generally pleased at the first notion of the elective system, would introduce it everywhere, entirely irrespective of differing circumstances

At a meeting of native gentlemen at Dinagepore, resolutions in favour of the elective system were passed, but it is only necessary to look at the maps to judge what chance there would be of any local representatives of the distant thanas in north, west and south ever attending a meeting. This applies to Bogra also. The Magistrate of Dinagepore thinks the elective system quite unsuited to that district, and the Magistrate of Bogra is opposed to it till it has been at least successfully tried in the municipalities. The Magistrate of Rungpore and his two sub-divisional officers, who have expressed an opinion, are opposed to it. The Deputy Commissioner of Julpigoree says nothing about Alipore, but I am sure he is also opposed to it in that sub-division, and apparently understands the system to be out of the question where there is no local board, in which general view I concur.

14. I understand that in districts coming under class (1), such as Dinagepore and Bogra, the district officer will be chairman of the district committee as a matter of course, and that in all sub-divisions not considered fit for a local board, the sub-divisional officer will similarly be chairman of the branch committee; but I may mention that the following opinions have been expressed as regards the above districts and sub divisions not being considered fit for local boards

The Magistrate of Dinagepore says that he and all the leading native gentlemen think the chairman of the district committee or board must be an official, and at first, at all events, must be the district officer He thinks it would be quite impossible for any non-official to do, or get the work of a district committee done, properly, and it is certain that there is no non-official who is both qualified and willing. There was a difference of opinion at the meeting of native gentlemen on the point, a majority being in favour of a non-official, whom they would elect.

In the Bogra district the opinion of all educated classes, who alone have expressed any opinion, is that there is no non-official who is fit to be chairman and though this is not stated distinctly, as it was in the case of the chairmanship of the municipalities that the district officer should be chairman, opinions of native non officials were divided as to whether the three sub-divisional officers of Rungpore should be chairmen, or whether a non-official should fill those offices; but the Magistrate and the sub-divisional officers are all agreed that the latter must be chairman As for Alipore, it is so backward that I really do not think it will be possible for the present even to form a branch committee under the chairmanship of the Sub-Divisional Officer.

15. My own opinion as regards the chairmanships of all committees, branch committees, and local boards, may as well be given here, and what it is may be inferred from what I wrote in regard to municipal chairmen. If I know no non-official at this moment who is both fit and willing to be chairman of a municipality, I certainly know none who is qualified for the chairmanship of a local board; and I can only repeat my opinion that an official should be appointed in every case, and that the chairman of all district boards should be the District Officer. In the case of sub divisional boards the Sub Divisional Officer should be chairman, and if there is a district board the Joint-Magistrate or senior Deputy Magistrate may be chairman of the sudder sub-divisional board. If there is no district board, then the District Officer should be chairman of the sudder sub-divisional board. As regards the District Officer being chairman of the district board that I hope will be constituted, I would refer to what I have said in paragraph 12 of this letter as to general considerations of public policy rendering that advisable; while as regards the local boards, what I said in paragraph 9 of my letter No. 294 about avoiding failure and inviting non-officials to train themselves for chairmanships applies to local boards. I may add that Mr. Norman also observes that after a time non-officials might become fit to be chairmen, though unfit now.

16. The question whether, if the chairman of a local board is the sub-divisional or other Government officer, he should have a vote, has not been dealt with at all by the Magistrates of Rajshahye, Pubna and Bogra and the Deputy Commissioner of Julpigoree. The Magistrate of Dinagepore would certainly give the chairman of the district committee a vote. The Magistrate of Rungpore thinks the experiment of not giving a vote might perhaps be tried, and the Deputy Commissioner of Darjeeling would certainly not give it. There is some difference of opinion, where any has been expressed at all, among native non-officials on the point; but on the whole there is a slight preponderance of opinion against it. My own idea is that it would be a great mistake to lower the position (which it seems to me would be the certain result) of the Government officer by not giving him a vote, and I would give him one in every case.

17. Having eliminated the districts and sub-divisions considered unfitted for the elective system, I take the others in turn.

Rajshahye.—The Magistrate says that the general opinion of native gentlemen in the district is that two-thirds of the members of the local boards of the Sudder and Nattore sub-divisions might be elected, and in this he agrees. I see no objection to this trial of the experiment in these two sub-divisions. A meeting was held at Nowgong which "did not

express any general wish for election, though specially asked on this point" I do not think the Nowgong sub-division fit for the system, though the Magistrate is disposed to allow one-third of the members to be elected.

As regards the chairman, the Magistrate writes—

"Both at the Sudder and Nattore sub divisional meetings which were held, the opinion was strongly expressed that the chairman should be elected by the board and not be nominated, and that they should be at liberty to elect a non official. The meeting held at Nowgong considered that the chairman should at first be the Sub-Divisional Officer, and in this opinion I fully agree. There will be many difficulties attending the experiment at Nowgong, and the members of this board will almost, without exception, have had no experience of committee work, such as many of the members of the two other boards will probably have had. Establishments will have to be organized and instructed, and a man of the necessary experience will be required to put the new system into proper working, and to guide and superintend its first steps.

"As regards allowing the other two boards to elect their own chairman, we are so utterly in the dark, both as to who will be the members who will be elected (it is proposed that two-thirds of them shall be elected) and as to how they would experience the privilege, *i.e.* whether they would elect a suitable chairman or not, that it is hardly safe to venture an opinion. The chairman must, I think, be resident where the office is, and this must be at the head quarters of the sub division. Then he must certainly have some business qualifications, and it is not at all certain that the members who would elect him either know what these qualifications are, or would select a man possessing their qualification if they know. It is on the chairman or vice-chairman principally that the success of the committee in the management of its affairs will depend. It is through him all orders to the establishments must be issued, and it will depend more than anything else on his active supervision that the establishment works efficiently.

"At the sudder sub-division, where the experiment will be under the close and immediate supervision of the District Officer, and where in all probability there will be some experienced Government officers on the committee, the experiment might perhaps be tried. But at Nattore, where the Sub-Divisional Officer is alone, I think the experiment of local self-government would be more likely to succeed if at first the Sub-Divisional Officer were chairman. When the board had shewn by their intelligent interest and successful management that their qualifications were sufficient, they might be allowed to elect their own chairman At present we cannot anticipate that the majority of members of the Nattore board will have any knowledge of committee business, or of the affairs they would have to control, so as to be able to act without the guidance of the Sub-Divisional Officer, as though a few will have been engaged on committees, the majority will probably be new to the work. Besides, the control from without will be a difficult business, requiring much tact, which it would be better at first for the District Officer to exercise than for the Sub-Divisional Officer. The appointment of the Sub-Divisional Officer as chairman might be understood to be only temporary."

18 *Pubna.*—The Magistrate reports that at Pubna a strong desire was expressed for the elective system and a non-official chairman in the sudder sub-division. "The moving spirits at the meeting were evidently the pleaders and other educated inhabitants of the town;" but the Magistrate goes on to say that the zemindars accepted those views when asked, though not much interested about the matter. He would limit election to six out of twelve members, and only apply it to an area near the sudder station, which he does not specify, pending approval of his proposal. He would allow the members to elect their chairman, either from their own body or from outside I see no objection to trying the elective system for members at Pubna to the extent suggested.

In the Serajgunge sub-division the zemindars have all declared for nomination of members and for an official chairman, and it is understood that they presented to the Lieutenant-Governor, when he was there, a petition to that effect. The Magistrate is nevertheless in favour of introducing the elective system in part. Mr. Farrer, who knows the sub-division well, is much opposed to it. I think the strong and, I understand, unanimous wish of the zemindars should prevail. It would be a great mistake to introduce the elective system where it is clearly not wanted by those most concerned, or by such of them as are competent to form an opinion.

19. *Rungpore.*—As regards the sudder sub-division, the Magistrate says the members of the board should be appointed by Government and not elected, and the chairman should be an official. He writes as follows:—

"With regard to the introduction of the elective system, the general population have no desire whatever for the franchise, and in fact are profoundly ignorant of the very meaning of the term; they are also, owing to the absence of education, quite unfitted for the exercise of the franchise. If elections were held, it might be possible with some difficulty to get a certain number of voters together, but it would be impossible to render the voters capable of appreciating the object and utility of the proceeding. In this district education is as yet in a very backward condition; the population exceeds two millions, but the total number of primary schools, aided and unaided together, only amounts to 394. The above facts cannot be disputed, and are in my judgment quite conclusive against the immediate introduction of the elective system. Nevertheless, if a meeting for the consideration of the question be held at the head-quarters of any of the sub divisions, the persons who attend it,

consisting chiefly of professional men, such as vakils, mooktears, Government servants, native doctors, &c., with a few zemindars and zemindars' servants, will profess themselves in favour of the immediate introduction of the elective system, and such has actually been the case at all meetings held at sub divisional head-quarters; but on questioning these gentlemen, it is at once made evident that they have not thought out the problem with sufficient care and attention. The more the question is considered, the more certain it appears to be that the attempt to introduce elections outside the municipality would be premature, and would be merely to invite failure"

I entirely concur in thinking the Rungpore sudder sub-divisions quite unfitted for the elective system

20. *Julpigoree.*—The Deputy Commissioner concurs in the unanimous opinion of a meeting that "some" (he does not say how many) members of the sudder sub-division board should be elected. Julpigoree is as backward a district as Rungpore, and is in my opinion unfit for the elective system. It would take a long time to make the voters understand it, and I would not introduce it until, and unless, a petition of some weight asking for it is presented to Government. The Deputy Commissioner and the meeting are and were both in favour of the election by the board of their own chairman.

21. *Darjeeling.*—I agree with the Deputy Commissioner, and all non-officials consulted, that the elective system is quite unsuited to this district, unless it be as regards the election by planters of members from their own body, as suggested at the end of paragraph 14 of Mr. Wace's letter. But I think such a very trifling and partial election undesirable, and the planters do not desire it. The Deputy Commissioner's opinion on the question of an official or non-official chairman, and his election or appointment, are stated in his paragraph 15. The planters are in favour of an official, but do not say if they would elect him or think he should be appointed by Government. Some who say they agree with Mr Wace on all points may be understood to agree with him as to letting the local boards elect their own chairman either from their own body or from the officials.

22. The next questions are those connected with the elective system where introduced, viz. the qualifications for (1) voters and (2) members of Board, (3) whether the number of votes should vary according to the stake of the voter, (4) a condition as to residence in the case of members, and (5) whether any special systems of election or modes of voting should be applied in any particular localities.

23. Point five may be disposed of at once by my saying that no one thinks any special system or mode of voting needed anywhere, and in this I agree. The truth is that the elective system is entirely unknown in the division, and it is natural that no suggestion for arrangements not in force where it is known should be made at present. I would only allow votes to be given in person (at the thanas), as it would be impossible to trust voting papers when presented as having been signed by voters at a distance, though any tricks might be detected in the small area of a municipality in which an enquiry could be made promptly and easily

24. The Magistrates of Bogra and Rungpore, and the Deputy Commissioner of Darjeeling, being opposed to applying the elective system in their districts, say nothing on these matters. The Magistrate of Dinagepore adopts the views of the Lieutenant-Governor on points 1, 2, 3 and 4 as suitable where the elective system is applied. It will be observed, from the proceedings of the meeting held at Dinagepore, that it was in favour of lowering the qualifications of both voters and members, and of admitting some special educational franchise, such as certificates from normal schools and moulvies. The Magistrate of Rajshahye says—

"At nearly all the meetings held on the subject of local self-government, purely educational or professional qualifications have been proposed. Thus the Rajshahye Association proposed for voters anyone 'who had passed the junior scholarships, entrance, or final normal school examination, or who is a passed native doctor, overseer, mooktear or second grade vakil, or who is a titled pundit or moulvi,' and for members anyone 'who is a graduate of the University or assistant surgeon, or assistant engineer, or supervisor, or is a vakil of the Judge's Court' A purely educational or professional test, without the qualification of some property, does not commend itself to me. The furthest I would go would be to lower the property qualification to, say, one half in cases where qualifications were present, which insure a higher than the average intelligence, so that the candidate makes up by intelligence what he lacks in means. To allow men without independent means to be members would be to court jobbery, as I do not believe such members could afford to give the necessary attention to their board duties unless they anticipated making out of them profit which would supply the income which they had failed to obtain by more legitimate means. The only exception I should be disposed to make would be in the case of titled pundits or moulvies as professional scholars of the languages of the country, but even here also the reduced property qualification would probably be a sufficient concession."

The Magistrate would lower the qualification of road-cess payment from Rs. 10 to Rs. 8 for voters, and from Rs. 25 to Rs. 16 for members On other points he adopts the suggestions of Government. The Magistrate of Pubna does not suggest any changes, nor report any opinions of meeting or individuals on points 1, 2, 3 and 4. At the Julpigoree meeting all the suggestions of Government were adopted with the additions of graduates and under-graduates as voters, and graduates as members. At meetings in Rungpore educational and professional qualifications were proposed, and it may be said generally,

though not specifically stated in the reports, that in most places where meetings have been held of native non-officials, the pleaders and mooktears have proposed purely professional and educational qualifications.

25. There is a pretty general concurrence that the police thana should be the area represented, the only differences in opinion being as to the number of members for each thana. I think this might be varied according to population and general importance, and this has been proposed in some cases.

26. I think the suggestions of Government on points 1, 2, 3 and 4 may be adopted as they stand, with one modification only, to be presently stated.

From the figures given by the Magistrates of Rajshahye and Pubna, the numbers of voters would not be large, but I think this would be an advantage on the introduction of such a novelty, and I would give power in the Act to the Lieutenant-Governor to vary from time to time the qualifications in the case of both voters and members. I am not sure that the modification I am about to propose is needed under the terms of paragraph 10 of the Government circular; but if it contemplates allowing pleaders and mooktears, who have a sufficient professional income earned, say, at Rampore Beauleah, while they have no property whatever in the Rajshahye district, and their homes are in Calcutta, to offer themselves as candidates for membership, I would not allow it. Such a qualification should suffice for voting, but nothing less than real property in the locality should quality for membership. I think this, because I find that these professional classes, without any property in the localities, hope to keep a large share of local administration under the new scheme among themselves, and this idea is so distasteful to others, that I think such a result would throw discredit on local self-government and make it unpopular.

27. Referring to paragraph 12 of the circular, very little has been added by such district officers as have written at all on the subject to what was reported in paragraph 11 of my letter No. 492M, dated 20th January 1882, in regard to ways and means to enable the local boards to do any useful work, except that the Magistrate of Pubna suggests a 1 per cent. chowkidari tax to be levied on all through punchayets. The Magistrate of Rajshahye now agrees with those who suggested that a share of the surplus excise revenue might be made over to the boards to interest them in suppressing illegal practices—a suggestion that I supported in my above cited letter. He also thinks a share of the license tax should be made over, and the Deputy Commissioner of Julpigoree apparently concurs in the general opinion of the meeting there that the whole of the proceeds of that tax should be made over No officer, however, is in favour of making over either the assessment or the collection of the tax to the boards, all agreeing that no change should be made in the existing arrangements. It may be said that the district officers support generally the previous proposals to make over certain branches of business, and with them the proceeds arising therefrom, or the grants now made by Government, on such accounts. Native non-officials appear to have said little on this subject, except on two points, though I believe that on the amount of money placed at the disposal of the boards will mainly depend the popularity of, and interest taken in, self-government. All natives seem to agree with the district officers in thinking that the assessment and collection of license-tax should not be made over to the boards. as it would place them in an invidious position, and that no powers of fresh taxation should be entrusted to them.

28. For my own opinion as to the sources of revenue to be made over, I request reference to paragraph 11 of my letter No. 492, dated 20th January 1882. I specially urged there that a grant should be made to the boards from the Public Works cess, and I have only to add to the suggestions made in that letter the following remarks and opinions. I concur in the general view that the local boards should have nothing to do with the assessment and collection of the license-tax. It would make membership unpopular and injure the cause of self-government until native ideas undergo a great change in the matter of taxation. I would empower the boards to levy a local rate, but would not press on them the exercise of that power at first.

29. There remains the question of control. Where there is a district committee, I understand that matters will go on much as they do now under the Road Cess Act, and that no material alterations of law or practice will be made. It is probably in this view the Magistrates of Dinagepore and Bogra say nothing on the question of control, but neither do the Magistrate of Pubna nor the Deputy Commissioner of Darjeeling: while all the Deputy Commissioner of Julpigoree reports is that he and the meeting agreed as to limiting the powers of the board to sanction new works to an expenditure of Rs. 2,000 and to sanction repairs up to an expenditure of Rs. 5,000. As regards the sanction to certain acts, the Magistrate of Rungpore says nothing, but on the second point he prefers control by the Commissioner to control by a central board.

The Magistrate of Rajshahye has written what seems to me well worthy of consideration on the first point, and I append an extract from his letter. I concur in his suggestions (*a*), (*b*) and (*c*), but I think it unnecessary to trouble Government in the case of all appointments: such limits as are laid down in the Road Cess Act seem very suitable, some appointments being sanctioned by the local board, some by the Commissioner, and some by Government It will be observed that Mr. Ruddock agrees with Mr. Norman in preferring control by the Commissioner to control by a central committee, and much as I should personally like to be relieved of the duty, I concur in that view for the present at all events. In addition to the limit of expenditure on single works, which might follow the figures in the rules under the

Road Cess Act, I would require the sanction of Government before any local rate is imposed, though I believe that some time will elapse before any board will suggest a rate. No other acts requiring sanction occur to me at present. Of course the board must be required to keep a record of their proceedings at meetings, and to send copies to the authority decided on. I think that real and useful control will be very difficult if the District Officer is not chairman of the district board, if in that capacity he does not receive copies of the proceedings at meetings, and if he has not such powers as are described by Mr. Ruddock under heading (*f*). I think the District Officer should report to the Commissioner all cases where he thinks the board have gone wrong and refuse to be set right. If the local board still refuse to do so in cases where the Commissioner concurs with the District Officer, the case should be reported to Government, and if the Government order is not carried out, then I would certainly supersede the board altogether, and appoint a fresh one after a short interval, during which its duties would be entrusted to the executive under certain rules made by Government, deciding on what matters the Commissioner's approval and sanction must be obtained. I think a central committee or board would be at a great disadvantage in having no local knowledge or opportunities of seeing anything in any one district without detriment to their duties to the boards of the country as a whole.

No 1003G, dated Darjeeling, the 29th July 1882.

From—A. A. WACE, ESQ., Deputy Commissioner of Darjeeling,

To—The Commissioner of the Rajshahye and Cooch Behar Division.

IN accordance with your verbal request, I have the honour to submit the following suggestions with reference to Government circular No 5T—M, dated 5th July 1882, on the subject of local self-government.

2. I state first the factors with which we have to deal in this district: one first class municipality—Darjeeling; one second class municipality—Kurseong; two sub-divisions, one comprising the Kurseong thana and the Terai, the other the rest of the district. There is one District Road Cess Committee with powers over the whole district, and one Branch Committee for the Terai with consultative powers only.

3. I deal first with the Darjeeling Municipality The points to be considered are—

1st—Whether the rate-payers are in a position to elect Commissioners;

2ndly—The Board of Commissioners being constituted, whether it should elect its own Chairman; or

3rdly—Whether it is necessary that an executive officer should be Chairman, but without a vote in the proceedings

4. As regards the first point, I am of opinion that in neither municipality can the elective system be introduced. The resident population of Darjeeling consists of the following elements:—

A.—A few European officials.

B.—A greater number of non-official Europeans.

C.—About an equal number of educated Bengalis, chiefly employed in the Government offices.

D.—A good number of shop-keepers, chiefly from the North-Western Provinces of India.

E.—A—large labouring population comprised of plainsmen doing skilled labour and household service—Bhooteas, Paharias, and Lepchas.

5. You will, I am sure, agree with me in thinking in that Classes C and D alone would any desire for the elective system be found to exist They do not represent anything like one-third of the rate-payers, and it is to be remembered that they are aliens to the district, Class C having little influence on the real natives of the hills, and Class D, not without influence, but viewed by natives as a creditor is viewed by a debtor. Class E would be at once excluded on the principle laid down by his His Honor the Lieutenant-Governor that the political education contemplated "should succeed, not precede, education in the ordinary sense of the term." Education has hardly yet touched the masses even of this principal town of the district. Darjeeling is, as regards the vast majority of the population, a "backward rural tract" (to use the words of paragraph 13 of the Resolution of the Government of India), in which the election should be extended "cautiously and gradually." I need only quote the following figures to confirm this assertion. The population of the municipality is returned by last census as 7,018, of whom only 841 are shown as able to read and write.

To Class B, non-official Europeans, the elective system does not, I believe, recommend itself. Non-official Europeans are very fully represented in the Municipality and evince (to use again the Lieutenant-Governor's own words) "much independence and public spirit in the discussion and direction of municipal affairs."

6. I would then, as regards the first point, deprecate the election of Commissioners by the rate-payers in either of the municipalities of this district. If, however, I am overruled, I would propose the following modification of the elective system. I would not wait to be moved by a petition of one-third of the rate-payers. There is really not that proportion of the residents who would understand that they were asking. I would allow two-thirds of the

Commissioners to be elected by those whose payments on account of the rates are such that they might be presumed to be fit for "political education" We might, for this purpose, take the occupiers of holdings paying Rs. 7 house-tax and upwards, who number 391, and all residents of the municipality who pay license-tax of Rs. 10 and upwards. These last number 124; but of these 93 are included in the 391 paying Rs. 7 house-tax. The remaining one-third should any how still be nominated by Government, and should be considered to represent the uneducated classes and the Government interest involved in the maintenance of this sanitarium.

7. I proceed to consider the second and third propositions as stated in paragraph 3 of this report The considerations which have induced the Lieutenant-Governor to maintain the chief executive officer of the district in the position of Chairman of the Calcutta, Howrah, and Suburban Municipalities, apply in a certain degree to this town. I have already noticed the "independence and public spirit in the discussion and direction of municipal affairs" which even our nominated Commissioners evince. There are also "special interests," certainly of a "provincial," and in some way of an "Imperial" character, which are involved in the administration of the Darjeeling Municipality. I was two years Chairman of the Howrah Municipality, and am therefore in a position to compare at least that town and Darjeeling. The Lieutenant-Governor, however, and his advisers have a personal knowledge of the wants of this place, and can well decide whether the chief executive officer should remain Chairman of the Darjeeling Municipality I would, however, at least beg, for the reasons given in paragraph 6 of this report, that he do not wait for a petition from one-third of the tax-payers in this matter either. If a more pronounced indication of my own opinion in the matter is desired, I should be disposed to recommend that the Commissioners should be asked to nominate their own Chairman. At the same time knowing the character of the municipal work which devolves on me, I feel bound to express a doubt whether non-officials would be willing "to accept the responsibilities of the office without a special salary," and I am confident that the funds cannot, with justice to the growing wants of the town, stand this extra charge without an increase of taxation. The matter, however, is one in which you could elicit more satisfactorily than I could the wishes of the Commissioners in the matter It is possible that if the rate-payers enjoyed the privileges of election in the modified form suggested in paragraph 6 of this report, "the Commissioners would prefer to retain the gratuitous official agency now available to them" (*see* paragraph 5 of the Government letter) If it is decided to maintain an official Chairman in Darjeeling, whether he be the Deputy Commissioner or another. I would let the question whether or no he should have a vote in the proceedings depend on whether his maintenance rested on the will of Government, or on the wishes of the Commissioners. In the latter case, I would give him a vote; in the former, I would not.

8. The Kurseong Municipality is of the second class, with a population of 4,343 souls, and an income of Rs. 4,039. I intend to propose a local board for the Kurseong thana; and having regard to this, I am disposed to recommend the abolition of the Kurseong Municipality in accordance with the suggestion made in paragraph 13 of the Government circular "in view of the extensive powers to be entrusted to local boards." If, however, this advice is not adopted, all I have written as regards the inapplicability of the elective system applies with equal force to Kurseong. The modified system of election suggested in paragraph 6 might be adopted, if something must be done in this direction.

My opinion, however, on points 2 and 3 of paragraph 3 would not be quite the same as regards Kurseong. If this small municipality is to be maintained, I would certainly let the Commissioners elect their own president. The Deputy Commissioner now fills the office of Chairman, and the Sub-Divisional Officer that of the Vice-Chairman. The checks on their influence, alluded to in paragraph 5 of the Government letter, do not exist to the same extent in Kurseong as they do in Darjeeling Two officers would be unnecessary for so small a place, and I would, as I have said, let the Commissioners, whether all nominated or in part elected, select their own president, call him Chairman, and be independent of both the District and Sub-Divisional Officer.

9. I now proceed to the consideration of local boards I would, in the first place, eliminate altogether from the scheme the tract east of the Teesta, commonly known now as Kalimpong I have served for a short time in the Sonthal Pergunnahs, and can confidently say that Kalimpong is less fit even for an experiment of the kind proposed than that district We are just introducing our first land settlement Even our munduls cannot all read and write, and to expect them to do any more work than their sunnuds require of them would be idle. In some of this work perhaps we may trace the first germs of self-government, but it is a mere germ, and to attempt to force it would be to kill it.

10 As regards the rest of the district the following remark, to be found in my first report on the subject, fully applies "This district seems to me specially well suited for an experiment of this kind, as having scattered over it a considerable number of intelligent, pushing Europeans, whose personal interests are largely bound up in its development" I further think that the adoption of small jurisdictions as the unit of administration renders self-government in the modified form, in which I should introduce it, even still more suitable to this district than the original idea of one central board. The men to whom we must chiefly look for working out this policy are so scattered and so engrossed in their own important affairs that they would have neither the local knowledge to deal with the whole district, nor the time to attend the constant writings which efficient control of a large area in the

many departments, to be now handed over, would entail. At present the official members of the Road Cess Committee supplement the non official ignorance of outlying tracts, and harmonise their conflicting interests; while six or seven meetings a year dispose of all business. Three local boards, however, dealing independently—one with the Darjeeling thana; one with the Kurseong thana; one with the Terai—could, I believe, efficiently work the district in the departments to be made over to it.

11. I have stated that it is to the tea-planters of this district that we must look chiefly for the working out of this new policy. This is only consistent with the last sentence of paragraph 10 of the Government circular, and it is perhaps unnecessary to justify the assertion by reminding you of the large area in the hands of tea-planters, and of the fact that this represents the chief wealth of the district. The hill plantations adjoin one another for mile after mile, separated here and there only by Government forests. The few bazars in the interior have been developed by, and are situated on, the property of planters The only population of these gardens is entirely dependent on the owners and managers, and is as much alien to the district as is the planter himself, having immigrated from Nepal. Even the majority of the few native land holders of the district are equally aliens, and but few of them are in a position to work effectively on a local board. It is on the planter, I repeat, that we must chiefly depend for the development of this policy. He is much more independent than any native of the district, and his interests are bound up equally with the natives in the development of the district.

12. How then can we best utilize this agency? I have suggested the establishment of three local boards. The necessity for constituting the Terai separately from the hills, you will, I know, at once recognize. Lest you should think that I am unnecessarily sub-dividing the Hill Tracts, I may state that the area which contemplate being served by the Darjeeling Board comprises 64 tea gardens, the Government cinchona gardens, all but four of our khas mehals west of the Teesta, and most of the grants held by natives. The area which I contemplate being served by the Kurseong Board comprises about 34 tea gardens and the present Kurseong Municipality. I have long felt that the hills below Kurseong are poorly represented on our present Road Cess Committee. Residents of these tracts are in the list of members, but they can rarely attend meetings. I believe they would assist in working a purely local board; and I think they might well be entrusted also with the administration of the little town of Kurseong. At present the Sub-Divisional Officer practically has to manage this; but his position is inconsistent with the spirit of the present Government policy, and I cannot assert that there is any necessity for it in the circumstances of the place.

13. The Terai Board would represent about 50 tea gardens, and the native jotedars of the Terai. I am aware that Kurseong and the Terai now form one sub-division for executive purposes, but the Government circular contemplates the adoption of even smaller jurisdictions than sub-divisions, and this is a case in which this discretion should undoubtedly be exercised. Terai men, you know, are very shy, on grounds of health, of paying frequent short visits to the hills, and their interests are in some ways different from those of their fellows in the hills. I would specially notice, for instance, the necessity of keeping to the Terai Board alone the administration of the one anna cess levied on Terai jotes.

14. I would then declare the Darjeeling districts, excepting that part east of the Teesta, a local Government district. It remains to consider how the boards should be constituted. What I have said above with reference to the elements comprising the population, their feelings, and the state of education, applies with even greater force to the whole district than it does to the Darjeeling Municipality, and it seems to me hardly worthwhile to consider the possibility of extending the elective system to this district, even in the modified form in which I have said it might perhaps be applied in the Darjeeling Municipality. As regards the mass of the people it is most certainly in the words of the Resolution of the Government of India a "backward rural tract." The Census shows the population of the whole district, excluding Darjeeling Municipality, as 148,161, of whom only 6,137 can read and write. I may note that the number of persons paying road cess of more than Rs. 10 in the hills, excluding planters, is only five; that the number of persons paying license-tax outside the Darjeeling Municipality is only 222. The principal other persons, with an income approaching in any way the limit suggested by paragraph 10 of the Government letter, are sirdars of coolies on tea gardens, and each of these would of course vote for his master. The only kind of election which suggests itself to my mind as practicable is to ask the managers of tea gardens in each particular area to elect their own representatives on the board. Government might fix the number of members to form each board, the proportion of the seats which might be filled by planters, and then rely on election to fill these. I do not know, however, that managers of gardens would care to exercise this power, and I am disposed to think that the result would anyhow very closely tally with the results of nomination by Government.

15. To these local boards, whether constituted entirely by Government nomination or partly by election, I would give the option of electing their own Chairman, either from among their own body, or from the official staff of the district. Having regard, however, to the nature of a planter's work, I doubt very much if any gentleman of this class would be able to undertake the work of Chairman, even if disposed to do so, without a special salary. There is certainly no non-official in the district, not of this class, in a position to undertake

the work. I doubt therefore whether election, if allowed, would materially charge the present system, and think it not unlikely that the local boards would themselves prefer "to retain the gratuitous official agency now available to them," especially if, as I would certainly recommend, the post of Chairman, if held by an official, carried no vote with it. The board would, with this arrangement, to use the words of paragraph 22 of the Resolution of the Government of India, be "left unfettered in the initiation and direction of operations," and the Chairman would be "placed in the position of their servant, and not of their master."

* * * * * * * *

21. I trust that in what I have written I shall not be thought to cling to "preconceived ideas on general questions of policy." Were I now in charge of a plains district, inhabited by people of one language, and with the same feelings and aspirations, I should be ready to push the declared policy of Government to its utmost. But it is to be remembered that Darjeeling is a frontier district, peculiarly circumstanced, containing sanitaria designed chiefly for Europeans and tea gardens worked by European capital and energy, on the success of which depends much of the prosperity of the natives, and which contribute largely to the development of the trade of the empire. Its population is very mixed, and the most intelligent native element thereof is alien to the district. True natives of this district and the adjoining tracts would be pronounced by the last-mentioned element as utterly unfitted for self-government, and they, on their part, would infinitely prefer to be governed by the class which has done so much for their district, rather than by the native immigrants from the plains, whom the success of European enterprise has attracted to it. All these points I have had to weigh, and I am satisfied that the best way to "give the fullest effect to the wishes of the Supreme Government that may be compatible with my duty to my own charge" is to look chiefly to the European residents of the district for the establishment and working of local boards. The more independent these boards make themselves consistently with efficiency, the better for those on whom "the task of administration is yearly becoming more onerous."

Extract from a letter from the Magistrate of Rajshahye.

SANCTION TO CERTAIN ACTS—(1).

Control—(*a*). I think there should be a formal budget prepared and approved by Government.

(*b*). The rates of expenditure on establishments to other expenditure should have a maximum limit only to be exceeded by Government sanction.

(*c*). The creation of new permanent appointments of a certain value should require Government sanction.

(*d*). All appointments above the lowest should be sanctioned by Government, unles the nominee is a person who has been certified by proper authority to be a qualified candidate. It is absolutely necessary that all important officers, such as an accountant, a road overseer, &c., should be properly qualified. The best plan, in my estimation, and that to which fewest objections could be raised, would be to allow heads of departments or a special examining body to give certificates of efficiency after proper tests had been imposed, and only to allow candidates so qualified to be appointed.

(*e*). The District Officer should have power to suspend, and the Government to dismiss, any of the establishment who willfully break any of the rules authoritatively laid down by Government for the guidance of the local boards establishments.

It must be remembered that Government has no practical means of punishing members of a local board, who are not Government officers, for neglect of, or disobedience to, its rules, and, if it cannot touch the principal, it should have power to punish the agent.

(*f*). The position of the District Officer should be defined. He should have ample powers of inspection of every paper and account, and of summoning the establishment to appear and answer his inquiries as to the conduct of business. He should, I think, be entitled to call the local board together to confer with him and to hear the views of Government, and to explain breaches of Government rules committed by them. He should have the power of stopping any work which he considers injurious to the public interests, pending a reference to the controlling authority, and power to stay expenditure in excess of the budget estimate or the funds at the command of the local board. Reference to the controlling authority will involve difficulty and delay, and is not likely to be unduly resorted to, and it must not be rendered ineffective for want of summary power to keep the question open until it can be properly inquired into The real responsibility of the District Officer must necessarily be proportioned to his power, and though, no doubt, every District Officer has an unlimited belief in his own power of persuasion—a belief justified by experience—still it will certainly be found that in the long run his power of persuasion will be proportioned to his power of enforcing his views.

No. 1803, dated Camp Balasore, the 8th December 1882.

From—A. SMITH, Esq., Commissioner of the Orissa Division,

To—The Secretary to the Government of Bengal, Financial Department.

WITH reference to Government circular No. 5T—M of the 5th July last, and its enclosures, I have the honour to submit my proposals for introducing into the Orissa Division the scheme of local self-government therein sketched out.

2. I would premise that the widest publicity has been given to the wishes and intentions of Government on the subject under notice. Orya translations of the Government circular and its annexures have been distributed, and the persons best qualified to form intelligent opinions have been consulted, large and influential meetings have been held at the head quarters stations of every district, and at those of some of the sub-divisions, where the subject has been discussed, and the resolutions passed at some of these meetings have been communicated to me and the district officers. Copies of the Government circular and its enclosures were also sent by some of the Collectors to selected zemindars, who have duly responded to the call for an expression of their opinion.

3. I have carefully considered the views and sentiments expressed by the several district officers in their respective reports, and those contained in the resolutions of the public meetings, as well as the views of the other persons, official and non-official, who were specially consulted. I have also duly and carefully weighed the local circumstances of all the districts, including their sub-divisions, with which I am well acquainted, having been in charge of the division for nearly five years, during which I have often visited the principal parts of it, and have had personal intercourse with most of those who, by their education, intelligence, or social position, may be said to occupy the foremost ranks in the communities at the various places they respectively belong to.

4. It is to be borne in mind that Orissa is still a backward province. It came into British possession more than a quarter of a century later than Bengal, and was for a long time afterwards regarded as a comparatively unimportant adjunct to the sister province. Although it was previously under the administration of able officers like Messrs. Ricketts and Mills, it was not until that dire calamity, known as the Great Orissa Famine, befell the country that its wants largely attracted the attention of Government. Since then, however, what with the irrigation and navigation canals provided by Government, the steam services established by private firms between its ports and Calcutta, the opening of a college at Cuttack, and the multiplication of schools of all classes, the province has advanced greatly, both materially and intellectually, and it is so rapidly growing in education and intelligence as to warrant the hope that ere long it may be found equal to the generality of the districts of Bengal. Full scope may then be legitimately given to the policy of local self-government enunciated in the papers under reference. At present I consider it advisable that the measure should only be put into partial operation, and I would gradually extend its scope as the people become prepared for it.

5. There are at present five municipalities in this division—three at the head-quarters stations of the three districts Cuttack, Balasore, and Pooree, the first two being in the second class, and the last in the first class, and two of the sub-divisional head-quarters of Jajpore and Kendrapara, in the Cuttack district, both of which are in the second class. I would establish elective boards only in the three district head-quarters towns, leaving the small municipalities at the sub-divisions as they are. I would give each of the three municipal boards at head-quarters the privilege of electing its own chairman, whether he be a commissioner or not, an official or a non-official. It appears to me, however, if the office be by election, the district officer should not be eligible. I consider it compatible with his position that he should count for votes, or be exposed to the possible indignity of being rejected if he be a candidate. The municipal tax-payers of Balasore and Pooree have, as required by section 16 of the General Municipal Act, presented petitions praying for the introduction of the elective system into their respective municipalities. Each petition contains a clause expressing a desire on the part of the petitioners to have for their chairman a nominee of the commissioners. A similar petition is in circulation for signatures among the rate-payers of the Cuttack Municipality, and is expected to be shortly presented to the Magistrate. The district officers are unanimous in supporting these measures.

6. As regards the system of election to be followed, the district officers have unanimously proposed election by wards, and I recommend it as being most suitable. The proposals regarding the rules which are to regulate and control the election, however, differ from each other. The Pooree Rules have been framed with reference to those in force in the Burdwan Municipality, while the Magistrate of Cuttack would adopt the Serampore Rules. The Magistrate of Balasore has submitted a set of rules apparently drawn upon the model of those received with the Government circular under reply. The circumstances of the three municipalities are so nearly similar that the same rules may answer for all. I recommend for adoption the set of rules annexed, which has been carefully prepared with reference to the various proposals of the district officers.

7. The district officers are almost unanimous in their recommendations in regard to the qualifications to be prescribed for candidates for election, the minimum rate proposed by every one of them being Rs. 6 per annum, which seems to me suitable. They, however, somewhat differ in the matter of the elector's qualifications. Considering the number of rate-payers of the several grades in each municipality as shown in the annexed statement,

would uniformly prescribe Re. 1 as the minimum rate per annum for the voter's qualifications. The number who would be eligible as electors, and that of the persons who would be entitled to present themselves as candidates for election in each municipality according to the above standards under the assessment at present in force in it, will be approximately as shown in the margin.

	Number of rate payers eligible as members.	Number of voters.
Cuttack	403	2,340
Balasore	203	1,205
Pooree	278	2,840

8. As regards local boards, there is great diversity of opinion amongst the district officers. Mr. Dutt, Officiating Collector of Balasore, would have one board for the whole district under the elective system, while Mr. Pawsey, the Collector of Cuttack, would allow things to remain much as they are. Mr. Grant, Officiating Collector of Pooree, is for having two boards—one at the sudder sub-division and one at Khoordah—which is the only outlying sub-division of his district. Both of these would apparently make elective. It seems to me that the opinions expressed are based on either too high or too low an estimate of the capacities of the people of Orissa, who differ but little in point of education and intelligence in the various parts of the province. Except the hill tracts, the inhabitants of which are behind their brethren of the plains, I would place all the three districts under the third category, and I would form local boards at all the sub-divisions.* I would, however, reserve for the present the extension of the elective system to any of them. When the people of the interior shall have become a little more advanced, seen the working of the elective municipal boards at the district head-quarters, and learnt to appreciate the advantages of the system, it may be extended if it is desired. Till then I would have the boards composed of official and non-official members nominated by local authorities, and appointed by Government in the proportion of not more than one official to two non-official members. The district boards should be presided over by the Magistrate-Collectors, and those at the sub-divisions by their respective sub-divisional officers as chairmen, who should of course have votes, and take full part in the proceedings of the boards. There are at present District Road Cess and Educational Committees at every district head quaters and at all the sub-divisions. At Bhuddruck in Balasore, and Khoordah in Pooree, there are dispensaries not falling within municipal limits of which the committees might take charge There is also one at Piplee in Pooree. It is supported largely from the Pooree Lodging-house Fund, but it may be unobjectionably managed by the local board.

* Cuttack district.
Cuttack sudder sub-division.
Kendrapara ditto.
Jajpore ditto.
Pooree district.
Pooree sudder sub division.
Khoordah ditto.
Balasore district.
Balasore sudder sub-division.
Bhuddruck ditto.

9. Referring to paragraph 12 of the circular under reply, it seems to me that the determination of the question therein raised will rest largely upon the settlement of the point as to what charges are to be transferred to the local boards. A considerable proportion of the revenue derived from the license tax is obtained from persons residing or carrying on trade, &c., within municipal limits. There can be no objection to transfer this part of the revenue to the municipal boards, provided coresponding responsibilities be imposed upon them. The same may be said as regards the proposals to make over to the local boards, as distinguished from the municipal boards, the assessments and collections of the license tax beyond municipal limits, or the public works cess, or any other similar source of revenue. The ferries on the provincial roads are particularly in point. I would only make over their revenues if the charge of the roads be made over. If these roads are made over, the proceeds of the ferries, the license tax, and the public works cess might also be made over. The question of the transfer is however, a rather large one, and may be left for consideration hereafter. The subject of the large irrigation and navigation canals and their revenues is so largely mixed up with considerations effecting the Government land revenue that I think it advisable they should continue, at all events till the next settlement, under direct Government control.

10. As regards the point in paragraph 14, upon which I am desired to offer my opinion, I think that, in the matter of expenditure on works, the contemplated legislation might proceed much in the same line as that adopted in the existing rules, limiting the powers of Road Cess Committees. Rs. 5,000 would perhaps be the proper maximum amount which a local board should be authorized to expend on a single original work without previous sanction, provided it has a sufficiently competent engineer to execute or supervise the work. Individual new works, costing more than Rs. 5,000, might be specially sanctioned by the Divisional Commissioner or the Government on the application of the board. Another matter in respect of which I would reserve control to the executive authorities is the appointment of the officers to be employed under the local boards. The scale of establishment and the selection of officers drawing high salaries, say salaries over Rs. 100, should, I think, require sanction from some executive authority, who will generally be in a better position to judge of the qualifications of candidates for such appointments than the local boards. It was found in practice that something of this sort was required for the control of the action of District Road Cess Committees. As regards the proposed Government board, I am inclined to think that the power to order a necessary work, and to carry it out if not executed, might be well given to the Commissioners of Divisions only with the approval of the local Government.

11. Copies of the district officers' reports, together with their enclosures, including the petitions respecting the Pooree and Balasore Municipalities, are herewith submitted.

No. 204M, dated Pooree, the 12th September 1882.

From—T. J. C. GRANT, Esq., Offg. Magistrate of Pooree,
To—The Commissioner of the Orissa Division.

I HAVE the honour to submit the following report on the subject of local self-government. I enclose three appendices, viz. Appendix A, which contains petitions from certain inhabitants of Pooree to the Imperial and Local Governments, Appendix B (called for in your No. 1305, dated 1st instant), which shows the distribution of the tax among the rate-payers, and Appendix C, which is a petition (signed by more than one in three of the rate-payers) for the introduction of the elective system into the municipality, and for the appointment of a non-official (or rather an elected) chairman.

2. In accordance with paragraph 4 of the Government of Bengal circular No. 5T—M, dated 5th July 1882, I called a meeting (which was attended by several hundred people), and I very carefully explained all the proposals on the subject of municipal self-government, and also the requirements of the law. These last I reduced to writing and caused them to be circulated through the town, and announced that, on the presentation of the properly signed petition, the Lieutenant-Governor would be willing to introduce the elective system into Pooree, unless there appeared some special objection to such a course. I acted in precisely the same way as regards the office of municipal chairman, publishing that the Government would be willing to appoint a non-official chairman, or to appoint any non official person as chairman whom the committee might nominate, but only on condition that one-third of the rate-payers petitioned for it, and if no special objection appeared.

3. Appendix C is a petition from more than one-third of the total number of rate-payers. It complies with the requirements of the law and the stipulation of the Lieutenant-Governor to the letter. I am now prepared to say that this compliance extends to the spirit.

4. The truth of the matter is that anything in the shape of a public memorial from the people of Pooree is a meaningless document, misleading and most dangerous as a ground of Government action. It is no test whatever of the state of popular feeling. Even were the popular mind really excited, the method of memorialising would neither suggest itself nor recommend itself for adoption. They have not the faintest idea of its efficacy and on small persuasion will sign any memorial whatever without having, or causing to have, any idea of its purport. Whilst the public (of Pooree, if not of all Orissa) has this easy indifference on the subject of memorials, there are many of the highest placed members of the governing body who never dream that a public memorial can anywhere have less significance and importance than it has in England. The consequence is that there is always danger that the Government may mistake the interested wishes of a very few for the expression of popular wishes which may in fact lie quite on the other side.

5. The truth about the reception in Pooree of this scheme of local self-government is not pleasant and far from flattering. It was declared by a designing few, and instantly believed by the many, that the disinterested benevolence of Government was nothing but a pretence and a snare, under cover of which a great scheme of increased taxation was to be introduced. This was the fixed belief of the common people who formed the large body of the population. Add to this the facts that the real wishes of the people are distinctly adverse to progress, that they would do away with the municipality to morrow because of the tax, that they would for the same reason do away with the cesses to-morrow and take their former chances of roads and public works, that they would if they had their will dispense with sanitation and hospitals even if they could get them for nothing, and it will be understood that the scheme of local self-government was received with the utmost disfavour at first. That the people should be so backward and lethargic is unfortunate, that some of those who will understand the object of the Government should disseminate ungrateful libels of the Government is exasperating, and that the people should believe those libellous falsehoods after all that Government has done to deserve confidence in its rectitude is most disheartening. I am personally a firm believer in the self-government scheme and it is no pleasant task to me to write down the above facts, but facts they are, and they have so important a bearing on the question that they cannot be kept out of view.

6. The advocates of the scheme were to be found among the native officials, education officers, amla, the highly educated classes in general, and the more educated and intelligent of the people of the town. It is significant that almost all of them are Bengalis or of Bengali extraction. These resolutely set themselves to work to counteract the disseminators of libellous falsehood. They called one public meeting after another in the temple, they invited people to attend meetings at their private houses, and they freely visited in the houses of others. Everywhere they carefully and clearly explained the whole scheme and the principles on which Government was acting, and their success has been marked. The meetings at the temple were attended by many thousand attentive listeners, anxious to learn about the matter, and fast acquiring an interest in it. The result has been that a very great many have become converts from conviction. There are still many who are opposed to the scheme—some honestly, some from interested motives, and many ignorantly. But I feel no doubt in my mind that in very fact fully one-third of the rate-payers are sincerely desirous of trying the elective system and of seeing a non-official chairman presiding over the municipality.

7. Seeing then that one-third of the rate-payers have petitioned for, and may be considered to be really desirous of having, the elective system introduced and a non-official chairman appointed for the Pooree Municipality, I presume I may take it for granted that

the Lieutenant-Governor will accede to these requests, unless there appears some sufficient cause to the contrary.

8. The backwardness of the general population in education, their unfortunate and undeniable lethargy as to all the duties of a citizen, their repugnance to progress and taxation, combined with the fact that the municipality has only existed for about a year (and has therefore acquired no experience in municipal government), are the circumstances that have most right to be regarded as obstacles to the petition, &c.

9. At the same time, I am for my part of opinion that they should not be allowed to prevail against the petitioners. I do not put any particular value on that kind of experience which has been acquired in the older municipalities. I by no means consider that that was a wholesome experience in itself, and I am quite certain that it forms no essential stage that should precede the introduction of self-government. I think it cannot be denied that, as a very general rule, the experience acquired by native commissioners was about as healthy as that learnt by the ministers of Louis XIV, namely, that the municipality is the chairman. They simply learnt to conceive that it was for them only to efface their personality, not merely to show no originality, but also to offer no opposition; that their simple duty was to attend so many meetings a year, slavishly wait for a lead from the chairman, and then applaudingly follow that lead, not even attempting to preserve a decent appearance of consistency when succeeding chairman differed wholly from their predecessor's. That this sort of experience, prolonged through 20 years, may now very well impede efforts at self-government elsewhere, is a thing I well believe. That this municipality has not grown up in any such bonds, and has acquired no long habits of subservience and self-suppression, is, I think, a circumstance of the greatest advantage, and a decided reason in favour of the introduction of self-government.

10. The want of education is, I admit, a drawback; but this must not by any means be confounded with a lack of intelligence. In natural intelligence, I believe the Uryas to be quite on a par with the Bengalis. These men are as capable of conducting their business and their lives with skill and success as any Bengalis, and I have no doubt that they are, even now, as fit to form good municipal commissioners as are the inhabitants of any district of Bengal not in the near neighbourhood of Calautta.

11. A great absence of what is known in England as public spirit, and a disposition that finds bad management more tolerable than taxation, are things that must be a great source of danger when self-government is introduced. But it must be remembered these drawbacks attach not only to Pooree, but are common to all Bengal. It should never be forgotten that Pooree is, after all that can be said, not diverse from the rest of Bengal; that it has no disqualification of a special nature; that its drawbacks differ from those of more advanced districts—not in kind, but only in degree. A selfish apathy as to public affairs, and a short-sighted intolerance of taxation, however useful and remunerative, are to be found all over India, and it is precisely in the hope of eradicating these public vices that the self-government scheme has been designed. If self-government is a cure for these evils elsewhere, it does not seem logical to withhold the cure from Pooree, merely because the evils are greater

12. Should the elective system be introduced, it is now to be considered what method of election will be most suitable and the rules by which it should be controlled. As to the former, I enclose separately a draft of the rules founded on those published for the town of Burdwan; it may suffice to say here that it is the general opinion (in which I concur) that the election should be conducted by wards. The town is at present divided into four wards, the petition proposes six, and that there be four commissioners for each ward. The division into six instead of four wards is certainly an improvement, but I think that three commissioners will amply suffice for each ward; it will not be easy or perhaps possible to find four fit men, and that a body of 24 commissioners will be unmanageably large, and lead to much unnecessary waste of time and discussions.

13. Next, as to the qualification of the electors. The petitioners, and indeed all whom I have consulted, are of opinion that the money qualifications proposed in the Government resolution is much too high. In this opinion I concur. They think also that in order to secure a sufficiently high degree of intelligence among the electors, education should be recognised apart from wealth, as giving a title to the franchise. I gladly recommend for acceptance the proposals in the petition, namely, that all those should be entitled to vote for municipal members who are pundits, pleaders, mukhtears, graduates, under-graduates, those who have passed for minor or vernacular scholarships, and those who pay a rate of not less than Rs. 2 a year.

14. As regards the qualifications for membership, I have only to repeat the remarks made in the previous paragraph. Here also I would recommend for acceptance the proposal of the petitioners, which requires the same educational qualifications as for voting with a further property qualification as follows:—A payment of a municipal rate of not less than Rs. 6, or an income of Rs. 200 a year.

15. The number of persons qualified as voters in accordance with the above proposals would be about 1,057 out of a total of 5,286 rate-payers; the educational qualification will probably add more to this number. I cannot say how many more, but not many. The number of persons qualified for membership it is quite impossible to ascertain, but about 300 is near enough. It is not proposed even to insist upon residence within the municipality as a qualification, but to leave the electors at liberty to choose whomsoever they like (who possesses the qualifications), in whatever place he may reside.

16. I now come to the question of chairmanship. You will see that the petitioners are anxious to have a non-official chairman. I am decidedly of opinion that their prayer should be granted. It may sound rash to propose so large an innovation in so backward a district. It is precisely because of that backwardness that I so strongly urge it. I say without fear of contradition, that if the district officer is appointed chairman, there will be no self-government at all. The whole thing will degenerate into a mere show In this district no such thing as independence can be found, or can be expected to be found. The men from whom the members must be chosen are far too intimately connected with the district officer to believe it worth their while to exhibit the slightest independence where he is concerned. Moreover, so surely as these men find themselves the colleagues of a responsible official who must do the work, so surely will they give full rein to their apathetic natures and leave him every iota of the work to do. They will oppose nothing and propose nothing; nor will they move a little finger towards the execution and carrying out of the resolutions and orders of the committee. There will be under the new system absolutely no change whatever from the present state of things. The work of the members will merely consist in attaching a *jo hukum*. (Anglice, I cordially concur) to whatever the chairman lays before them; and the chairman will be left to carry out his own plans through the committee's servants without any help from the members themselves. If these members are to be taught how to rule the town, it must be by the rough effectual method of leaving them to do all for themselves, as boys are taught to swim by throwing them into deep water. With the district officer as chairman, self-government is, as I have said, impossible, and out of the question With any other official as chairman it would be nearly impossible. I think that it would be in every respect the best way (if local self-government is to be tried in earnest) to at once adopt the plan of allowing the committee to nominate their own chairman. I think that in Pooree this plan would work better than in most places, for I do not doubt that under any circumstances the committee will consult the district officer, and very carefully consider whatever advice he may give them; that they will be amenable to good counsel I do not doubt in the least. I believe that in this district this is far the best plan. It is the only plan by which the Committee can be made to work, and I believe it involves less danger of a break-down in Pooree than is likely to occur in more advanced places. The committee will not suffer from the overweening conceit and ungrounded and rash confidence which always accompanies a little knowledge and much ignorance. They will be glad to seek counsel and be amenable to advice, and I feel confident will allow themselves to be guided clear of dangerous mistakes.

17. As regards local boards, the proposals of the petitioners are contained in paragraphs 3 and 4 of their proceedings, a copy of which accompanies this. Their idea is to have four committees—one at Khoordah, one at Piplee, one at Gope, one a Pooree—and that the Pooree committee shall exercise a degree of control over the others, in order to obtain uniformity and consistency of action throughout the district On the whole, I am inclined to think this is a dangerous plan I doubt whether enough fit members can be found for four committees. I am sure that any exercise of control by one committee over the others will give rise to dissensions, and I fear that there will be quarrelling and heartburning about the distribution of funds. I think, that for the present, at all events, a committee in each of the sub-divisions (Sudder and Khoordah) will suffice.

18. The proposals for qualification of voters and members in the case of the local boards are made in paragraphs 5*c*, 5*d* of the proceedings. In each case the same educational qualifications are proposed as in the case of the municipality, the property qualification is considerably lowered from the figure proposed in the Government Resolution, which was indeed much too high for a very poor district like Pooree. For voters, the proposed qualification is a payment of Rs. 5 for road cess, Rs. 10 for license tax, or an income of Rs. 200 a year. That for members is just double the above sums.

19 I imagine that the local boards will deal with roads, communications, education, sanitation, and hospitals which may be outside the municipal limits The one point in which the local board and the municipal committee are at all likely to clash is as regards the management of the zillah school The Lieutenant-Governor has suggested the appointment of a managing board, composed partly of members of the municipal committee, and partly of members of the local board of the sudder sub-division. I am inclined to recommend that the zillah school, which lies entirely within municipal limits, and is to be supported entirely out of municipal funds, should be left entirely to the management of the municipal committee. This arrangement avoids a certain chance of friction and is perfectly simple, nor will it leave the local board without experience in educational matters, as they will deal with all the education outside municipal limits. The petitioners ask that, in addition to the municipal income and road cess, the two committees may have made over to them, in such proportions as the Government may think fit, all the license tax collected in the district, the ferry and pound collections, the Juggernath Road Fund, so much of the lodging-house tax as is used for municipal purposes, and such a portion of the public works cess as the Government may think proper. Assuredly the income of these bodies should be made, so far as is possible, commensurate with the costly duties that they must undertake. It would be truly deplorable if, at the very outset of this experiment, failures should be the result simply of want of funds; nor at present would it be wise to make up any serious deficiency of money by local taxations, for, as I have said above, there has been (and to no small extent still is) a widespread belief that under the cloak of benevolence the grant of self-government is nothing but a crafty scheme for increasing taxation. It would certainly be important not to give any force to this belief by introducing at once new taxation. If, therefore, funds in sufficiency

could be found in the manner indicated by the petitioners, it would doubtless be a very great advantage.

No. 876, dated Cuttack, the 6th September 1882.

From—R. H. PAWSEY, Esq., Collector of Cuttack,

To—The Commissioner of the Orissa Division.

I HAVE the honour to state that the delay in replying to your No. 1001, dated the 12th July last, is simply due to the fact that the interest manifested in the subject of local self-government by the educated native community of Cuttack has been so strong, that it appeared certain that, besides being favoured with the individual opinions of a few influential residents, I should within a short time become aware of the main points under discussion upon which the educated community are at one. On 16th ultimo a public meeting was called for the purpose of forming an "Orissa Association" for expressing its views on self-govenment with the intention of promoting the general welfare of the district, and since then there has been a series of meetings in which the views of majority have been adopted on certain points.

2. I now enclose herewith copies of the reports of the Sub-Divisional officers of Kendrapara and Jajpur, Babus Chundra Seekur Banerjee and Bankim Chundra Chatterjee, and of the proceedings of the Orissa Association at these meetings, and I beg to submit the following report with reference to these, and to the opinions of others which I have also before me, and to the circumstances which appear to me to be worthy of consideration in the introduction of change.

3. In the matter of paragraph 4 of the letter of Government, I can only say that the first trial of the elective system is obviously to be made in the municipality of Cuttack. The signatures of the requisite number of rate-payers under the law to an application for the extension of this system under section 16 of the Act to Cuttack are being collected by the above-mentioned Orissa Association, and will, I believe, soon be laid before you. As to the details of the process of election, the present division into six wards should be maintained; three commissioners should be elected for each ward, keeping the number eighteen as at present. The qualification for a voter here should, I think, be the payment of Re 1 per annum as municipal tax I am aware that many of the gentlemen consulted have fixed on the higher sum of Rs. 3 as the property qualification I give here a statement showing total number of tax-payers with the number paying Re. 1 and upwards and Rs. 3 and upwards respectively in the municipalities of Cuttack, Kendrapara and Jajpur:—

		Total Number.	Payers of Re. 1 and upwards.	Payers of Rs. 3 and upwards
Cuttack	...	4,525	1,560	1,033
Kendrapara	...	2,817	808	114
Jajpur	...	1,940	1,048	124

I am aware that in the matter of distribution of classes of payers of rates you have called for further information, but I have not this ready up to date, and will submit it subsequently. For the qualification of candidates I think that the payment of Rs. 6 in rates per annum, which roughly means an income of Rs. 600 per annum, might be taken as the standard. In the details the election might be carried out under somewhat similar rules to those now in use at Serampore, copy of which has been forwarded to me with the letter under reply.

4. All whom I have consulted in regard to the matter of the selection of a chairman are also unanimous that he should be elected by the commissioners themselves. The selection should, I think, be of any person, a commissioner or not, official or non-official approved by Government, who should of course have a vote in the proceedings of the committee and a casting vote when necessary.

5 Although there has been perfect unanimity in the matter of and elective municipality for Cuttack, there is by no means a similar universal desire to extend the same privileges to Kendrapara and Jajpur. The Association at Cuttack after much discussion have declined to express an opinion that any advantage would be derived by such extension. The late Sub-Divisional Officer of Jajpur was of opinion that there was not sufficient interest felt in the matter to introduce it at present. The present sub-divisional officer (who has only recently joined) expresses his willingness to try the experiment with the object stated by Government of introducing some capacity for self-government among the rate-payers. The Sub-Divisional Officer of Kendrapara proposes to have elected members with the same object. It is extremely doubtful whether any expressed wish of one-third of the rate payers will be received by Government, which will permit of election under section 16 of the present Act. If an alteration in the law is made with this view, I am still of opinion that the chairman should be appointed by Government for the present. The mode of, and qualification for, election might be the same as at Cuttack.

6. As to local boards, it is the opinion of the sub-divisional officers and of the majority of the residents of Cuttack, as the Orissa Association, that such boards cannot at present be said to be desired in the interior of the sub-divisions of Kendrapara and Tajpur. The orders of Government in paragraphs 6, 7, 8. 9, and 10 of their letter have been considered by the sub-divisional officers and discussed by the Association. I confess that I see great difficulty in providing for an election of members in the interior to serve on a board, and I see very few who are not at the head-quarters of a sub-division or at Cuttack who would be likely to

take an interest in public affairs. I am therefore of opinion that both these sub divisions should remain under executive order as indicated in paragraph 8 of the letter of Government.

7. The question of a local board at Cuttack has been much discussed, and the opinions of the majority are certainly in favour of its election. Deputy Collector Babu Pran Kissen Roy expresses this opinion as follows :—

"The second point at issue is, under which of the three categories described in paragraph 8 of the circular under report should this district be placed? As the correctness of the opinion in a matter like this depends much upon the extent of local knowledge and experience, I think the sub divisional officers and gentlemen will be the best authorities on the point. With the limited knowledge I have of the circumstances of the district, and the condition of its people, as regards their intelligence, education, and administrative abilities, and keeping in view the present policy of Government in the matter of giving political education to the people of the country, and of *creating* if *need be* a capacity for self-help, I may say that this district may for the present be placed under the second category; that is, a local board may be established at once at the head-quarter sub-division, while the two other sub-divisions should wait for some time longer till their inhabitants, who are comparatively less educated and informed, become familiar with the principles of self-government started at head-quarters, and aspire to have it for themselves after appreciating its advantages."

I am not, however, offered a single opinion as to the capacity of the people of the interior for taking part in an election of this nature. My own opinion is that Cuttack is one of the very last districts in which election will be a real choice. It is not that villagers are incapable of feeling the want of roads or drainage in their immediate vicinity, but they think of no wants of which they have no experience. There will be intelligent candidates no doubt over and beyond the present members of committees, but they would not have in general the slightest influence throughout the area of a thana, and an elected candidate would by no means be a representative one.

8. One mode of election which might be simpler in Orissa than elsewhere has been suggested to me by Babu Pran Kissen Roy, and that is that the institution of village headmen should be entirely resuscitated, and one man in each village made the elective unit. This would give some 6,000 in the head-quarters sub-division alone, and these persons would perhaps be as ready to vote as those with the property qualification prescribed by Government.

9. I am, however, strongly of opinion that in this province the entire novelty of election and self-government should in the first instance be tried in the towns which are distinctly in advance of village life in Orissa, and that from this experience its adaptability to the rural parts should be understood. I would therefore retain the district committees at head-quarters with such changes as will be necessitated by the new law, with members nominated by officials and with an official chairman.

In regard to paragraph 14, I would state that it does not appear desirable that the central controlling authority of the municipalities in this district should be in Calcutta. I believe that the control would best rest with the Commissioner of the Division.

No. 842, dated Balasore, the 31st August 1882.

From—R. C. DUTT, Esq., Officiating Collector,
To—The Commissioner of the Orissa Division.

WITH reference to your No. 1001, dated the 12th July last, I have the honour to submit the following report. My remarks on the points referred to in paragraphs 4 and 5 of the Government letter, *i. e.*, on the subject of municipalities, have already been submitted in my No. 825, dated the 21st August 1882. I shall therefore, in the present report, submit my views on the subject of local boards only.

2. I beg in the commencement of this report to state that I have found it impossible to recommend the bestowal of the same degree of independence in the matter of district administration by boards as I have recommended in the matter of municipal administration. Education has not spread in the interior of the district to the same extent that it has in municipalities, and the people in villages are far less familiar with the objects and principles of administration than the people in towns. The management of a district too is a far more difficult and responsible task than that of managing a town; and it is necessary therefore to be extremely cautious in placing the work of district administration in the hands of persons who have hitherto had little experience of such work. While, therefore, it is most desirable to try, in the generous spirit in which the Government Resolution has been conceived, to induce the people to have a practical share in the administration of local matters, it is also essential, to the very success of the scheme, that they are not suddenly entrusted with a tax which my be at first beyond their ability. I have kept this twofold object in view in making the following suggestions.

Paragraph 7 of Government Circular, Districts to remain units of administration.

3. The first important point for decision is whether the district or the sub-division should be accepted as the unit of administration. The views of the Government on this point are laid down in paragraph 7 of their letter; but there are certain matters which, it seems to me, should be considered before the point is finally settled.

4. In all the departments which it is intended to make over to boards, the district and not the sub-division has hitherto been the unit of administration. There is one Education

Committee, as there is one Deputy Inspector of Schools, appointed to foster education in each district, and the rules framed for imparting education and for holding examinations are uniform throughout the district. A uniform rate of road cess is imposed in each district; there is one office for the collection of the cess throughout the limits of the district; the books and registers of the office show all the estates paying road cess, and all orders for the collection of cess from all these estates are issued from this office. Similary, in the disbursement side, one set of registers is kept for the whole district, one engineer (in most districts in Bengal) supervises all road operations in the district, and the wants of the whole district are collectively considered in making proposals and estimates for each year's work.

5. It seems to me that it will not be expedient to altogether change this system which has hitherto been followed everywhere, and to declare the sub division to be the unit of administration for the future. On the contrary, the proposed change would be found to be attended with much practical inconvenience in the working of it. Three or four or more collection offices, for instance, would have to be created for collecting road cess in place of one in each district, and each office would have to keep its separate list of estates and entertain it's separate establishment. The work of re-valuation done separately for each sub-division would be attended with much inconvenience, while in the matter of making roads each sub-divisional board would probably have its own plan, and the great advantage now derived by considering the wants of a district collectively would be lost. It would be easy to multiply instances, and to show that in every department we shall lose very much and gain little by cutting up districts into portions, and declaring each portion an independent unit of administration.

6. On the other hand there are positive advantages which we can derive by still keeping the district, as it has hitherto been, the unit of administration. There are in every district of Bengal men of education and intelligence, of business habits and public spirit at the head-quarters far superior to their brethren in sub-divisions. By dispensing with district councils altogether, as has been proposed in paragraph 7 of the Government letter, we lose the services of these superior men, except only for the work of one sub-division, viz the sudder sub-division. But by keeping district councils, we get the services of these men in supervising the work of the entire district, and in helping by their advice and instructions the less enlightened members of the sub-divisional boards, and it is, I believe, essential to the success of the scheme that sub-divisional boards should receive such help, instruction, and guidance. Again, under general orders of Government, to allow sub-divisional boards as much independence as possible, each district board will leave for its subordinate boards all work that con be safely done by such boards In advanced districts nearly all the work will be done by the sub-divisional boards under the general supervision and guidance of district boards, while in backward districts a larger proportion of the work will have to be actually performed at the sudder. Thus, by keeping district councils, as well as sub-divisional boards, we create as it were a self-adjusting scale, which will measure out work for sub-divisions in each district in accordance with the education and intelligence in the district and the advantages of such a process can hardly be over-estimated. Thirdly and lastly, there are some advantages to be gained by keeping the system of administration of local matters uniform with the system of civil, revenue, and criminal administration in the country, and to maintain in respect of the former the same local limits, and the same subordination of sub-divisions to districts as are maintained in the latter.

7. Thus while there are almost insurmountable difficulties in changing the system of administration which has hitherto been followed, and in multiplying the units of adminstration in local matters, there are, on the other hand, great and tangible advantages in continuing the present system of subordinating sub divisions to districts in respect of local boards. I am very strongly impressed with the necessity of such subordination, and I believe that it is essential to the success of the entire scheme in the present state of education in the country. It is necessary to proceed with the utmost caution in introducing this new scheme, and it would be an act of doubtful wisdom to begin by creating practically independent boards in sub-divisions. It would be far safer, as it certainly would be far more advantageous for administrative purposes, to place such sub-divisional boards under the control of the superior intelligence and ability which always exist at district head-quarters. If this is done the success of the great scheme is assured.

Sub divisional boards to be placed under the district board.

8. The reason for which sub-divisional boards are preferred to district boards as units of administration is, I believe, that the area of a district is too large, and that the people living in a sub-division would take much more interest in the administration of that sub-division than the people of an entire district could collectively take in the administration of so large an area. This is undoubtedly a decided advantage in favour of sub-divisional boards, but it seems to me that we secure this advantage to the very fullest extent by creating a sub-divisional board for each sub-division, including the sudder sub-division, and then placing such boards under such general control and guidance from head-quarters as they stand in need of. We thus combine the superior local interest of the people in favour of sub-divisional boards with the manifest advantages of control and guidance by district councils. This will appear more fully when I come to speak of the constitution of sub-divisional and district boards.

District boards to be placed under the central board.

9. I entirely agree with the remarks made in paragraph 14 of the Government circular that district boards too will require some control and guidance, and that there should be some "ready and efficient means of compelling defaulting boards to do their duty." The proposal made in the same paragraph of creating a central board will answer the purpose admirably, and such central board will control

and instruct the district boards much in the same manner in which district boards will control and instruct sub-divisional boards. I am convinced that this scheme will be found admirably suited to the present state of the country, that it will enable the people to have a real share in the administration of local matters, and that at the same time it would prevent each class of boards from abusing its powers or going far wrong, in consequence of its being under the supervision and control of the next higher board.

Paragraph 8 of Government Circular. Divisions of districts into three classes unnecessary everywhere. Sub-divisional boards should be subordinate to the district board.

10. If this plan be adopted, then it will not be necessary to divide districts into the three classes mentioned in paragraph 8 of the Government circular. Every district in the Bengal Presidency is advanced enough to be fit for a district board, while there will be no objection to creating a local board at each sub-division, including the sudder, seeing that such sub-divisional boards will be under the control of district boards, and will only have as much independence of action as they are fitted for. Should, however, it be decided to divide districts into three classes as defined in paragraph 8 of the Government circular, then I would propose that the district of Balasore be placed under class 2, and that a kind of branch board be formed in the sudder sub-division, and another in Bhuddruck sub-division, both of which will work under the control and instructions of the district board. I would place Balasore in class 2 and not in class 3, not because I consided Balasore to be very far behind many other districts of Bengal in education and intelligence, but because I consider the subordination of sub-divisional boards to district boards necessary for the purpose of efficient administration. I may add that Roy Nemai Charan Bose Bahadoor, the intelligent and public-spirited zemindar of Bhuddruck sub-division, does not recommend the independence of the sub-divisional board, and that the Sub-Divisional Officer of Bhuddruck also is of the same opinion with myself, and thinks it would be impossible to form an independent board at Bhuddruck; and suggests therefore that Balasore may be placed under class 2, and that a branch board may be established at Bhuddruck. The better plan, however, by a long way would be as I have stated before, not to divide districts into classes at all, but to create a district board at the head-quarters of each district with a subordinate board at each sub-division including the sudder sub-division.

Paragraph 9 of Government Circular.

11. I now come to the question of the constitution of the boards, *i e.*, the sub-divisional boards, the district boards, and the central board, and this subject involves the important questions of election of members and appointment of chairmen.

Paragraph 10 of Government Circular. The election system should be introduced.

12. The system of election is indeed "foreign alike to the genius and instincts of the people and to the system of rule which has obtained since the British power was established in India." Nevertheless, the simple idea on which the elective system is based is neither unintelligible nor unknown to the people of India To select a man to protect or advocate his interests, or represent his claims, or transact his work, is what the Bengal villager does as often as he names a *salees* to settle a dispute or appoints a *mukhtear* to do his work. To people who are so familiar with these customs, the idea of election cannot be unintelligible. It is only necessary to divest the elective system of its unnecessary surroundings, and to put it in a simple form before the people, and the better class of them will not only understand it, but will give their vote with the same degree of intelligence and interest with which they now appoint a *salees* or a *mukhtear* to transact their business. If therefore it is necessary and desirable, as undoubtedly it is, to introduce this system in order to induce the people to take an interest in their own concerns, no difficulty need arise from the fact that the people have hitherto been unacquainted with the system. The district of Balasore too stands very high among the districts of Bengal in education, there are no less than 2,195 schools and pathsalas at the present moment, and a large number even of the common people can read and write. I am therefore confident that in this district the system will work well if worked with care, and the Sub-Divisional Officer of Bhuddruck, Mr. Ricketts, as well as Rajah Syamanand De of Balasore and Baboo Kailash Chunder Roy Mohasay of Dehurda and Roy Nemai Churn Bose Bahadoor of Kothar, who were consulted on the subject, all recommend its introduction into this district. The sub-divisional officer recommends that eight members for the sub-divisional board may be so elected, and that fifteen more may be nominated by the present branch road cess committee. Roy Nemai Churn Bose Bahadoor also, speaking of the sub-divisional board, suggests that eight members may be elected and thirteen may be nominated. Rajah Syamanand De recommends a part of the members to be elected by the people, and Baboo Kailash Chunder Roy Mohasay recommends that two-thirds of the members may be thus elected. I think this to be a very fair proportion considering all circumstances, and I recommend that two-thirds of the members of the sudder sub-divisional board, as well as of the Bhuddruck sub-divisional board, be elected by the people, and that the remaining one-third may be nominated by Government. I am speaking now of the sub-divisional boards only—of the constitution of the district board I shall speak hereafter.

13. I may here mention that meetings have been held in the town of Balasore, largely attended by the rich and influential as well as intelligent and educated members of the community, and that resolutions have been passed expressing a strong and decided wish that the elective system may be introduced into the district. I understand that a pamphlet, explaining the purport of the Government Resolution in simple Uriya, is in the press, and will be largely distributed by the executive committee of this body in the interior of the district, and that some members of this body will shortly be deputed to explain to the people

generally, and especially to the papers of road cess and license tax, their duties in connection with the election system. It is my pleasing duty to record that these attempts on the part of the people of Balasore have been entirely spontaneous. My predecessor, in order to know the real wishes and opinions of the people themselves, carefully abstained from expressing his own opinions, and even from attending the meetings held, and I have thought it proper to strictly conform to the same policy since I took over charge. Should it be decided to introduce the election system in the district of Balasore, I have no doubt we shall get much intelligent help from this educated class of men who are trying with such praiseworthy zeal to explain to the villagers in the interior the objects and details of the great scheme which is shortly to be introduced in this country.

The qualifications laid down in the Government circular will do very well.

14. There are five thanas in the sudder sub-division, and four in Bhuddruck, and I would propose that for each thana two members may be elected by the cess and tax-payers, and one may be nominated by Government. The qualifications laid down in paragraph 10 of the Government letter seem to be fair, and I note in the margin the number of persons who would be qualified to vote and be elected under those rules, thana by thana. Some addition should be made to these figures on account of persons with annual income of Rs. 1,000 and Rs. 500 respectively, who do not pay either license tax or road cess; but the number of such persons in this district is very small. A larger figure will probably have to be deducted, as the same persons have been counted twice as paying both road cess and license tax. All this will be done when the lists of persons qualified to vote or to be elected will be made out as directed in paragraph 10 of the Government circular. I have already issued orders for the preparation of such lists, and when they are made, the number of men qualified to vote and to be elected in this district will be found to be about 1,800 and 600 respectively.

Number of persons qualified to be elected as members.

THANA.	Persons paying road cess of Rs. 25 or more.	Persons paying license tax of Rs. 20 or more.
Balasore	87	64
Bosta	70	11
Baliapal	32	6
Jellasore	59	11
Soro	28	18
Bhuddruck	77	20
Basudebpore	32	6
Chandbali	23	16
Dhamnagar	73	11
Total ...	400	163

Number of persons qualified to vote.

THANA.	Paying road cess of Rs. 10 or more.	Paying license tax of Rs. 10 or more.
Balasore	217	208
Bosta	162	79
Baliapal	71	37
Jellasore	116	38
Soro	62	132
Bhuddruck	204	89
Basudebpore	80	33
Chandbali	64	33
Dhamnagar	198	56
Total ...	1,174	705

15. Mr Ricketts, the Sub-Divisional Officer of Bhuddruck, recommends that "considering the condition of the ryots in my sub-division, I would suggest that ryots deriving an annual income of Rs. 200 from agricultural pursuits be included" as voters. Similar reductions in the qualifications both of voters and of candidates for election have also been proposed by Rajah Syamanand Dé and Roy Nemai Charun Bose Bahadoor. It is safer, however, in my opinion, to place the limit as high as it has been placed in the Government circular, at least until the election system is thoroughly familiar to the people. It would not be wise, in my opinion, to have a large class of voters of very imperfect or no education at the very commencement of the new system. According to the figures given before, there will be on an average two hundred voters for each thana—voters who will be men of substance, intelligence, and some education, and it is safer for the present to allow the right of voting to this limited number of representative men in each station. The thana average for Bhuddruck sub-division will be somewhat less; it will be between 150 and 200, and that number is, I think, quite enough, for the present. With regard to the qualifications for candidates for election as members, the sub-divisional officer would reduce the payment of Rs. 25 as road cess to a payment of Rs. 15, but he assigns no reason for this proposed change.

16. The sub-divisional officer urges with much stronger reason that men of intelligence and education may be eligible as members of boards even if they do not possess the qualifications spoken of above. To those who pay road cess and license tax, the sub-divisional officer "would add all intelligent officials, members of the Educational Department, and mukhtears and vakeels. I have suggested the latter three classes, as they are by far the most intelligent; and a board merely formed of landholders and license tax assessees would not answer and would also defeat the object with which local self-government has been sanctioned** I would therefore strongly urge that men of intelligence may not be excluded from the board merely because their annual income does not amount to Rs. 1,000."

17. Babu Kailash Chunder Roy Mohasay also makes a similar recommendation and uses similar argument. I admit there is considerable force in this argument, but it seems to me that, when we declare men with annual income of Rs. 1,000 eligible, we virtually include the classes of people whom the sub-divisional officer would like to see as members of boards All the more respectable Government officials, as well as mukhtears and pleaders, can show an annual income of Rs. 1,000 or more, and will therefore be eligible as members of boards; and it is not very desirable to elect members from among mukhtears and others of a lower income. For all these reasons, I think the qualifications laid down in the Government circular are about as good as any that could be substituted.

18. I have only one or two things more to say on this subject. In the first place it should be laid down that in the case of a joint family, possessing the same property, or carrying on the same trade, any one adult male member of the family may be elected as member of the board with the consent of all the rest. This is a most important matter. Young men of education and intelligence and property form the backbone of most committees in Bengal, it would very seriously tell against the efficiency of boards if such men were excluded on the ground that their parents or elder brothers were alive. The best men in the Balasore committees at the present moment fall under this class, and it would be difficult to form an efficient board if these men were excluded.

A provision in the case of joint families.

19. In the second place, I would grant travelling allowance to the members for attending meetings of boards. Rajah Syamanand Dé, Babu Kailash Chunder Roy Mohasay, and Roy Nemai Charan Bose Bahadoor, all insist on this, and the first-named gentleman, at any rate, is perfectly disinterested in the matter, as he is a resident of Balasore, and would be entitled to no allowance under the rule which he advocates. The state of communications in this district is by no means very good, the number of roads is not very numerous, and during floods in the rainy season many of the pucca roads are under water and the village roads become nearly impassable. Travelling is difficult except in *palkees*, and such travelling from distant thanas like Jellasore and Baliapal is very costly. A journey from such places to Balasore and the return journey would cost between Rs. 15 and Rs. 20, and such expenditure, once in the month or oftener, would be too much for members with a monthly income of only Rs. 100 or so. Even persons of larger income are not likely, in the ordinary state of things, to submit cheerfully to so heavy a monthly tax, and zeal for public duty and for good of ones own district is likely to abate when it is attended with such a heavy personal sacrifice.

Travelling expenses should be allowed to members of boards.

20. Zemindars and respectable merchants all over Bengal, generally speaking, perform journies in palki, and many of them will have to come 20 or 30 miles, or even more, to be present at the sub-divisional board. It is almost certain that, if the actual expenses of these gentlemen are not paid, their attendance will be anything but regular, and the management of work will be practically left in the hands of those members who live nearer the sub-divisional head-quarters. This would be a most undesirable result, and I strongly recommend therefore that members attending from a distance of over five miles be allowed travelling allowance. The cost to Government will be very small, and it would not be wise to save this expense at the risk of making sub-divisional boards less efficient than they would otherwise be. Rajah Syamanand De and Babu Kailash Chunder Roy Mohasay recommend that the rate may be eight annas per mile.

21. Under the rules explained in the preceding paragraphs, there will be two sub-divisional boards in this district—one in the sudder sub-division, and one in the Bhuddruck sub-division. The sudder sub-divisional board will consist of fifteen members, ten of them elected from the five thanas of the sub-division and the remaining five being nominated by Government. In the same way the Bhuddruck sub-divisional board will consist of twelve members, eight of whom will be elected from the four thanas of the sub-division and the remaining four will be nominated and appointed by Government. By this arrangement all the advantages for which it is proposed to make sub-divisions units of administration will be secured to the fullest extent, while there will be nothing to prevent the two sub-divisional boards from deputing or nominating well-educated and duly qualified men who, together with some men to be named by Government may form the district board to control the sub-divisional boards and keep some sort of unity in district administration. But of district boards I will speak hereafter, my present remarks apply to sub-divisional boards only.

Two sub-divisional boards in this district. Their constitution. Members to be partly elected and partly nominated.

22. The elections can most conveniently take place in thana buildings where the police will be present to preserve order if necessary. As the system is new to the people, it is, I think, worth while to take some pains to bring it home to them. A printed circular to the following effect, worded in the simplest language, and sent to each voter (there will be less than 2,000 voters in this district) will greatly facilitate matters. The circular will be to the effect. viz. that Government is desirous of entrusting the work of education, medical charity, and the construction of roads to a number of respectable men in the district; that the people will choose the majority of those men; that in your thana the persons named below are qualified for the work and have consented to be members of the board if elected; and that, if you are willing, you can come to the thana on such a day and give your vote for the person, out of those named below, whom you would like to see appointed to do the work. I foresee no difficulty if the work of election is carried on with due care, to explain its scope and object to the people in the manner described above. Different dates may be fixed for election at the different thanas, and a respectable official, perhaps a Deputy Collector, may be deputed to preside at each election. It will not take him many days to go through all the thanas one after the other, and his presence at the elections would prevent much confusion and probably fraud.

Elections for sub-divisional boards to be held in thanas. Details.

23. With regard to the appointment of chairmen of sub-divisional boards, I entirely agree with the remarks made in the concluding portion of paragraph 14 of the Government circular, that under sufficient control most of the local boards should elect their own chair-

Paragraph 11 of Government circular. Chairman of sub-divisional boards to be elected by the boards.

men. It will be seen that I have proposed the creation of a controlling board in every district, beside the central board proposed in paragraph 14 of the Government circular. The local executive officer too will have ample means of controlling the proceedings of the board by his own personal influence, as well as by invoking the interference of the superior boards when necessary. Thus the sub-divisional boards will be under a triple system of control, viz. that of the local officer, that of the district board, and that of the central board; and under this system of complete supervision, I have no hesitation in recommending that the sub-divisional boards both in Balasore and in Bhuddruck should be allowed to elect their own chairmen; and I consider it essential to the success of the scheme which is now under the consideration of Government that this should be done.

24. It is known to yourself that the principal reason why the members of the existing committees do not take an adequate interest in their work is that practically they have no work to do. If we take the instance of the road cess committee, we shall find that the chairman and his office really do all the work. The chairman during his cold-weather tour sees more of the district roads than any single member of the committee, and he is able, with the assistance of the engineering staff, to make out a plan of operations for the next year. The chairman practically decides which roads and which portions of roads should be taken up, and how much money is to be spent on such portions, and when the work is in progress he examines the engineer's reports and passes bills. The accounts are written and adjusted in his office, and he and his vice-chairman are practically responsible for them. Once in the month the accounts are brought before the committee to be passed; a few bills for large sums previously prepared and examined in the office are also brought forward and passed; a few petitions for village roads are considered and one or two suggestions are made. Such being the work generally done in the committee, it is not strange that men of intelligence and education, who have their own legitimate duties to perform, should be somewhat wanting in interest in the work. Whenever any real work is intrusted to them, whenever any really difficult question comes up to them for discussion and determination, they are always willing to bestow their time and attention on it, and take a praiseworthy pride in helping Government officers to the utmost of their power. It has been my good fortune to have been associated more than once with respectable and educated people at district head-quarters to discuss and settle important questions, and on such occasions I have uniformly received from them real and genuine assistance. On every such occasion I have been struck with the sacrifice of their own time and interest which they made to help me, and I have greatly benefited by their local experience and knowledge, and their really sensible suggestions. I have met the same men in committees, and I have always found them wanting in interest in the matters before them.

25. To associate district executive officers with the members of the board would be to repeat the mistake which has been committed so often, and would have the effect of throwing all the real work on the executive officer. The executive officer is not likely to allow things to be done otherwise than in the way which he conscientiously considers best; and the members of boards, elected or nominated, are not likely to oppose him in such matters. As a natural consequence, all the work will not only have to be done by the executive officer, but will also be done in the way in which he wishes it to be done, and the members of the board will feel (whatever forms they may go through in the committee) that they have no real work and no real responsibility. Men of education and intelligence will cease to take interest in work in which they have no real share, and the object of the present scheme, viz. to teach the people self-government in local matters, and allow them to have a share in the administration of such matters, will be entirely frustrated.

26. I may here be permitted to quote a passage from Rajah Syamanand De's letter, which is interesting as coming from a non-official. He says—"I know full well that the members of the existing district committee do not consider themselves responsible if they vote with the District Magistrate." This is a confession as coming from a non-official.

27. Mr. Ricketts, the Sub-Divisional Officer of Bhuddruck, recommends that "the members should have the privilege of nominating their own chairman," although for the present he thinks it desirable that the sub-divisional officer should be the chairman. There are men of education, intelligence, and public spirit, both in Bhuddruck and in Balasore, who have long been members of the different committees and who thoroughly understand the principles of administration, and I have no doubt that such men if elected chairmen of the sub-divisional boards will do this work with ability. I have no hesitation therefore in recommending that, under the checks which I have proposed, the sub-divisional boards in both the places may be allowed to elect their own chairmen. I have already stated before that I consider this essential to the success of the scheme which is now under consideration.

28. I have hitherto spoken only of the constitution of sub-divisional boards. I will now proceed to the subject of district boards, the necessity for which I have tried to prove in paragraphs 3 to 7 of the present report. My remarks under this head will be very brief.

District boards will consist of men partly elected by the sub-divisional boards and partly nominated by Government, and will elect their chairman.

29. As the members of the sub-divisional boards (including that at the sudder sub-division) will, according to my proposal, be elected by the people, a further election for district boards is necessary. Each sub-divisional board will nominate a certain number of members for the district board, and Government will also appoint some members, not exceeding one-third of the total number. As there are only two sub-divisions in this district—the Sudder and Bhuddruck—each sub-divisional board may nominate five members for the district board and five more may be

appointed by Government. The necessary qualifications of the members of the district board may be the same as of those of sub-divisional boards, and their duties may be defined and laid down by law. Most of the work which has to be done uniformly for the whole district, like the collection of road cess or the framing of general rules for schools and dispensaries, will be done by the district board, while detail work will be left as far as possible to sub-divisional boards. District boards should also be authorized by law to supervise and control the action of sub-divisional boards, and, like sub-divisional boards, district boards will elect their own chairmen.

Central board will consist of men partly elected by district boards and partly nominated by Government, and will elect its own chairman.

30. I have only a very few remarks to make about the central board of control, to which allusion has been made in the latter end of paragraph 14 of the Government circular. In order to give it a representative character, it is necessary that a portion of the members, say two-thirds, should be elected by the district boards, Two such members might be elected for each division by the district committees within such division, and to the eighteen members thus nominated for the nine divisions in Bengal, may be added nine members more, nominated and appointed by Government. The district boards within each division will, in consultation with each other, elect the two members of the division, and it will be competent to them to elect men who habitually live in Calcutta, or are prepared to proceed there to represent the division for which they are elected. Rules to this effect will enable distant divisions like Chittagong and Rajshahye to be properly represented in the central board of Calcutta. The Government nominees will, I have no doubt, be men of the highest education, talent, and aptitude for business, like some of the well-known public men in Calcutta, and the members will elect their own chairman. A central board so constituted will manage the affairs of the country with credit and distinction, and will command the respect and cheerful obedience of all district boards. It would be difficult to name any single act by which Government could endear itself more to the people than by thus taking them to its confidence, and bestowing on them a real share in the administration of local matters.

Paragraph 12 of Government Circular. The proposed local rate should not be imposed.

31. Much of the popularity of the proposed measure, however, is likely to be impaired if the district and sub-divisional boards are authorized to impose a tax. The degree to which the ignorant people of this country are liable to suspect increase in taxation as the ultimate object of many Government measures is not ever known to you, and even in taking the last census it was found necessary to explain to the people that an increase of taxation was not the object. Should the district and sub-divisional boards be empowered to levy a tax, it would be difficult to prevent the ignorant people from identifying the beneficent scheme of self-government with the tax itself, and the scheme itself would be proportionally unpopular.

32. There is no doubt means must be found for improving drainage, water-supply, and sanitation in the country; but if a tax is necessary for the purpose, Government should, I think, impose the tax and not leave it to local boards to do it. For it is scarcely expedient at the introduction of a new system of self-government and elections to hamper that system with the burden of imposing a new tax. The task of those who will be elected under the new system—who will take upon themselves for the first time many of the responsible duties hitherto done by Government officials—will be heavy and irksome enough; and it will scarcely be fair to fix on them the unpopularity which naturally attaches to the tax-gatherer. The new system will not have a fair trial under such conditions, and will be looked on with jealousy and distrust by the ignorant people, and the new men who will be chosen for the work will be regarded with suspicion. It is possible that most of the Boards in Bengal, if they are allowed any independence in the matter, will decline to impose the tax, and the central board of Calcutta (judging from the present tone of the most respectable Calcutta newspapers) will probably not insist on such a tax being imposed. The very object of the provision will thus be frustrated.

33. I may mention that all the gentlemen who have favoured me with an opinion on the subject unanimously agree on this point. The Sub-divisional officer states: "I do not think a local rate should be levied, which would render the scheme unpopular at the very outset." Rajah Syma Nando De says that "the imposition of a fresh tax in the shape of a local rate would put the people into inconvenience and raise murmer among them. The populace would then understand the new system to be nothing but an increase of taxation." Roy Nimai Charan Bose Bahadoor says: "Averse as the people of this country are to all sorts of direct taxes, a local rate being imposed, the very noble object of local self-government would not find favour with any of them." Similarly, Baboo Koylash Chundra Roy Mahasay states that "no local rate should be levied, for the scheme of self-government will be abhored on all sides if it begins with the levy of a new cess." I have no doubt you will receive similar testimony from every district and from every native gentleman who may have been consulted in the matter, as I have reasons to believe that the feeling among the people against the imposition of a new tax by the local boards is very strong. I hope, therefore, that, considering the strong feeling of the people on the subject, you will be so good as to move Government to reject this part of a scheme which is otherwise likely to be popular in the highest degree.

The work of collection of taxes should not now be entrusted to boards.

34. I am not aware if it has been definitively decided what charges are to be transferred to the local boards; and until that is decided, it is not possible for me to state what sources of income should be made over to them. It is my humble opinion that it would be safer,

at the introduction of the scheme, not to entrust the local boards with the collection of any tax (except the proceeds from ferries and pounds), but to make over to them distinct allotments for the charges that may be made over to them. The Lieutenant-Governor may by law reserve the power of making over from time to time other charges as well as the work of collection of taxes to the boards, according as the boards prove themselves fit for such work. Uniformity in the work done by the different boards is neither desirable nor practicable, and it will be a safer and better plan, I think, to make over work to boards from time to time, according to the ability and intelligence manifested by such boards by their past work. In this view I would recommend that the Balasore board be allowed distinct allotment for education, roads, and medical charity in the district, and that the work of collection of road and public works cesses as well as of other taxes remain with the Collector for the present. I have no doubt the Collector will be able to report in a few years on the fitness of the district board for such work also.

35. One reason for my making this recommendation is the difficulty that is experienced in collecting taxes. The Collector is seldom able, even with the help of the Public Demands Act, to show as satisfactory collections in the Road Cess Department as he would like to do; and it would scarcely be expedient to make over this work to boards until they have had a few years' experience in the work of administration and have thoroughly realized its duties and responsibilities. The making over of the collection of the license tax is open to yet another objection. That tax is assessed not on a definite calculation on the rent and revenue of estates like the road cess, but after an approximate calculation on the probable returns of the trade of a year on a number of years. It is much easier, therefore, to go wrong, intentionally or unintentionally, in such assessments than in assessing the road cess; and as most of the members of boards will be license tax assessees, their work would assuredly give rise to much scandal and rumours, even if they strictly did their duty in every case.

The work of Balasore Board.—Construction of roads; maintenance of schools, pathsalas, and dispensaries; management of pounds, ferries, &c.

36. For all these reasons I would, for the present, only make over to the Balasore board certain definite allotments for the construction of district roads and the maintenance of schools, pathsalas, and dispensaries. The board would have to distribute educational allotments to the different schools and pathsalas under such general rules as have been or will be laid down by Government, the central board, and will have to frame rules for the proper inspection of those institutions and examination of boys. The board would also have to decide which dispensaries should be supported out of the medical allotment, and in this, too, as well as the sums they will assign to the different institutions, they shall be guided by general rules laid down by Government and the central board. The construction and maintenance of roads and the management of pounds and ferries will also be among the duties of the board. In the performance of such simple and easy duties the members of the board will undoubtedly gain that experience, that knowledge of things, and that patriotic sense of duty to their district and their country, which will befit them for taking over charge of heavier duties.

The board will have a separate office and a separate sub-committee for each department.

37. For the performance of the duties as described in the preceding paragraph the district board will, no doubt, have different officers under them; the education office, the road cess office, the office for medical charity, and the like. They will also probably find it convenient to form sub-committees, each sub-committee choosing its president and being in charge of a separate department. The Civil Surgeon of the district, who will probably be nominated by Government as a member of the board, will, as a matter of course, belong to the medical sub-committee, and will naturally be elected president of the sub-committee. The Deputy Inspector of Schools, who will also probably be nominated by Government as a member of the board, will belong to the educational sub-committee, while the present non-official vice-chairman of the Road Cess Committee of Balasore will undoubtedly find his way to the board either by election or by nomination, and very likely be the president of the Road Cess Sub-Committee. This arrangement of division into sub-committees will, as far as possible, be copied by the sub-divisional boards of Balasore and Bhadrak. I am sure the boards will only be too glad to avail themselves in the manner indicated above of the experience which Government officials and non-officials have gained in the various departments which have hitherto been managed by Government, and are now about to be made over to the boards. I am equally sure that the Collector of the district will be ever ready to help the boards with his experience and advice, his personal influence, and his cordial sympathy, and under such conditions the new scheme of self-government cannot fail being a success.

Paragraph 18, Government circular.—Municipalities should be kept distinct from boards.

38. Municipalities should certainly be kept entirely distinct from boards. There is only one municipality in this district, and I have already submittted my suggestions with regard to it. There are no unions in this district.

Zillah schools to be managed by the district board. Provision about graded educational officers.

39. The zillah school of Balasore should remain entirely under the control of this district board and not under the municipality. A provision should be made for reserving the appointment, transfer, and removal of all graded officers, whether in the school or outside, in the hands of the Director of Public Instruction. The other officers will be under the orders of the board, subject to such rules as to qualifications as the central board may lay down. All appointments to posts of Rs. 20 or upwards should require the confirmation of the central board, and all orders of suspension or dismissal should be appealable to such board. When

such orders are passed by the sub-divisional board, they may be confirmed or reversed by the district board.

40. In concluding this report, I beg to record that I am very much indebted to Mr. Ricketts, the Sub-divisional officer of Bhadrak, to Rajah Syamananda De, and Munshi Abdus Suban, of Balasore, to Baboo Koilas Chandra Roy Mohasoy, of Deburda, in the north of this district, and to Roy Nemai Charan Bose, Bahadur, of Kothar, in the south of this district. All these gentlemen have favoured me with their views on the various points discussed in the preceding paragraphs, and have given me real assistance by many valuable suggestions. I am also indebted to the people of Balasore for the views they have expressed and the suggessions they have made in their meetings held in this town on the important subject of the introduction of local self-government into this district.

No. 395, dated Chinsurah, the 14th September 1882.

From—JOHN BEAMES, Esq., Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to reply to that part of your No. 5T—M, dated 5th July, which refers to the constitution of local boards. I have already, in my No. 177T, dated 28th August, replied to so much of your circular as deals with the question of municipalities.

I.—CLASSIFICATION OF DISTRICTS.

2. After much consultation with local officers and experienced native gentlemen, I beg to propose the following classification of the districts in this division under the three categories described in your paragraph 8 :—

Class I ... { Beerbhoom. Midnapore.	Class II ... { Hooghly. Bankoora.	Class III ... { Burdwan. Howrah.

I proceed to explain the reasons for suggesting this classification.

3. *Beerbhoom* is a very backward district. There is only one small town, and here and there a few petty marts The Magistrate is of opinion that it is not fit for self-government, and most of the leading native residents hold the same opinion. The sub-divisional officer of Rampurehat did indeed convene a meeting, at which about 150 persons attended and voted in favour of having a local board with elected chairman and all the rest of it. But it is very doubtful whether any of the persons who attended the meeting were fully aware of what was expected of them, and there is reason to think that no movement would have taken place at all but for the official stimulus applied by the Assistant Magistrate. After mature deliberation I am convinced that Beerbhoom for the present can only be a "rural district" under a committee.

4. *Midnapore*, though a very large district, is in nearly every part very backward. What little intellectual cultivation there is, is centred in the towns of Midnapore and Tumlook. As it has been proposed in my former letter to grant a very large measure of independence to these two towns, the aspirations of the advanced portion of the community will be fully satisfied. For the rest of the district the Magistrate remarks that the places where suitable persons could be found are so few, and the area of local boards would consequently be so limited, that it would only cause confusion to create them. By far the largest part of the district must be under a committee, and to have a portion of one thana in Tumlook and a portion of another in Ghattal under a local board would complicate the administration very seriously. A meeting was held at Tumlook at which the usual full range of concessions was voted, but it was attended chiefly by residents of the town and a few zemindars. That the people of the surrounding country are not interested in the subject was shewn by the fact that the meeting found it necessary to appoint a sub-committee to explain the principles of self-government to the people. It is not stated how they propose to do this, as the enthusiasm of the educated classes is not strong enough to overcome their dislike of travelling. For the present I would leave Midnapore in class I as a "rural district." Of course there may be progress hereafter, and in that case the provision which it is proposed to insert in the law enabling the inhabitants to petition for a local board may be taken advantage of when the time comes.

5. *Hooghly* is the most advanced district in the division; and were it not for the Jehanabad sub-division, it might be placed in class III. In that sub-division, however, there are no resident zemindars of wealth or position; the people are miserably poor and ignorant. The only intelligent class is that of the officials and pleaders collected at the sub-divisional head-quarters. I agree with the Magistrate in thinking that Jehanabad must be managed by a sort of branch committee under the sub-divisional officer. In the rest of the district local boards will probably be more successful than in any other part of the division.

6 With reference to the remark in paragraph 7 of your letter, that "even smaller jurisdictions would be admitted if it were found practicable to appoint local boards to control them," I have considered the question of the area to be assigned to each local board in the Hooghly and Serampore sub-divisions In the former the Magistrate reports that he has held meetings of the residents of each thana, and they are unanimously in favour of having a local board for every thana. Indeed, in some instances they wished to have two or more local boards in the same thana. The reasons given for this desire are that the members will certainly object to travel a long distance to meetings (and they seem to consider even five miles a long distance), and that practically the local knowledge of even the most intelligent native does not extend further than a mile or two from his residence. This latter point has once or twice before been pointed out by district officers, and my own experience amply confirms it. Many of my native correspondents again urge the necessity of granting travelling allowance for attending board meetings and the Collector of Burdwan is of opinion that unless this is granted there will be very poor attendance at meetings

7. At the outset I think it would not be advisable to have boards with such a very small area as a single thana. In so populus a district as Hooghly, however, I think there

might with advantage be two local boards for each sub-division. The Magistrate recommends the following arrangements:—

Hooghly local board for thanas	...	... Hooghly. Polba. Bolagurh.
Pundooah local board for thanas	...	... Pundooah. Dhaniakhalli.

In the Serampore sub-division the thana of Serampore is entirely within municipal limits. For the rest I would suggest—

Jonai local board for thanas	...	... Chunditollah. Singoor.
Haripal local board for thanas	...	... Haripal. Kishtonagar.

I select Jonai as the meeting place for this board, because it is the largest and most important town in the neighbourhood. Chunditollah, where the police thana is, is a far less important place.

8. I have not yet received census figures for this division, and therefore I put forward the above suggestion only tentatively. Possibly some rearrangement may be necessary to equalise the area and population of each local board tract, but the above will, I think, be found approximately correct. At any rate there seems no doubt that in a sub-division so densely peopled as Serampore, and containing so many native gentlemen of a very high degree of intelligence and practical business habits, one board for the whole sub-division will not be sufficient or acceptable to the people.

9. *Bankoora.*—This district is rather difficult to deal with, because it is a purely artificial one, so to speak, not being a homogeneous tract of country like Hooghly or Burdwan, but an assemblage of diversely constituted areas, brought together for convenience of administration. The western part of the district, consisting mostly of barren uplands with scanty population, and with the cultivated area everywhere interrupted by forests, has nothing in common with the fertile rice plains, numerous trading marts, and abundant population of the eastern part. In the former there is a large proportion of utterly uncivilized Sonthals, Bowris, and other aborigines; in the latter the population consists almost entirely of industrious and intelligent Bengalis, identical is every respect with those of the neighbouring district of Burdwan.

10. Thus in Bankoora thana the non-Aryan population amounts to 28·9 per cent, in Onda to 19·2, in Chattra to 33·8, while in Kotulpore, Sonamukhi, and Indas there are only a few hundreds. It is of course impossible to make such a matter as local self-government intelligible to Sonthals and Bowris; and as the majority of the Hindus are unlettered cultivators, the people of the sudder sub-division cannot be said to be ripe for the exercise of self-government, and indeed could hardly be made to understand what it means

11. The thanas in the Bishenpore sub-division are, on the other hand quite as fit for local boards as the adjacent parts of Burdwan. A meeting was held at Bishenpore, at which the people expressed a desire for the introduction of the new system; and I have no hestitation in recommending that a local board be constituted for that sub-division. The Bishenpore thana itself is perhaps less advanced than the others, but I do not see how it could well be left out. There are here also the same objections to boards with large areas as were put forward in Hooghly. The people do not like the idea of having to travel far to the meetings, and the local knowledge and influence of most of them is restricted to their own immediate neighbourhood

12. The Magistrate of the district also, though admitting that Sonamukhi, Indas, &c, are sufficiently advanced to have a local board, objects on the ground that while the Bishenpore sub-division would thus be a "local government district," the head-quarter sub-division would be only a "rural district," which he thinks would place him, the Magistrate, as only chairman of a branch committee, in a position of subordination to the sub-divisional officer as chairman of the local board. I do not see that this need be the result. It would be quite possible to make some one else than the District Magistrate chairman of the Bankoora board, leaving the Magistrate himself a general controlling power over both that and Bishenpore. I do not think it would be fair to refuse to the advanced parts of the district a share of independence for which they are quite fitted merely because the chief town of the district happens to be situated in a less advanced part of the country. I have therefore, in accordance with the wishes of the people, proposed that Bankoora should be placed in class II with one local board at present for the whole Bishenpore sub-division, which may hereafter be broken up into two or more, and with the sudder sub-division as a "rural district."

13. *Burdwan.*—The Magistrate proposes to extend the system to all the sub-divisions of his district. Mr Larminie repeats the opinion which he expressed regarding municipalities, that unless the very fullest extension is given to the system there will be a cry, in the event of failure, that it has not had a fair trial. This argument seems to me to have greater weight in the case of local boards than in that of municipalities. In the latter the choice of fit persons is limited, and the general intelligence of the inhabitants of so small an area can be readily gauged, so that we can foretell with some degree of certainty, which places are and which are not fitted for extended powers. But the case

is different in a larger area. Although the mass of the population may not be highly intelligent, yet if there can be found only a small number of sufficiently capable business men to form a board, the work will go on satisfactorily. The Magistrate thinks that there does exist in every one of his sub-divisions the requisite number of persons of intelligence; and it must be admitted that the general average of intellectual qualifications is fairly high throughout the district. I confess I have misgivings about some parts, such as the Ranigunge sub-division. But as the popular feeling is strongly in favour of having local boards in every sub-division, and as the District Magistrate also wishes it, I would not oppose it. Any difficulties that may arise in constituting the boards can be got over by a judicious intermixture of nominated with elected members in the way discussed later on under the head of "Election of Members."

14. Some of the native gentlemen whom I have consulted in the district are also desirous of having local boards with very small areas, such as a single thana, or even two in one thana; but I agree with Mr. Larminie in thinking this premature. He admits that the sudder sub-division with its eight thanas will eventually be found unmanageable by a single board, and as time goes on he would break it up into three: thus—

Royna local board for thanas	.. ..	Royna. Khundoghosh.
Burdwan local board for thanas	.. ..	Burdwan. Selimabad. Gangoor.
Mankur local board for thanas	.. ..	Shahibgunge. Ausgram. Budbud.

I do not press this at present, but it is a point which should be borne in mind. The present boards should be four—one for each sub-division, viz. Burdwan, Culna, Cutwa, Ranigunge

15. *Howrah*—This district, which for the present it is more convenient to treat as distinct from Hooghly in order to avail ourselves of the local knowledge of the Magistrate is so close to Calcutta, and possesses such a large number of intelligent residents, that every part of it may, I think, be put under local boards. Of course the remoter parts, such as Bagnan and Shampoor, are not so advanced as those nearer the capital; but the Magistrate is confident that even in them there is a sufficient number of persons of ability to carry out the scheme of local self-government satisfactorily. There would be two local boards—one at Howrah for the sudder sub-division exclusive of the municipality, and one at Uluberia for that sub-division In time, I think, a third board might be established at Ampta for the western portion of the district, but I do not recommend this at present.

II.—QUALIFICATION FOR VOTERS AND BOARD MEMBERS.

16. As a preliminary to the discussion on the question of election of members and voters, the consideration of what should be their qualification is indicated in paragraph 10 of your letter. I therefore take up this subject next.

17. There is much difference of opinion as to the property qualification, but it is pretty generally agreed that unless it is placed very low an unduly large number of the residents in each local board tract will be excluded. There is no fear that by having a very low qualification the number of voters will become inconveniently large, as at any rate for a good many years to come it is certain that a great number of those who are entitled to the franchise will not come forward to claim it. The qualification suggested in your letter is thought by all whom I have consulted to be too high. Payment of Rs. 10 as road-cess by a tenant implies payment of Rs. 600 a year as rent, and as there are very few persons among the cultivating classes who pay so high a rent the majority of this class would be excluded.

18. Various suggestions have been made as to the amount of property qualification, but as they differ only slightly, it will perhaps be best to take a sort of average of them all. In this way the qualification of a voter would be fixed at payment of Rs. 2 road-cess (representing in the case of a ryot about Rs. 100 yearly rent), or the possession of two ploughs, which would imply the ownership or holding of about twenty bighas of land, or being assessed to the lowest grade of license-tax, or, finally, proof of the possession of income from any sources of Rs. 250 a year.

This, I think, fairly represents the general status which would be fixed upon by most of my correspondents as entitling a person to a vote.

19. The educational or intellectual qualification is also very strongly insisted upon in all quarters. Any person who holds a university degree, all pleaders, mookhtears, licensed medical practitioners, and schoolmasters should have a vote. In this as well as in the property qualification actual residence in the area of the board should be compulsory.

20. In regard to candidates for membership also the qualification proposed is so high as to exclude all but a very few, and those probably not the most desirable persons. I would reduce it to an income of Rs. 1,000 a year, which might, as in the case of voters be expressed in terms of paying either road-cess, rent, revenue or license-tax, or of possession of capital yielding an annual income of that amount. As to the educational qualification, persons holding a degree not lower than that of bachelor or licentiate in any of the various subjects in which degrees are conferred by the Calcutta University, or equivalent degrees of other universities, would be eligible, provided they were residents of the district.

21. In the case of joint Hindu families or mercantile firms, it might be provided that the family or firm should have one vote for every Rs. 250 of income they could prove. Such vote should be exercised by only one member of the firm or family at a time.

22. Several officers object to allowing a cumulative vote, on the ground that the local influence of a rich man is likely to be too great as it is, and that it is not desirable to add to it by giving him a plurality of votes. I think there is much weight in this objection as things stand at present in most mofussil districts, and upon the whole I would not go further than giving two votes to one man.

23. I regret that it has not been found possible to prepare the rough list of persons entitled to vote, asked for in your 10th paragraph. Indeed, when the standard of qualification proposed varies so much in each district, it is impossible for district officers to decide whom to include. Even when the qualifications shall have been finally fixed by Government, it will not be easy to prepare lists of the kind required. The road-cess registers shew the amounts due from each estate, not from individual holders They do not shew the amounts payable by ryots or tenureholders in detail, and the task of picking out all this information from voluminous registers and records would require a special establishment for six or eight months.

24. I submit, however, that as at the present stage of the question we are only discussing the general principles of the system such lists, even if they could be prepared. would be of much use to us now. When we arrive at the time when the actual voting has to commence, the best plan will be, I think, to issue a proclamation calling upon all persons who wish to vote to appear before a duly appointed officer and prove that they possess the necessary qualification either in road cess, rent, income or any other shape. This would have to be done some months before the actual voting day, and there would be time to verify the claims by reference to the Collector's records, and compile a register which in future years would require very little rectification.

25. In connection with this part of the subject is the question of the method of conducting the elections, concerning which I have received several more or less valuable suggestions from various quarters. That put forward by Mr. Carstairs is based upon the hint thrown out in your 10th paragraph that for election purposes a local government tract might be divided into wards corresponding with thanas. or even smaller areas, in some of which the members might be elected, while in others they would be nominated.

26. Mr. Carstairs would take the supervisors' circles formed at the late census, which are blocks of villages of convenient size (he wishes to call them "parishes," but I fear both the name and the idea are foreign to India). Each parish should elect one elector, and the body of electors should then proceed to elect a board member. I fear this system of double election would be found difficult to work, and the plan has not met with the approval of other officers to whom I have shewn Mr. Carstairs' note. That officer's idea is that the boards of electors should by degrees become the actual local board, his object being to have boards with very small areas indeed in order to carry out the system referred to in paragraph 15 of your No. 921½, dated 8th April, to the Government of India. under which punchayets raised funds for local works. This object might, however, be attained by the appointment of sub committees under the local board. But omitting the double election part of the system, I think the idea of taking the census supervisors' block as the unit is a good one Thus in the tract under the Jonai board, mentioned in paragraph 7 above, there are 40 census blocks. If every two of these blocks elected a member we should have a board of 20, which is not too many when we remember that the Bengali will not travel if he can help it, and that if local works are to be looked after at all we must have a board member living very close to them to look after them.

27. Mr. Wyer, the Collector of Hooghly, would prefer taking the enumerators' blocks as the unit. These, it will be remembered, are smaller than those of the supervisors, and rarely exceed one village. He would allow the residents of an enumerator's block to elect an elector, and these electors would elect in their turn a representative for each supervisor's circle. These representatives would form a thana board.

28. I have already given my reasons for objecting to the double system of election as well as to having boards for such a small area as a single thana. We may, as Mr. Larminie observes, come to thana boards in time, but at the outset it would be probably found very bewildering to have to control a large number of thana boards, all of which would necessarily consist of untrained persons, and works of general utility, such as roads passing through the jurisdiction of several boards, would run a risk of being neglected. Co-operation between two adjacent boards is even in England difficult to secure, and in India, where the area of a person's local knowledge and interest is so very limited, it would be still more so.

III.—ELECTION OF MEMBERS

29 In paragraph 10 of your letter it is stated that the power of electing representatives will be conceded to any local government tract in which a reasonable number of those who would probably have the franchise desire it and shew that the desire is real by exercising the franchise. As to the latter test of sincerity, we cannot of course apply it at this stage of the affair, for the people cannot exercise the franchise till they get it But as regards the former, namely the desire for the franchise, I may say that it is universal. At every meeting that has been held, and in every letter I have received, the elective system is treated as the basis and essence of self-government. The only difference in the various opinions is that in some it is proposed that the whole, in others that a part only, of the members shoud be elected. Your paragraph 9 does not apparently contemplate that

in any case more than a part of the members should be elected; but I presume that this is not a final decision, and that it is open to me to discuss the question further. I therefore offer the following considerations.

30. As the exponent of that class who would extend the system of self-government as widely and freely as possible, Mr. Larminie may be taken. This gentleman would elect the whole of the members of every local board, on the ground that at present at any rate the number of persons, both eligible and willing to be members, is everywhere very limited, and that whether elected or nominated the same persons would eventually form the board. So that it matters little whether Government retains in its own hands the power of nominating a portion of the members or not. The nominated members must necessarily be the same persons as would be elected if election were granted for the whole body. This is undoubtedly very true as regards most districts. The only object in retaining the power of appointing a proportion of the members is to secure the presence on the board of a certain number of persons acquainted with the conduct of public business. But if these very persons are certain to be elected, if not nominated, there is nothing gained by limiting the full concession of elective franchise for all the members.

31. On the other hand, however, there seems to be no necessity for going beyond the wishes of the people and granting them more than they ask for. I observe that even in Burdwan there are many writers and speakers who do not ask for more than a proportion of elected members.

32. In this, as in many other points in this scheme, we are rather hampered by the necessity of taking the already existing political divisions of the country as our units. Neither districts nor sub-divisions where originally mapped out with reference to the intelligence of the people; and it often happens that a very backward tract is for administrative purposes bound up with far more advanced tracts: so that we cannot treat any district, or even any sub-division, as being entirely on one level in respect of intelligence.

33. Thus in the Culna sub-division there are three thanas, two of which—Culna and Poorbasthali—lying along the river Bhagirathi, which has for centuries been a great highway of commerce, are full of intelligent persons, while the third, Montessur, lying inland, is comparatively backward. In this case the sub-divisional officer's suggestion is that each thana should contribute one-third of the members; those for Culna and Poorbasthali being elected. and those for Montessur appointed by Government. This proposal is similar to that of dividing local government tracts into wards, mentioned in your paragraph 10, and I would recommend its adoption.

34. It is obvious, however, that this easy solution is only rendered possible for Culna by the accident of its three thanas affording the correct proportion of intelligent and backward tracts; it would not be so easy in all other sub-divisions. In spite of Mr. Larminie's assertion that in every thana there will be found two or three men at least who are fitted to act as members, I cannot forget that in some of the Burdwan thanas—Ausgram for instance and Kaksa—it was found impossible last year to obtain the services of persons sufficiently intelligent to be enumerators or supervisors for the census; and if even census enumerators were not procurable, it is unlikely that persons possessing the much higher qualifications of board members would be found.

35. On the whole, after giving due consideration to the numerous opinions before me, and observing that many of those who represent the most advanced stage of native opinion are fully alive to the difficulty of getting boards to work well at first without a certain proportion of members trained to public business, I am disposed to recommend that the local boards shall in every case consist at first of two-thirds elected members and one-third nominated by the district officer and appointed by Government. Whether the ward system shall be introduced, so that in two or three thanas the members shall be elected, while in the others they are nominated, or whether two-thirds of the members shall be elected and the rest nominated without regard to geographical sub-division, must be left to be decided in respect of each tract by local considerations. At present we are concerned with the general details of the scheme only. If in the Act which will have to be passed all these various systems are legalised, it will be a matter of mere executive arrangement to decide hereafter which of them is to be applied to each tract.

36. I would also provide (as suggested by Baboo Eshan Chunder Mitter of Hooghly that one-third of the members should retire by rotation. For advanced sub-divisions like Serampore and Howrah, it should be the rule that the appointed members should retire first, and that on their retirement, if so desired by the electors, and if the working of the board should have been satisfactory, the places of the retiring appointed members should be filled by elected members. By this process we gain the advantage of having at first a certain leaven of persons trained to business experience to guide the infant board during its first years, which, after a while, when no longer needed, can be gradually withdrawn and the whole board made purely elective. This would, I think, meet the wishes of the educated classes among the natives, and be accepted as a satisfactory solution even by such very advanced liberals as the Collector of Burdwan.

IV.—ELECTION OF CHAIRMAN.

37. This is a comparatively simple question. It is asserted in most of the reports, especially in several from natives, that though the people would be everywhere much gratified by the permission to elect their own chairman, yet from a sense of their own helplessness they will in a great majority of cases unanimously elect the sub-divisional officer.

38. I feel, however, in regard to this point, the same hesitation as I felt in respect of allowing District Magistrates to be elected chairmen of municipalities. The Magistrate so elected would feel himself in a very false position. He should preside either by virtue of his official position or not at all. A note of warning is given in a letter from a native gentleman which it is worth while to bear in mind. He says if the sub-divisional officer is mild, courteous, and sympathetic to the people, he will be sure to be elected. If, however, he is the reverse of this, he will not be elected. It is, as we all know, exceedingly difficult to combine firmness and vigour in the discharge of public duties with what the natives of Bengal understand by mildness and sympathy. They are too apt to misapply these epithets to laxity and dulness. It is to be feared that the officers who let people alone most, and disturbed the dirt and prejudices of ages least, would be the most popular in many places.

39. From the remarks in paragraph 11 of your letter, I gather that Government is generally in favour of having non-official chairmen, and I think that in most parts of this division this would be feasible. In all the local boards of the Burdwan and Hooghly districts there might be non-official chairmen. In fact in those boards which are not at the sub-divisional head-quarters it is necessary that the chairman should be non-official, as the sub-divisional officer could not be always going out to preside at meetings. I think it would perhaps be better to provide distinctly that the sub-divisional officer should not be eligible as chairman. If it should be ultimately decided that the necessary control over boards should be exercised by the local officers, it follows that they cannot be members of the boards or take any part in their work.

40. I think, however, that for the present the Uluberia and Bishenpore boards should have the sub-divisional officer as their chairman, as it is questionable whether a suitable non-official chairman can be found in those places. The sudder sub-divisional board of Howrah should elect its own chairman.

V.—POWERS OF LOCAL BOARDS.

41. The proposal to empower boards to levy a local rate has been received with every possible expression of disapproval by the whole of the native community. At meetings and in letters from private individuals it has been denounced as fatal to the system of self-government. This might have been anticipated, as there is nothing so distasteful to the native mind as taxation in any form; and the future members of the local boards, while sharing in this feeling, have in addition the certainty of becoming personally unpopular from taking part in the assessment and realization of the rate. Several district officers also consider that it would be bad policy to levy a local rate at all, and still worse to entrust the work of assessment and collection to the local boards.

42. It does not appear that there is any necessity at present for fresh taxation. It is not to be expected that the local boards will at first, or for a long time to come, do more in the way of sanitation or other branches of the public service than is now done by the Magistrates and Collectors and other officers of Government. On the contrary they will, it may be anticipated, do in many cases much less. They will be new to the work and somewhat helpless and bewildered, and in all probability there will be a great deal more talk than action. It will be quite as much as they can do to spend the ordinary funds that are placed at their disposal. I hope that for the present all idea of further taxation will be laid aside, and on the same grounds I do not see the necessity of making over any part of the proceeds of the license-tax or of the public works cess. I am not, however, in a position to offer any opinion on questions of finance, as such matters rarely, if ever, fall within the range of my official experience; nor have the Collectors offered any suggestions on this head beyond a general opinion, in which I concur, that the views expressed in your letter No. 921½, dated 8th April, are suitable, and should be carried out.

43. The 13th and following paragraphs of your letter under reply do not call for any special report. The remarks on the subject of control are, I understand, merely suggestions, and liable to modification on receipt of orders from the Government of India. It is useless, therefore, to discuss them at present.

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 9th February, 1883, and is hereby promulgated for general information :—

ACT No. III OF 1883.

An Act to repeal Act XXVII of 1854.

Preamble.

WHEREAS Act XXVII of 1854 (*to amend the law relating to the Názim of Bengal*) provides for the service and execution of processes within the precincts of the palace of the Názim at Murshidábád, through the Superintendent of the affairs of the Nizámat, or other officer discharging like functions;

And whereas by an indenture dated the first day of November, 1880, and made between His Highness Sayyad Mansúr Alí, Nawáb Názim of Bengal, of the first part, the Secretary of State for India in Council of the second part, and certain other persons of the third part, the Nawáb Názim of Bengal has, for certain valuable considerations in the indenture mentioned, relinquished and retired from the Nizámat and Súbahdárí of Bengal, Bihár and Orissa, and his position as Názim and Súbahdár of Bengal, Bíhár and Orissa, and his right as Nawáb Názim for the time being to the authority, dignities, stipend, pay, allowances, properties, privileges and rights thereof, or in any wise thereunto annexed or appertaining or therewith enjoyed, and all right and title to interfere or intermeddle hereafter in any way, directly or indirectly, with anything concerning the said Nizámat and Súbahdári;

And whereas, in consequence of the arrangements made by the said indenture, the office of Superintendent of the affairs of the Nizámat has been abolished, and there will in future be no officer discharging the like functions, and it is therefore expedient to repeal Act XXVII of 1854; It is hereby enacted as follows :—

Repeal of Act XXVII of 1854.

1. Act XXVII of 1854 is repealed.

R. J. CROSTHWAITE,
Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 16th February, 1883, and is hereby promulgated for general information :—

ACT No. IV OF 1883.

An Act to amend the Indian Railway Act, 1879.

IV of 1879.

Preamble.

WHEREAS it is expedient to amend the Indian Railway Act, 1879, in manner hereinafter appearing; It is hereby enacted as follows :—

Short title. Commencement.

1. This Act may be called the Indian Railway Act, 1883; and it shall come into force at once.

New sections substituted for section 5 of Act IV of 1879.

2. For section five of the said Act the following sections shall be substituted, namely :—

Railway when to be opened.

"5. A Railway, or portion or extension of, or addition to, a Railway, shall not be opened for the public conveyance of passengers until the Railway Administration has given to the Governor General in Council notice in writing of the intention of opening the same, and until the Governor General in Council has by order sanctioned the opening of the same.

Governor General in Council may appoint Inspecting-officers.

"5A. The Governor General in Council may from time to time appoint, by name or by virtue of their office, officers to be Inspecting-officers under this Act.

Sanction not to be given until after report by Inspecting-officer.

"5B. (1) The sanction referred to in section five shall not be given until an officer appointed under section 5A has, after inspection of the Railway, portion, extension or addition, as the case may be, reported to the Governor General in Council that in his opinion the opening of the same would not be attended with danger to the public using it.

"(2) Notwithstanding anything hereinbefore contained, the Governor General in Council may, in any particular case or in any particular class of cases, by special order, confer on any officer appointed under section 5A power to sanction the opening of a Railway, portion, extension or addition, if in the officer's opinion the opening of the same will not be attended with danger to the public using it.

"(3) In such case it shall not be necessary to make the report required by sub-section (1); but the Governor General in Council may by order cancel the sanction given under sub-section (2), or direct that the sanction shall be subject to such conditions as he thinks fit.

"(4) The sanction given under this section may be either absolute or subject to such conditions as the Governor General in Council, or the officer appointed under section 5A, as the case may be, thinks necessary for the safety of the public.

"(5) When sanction for the opening of any Railway, or portion or extension of, or addition to, any Railway is given subject to conditions, and the Railway Administration fails or neglects to fulfil, or comply with, those conditions, the sanction shall on the failure or neglect forthwith be deemed to be void, and the Railway, or portion, or extension, or addition, as the case may be, shall not be used unless and until sanction is again obtained under this section for the opening thereof.

When alterations affecting safety of passengers are made in Railway, sanction to be again obtained for opening.

"5C. If, after a Railway has been opened as hereinbefore provided, any portion of it is so altered by the Railway Administration as to cause danger to, or affect the safety of, passengers carried thereon, the portion so altered shall not be used for the public conveyance of passengers, unless and until sanction is obtained, in accordance with the provisions of section 5B, for the opening of it.

Powers of Inspector of Railways.

"5D. (1) Every officer appointed under section 5A shall, for the purpose of the inspection, be deemed to be a public servant within the meaning of the Indian Penal Code, and shall, subject to the control of the Governor General in Council, have the following powers, namely :—

"(a) he may enter on and inspect any Railway or portion thereof which has been opened for the public conveyance of passengers, or any rolling-stock used thereon;

"(b) he may, by an order in writing under his hand, require the attendance of any Railway-servant whom he thinks fit to call before him and examine for the said purpose, and may require any such servant to answer, or furnish returns regarding, such inquiries for the said purpose as he thinks fit to make;

"(c) he may require and enforce the production of all books, papers and documents belonging to or in the possession of any Railway Administration which in his opinion are necessary for the said purpose.

"(2) Every Railway Administration whose Railway or rolling-stock is being inspected under this Act shall afford all reasonable facilities for making the inspection to the officer making it.

Governor General in Council empowered to close Railway.

"5E. When, after inspecting any Railway or portion of a Railway, or any rolling-stock used thereon, any officer appointed under section 5A reports to the Governor General in Council that in his opinion the use of the Railway or portion or of any specified rolling-stock will be attended with danger to the public using it, the Governor General in Council may, by order, direct that the Railway or portion be closed for the public conveyance of passengers, or that the rolling-stock so specified shall no longer be used, as the case may be.

Re-opening of Railway.

"5F. (1) When a Railway or portion of a Railway has been closed under section 5E, it shall not be re-opened for the public conveyance of passengers unless and until it has been inspected, and its opening sanctioned, in accordance with the provisions of section 5B.

"(2) When the Governor General in Council has directed under section 5E that any rolling-stock shall not be used, the rolling-stock shall not be used unless and until an officer appointed under section 5A reports that it is fit for use and the Governor General in Council sanctions its use."

Amendment of, and addition to, section 8.

3. In section eight of the said Act, in clause (*d*), the word "and" shall be omitted, and after clause (*d*) the following clause shall be, and be deemed to have always been, inserted:—

"(*dd*) for regulating the conduct of the Railway-servants, and."

New section to be substituted for section 21 of Act IV of 1879.

4. For section twenty-one of the said Act the following section shall be substituted:—

Penalty for opening or re-opening Railway in contravention of sections 5 and 5F, and keeping open after order under section 5E.

"21. Any Railway Administration opening or using, in contravention of section five, section 5B, or section 5C, any Railway, or any portion or extension of, or addition to, a Railway, or keeping, in contravention of an order of the Governor General in Council under section 5E, any Railway or portion thereof open, or re-opening, in contravention of section 5F, sub-section (*1*), any Railway or portion thereof, or using, in contravention of section 5F, sub-section (*2*), any rolling-stock, shall forfeit to Government the sum of one thousand rupees for every day during which the Railway, portion, extension or addition remains open or is used in contravention of any of those sections or of the order of the Governor General in Council, as the case may be, or during which the rolling-stock is so used."

R. J. CROSTHWAITE,

Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd February, 1883, and is hereby promulgated for general Information :—

ACT No. V OF 1883.

THE INDIAN MERCHANT SHIPPING ACT, 188

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Extent.
   Commencement.
2. Repeal of enactments.
3. Definitions.
4. Saving and provision as to powers for removal of master.

CHAPTER II.

INVESTIGATIONS INTO SHIPPING CASUALTIES.

5. Chapter not to apply to certain ships.
6. Report of casualties to be made to Local Government.
7. Power for local Government to appoint special Court of Investigation.
8. Power for other Courts to hold investigations into casualties, when so directed.
9. Power for Court of Investigation to inquire into charges against masters, mates and engineers.
10. Power for Local Government to direct investigation into charges of incompetency or misconduct.
11. Person accused to be heard.
12. Powers of Courts as to evidence and regulation of proceedings.
13. Assessors.
14. Power to arrest witnesses and cause entry and detention of vessels.
15. Power to commit for trial and bind over witnesses.

SECTIONS.

16. Depositions.
17. Report by Court to Local Government.

CHAPTER III.

SUSPENSION AND CANCELLATION OF CERTIFICATES AND GRANT OF FRESH CERTIFICATES.

18. Saving of power to cancel and suspend certificates under English Acts.
19. Power to issue local certificates in lieu of cancelled or suspended certificates.
20. Power for Local Government to suspend or cancel certificates in certain cases.
21. Obligation to deliver up cancelled or suspended certificate.
22. Report to other Local Governments.
23. Report to Board of Trade.
24. Power to revoke cancellation or suspension and grant new certificate.

CHAPTER IV.

AGREEMENTS WITH SEAMEN.

25. Chapter to be read with Act I of 1859.
26. Masters to enter into agreements with seamen.
27. Form and contents of agreement.
28. Scale of provisions to be furnished to lascars.
29. Stipulation where lascars are shipped.
30. Forms for British or Colonial ships.

CHAPTER V.

HEALTH-OFFICERS.

31. Addition to Act XII of 1875.

CHAPTER VI.

MISCELLANEOUS.

32. Power to appoint persons to sue.
33. Proceedings to be instituted in name of Secretary of State for India in Council.
34. Amendment of section 10 of Act I of 1859.
35. Addition to section 11 of Act I of 1859.
36. Amendment of section 79 of Act I of 1859.
37. Provisions as to examinations, &c., of masters not to apply to certain ships.
38. Amendment of Act X of 1841, sections 2, 15, 17 and 23.

Merchant Shipping Act, 1883.

(*Chapter II.—Investigations into Shipping Casualties.*)

An Act for the further amendment of the law relating to Merchant Shipping.

WHEREAS it is expedient to amend the law relating to investigations into casualties affecting ships and charges against masters, mates and engineers;

and whereas it is also expedient to provide, in other respects hereinafter appearing, for the regulation and control of Merchant Shipping;

It is hereby enacted as follows :—

CHAPTER I.

PRELIMINARY.

Short title.

1. (*1*) This Act may be called the Indian Merchant Shipping Act, 1883.

Extent.

(*2*) It extends to the whole of British India;

Commencement.

(*3*) and it shall come into force on the first day of January, 1884.

IV of 1875.

Repeal of enactments.

2. (*1*) The Indian Merchant Shipping Act, 1875, and Act XIII of 1878 (*an Act to provide for the recovery in British India of wages due to, and expenses incurred in respect of, certain seamen and apprentices, and to amend the Indian Merchant Shipping Act, 1875, and the Indian Ports Act, 1875*), are hereby repealed.

(*2*) But all proceedings commenced, officers appointed, powers conferred, investigations held, certificates cancelled or suspended, agreements made and persons authorized under the said Acts or either of them, shall be deemed to have been respectively commenced, appointed, conferred, held, cancelled or suspended, made and authorized under this Act.

Definitions.

3. In this Act—

"ship" includes every description of vessel used in navigation not propelled by oars; and

"master" means any person (except a pilot or harbour-master) having for the time being control or charge of a ship.

Saving and provision as to powers for removal of master.

17 & 18 Vic., c. 104.

4. (*1*) Nothing in this Act shall affect the powers conferred by section two hundred and forty of the Merchant Shipping Act, 1854, or by section eighty of Act I of 1859 (*for the amendment of the law relating to Merchant Shipping*), on Courts having admiralty jurisdiction in India.

(*2*) The powers conferred by the last-mentioned enactment may, at any port in British India where there is no Court having admiralty jurisdiction, be exercised by the principal Court of ordinary criminal jurisdiction at that port.

CHAPTER II.

INVESTIGATIONS INTO SHIPPING CASUALTIES.

Chapter not to apply to certain ships.

5. Nothing in this chapter shall apply to any ship belonging to, or in the service of, Her Majesty or of the Government of India, or belonging to any foreign Prince or State.

Report of casualties to be made to Local Government.

6. (*1*) Whenever any Magistrate, or any officer appointed by the Local Government in this behalf, receives credible information that—

(*a*) any ship has been lost, abandoned, stranded or materially damaged on or near the coasts of British India; or

(*b*) by reason of any casualty happening to or on board of any ship on or near those coasts, loss of life has ensued; or

(*c*) any ship has caused loss or material damage to any other ship on or near those coasts; or

(*d*) any such loss, abandonment, stranding, damage or casualty has happened elsewhere to, or on board of, any British ship, and any competent witnesses thereof have arrived or are to be found at any place in British India; or

(*e*) any British ship is supposed to have been lost, and any evidence can be obtained in British India as to the circumstances under which she proceeded to sea or was last heard of;

he shall forthwith report in writing the information to the Local Government.

(*2*) In the cases mentioned in clauses (*a*), (*b*) and (*c*), the master, pilot, harbour-master, or other person in charge of the ship, or (where two ships are concerned) in charge of each ship, at the time of the loss, abandonment, stranding, damage or casualty, and

in cases under clause (*d*), where the master of the ship concerned, or (except in the case of a loss) where the ship concerned, proceeds to any place in British India from the place where the loss, abandonment, stranding, damage or casualty has occurred, the master of the ship,

shall, on arriving in British India, give immediate notice of the loss, abandonment, stranding, damage or casualty to the nearest Magistrate, or, when he arrives at a port in British India, to the officer appointed as aforesaid at that port.

(*3*) Any person bound to give notice under this section and wilfully failing to give the same shall be punished with fine which may extend to five hundred rupees, and, in default of payment, to simple imprisonment for a term which may extend to three months.

Power for Local Government to appoint special Court of Investigation.

7. (*1*) If in any such case a formal investigation into the facts mentioned in section six, clause (*a*), (*b*), (*c*), (*d*) or (*e*), appears to the Local Government to be requisite or expedient, the Local Government (whether the notice is given or not) may appoint a special Court, consisting of not less than two nor more than four persons, and direct that Court to make the investigation, and may fix the place for making the same.

(*2*) One of the members of the Court shall be a Magistrate acting in or near the place where the investigation is made; another shall be some person conversant with maritime affairs; and the

Merchant Shipping Act, 1883.

(Chapter II.—Investigations into Shipping Casualties.)

other or others (if any) shall be conversant with either maritime or mercantile affairs.

Power for other Courts to hold investigations into casualties when so directed.

8. Every Court having admiralty jurisdiction in British India, and the principal Court of ordinary criminal jurisdiction at every port of British India where there is no Court having admiralty jurisdiction, is hereby authorized, when so directed by the Local Government, to make the investigations referred to in section seven.

Power for Court of Investigation to inquire into charges against masters, mates and engineers.

9. (*1*) Any Court making an investigation under section seven or section eight may inquire into any charge of incompetency or misconduct arising, in the course of the investigation, against any master, mate or engineer, as well as into any charge of a wrongful act or default on his part causing any such loss, abandonment, stranding, damage or casualty as aforesaid.

(*2*) In every case in which any such charge, whether of incompetency or misconduct, or of a wrongful act or default, as aforesaid, arises against any master, mate or engineer in the course of an investigation, the Court shall, before the commencement of the inquiry, cause to be furnished to him a copy of the report or statement of the case upon which the investigation has been directed.

Power for Local Government to direct investigation into charges of incompetency or misconduct.

10. (*1*) If the Local Government has reason to believe that there are grounds for charging any master, mate or engineer, holding a certificate granted by the Board of Trade or a Local Government, with incompetency or misconduct, otherwise than in the course of an investigation under section seven or section eight, it may transmit a statement of the case to any Court mentioned in section eight, at or nearest to the place at which it may be convenient for the parties and witnesses to attend, and may direct that Court to make an investigation into thatcharge.

(*2*) Before commencing the investigation, the Court shall cause the master, mate or engineer so charged to be furnished with a copy of the statement transmitted by the Local Government.

Person accused to be heard.

11. For the purpose of an investigation under this chapter into any charge against a master, mate or engineer, the Court may summon him to appear, and shall give him full opportunity of making a defence either in person or otherwise.

Powers of Courts as to evidence and regulation of proceedings.

12. For the purpose of any investigation under this chapter, the Court making the investigation, so far as relates to compelling the attendance and examination of witnesses and the production of documents and the regulation of the proceedings, shall have—

(*a*) if the Court is a special Court—the same powers as are exerciseable by the principal Court of ordinary criminal jurisdiction for the place at which the investigation is made;

(*b*) if the Court is a Court having admiralty jurisdiction or a principal Court of ordinary criminal jurisdiction—the same powers as are exerciseable by that Court in the exercise of its admiralty or criminal jurisdiction (as the case may be).

Assessors.

13. (*1*) When any investigation involves, or appears likely to involve, any question as to the cancelling or suspension of the certificate of a master, mate or engineer, the Court making the investigation shall constitute as its assessors for the purpose of the investigation two persons having experience in the Merchant Service; and in every other investigation the Court making it may, if it thinks fit, constitute as its assessor for the purposes of the investigation any person conversant with maritime affairs and willing to act as its assessor.

(*2*) The assessors shall attend during the investigation and deliver their opinions in writing, to be recorded on the proceedings. But the exercise of all powers conferred on the Court by this Act or any other enactment for the time being in force shall rest with the Court.

Power to arrest witnesses and cause entry and detention of vessels.

14. (*1*) If any Court making an investigation under this chapter thinks it necessary for obtaining evidence that any person should be arrested, it may issue a warrant for his arrest, and may, for the purpose of effecting the arrest, authorize any officer (subject, nevertheless, to any general or special instructions from the Local Government) to enter any vessel.

(*2*) Any officer so authorized may, for the purpose of enforcing the entry, call to his aid any officers of Police or Customs, or any other persons, and may seize and detain the vessel for such time as is reasonably necessary to effect the arrest; and every such officer or other person shall be deemed to be a public servant within the meaning of the Indian Penal Code, section 186. XLV of 1860.

(*3*) No person shall be detained by virtue of this section for more than forty-eight hours.

Power to commit for trial and bind over witnesses.

15. (*1*) Whenever, in the course of any such investigation, it appears that any person has committed within the jurisdiction of any Court in British India an offence punishable under any law in force in British India, the Court making the investigation may (subject to such rules consistent with this Act as the High Court may from time to time prescribe) cause him to be arrested, or commit him or hold him to bail to take his trial before the proper Court, and may bind over any person to give evidence at the trial, and may, for the purposes of this section, exercise all the powers of a Magistrate of the first class or of a Presidency Magistrate.

(*2*) For the purposes of this section the Recorder of Rangoon shall, within the local limits of his ordinary civil jurisdiction, be deemed to be the High Court.

Depositions.

16. (*1*) Whenever, in the course of any such trial, the testimony of any witness is required in relation to the subject-matter, any deposition previously made by

Merchant Shipping Act, 1883.

(Chapter III.—Suspension and Cancellation of Certificates, &c.)

him in relation to the same subject-matter before any Court making an investigation under this chapter shall, if authenticated by the signature of the Magistrate or presiding Judge, be admissible in evidence on proof—

(*a*) that the witness cannot be found within the jurisdiction of the Court before which the trial is held; and

(*b*) that it was made in the presence of the person accused and that he had an opportunity of cross-examining the witness.

(*2*) A certificate by the Magistrate or presiding Judge that the deposition was made in the presence of the accused and that he had that opportunity shall, unless the contrary be proved, be sufficient evidence that it was so made and that he had that opportunity.

Report by Court to Local Government.

17. (*1*) The Court shall, in the case of all investigations under this chapter, transmit to the Local Government a full report of the conclusions at which it has arrived, together with the evidence.

(*2*) In cases in which, under the Merchant Shipping Acts, 1854 to 1882, the Court is required to send a report to the Board of Trade, the report shall be sent through the Local Government, and the transmission of the report to the Local Government shall be a sufficient compliance with this section.

CHAPTER III.

SUSPENSION AND CANCELLATION OF CERTIFICATES AND GRANT OF FRESH CERTIFICATES.

Saving of power to cancel and suspend certificates under English Acts.

18. Nothing in this Act shall affect the powers conferred by the Merchant Shipping Acts, 1854 to 1882, on the Courts conducting investigations under sections seven, eight, nine and ten of this Act, to cancel or suspend certificates granted under any of the said Merchant Shipping Acts, or certificates to which the provisions of any such Act have been made applicable under the Merchant Shipping (Colonial) Act, 1869. 32 & 33 Vic., c. 11.

Power to issue local certificates in lieu of cancelled or suspended certificates.

19. (*1*) When any such Court cancels or suspends any such certificate, the Local Government may, if it thinks fit, and if it is so empowered by any enactment of a British Indian legislature for the time being in force, grant under that enactment, but without examination, to the holder of the certificate, when the certificate is a certificate as master, a certificate as mate, and, when the certificate is a certificate as mate or engineer, a certificate as mate or engineer, as the case may be, of a grade lower than that which he held at the time of the cancellation or suspension.

(*2*) A certificate so granted shall have the same effect as if it had been granted after examination, but shall not have the effect of a certificate granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under that Act. 32 & 33 Vic. c. 11.

(*3*) The Local Government may act under this section either in pursuance of a recommendation from the Court, or of its own motion.

Power for Local Government to suspend or cancel certificates in certain cases.

20. Any certificate (whether of competency or service) which has been granted by any Local Government to any master, mate or engineer, but has not been granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under the said Act, may be suspended or cancelled, by that or any other Local Government, in the following cases, that is to say:— 32 & 33 Vic. c. 11.

(*a*) if, on any investigation made under this Act, the Court reports that the loss, stranding or abandonment of, or damage to, any ship, or loss of life, has been caused by his wrongful act or default, or that he is incompetent, or has been guilty of any gross act of drunkenness, tyranny or other misconduct;

(*b*) if, on any investigation made under the Merchant Shipping Acts, 1854 to 1882, or on any investigation made by any Court or tribunal for the time being authorized by the legislative authority in any British possession to make inquiry into charges of incompetency or misconduct on the part of masters, mates or engineers of ships, or as to shipwrecks or other casualties affecting ships, the Court or tribunal reports that the master, mate or engineer is incompetent, or has been guilty of any gross act of misconduct, drunkenness or tyranny, or that the loss, stranding or abandonment of, or damage to, any ship, or loss of life, has been caused by his wrongful act or default;

(*c*) if he is proved to have been convicted of any offence which, if committed in British India, would be non-bailable, or, if committed in England, would be a felony; and

(*d*) if (in case of a master) he has been superseded by the order of any Admiralty Court, or of any Naval Court constituted as provided by the Merchant Shipping Act, 1854, or by any other law for the time being in force: 17 & 18 c. 104.

Provided that, in any case in which an investigation has been made into a charge against any master, mate or engineer, a certificate shall not be suspended or cancelled under clause (*a*) unless the Local Government is satisfied that the holder of the certificate has been furnished before the commencement of the investigation with the copy of the report or statement required by section nine or section ten, as the case may be.

Obligation to deliver up cancelled or suspended certificate.

21. Every master, mate or engineer whose certificate is cancelled or suspended under section twenty shall deliver it to the Shipping Master or to such other person as the Local Government which cancelled or suspended the certificate directs, and in default of such delivery shall, for each offence, be punished with fine which may extend to five hundred rupees.

Merchant Shipping Act, 1883.
(Chapter IV.—Agreements with Seamen.)

Report to other Local Governments.

22. If the Local Government which cancels or suspends, under section twenty, a certificate of a master, mate or engineer is not the Local Government that granted the same, the Local Government so cancelling or suspending the certificate shall report the proceedings, and the fact of cancellation or suspension, to the Local Government which granted the certificate.

Report to Board of Trade.

23. Every Local Government cancelling or suspending under section twenty the certificate of a master, mate or engineer shall, as soon as may be practicable, report to the Board of Trade the fact of such cancellation or suspension.

Power to revoke cancellation or suspension and grant new certificate.

24. (*1*) Any Local Government may at any time revoke any order of cancellation or suspension which it may have made under section twenty, or grant, without examination, to any person, whose certificate it has so cancelled, a new certificate of the same or of any lower grade.

(*2*) A certificate so granted shall have the same effect as if it had been granted after examination, but shall not have the effect of a certificate granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under the said Act.

32 & 33 Vic., c. 11.

(*3*) A certificate of competency for a Home-trade ship under Act I of 1859 shall be deemed, for the purposes of this section, to be of a lower grade than a certificate of competency for a foreign-going ship under the same Act.

CHAPTER IV.

AGREEMENTS WITH SEAMEN.

Chapter to be read with Act I of 1859.

25. This chapter shall be read with, and taken as part of, Act I of 1859.

Masters to enter into agreements with seamen.

26. The master of every ship, except ships of a burden not exceeding three hundred tons employed only in the Home-trade, shall enter into an agreement with every seaman whom he engages in, and carries to sea from, any port in British India as one of his crew, in the manner hereinafter mentioned.

Form and contents of agreement.

27. (*1*) Every such agreement shall be in a form sanctioned by the Governor General in Council, and shall be dated at the time of the first signature thereof, and shall be signed by the master before any seaman signs the same, and shall contain the following particulars as terms thereof, that is to say:—

(*a*) either the nature and, as far as practicable, the duration of the intended voyage or engagement, or the maximum period of the voyage or engagement, and the places or parts of the world, if any, to which the voyage or engagement is not to extend;

(*b*) the number and description of the crew, specifying how many are engaged as sailors;

(*c*) the time at which each seaman is to be on board or to begin work;

(*d*) the capacity in which each seaman is to serve;

(*e*) the amount of wages which each seaman is to receive;

(*f*) a scale of the provisions which are to be furnished to each seaman; and

(*g*) any regulations as to conduct on board, and as to fines, short allowance of provisions or other lawful punishments for misconduct, which have been sanctioned by the Governor General in Council as regulations proper to be adopted, and which the parties agree to adopt.

(*2*) Every such agreement shall be so framed as to admit of stipulations to be adopted at the will of the master and seaman in each case (not being inconsistent with the provisions of any enactment for the time being in force relating to Merchant Shipping), as to advance of wages and supply of warm clothing, and may contain any other stipulations which are not contrary to law.

Scale of provisions to be furnished to lascars.

28. (*1*) In the case of such agreements with lascars or other Native seamen, the scale of the provisions agreed to be furnished to each of such seamen shall not be less than a scale to be from time to time fixed and published by the Local Government with the previous sanction of the Governor General in Council.

(*2*) Any master entering into an agreement with any lascar or other Native seaman for a scale of provisions less than the scale so fixed and published shall be punished with fine which may extend to two hundred rupees.

Stipulation where lascars are shipped.

29. (*1*) Whenever it is agreed that the service of any lascar or other Native seaman shall end at any port not in British India, the agreement shall, in addition to the particulars specified in section twenty-seven, contain a stipulation that fit employment shall be provided for him on board some other ship bound to the port at which he was shipped, or such other port in British India as may be agreed on; or

that a passage shall be provided for him to some port in British India free of charge, or on such other terms as may be agreed on.

(*2*) Every such stipulation shall be signed by the owner of the ship, or by the master on his behalf.

(*3*) In this section the word "seaman" shall include also any Native of British India carried to sea from any port in British India as one of the crew of a ship.

Forms for British or Colonial ships.

30. If the master of any ship belonging to the United Kingdom or any British possession has an agreement with his crew, made in due form according to the law of the place to which the ship belongs, or in which her crew were engaged, and engages a single seaman, not being a lascar or other Native seaman, in any port in British India, the seaman may sign the agreement so made, and it shall not be necessary for him to sign an agreement under this Act.

Merchant Shipping Act, 1883.
(Chapter V.—Health-Officers.)

CHAPTER V.

HEALTH-OFFICERS.

XII of 1875.

Addition to Act XII of 1875.

31. In the Indian Ports Act, 1875, after section eighteen, the following section shall be inserted, that is to say:—

Appointment and powers of Health-officer.

"18A. The Local Government may, from time to time, appoint, at any port subject to this Act, an officer to be called the Health-officer, and may suspend or remove from office any officer so appointed.

"A Health-officer shall, subject to the control of the Local Government, have the following powers within the limits of the port for which he is appointed, that is to say:—

"(*a*) with respect to any ship, the powers conferred on a Shipping Master by Act I of 1859, section 71;

"(*b*) power to enter on board any ship and medically examine all or any of the seamen or apprentices on board the ship;

"(*c*) power to require and enforce the production of the log-book and any other books, papers or documents which he thinks necessary for the purpose of enquiring into the health and medical condition of the persons on board the ship;

"(*d*) power to call before him and examine for any such purpose all or any of those persons and to require answers to any inquiries he thinks fit to make;

"(*e*) power to require any person so examined to make and subscribe a declaration of the truth of the statements made by him.

CHAPTER VI.

MISCELLANEOUS.

Power to appoint persons to sue.

17 & 18 Vic., c. 104.

18 & 19 Vic., c. 91.

17 & 18 Vic., c. 104.

I of 1872.

32. (*1*) Where any wages or expenses recoverable under section 213 of the Merchant Shipping Act, 1854, or under section 16 of the Merchant Shipping Act Amendment Act, 1855, are, under the same sections, a charge upon any ship, or recoverable from any master, owner or other person, within the jurisdiction of any Court in British India, the Governor General in Council may from time to time, by notification in the *Gazette of India*, authorize, either generally or specially, such persons as he thinks fit to sue for and recover, in manner in the Merchant Shipping Act, 1854, section 213, provided, those wages or expenses.

(*2*) Every person so authorized shall be entitled to sue and recover accordingly in any such Court, and shall be deemed to be a person filling a public office within the meaning of the Indian Evidence Act, 1872, section 57, clause 7.

Proceedings to be instituted in name of Secretary of State for India in Council.

33. All suits and proceedings under section thirty-two shall be instituted and carried on in the name of the Secretary of State for India in Council.

Amendment of section 10 of Act I of 1859.

34. In section 10 of Act I of 1859, for the words "Fees at the following rates shall be paid by all applicants for examination:—

For a certificate as master	...	ten rupees.
Ditto ditto as mate	...	five „ "

the following shall be substituted, namely:—"Fees at such rates as the Local Government may, from time to time, with the previous sanction of the Governor General in Council, fix in this behalf shall be paid by all applicants for examination."

Addition to section 11 of Act I of 1859.

35. To section 11 of Act I of 1859 the following shall be added, namely:—

"Provided that the Local Government may, in any case in which it has reason to believe that such report has been unduly made, require, before granting a certificate, a re-examination of the applicant or a further inquiry into his testimonials and character."

Amendment of section 79 of Act I of 1859.

36. For the last fifteen words of section 79 of Act I of 1859, the following shall be substituted, namely:—"punished with fine which may extend to one thousand rupees, or with imprisonment for a term which may extend to two years, or with both."

Provisions as to examinations, &c., of masters not to apply to certain ships.

37. Sections 9 to 16 (both inclusive) of Act I of 1859 shall not apply to ships registered under Act X of 1841 and trading between ports in India and the coasts of Arabia, when such ships are navigated and manned exclusively by Arabs, lascars or other Asiatic masters and seamen.

Amendment of Act X of 1841, secs. 2, 15, 17 and 23.

38. In sections 2, 15, 17 and 23 of the said Act X of 1841, for the words "on information in any Court of Her Majesty or the East India Company by the Advocates General of the respective Presidencies," "by information as aforesaid," "on information as aforesaid," "upon information as aforesaid," in each of the places where they occur, the following words shall be substituted, namely:—"on conviction before a Presidency Magistrate or a Magistrate of the first class."

Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd February 1883, and is hereby promulgated for general information:—

ACT No. VI OF 1883.

An Act to give power to arrest persons whose evidence is needed under Act XII of 1859.

Preamble.

WHEREAS it is expedient to empower the Judges holding trials under Act XII of 1859 (*An Act to make better provision for the trial of Pilots at the Presidency of Fort William in Bengal for breach of duty*) to arrest persons whose evidence is required on such trials; It is hereby enacted as follows:—

Addition to Act XII of 1859, after section 14.

1. The following section shall be inserted immediately after section 14 of the said Act, namely:—

"15. (*1*) Whenever the Judge of the said Court thinks it necessary for obtaining evidence that any person should be arrested, he may issue a warrant for his arrest, and may, for the purpose of effecting the arrest, authorize any officer (subject, nevertheless, to any general or special instructions from the Local Government) to enter any vessel.

"(*2*) Any officer so authorized may, for the purpose of enforcing the entry, call to his aid any officers of Police or Customs, or any other persons, and may seize and detain the vessel for such time as is reasonably necessary to effect the arrest; and every such officer or other person shall be deemed to be a public servant within the meaning of the Indian Penal Code, section 186. XLV of 1860.

"(*3*) No person shall be detained under this section for more than forty-eight hours."

Commencement of Act.

2. This Act shall come into force on the first day of January, 1884.

R. J. CROSTHWAITE,

Addl. Secy. to the Govt. of India.

Proceedings of the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations.

Saturday, the 24th February 1883.

Present:

HIS HONOR THE LIEUTENANT-GOVERNOR OF BENGAL, *Presiding*;
The HON. G. C. PAUL, C.I.E., *Advocate-General*;
The HON. H. L. DAMPIER, C.I.E.;
The HON. H. J. REYNOLDS;
The HON. C. P. L MACAULAY;
Colonel the HON. S. T. TREVOR;
The HON. J. E. CAITHNESS;
The HON. BHUDEB MOOKERJEE, C.I.E.;
The HON. MAHOMED YUSUF;
and
The HON. HARBUNS SAHAI.

JUTE-WAREHOUSES AND FIRE-BRIGADES.

THE HON. MR. REYNOLDS presented the Report of the Select Committee on the Bill to amend the law relating to Jute-warehouses and Fire-brigades. He said that, as the Select Committee had recommended that the Bill as amended by them be republished, he did not propose to bring forward any motion on the Bill till further time was given for consideration.

LOCAL SELF-GOVERNMENT.

The HON. MR. MACAULAY introduced the Bill to extend the system of Local Self-Government in Bengal. He said that he did not propose at this stage to enter upon any discussion of the details of the measure His object for departing from the usual course was that his colleagues might have an opportunity of making themselves fully acquainted with the provisions of the Bill before they were called upon to discuss it. It had been represented to him by more than one member of the Council that it would be desirable that they should have some further time for this purpose, and he would therefore, with the permission of the President, reserve his remarks until the motion for referring the Bill to a Select Committee came before the next meeting of the Council. He might, however, be permitted to say one or two words with reference to the delay which had taken place in the preparation of the Bill. The Council were aware that the drafting of such a measure as this in the middle of the Session, when Select Committees and the Secretary were cosntantly engaged upon other Bills, was a work of no ordinary difficulty. But the difficulty had in this case been much enhanced by the sudden and serious illness of the Secretary Mr. Reily, who, he regretted to say, had been compelled to take leave to Europe. They had, however, been fortunate in obtaining the assistance of his learned friend Mr. Macgregor, and he deemed it right to inform the Council that it was mainly owing to Mr. Macgregor's ability and the untiring industry with which he had devoted himself to this task that there had not been still further delay in bringing the Bill before the Council. MR. MACAULAY had also to express his acknowledgments to his Hon. friend Mr. Reynolds, who had been good enough to assist him with his great knowledge and experience in revising and settling the terms of the Bill. He then moved that the Bill be read in Council.

HIS HONOR the PRESIDENT said that he thought it was in accordance with the general wish of the Council that any discussion on this measure should be deferred for another week. Personally he was quite willing to meet those wishes, not only on account of the length of the Bill, but on account of its great importance. Therefore he thought it would be better on all grounds that the Council should reserve any remarks they wished to make till the next week when the motion would be put to the Council to refer the Bill to a Select Committee.

The motion was put and agreed to

The Council was adjourned to Saturday, the 3rd March 1883.

DOCKS AT DIAMOND HARBOUR.

No. 75.

Dated 23rd February 1883.

THE following papers on the subject of the proposal to construct Docks at Diamond Harbour are published for general information.

By order of the Lieutenant-Governor of Bengal,

S. T. TREVOR, *Colonel*, R.E.,

Joint-Secretary to the Government of Bengal,

P. W. Dept.

No. 615MPI, dated Calcutta, the 23rd February 1883.

From—COLONEL S. T. TREVOR, R.E., Joint-Secretary to the Government of Bengal, Public Works Department,

To—The Secretary to the Government of India, Public Works Department.

I AM directed to submit, for the information of the Government of India, the report of the Committee appointed in December 1881 to consider the question of constructing docks at Diamond Harbour, together with an office note on the report by the Joint-Secretary in this Department, and a Minute by His Honor the Lieutenant-Governor.

2. I am to state that, for the reasons given in His Honor's Minute, the Port Commissioners have been requested to institute an enquiry in communication with the Chamber of Commerce, and to submit a report as to the measures which it is possible to take for the extension of the present accommodation in the port, and the cost at which any changes which may be recommended can be carried out. His Honor deems it right that some conclusion should be arrived at on this point, upon which an issue has been directly raised by the merchants of Calcutta, before any action is taken upon the proposals for constructing docks at Diamond Harbour.

3 As regards the alternative scheme for the construction of docks in the neighbourhood of Calcutta, communicating by means of a ship canal with the Mutlah river, which the Government of India will observe has been discussed in the report of the Committee, and which has strong advocates in some members of the mercantile community, Mr. Rivers Thompson is of opinion that it is unnecessary to order any further enquiry at present. This scheme has been more than once under discussion, and no serious effort has ever been made to raise the capital required for its prosecution. If, however, the Government of India deem it advisable to do so, a professional survey of this work will be ordered.

No. 616MPI, dated Calcutta, the 23rd February 1883.

From—COLONEL S. T. TREVOR, R.E., Joint-Secretary to the Government of Bengal, Public Works Department,

To—The Vice-Chairman of the Port Commissioners.

I AM directed to forward herewith, for the information of the Port Commissioners, 50 copies of the report of the Committee appointed in December 1881 to consider the question of constructing docks at Diamond Harbour, together with an office note on the report by the Joint-Secretary in this Department, and a Minute by His Honor the Lieutenant-Governor. His Honor has decided that before any further action is taken upon the proposals of the Committee, the question as to the further capabilities of the extension of the port should receive a fuller and closer investigation than has yet been attempted. I am therefore to request that the Port Commissioners will, in communication with the Chamber of Commerce, institute an enquiry, and submit a report as to the measures which it is possible to take for the extension of the present accommodation of the port, and the cost at which any changes which may be recommended can be carried out.

Minute by His Honor the Lieutenant-Governor of Bengal.

I THINK that all these papers should be published for general information before the Government can take any further steps in the matter.

The Committee, whose report is now under consideration, was appointed by the Lieutenant-Governor of Bengal, in December 1881, to examine the question of the construction of wet docks at Diamond Harbour, in view of the sanction which had then been received for a railway from Calcutta to that place. The railway referred to is now all but completed, and will be open to traffic in the course of a few weeks; and there can be little doubt that, if not at once, yet certainly with the completion of the railway bridge over the Hooghly (which will probably be finished in 1885), the advantages of a subsidiary port at Diamond Harbour would be very great to the mercantile and shipping community, if its establishment is within the limits of a practical and profitable undertaking. By the successful completion of such a project, the difficulties and dangers to which navigation of large ships above Diamond Harbour is exposed would be removed; the cost now incurred in bringing ships up the longer distance to Calcutta would be saved, the expenses involved in loading and unloading cargoes, in portage, and other similar charges would be diminished, and great convenience would probably result to the passenger traffic from and to Calcutta. It was not, however, with reference to these future possible advantages that the question of this Diamond Harbour dock scheme was mainly revived. The much more serious consideration has pressed itself upon our attention, that with the rapid development of railways converging on Calcutta, and the vast strides which the trade of the port has made within the last ten years, the existing accommodation for ships in the port of Calcutta is insufficient to meet the requirements of the increasing traffic. As to this fact, there appears from the 18th paragraph of the Committee's report to be no difference of opinion among the members of the Committee, who agree "that a large increase in the accommodation of the port of Calcutta will soon be an urgent necessity." The unanimity, however, begins and ends at this point; for on the further question as to the best means for meeting this difficulty, though a strong majority of the Committee are favourable to the Diamond Harbour project "as the most practicable scheme which has yet been proposed, and the one that offers the best prospect of financial success," it is found that the merchants of Calcutta, presumably those who are most nearly interested in its effectual solution, deprecate any measure which will tend to remove the shipping from the present limits of the port. This view, though not universally accepted by the mercantile community, is based on the opinion "that the transfer of a part of the business of the port to Diamond Harbour, or to any similar locality, would be attended with much inconvenience and expense. It would be necessary, it is urged, to keep up double establishments, and to rent a double set of warehouses: matters of importance will either have to be settled by subordinates, who will be unfit to deal with them, or will have to be delayed for the decision of a principal, who will be forty or fifty miles away. The value of the property of the Port Commissioners, and of the owners of godowns in Calcutta, will be seriously depreciated. The example of Port Canning is sufficient to show the danger of attempting to divert trade into new channels."

The objection thus generally taken is further strengthened by the dissents which have been recorded by two eminent members of the Committee, representing the mercantile interests of Calcutta, who consider that there is room within the limits of the port for much further expansion of improvements, and agree with Mr. Duff Bruce, the Vice-Chairman of the Port Commissioners, that the present accommodation can be considerably increased. Mr. Keswick, in his note of dissent, adds that his "enquiries lead him to believe that it is possible for the Port Commissioners to acquire land on both sides of the river from Garden Reach downward, sufficient to double the accommodation of the port, and provide sufficient warehouse and jetty-room;" and Mr. G. H. Morrison, speaking with the authority of President of the Chamber of Commerce, records, among other objections to the proposal, the opinion that the docks at Diamond Harbour, if successful, would gravely prejudice Calcutta as a centre of trade, and probably ultimately destroy it as a port (p. 28).*

* See page 293.

Now, in considering the measures which have been adopted during the last twelve years to extend the facilities within the port, it is desirable to notice the great improvements which have been made under the Port Trust. Twelve years ago (I am quoting from the report of the Committee on the Diamond Harbour Dock project) "there were no jetties, wharves, warehouses, or appliances available generally for loading or unloading vessels in the port of Calcutta. Vessels were moored in the river and cargoes were discharged and taken in by means of cargo-boats. The Port Trust was established in 1870, and since then great facilities have been provided by the construction of jetties supplied with suitable good-sheds, hydraulic and steam-cranes, and a line of tramway in rear of the jetties in connection with the Eastern Bengal Railway." During the period in question the number of jetties has been doubled. There are now eight of them, and the extent and growth of their advantages may be gathered from the fact that, while the number of vessels accommodated by the jetties was in 1869-70 only 75, in 1880-81 there were 193. Again, whereas in 1871-72 (the earliest date for which figures are available) the total jetty receipts for imports and exports came to Rs. 3,63,145; in 1880-81 they amounted to Rs. 7,14,189. The report goes on to say that "these jetties and their appliances for loading and unloading are all of the latest approved types of construction, and admirable in all respects. If there were room in the port for extending them from time to time to meet the growing trade, it seems probable that such a course would be adopted in preference to taking up new ground for docks at a distance from Calcutta, and that merchants would be content to trust, at all events till the growing size of vessels exceeded the draft available in the river, to the acknowledged skill of the Pilot Service to overcome the dangers of the navigation of the Hooghly. But the jetty accommodation is not really sufficient even for the existing trade of the port, and the evidence we have collected shows that, *although room might be found for some extension, yet it is very doubtful whether the space available in port could be made adequate at any reasonable cost to meet the increased trade that will be brought to Calcutta by the opening of the railway bridge over the Hooghly, and the extension of railways in Bengal.*"

The part which I have italicised in the above quotation raises an issue as to facts, regarding which the dissenting members of the Committee at all events are opposed to the majority of the Committee; and it is due, I think, to the influential body who take this objection, and who after all are the most interested in the settlement of the question, that the matter as to the further capabilities of the extension of the port should receive a fuller and closer investigation than has yet been attempted. It is quite true, as Colonel Trevor points out, that by merely expanding existing appliances, we do not touch the great drawbacks of the port, and the main causes of its expensiveness, which lie in the 120 miles of extremely difficult river navigation, involving heavy charges in pilotage and detention. The Diamond Harbour scheme, if established, would at once diminish these and other evils in the present system. On the other hand, the proposals of the Committee subvert all the present business arrangements of the port, and I am quite certain that the Government could not commit itself to any project involving an outlay of a million-and-a-half of money without a detailed discussion of the alternative suggested of extending the accommodation in the present limits of the port. It is scarcely necessary for me, upon this view of the case, to state at length my own views; but I confess that I entertain very strong doubts whether any possible extra facilities within port limits will afford more than a very temporary relief. The future developments of trade which the continual progress of railways encourages are incalculable; and when the bridge over the Hooghly is finished, and direct communications with Calcutta have been established from the producing districts of the North-Western Provinces, and the tracts of country served by the Northern Bengal, the Central Bengal, and the contemplated line from Seetarampore to the Central Provinces, with their connected branches, the space at present at the disposal of the Port Commissioners seems to me to be utterly inadequate. I leave out of question the lines which are under survey and construction in the Dacca and Mymensingh districts, and the lines projected under the same general system towards Tipperah, Cachar and Chittagong, because all the produce and trade of those regions seems, upon the

most cursory view of the map, to be likely to seek its most natural outlet from the port of Chittagong. But even with such relief as this may give, I doubt whether any economy of space, or any extension of jetties and appliances within present port limits, will meet its requirements a few years hence. As the issue, however, has been directly raised by the merchants of Calcutta, it is right that it should be settled before any action is taken upon the Diamond Harbour proposals.

I propose, therefore, to publish the papers with this Minute and the Note recorded by Colonel S. T. Trevor on the 4th August last. I would ask the Port Commissioners, in communication with the Chamber of Commerce, to institute an enquiry as to the measures possible for extending the present accommodation of the port, and the cost at which such changes could be effected. I limit myself to this point, because the Mutlah Canal scheme, which has strong advocates in some members of the mercantile community, has more than once been under discussion, and no serious effort has ever been made to raise the capital required for its prosecution. In forwarding, however, the papers to the Government of India, and explaining the action we have taken, it may be stated that, if they deem it advisable, a professional survey of this work would be undertaken. Our object is to discover a remedy "for the present congestion;" and if every scheme which is started has to be investigated in all its details, we shall have to postpone practical action to an indefinite period. If the extension of the existing accommodation of the port fails us, I see no better hope for relief than in the establishment of a subsidiary port at Diamond Harbour in connection with the railway to that place which is about to be opened.

RIVERS THOMPSON.

17*th February* 1883.

Office Note by COLONEL S. T. TREVOR, R.E., *Joint-Secretary and Chief Engineer, Bengal, Public Works Department, on the Report of the Committee on Docks at Diamond Harbour.*

MR. ROBERT STEEL, who was a member of the Committee till he went to England, has returned, and at my request has kindly furnished me with a note of his opinion, which I put up with this. Of the two alternative projects—docks at Diamond Harbour or canal to the Mutlah—he prefers the latter, even if it should cost twice as much as the former. But he thinks both schemes premature, and would prefer to see an attempt made to extend the existing accommodation of the port. He would move the bridge higher up the river, and extend the jetties in that direction first, and afterwards in the other direction along the *Maidan* frontage. He would go to the length of removing Fort William itself, if it presented any obstacle to the extension of the port. This idea of sweeping away Fort William, if necessary, to make room for the port, seems a little startling at first, but I remember it was suggested long ago—I believe by Sir William Mansfield, when he was Commander-in-Chief.

2. Mr. Keswick is also of opinion that the accommodation in the port may be doubled within the existing limits, and proposes that steps should be taken to ascertain this definitely before proceeding with any scheme for docks elsewhere.

3. Mr. Morrison's view of these proposals for increasing the accommodation for shipping without leaving the present limits of the port, is that "they deserve careful consideration, but are open to the serious objection that they leave untouched the delays and dangers of the Hooghly." He much prefers the Mutlah Canal scheme to that of docks at Diamond Harbour, and has recorded his arguments in favour of the former and against the latter, which will be found at page 28* of the report, and page vi of the appendix†.

4. In the *Englishman* of the 2nd August is a report of what is said by Mr. Miller, as President of the Chamber of Commerce, regarding the project for docks at Diamond Harbour. He spoke as follows:—"The experiment would unsettle our trade and add to the current expenses of working it. In this view there would appear to be general agreement amongst merchants: but the proposal is still in its infancy; and remembering, as many

* Page 293. † Page 301.

here must, the strong opposition which existed to the work of the Port Commissioners on the first establishment of that body, I would venture to think we may prudently await a further development of the views of the professional advisers of Government before pronouncing definitely on it, or actively opposing the proposal that has been suggested. It is possible that a wet-dock at Diamond Harbour might prove convenient for salt ships to discharge, and for ships and steamers to load cargoes of jute and seed and wheat; and if the undertaking could be commenced on a small scale and allowed to grow with the development of trade, it is conceivable that it may prove the best remedy for our present congestion. It is still in embryo, and in view of the great increase that is yearly being made in the size and capacity of steamers, and of the difficulty of navigating them up to Calcutta, I do not think we should condemn this proposal too hastily. Still it appears to me that it would be better to make the most of what we have got before venturing on these gigantic engineering feats, and I hope the mercantile community will be made aware, before it is too late, of the decision of Government, when one is arrived at, and again have an opportunity of forming an opinion."

5. These views may, I think, be taken to represent the opinion of the mercantile community generally, and they amount to this, that there is a strong reluctance to any separation or removal of the port from the neighbourhood of the merchants' offices in Calcutta. In deference to this opinion, I think the Port Commissioners should be asked to submit a full and detailed report and estimate, showing exactly what can be done to increase the accommodation within the limits of the port, what it will cost, and how far it will meet the altered circumstances of the traffic when all the railways are centred in Calcutta.

6. But if we are to be content to go on as we are, and merely expand existing arrangements, there can be no doubt that we shall never succeed in making Calcutta a cheaper port; and that is perhaps the thing most to be desired. In much of the produce exported, jute and wheat for instance, the margin of profit is very small, and the very existence of the trade depends on the cost at which such produce can be delivered at the ship's side, and on the charges for freight. The existing arrangements of the port, under which it is impossible to deliver produce at the ship's side otherwise than by the employment of intermediate agencies, and after much handling and carting and boating, are about as expensive as can well be imagined. The port itself is approached by 120 miles of extremely difficult river navigation, which involves a very heavy expense in pilotage and detention. These are the grand drawbacks of the port and the main causes of its expensiveness. By merely expanding existing appliances we do not touch them. We cannot hope to get a harbour like Bombay on the sea coast, but still we can do something to mitigate the present disadvantages. We can reduce the detentions and dangers of the river navigation by half if we build docks at Diamond Harbour, so as to enable ships to terminate their voyage there. We can extend the railway right into the docks, and build proper warehouses, with suitable appliances for lifting and handling goods on the railway, so that every possible facility and enconomy can be afforded in the treatment of goods up to the point of shipment. In this way, and in this way only, it appears to me, can we relieve trade of the burden of intermediate agencies, of the unnecessary expenses of cartage and boat-hire, and of such charges as may be attributable to the time and money spent by ships in navigating the Hooghly. The expense thrown, per contra, on trade by the termination of the voyage at Diamond Harbour is the extra cost of carriage of goods by rail to that point, and this the majority of the Committee think will be nothing in the case of goods booked through from up-country, and about one rupee a ton for goods booked to and from Calcutta.

7. In calculating the saving to ships and steamers by terminating the voyage at Diamond Harbour, the Committee reduced the amount to an extremely low figure. The calculations are given in pargraphs 42 to 46 of the report, and it will be instructive to compare them with those given by Mr. Morrison at page ix of the appendix.* It was at his instance that the Committee cut down their estimate and produced a resultant saving of Rs. 520 only for a steamer and Rs. 2,479 for a sailing ship. But for the purposes of

* Page 304.

his own argument in support of the Mutlah Canal scheme he makes the saving to be—

	Rs.
For a Coasting steamer	625
„ Canal steamer	2,230
„ Sailing ship	6,250

One omission in the Committee's estimate should be noticed. At the end of paragraph 41 it is stated that the dock charges of 14½ annas per register ton would cover all dock dues, wharfage, landing charges, &c., excluding only crane-hire and warehouse rent. But in paragraph 42, where the estimate is given of the cost of bringing a steamer to Calcutta, only "jetty charges," amounting to Rs. 385, are entered, and the "landing charges," &c, payable for the use of the jetties and which are much the heaviest, are omitted, although in the case of the vessels using the Diamond Harbour dock the average charge of 14½ annas per ton includes such charges. It should be observed that in the table given at page 12 of the report, it is shown that the Port Commissioners actually realized an income of Rs 7,14,189 for the use of the jetties from 193 vessels, or an average of Rs. 3,700 per vessel; whereas in the calculation given in paragraph 41, the Committee estimate that an income but slightly larger, Rs. 7,50,000, will be sufficient to make the docks a remunerative undertaking and that it can be realized from 468 vessels—an average of Rs. 1,600 per vessel. There is here, therefore, a saving of Rs. 2,100, for which no allowance has been made in the Committee's estimate. The Committee's report just touches on this point in paragraph 46, but in the absence of figures giving the precise incidence of the charges in each case, we could not go into the matter more fully. I think there is no doubt, however, that the Committee's estimate of savings errs too much on the side of safety, and that Mr. Morrison is probably more nearly correct.

8. His estimate again at page x of the appendix* gives almost fabulous figures for the savings in boat and cartage expenses. He gives these figures as the anticipated results of the Mutlah Canal scheme which he is advocating; but they are the supposed results simply of berthing ships in properly constructed and furnished docks, instead of in the open river as at present. They are therefore applicable with as much force to the Diamond Harbour scheme as to that of the Mutlah Canal. I should say that they apply with much greater force, for (1) the Diamond Harbour scheme will involve only half the capital expenditure of the other, and therefore the charges so far as providing for interest is concerned will be proportionately less; (2) it will reduce the distance between Calcutta and the sea to about half what it is now, and the saving due to this is an absolutely calculable quantity; whereas in the case of the Mutlah Canal, there is no reduction of distance, and although the navigation is assumed to be less dangerous, it will probably not be less expensive or dilatory than that of the Hooghly. There would be two sets of pilots—one for the river up to the entrance of the canal and one for the canal itself, and the navigation of the latter will unavoidably be slow. The expense to sailing ships will certainly be much greater in the case of the canal than in that of Diamond Harbour, on account of the towage: they must be towed in the canal, but they would get up to Diamond Harbour without it. There would be delay in warping them through the locks for they could not be towed in for want of space. Then, again, there are the important considerations given in paragraph 62 of the report. On the whole, it seems to me that all the advantages of economy, which Mr. Morrison claims for the docks of the Mutlah Canal can be much more reasonably claimed for the Diamond Harbour docks; while as to the question of men's business being destroyed, or their interests assailed, the whole discussion seems to me to turn on the question of providing for an inevitable *increase* of business, not on its destruction. There may, indeed there must, be changes in the methods of carrying on business to provide for such increase, but I cannot see how any idea of destruction can arise. But supposing Mr. Morrison's figures to be accepted for the sake of argument, and that they are as applicable to Diamond Harbour as to the Mutlah Canal, we may form some estimate from them how greatly the savings resulting from the use of docks would exceed the extra carriage from Calcutta to Diamond Harbour. The

* Page 304.

savings he estimates at Rs. 81,25,750, while the extra carriage on the total tonnage which entered the port would, at one rupee per ton, be Rs. 12,20,546.

9. But the main argument to my mind in favour of Diamond Harbour is that which I have given in paragraph 6 above. Leaving out of consideration ordinary Calcutta assorted cargoes, which it may probably always be preferable to bring up to Calcutta, it is clear from Mr. Leslie's note that there is reason to believe that a very large export trade in grain, coal, &c., might be created if only the appliances existed for delivering such cargoes cheaply into ships' holds. Such trade is strangled by the expenses of shipment as the business of the port is now conducted; and the prosperity of Bengal, the wealth of the agricultural population, and its consequent ability to cope with famines when they occur, depend enormously on the fostering of such trade.

10. The uncertainty of the permanence of the channels of the Hooghly below Diamond Harbour is a point which Mr. Morrison regards as almost fatal to the proposal to build docks there. But as he himself remarks, the Hooghly has been navigated for the last hundred years, and why not another hundred? Those who recommend the expansion of the existing accommodation at Calcutta, evidently are not deterred by any fear of the river closing. At any rate, we know all that is to be known of the Hooghly channels, but our experience of the Mutlah is almost nothing. There appears to me to be less wisdom in sinking three millions on a speculative transfer of the port to a new and almost unknown river than in spending a million and a half in providing docks on a river which already forms the port of Calcutta, and of which we know the worst.

11. The opposition of the mercantile community throws a difficulty in the way of proceeding with the dock scheme. I think not only should we get a report and estimate from the Port Commissioners to set at rest the question of the possibility of extending the present port, but we should also appoint some one to investigate the scheme for the canal to the Mutlah, and frame as correct an estimate as possible of its cost. In the meantime I think the Committee's report should be made public.

The 4th August 1882. S. T. TREVOR.

REPORT OF THE COMMITTEE ON DOCKS AT DIAMOND HARBOUR.

PRESIDENT:

HON'BLE H. J. REYNOLDS, C.S.,
Chairman of the Commissioners for making Improvements in the Port of Calcutta.

MEMBERS:

H. C. LEVINGE, ESQ., C.E.,
Secretary to the Government of Bengal, Public Works Department.

COLONEL S. T. TREVOR, R.E.,
Joint-Secretary to the Government of Bengal, Public Works Department.

BRADFORD LESLIE, ESQ., C.E.,
Agent to the East Indian Railway Co.

ROBERT STEEL, ESQ.,
Firm of Robert Steel & Co. of Calcutta.

G. H. MORRISON, ESQ.,
Firm of Turner, Morrison & Co. of Calcutta.

C. WAWN, ESQ. C.E.,
Special Engineer appointed to the Committee by the Secretary of State.

SECRETARY:

C. W. ODLING, ESQ., C.E.,
Executive Engineer, Public Works Department, Irrigation Branch.

After the second meeting of the Committee, Mr. Steel left Calcutta and was replaced by

J. J. J. KESWICK, ESQ.,
Firm of Jardine, Skinner & Co.

1. The Committee held meetings at the office of the Port Commissioners on the following dates:—10th January, 31st January, 24th March, 20th April, and 1st May 1882. They visited Diamond Harbour on the 25th January. All the members were present at every meeting.

2. Mr. Wawn arrived in Calcutta on the 12th December 1881, and proceeded on the 15th of the same month to Diamond Harbour to make his preliminary examination of the site of the proposed docks. He subsequently visited Diamond Harbour on the 25th January, the 25th February, the 2nd March, and the 26th April. In the meantime he has been engaged in the preparation of the designs, which are submitted with this report and explained in his letter of the 4th of March.

3. Under Mr. Wawn's directions, trial-wells and borings were sunk by Mr. White, Assistant Engineer, Diamond Harbour Railway. A well was got down dry to about 25 feet below the surface of the ground, or about 10 feet below low tide. At about this level water was first encountered, and at about 28 feet below the surface the earth fell from behind the timber backing, and the well was abandoned. A brick well is at present being sunk. Borings to a depth of 82 feet have been made in two places, the general result shewing a mixture of silt and sand in varying proportions. In boring No. 1, at a depth of between 40 feet and 50 feet from the surface, where the proportion of sand was greatest, a considerable quantity of water also appeared to be present with it, but to what extent the water is likely to give trouble cannot be satisfactorily gauged until a well has been sunk through it. In boring No. 2 very little water was observed. The latest information on this subject will be found in Mr. Wawn's letter in the appendix,* page v.

Proceedings of Committee.

4. At the first meeting of the Committee it was resolved, in order to obtain general information as a guide to more particular enquiries, that the Committee should draw up and circulate amongst merchants, ship-owners, pilots, &c., a series of questions relating to the navigation of the river, size and expenses of vessels, general commercial facilities, &c.

5. Questions suggested by different members of the Committee after the first meeting having been collected, arranged, and printed, another meeting was held on the 31st January to consider them. They were then, as modified in Committee, corrected and issued to about 100 gentlemen, who, it was supposed, would be able to afford information, including the Port Commissioners, the Chamber of Commerce, insurance companies, &c., and a note explaining generally the scheme, as suggested by the Special Engineer, was circulated with the questions (see appendix, page xi).

Messrs. R. Steel & Co.
" Hoare, Miller & Co.
" Mackinnon, Mackenzie & Co.
" George Henderson & Co.
" Gladstone, Wyllie & Co.
" Ralli Brothers.
" Prankissen Law & Co.
" Jardine, Skinner & Co.
D. Scott, Esq., Vice-Chairman, Port Commissioners.
Captain Yates, Harbour Master.
Lieutenant Petley, R.N., River Surveyor.
" Stiffe, I.N., Port Officer.
S. R. Elson, Esq., Master Pilot.
A. J. Milner, Esq., Branch Pilot.
G. H. Simmons, Esq., Secretary, Port Commissioners.
W. H. Grimley, Esq., Collector of Customs.
C. J. Wilkinson, Esq., Superintendent, P. & O. Co.
Captain G. S. Thompson.
F. Prestage, Esq., Agent, Eastern Bengal Railway.
Messrs. Bird & Co., Managing Agents, Burrakur Colliery.
R. M. Daly, Esq., Branch Pilot.
Messrs. Duncan Brothers.
" Apcar & Co.
A. B. Inglis, Esq.
Messrs. Gillanders, Arbuthnot & Co.
Chamber of Commerce.
J. R. Wells, Esq., Branch Pilot.

6. A sufficient number of replies having been received, a meeting of the Committee was held on the 24th March to consider them, and to deduce from the evidence thus obtained the information to be set forth in the report. The names of the gentlemen who have favoured the Committee with replies are given in the margin, and their replies are printed in full in the appendix, pages xi to xliv. Besides replies to the Committee's questions, the gentlemen named on the margin* have also addressed letters to the Committee explaining their views more fully and generally: these are printed in the appendix, pages xlix to lvii.

* Captain A. D. Taylor, I.N.
Lieutenant Stiffe, I.N.
C. J. Wilkinson, Esq., Superintendent, P. & O. Co.
Messrs. Hoare, Miller & Co.
" Ralli Brothers.
W. H. Grimley, Esq.
Messrs. Gladstone, Wyllie & Co.
R. M. Daly, Esq., Branch Pilot.
Messrs. Gillanders, Arbuthnot & Co.
S. R. Elson, Esq., Master Pilot.
W. Duff Bruce, Esq.
The Port Commissioners enclosing a letter from J. R. Wells, Esq., Branch Pilot.

7. At the meeting of the 24th March, the Committee considered also Mr. Wawn's letter of the 4th idem, printed at pages i to iv of the appendix IV,† and examined Captain Yates, Harbour Master of Calcutta, more fully as to the replies given by him to the printed questions.

† Pages 296–299.

Review of previous schemes for improving the port.

8. Before proceeding to consider the opinions which have been collected on the scheme of docks now proposed to be constructed at Diamond Harbour, the Committee deem it advisable to review briefly the projects which have been previously suggested with a view to improve the port of Calcutta. In a letter from the Bengal Chamber of Commerce, dated the 29th December 1858, reference is made to a proposal, dating so far back as 1824, for constructing wet docks in the neighbourhood of Calcutta; and in page 31, volume XXI of the Proceedings of the Institution of Civil Engineers, it is stated that in 1831 a survey was made by order of Government with a view to the excavation of a canal from Calcutta to the head of the Mutlah. This proposal for a canal was revived at various times, but eventually the matter was for the time decided by the construction of the Calcutta and South-Eastern Railway in its place.

9. In 1843 the Government of Bengal, in reviewing the proceedings of a Committee appointed to investigate the circumstances attending the loss of certain Government vessels during the hurricane of 1842, observed that the damage was chiefly due to the crowded state of the port, and pointed to the necessity of constructing wet docks with a view of preventing the occurrence of similar calamities in future. A Committee, with Lieutenant-Colonel Forbes, Bengal Engineers, as President, was appointed in May 1844 for the purpose of enquiring into, and reporting upon, the expediency of constructing wet docks capable of receiving the whole shipping of the port of Calcutta. The Committee reported strongly in favour of wet docks being constructed, and indicated the vicinity of Kidderpore as the one in most respects best adapted for the purpose. They recommended that the docks should be made of sufficient size to accommodate 200 vessels of an average burden of 400 tons, and estimated their cost at 50 lakhs of rupees. In 1847 an endeavour was made to float a company with a capital of one million sterling for constructing a line of railway to Diamond Harbour with warehouses and wet docks there. The project fell through chiefly owing to the impossibility of raising the capital without a Government guarantee of a certain minimum rate of interest which was refused, but the doubt then existing as to the feasibility of introducing railways into India had also a share in this result.

10. The Chamber of Commerce, between 1858 and 1864, several times represented the inadequacy of the appliances of the port for the increasing number of ships frequenting it. In the letter dated 29th December 1858, before referred to, the Committee of the Chamber of Commerce state: "The time has now arrived when nothing less than the absolute possession of wet dock accommodation will satisfy the increasing requirements of the extending commerce of Bengal;" and in a subsequent letter dated the 27th February 1863, they recommended to the favourable consideration of Government the construction of wet docks on a plan advocated by Mr. F. Prestage, then Chief Engineer of the Eastern Bengal Railway Company. In 1864 definite proposals for wet docks were laid before Government by Mr. Power of the East Indian Railway Company, and by Mr. Leith, Chairman of the Eastern Bengal Railway Company, representing respectively the Calcutta Victoria Dock Company, Limited, and the Calcutta Wet Docks and Wharves Company, Limited. Late in that year a Committee was appointed to consider this subject in connection with the proposed Hooghly bridge and the junction of the East Indian and Eastern Bengal Railway Companies. The practical result of the report of this Committee was the creation of the Calcutta Port Trust, which has to a very large extent met the wants of the port up to the present time.

11. The improvement of the river itself has not escaped attention. In 1863 an attempt was made to improve some of the channels by means of a toothed roller, which was on the whole considered successful, and the subject was considered of such importance that Mr. Leonard, C.E., was deputed to visit the principal European rivers in the hope that some of the means used of training rivers in Europe or dredging apparatus used there might be adapted for the Hooghly. Mr. Leonard, supported by Sir C. Hartley, C.E., recommended

the construction of a steamer fitted with rakes for the purpose of stirring the sands in the shoaler parts of the river and the construction of spurs at Moyapore. A steamer, the *Agitator*, was procured from England and commenced working in 1867. Although frequently laid up for repairs, she appears, on the whole, to have been of service. Doubts, however, were expressed whether the results were commensurate with the expense of working her, and the vessel being required for other uses, she ceased to be employed on this work in November 1869, though her dredging apparatus was ordered to be preserved for use in case of any emergency arising in future.

12. As regards the Moyapore Shoals, an estimate, amounting to Rs. 2,42,000, for spur works for improving the channels there was sanctioned in February 1868; work was carried on at intervals up to June 1870, about two lakhs of rupees being expended without any decided improvement resulting. Mr. Robertson, C.E., was consulted in 1872, and recommended that a training wall should be substituted for spurs, but the Chief Engineer did not concur in this view, which was not carried out.

13. The most determined attempt, however, to meet the constantly increasing trade of Calcutta was the creation of a new port (Canning) in conjunction with the Calcutta and South-Eastern Railway. Jetties were built on the river Mutlah, and a commencement was made in the way of providing warehouses. The capital expended was very large, but for several reasons, the most potent of which was perhaps the financial crisis of 1866, the scheme was not successful. There were from the outset grave difficulties attending the attempt to open this port; the place, like all new settlements near the Sunderbuns, was unhealthy; good water for drinking purposes was not to be had; the water in the river was believed to have a prejudicial effect on the bottoms of iron ships; the river bank cut away rapidly, and one jetty erected by the Railway Company was so much injured by scour that it fell in; tug boats and other facilities were wanting, and the place got a bad name, which, added to the financial difficulties with which the Port Canning Company were then contending, led to the abandonment of a scheme which at one time was thought likely to solve all the difficulties connected with the shipping trade of Calcutta.

14. The presumed advantages of the river Mutlah over the Hooghly are, however, so great, that in 1876 the earlier project of connecting Calcutta and the Mutlah by means of a ship canal was again subjected to detailed examination. Mr. Dejoux, C.E., of the Public Works Department, after carefully investigating the whole matter, proposed a canal 30 miles in length with a width at surface of water of 250 feet and 28 feet deep. The canal was to be supplied by pumping from the Hooghly, the maximum lift being 17 feet, and to be provided with locks 600 feet by 60 feet. Its total cost was estimated at Rs. 1,54,58,344. Including interest at 4 per cent., a sinking fund of 3 per cent., and working expenses, an annual income of Rs. 16,56,788, equivalent, according to Mr. Dejoux, to 12 annas per ton *on all* shipping visiting Calcutta, would have been required to render the project financially successful. The estimated cost included four locks into the Circular canals for boat traffic, but not wet docks at Sealdah, which, it was stated, would be necessary, unless an extra width was given to the last four miles of the canal, and masonry quay walls allowed on that length. The extra cost of these two items was estimated at one million sterling, on which a return was expected from loading and unloading charges. No serious effort was made to raise capital for this work.

These various schemes, completed or only suggested, go to shew that the trade of Calcutta has for years back been struggling against recognized disadvantages.

Increase of trade.

15. But the trade of Calcutta has nevertheless made vast strides of late years. The following statement, extracted from the annual report of the Port Commissioners, gives the number of sea-going steamers and sailing ships that have annually entered the port during the last 20 years. The statement shows only the sea-going

vessels which have been brought into port by officers of the Pilot Service, and excludes all river steamers and country boats :—

Year.	Number of vessels.			Net tonnage.
	Steamers.	Sailing vessels.	Total.	
1861-62	89	803	892	668,311
1862-63	118	816	934	699,010
1863-64	173	967	1,140	933,148
1864-65	187	1,019	1,206	997,756
1865-66	201	708	909	784,703
1866-67	175	599	774	682,848
1867-68	152	732	884	804,450
1868-69	208	679	887	839,823
1869-70	204	602	806	757,208
1870-71	259	672	931	889,229
1871-72	300	655	955	985,822
1872-73	338	615	953	978,621

16. The number and tonnage of steamers from European ports *viâ* the Suez Canal are given in the following statement :—

Year.	Number.	Gross tonnage.
1871-72	87	156,583
1872-73	95	188,509
1873-74	118	266,960
1874-75	105	270,799
1875-76	145	360,586
1876-77	161	406,120
1877-78	171	417,604
1878-79	128	347,408
1879-80	136	365,578
1880-81	163	430,894

17. These statements show that the trade of Calcutta measured by tonnage has doubled itself in the last 20 years, and that it is passing gradually from sailing vessels to steamers. In 1877 and 1878 there was an abnormal increase of shipping in the port in consequence of the Madras famine. But setting this aside, if the number of canal steamers that entered the port in 1880-81 be compared with those that entered in 1871-72, it will be seen that in ten years the number has doubled, and the tonnage increased three-fold. But on the other hand there has been a reduction in the number of sailing vessels during the same period from 655 in 1871-72 to 478 in 1880-81, although the total tonnage has remained almost the same. The net increase in tonnage in these ten years has been from 985,822 tons in 1871-72 to 1,220,546 tons in 1880-81, which is nearly 24 per cent.; and this increase has taken place while the railway system of Bengal has been in its infancy. It is only within the last five years that any advance has been made in extending railways in Bengal further than the original guaranteed lines. We have now the Northern Bengal system at work and the Tirhoot system and the Patna-Gya line. Further extensions are either actually under construction or will soon be commenced in Central Bengal, in Eastern Bengal, and in Western Bengal to connect Calcutta with the Central Provinces. The prospect thus opened out of a further rapid increase in the trade of Bengal is very clearly indicated in a

memorandum which has been furnished to us by our colleague Mr. Bradford Leslie, and which we here quote:—

If it be assumed that the trade of Bengal has nearly attained its final development, and that all further expansion of trade will be diverted to Bombay, there would be no sufficient cause for bringing the East Indian Railway across the Hooghly, or for considering the subject of docks at Diamond Harbour; but this is not the opinion of those who have studied the subject by the light of practical experience.

2. In gauging the progress due to railway enterprise, it is usual to look at the net financial result, and in the case of the older guaranteed lines this is sufficiently startling, but a truer index of their utility would be the value of goods transported. Although it is impossible to give this, the tonnage carried affords some idea of its rate of increase.

3. Owing to progressive reduction of rates the tonnage carried on nearly all the railways has increased in a much higher ratio than the net earnings.

4. The following statement exhibits separately the quantity of coal and all other goods received by rail at Howrah from the year 1871 to the year 1880 inclusive. Dividing the total period of ten years into two of five years each, and taking the average of each five years, we arrive at the average increase of tonnage in a period of five years.

EAST INDIAN RAILWAY.

Statement of Goods Traffic downwards from 1871 *to* 1880.

	Received at Howrah.	
	Coals.	Other goods.
	Tons.	Tons.
1871	185,969	192,533
1872	231,727	181,161
1873	292,873	219,783
1874	311,924	215,976
1875	293,796	295,818
	1,316,289	1,105,221
Average per year ..	263,257	221,044
1876	274,387	531,189
1877	308,484	738,273
1878	398,587	533,270
1879	389,450	543,501
1880	387,836	627,515
	1,758,744	2,973,748
Average per year ..	351,748	594,749

5. The increase on coal is 33 per cent. in five years, or at the rate of about 7 per cent. per annum, and this notwithstanding the first period includes the years 1872-73-74 when the Bengal coal trade was abnormally stimulated by the fancy price of coal in England.

6. The coal trade is at present much incommoded by the want of depôt accommodation at Howrah; but when the bridge is ready this trade will receive a great impulse, and as prejudices are overcome, and the good steaming qualities of the finer descriptions of Bengal coal are better known, a slight reduction in its cost will ensure its use by ocean steamers, especially if facilities are afforded for loading direct into bunkers at Diamond Harbour. It is indeed probable that, with the completion of the harbour at Madras, the railways there will find it more profitable to use Bengal coal than English "Patent Fuel," but arrangements would be necessary for loading screw colliers direct from the railway hoppers.

7. Comparing the average downwards goods, excluding coal, received at Howrah for the five years 1871 to 1875 inclusive with the same average from 1876 to 1881, it appears that the tonnage of the ordinary railway traffic to Howrah is increasing at the rate of over 20 per cent. per annum, and most of it is for exportation.

8. The tonnage of downwards goods (excluding coal) received at Howrah during the year 1881 was 799,468: coal amounted to 392,340 tons.

9. The official returns of the internal trade of Bengal shew that the enormous increase of railway tonnage has not caused any falling off in the boat and steamer traffic, the imports into Calcutta by all the routes of navigation shewing a satisfactory increase; the explanation being that a large proportion of the boat traffic comes from districts north of the Ganges and elsewhere not yet provided with railway communication, and the great increase of railway traffic is brought from districts remote from navigable rivers and canals.

10. Considering that the construction of the proposed Central Provinces Railway will in a few years place Calcutta within a comparatively short lead by rail of the fertile districts of Sumbulpore, Raipore, and Chattisgarh, and the enormous districts north of the Ganges that will be placed in direct communication with the port of Calcutta by the extensions of the Tirhoot State Railway to Goruckpore and Bahraitch, the increase of traffic that will result from the completion of the bridge over the Ganges at Benares, the further ramifications and development of the Northern Bengal Railway system, together with the growing traffic of Assam and Cachar, the opening of the Bengal Central Railway, and the gradual reclamation of the Sunderbuns that is certain to ensue, there is no reason to suppose that the limit of railway traffic seeking Calcutta as its natural outlet has yet been distantly approached.

11. The East Indian Railway Co. is increasing its rolling-stock, and can still further reduce its rates, and by the year 1885, when the bridge, it is hoped, will be finished, the Agent confidently expects that this railway alone will be pouring in country produce, excluding coal, at the rate of 1,250,000 tons per annum, provided facilities are afforded for its export; for experience has proved the futility of stimulating traffic by cheap transport without proper accommodation for dealing with it at destination. Already, owing to insufficient shed-room at Howrah, the railway company is compelled to unduly limit the free time for removal of consignments.

12. It may be contended that there is no advantage in providing for expansion of traffic, which, owing to foreign competition or to dullness of demand, may never be realized. The reply to this is that, with every advantage in the way of communications, India can only supply a fractional part of the requirements of the markets of the world, and that by the adoption of improvements in the transmission of her produce to market, she should be in a position to command a sale for all her surplus.

13. The conditions under which India, and Bengal in particular, compete with the other grain-exporting countries are already very favourable. The climate, assisted by artificial irrigation, produces annually two crops—the khurreef and the rubbee—or the monsoon and cold-weather crops. The former, generally speaking, supports the frugal, industrious, and teeming population, and the latter is available for exportation. Agricultural labour, both human and animal, is thus constantly employed all the year round, and does not spend half its time in unprofitable hibernation as in Russia and North America. The ryot in fact employs his capital, that is his labour, continuously instead of intermittently. Again, the export of grain and seeds is favoured by the cheapness of inland transport by rail and river, and by abundance of labour for handling goods. Another favourable circumstance is that the jute sacks required for shipment of these staples are produced locally and have a high market value at the port of destination, so that instead of heavy capital outlay for elevators, machinery, and special stock for the unsatisfactory system of dealing with the grain in bulk, there is a certain profit on the very sacks necessary for carrying the grain.

14. With all these advantages Bengal should be in a position to export produce at rates which cannot be approached by any other country in the world, but for this purpose the trade must be supervised throughout by European agency. Under the existing system, in which the trade in country produce (excepting cotton, indigo, tea, and a few other staples) is chiefly in the hands of natives, a considerable percentage of the freight paid to railways is for the carriage of dirt, and produce unfit for export, and the losses through rotten bags, exposure to the weather, and pilferage are considerable. To obviate these losses, European produce agents have established themselves at the provincial depôts, who clean and bag the grain for direct shipment. There is no doubt that the dry climate of the interior is more favourable for the storage and preparation of grain and seeds than the humid atmosphere of the tropical sea-ports, and that, for the delivery of country produce in good order at the port of destination, the shorter the time it is exposed to the damp air of Lower Bengal the better.

15. It may not be out of place to point out that a regular export of food-grains is the best insurance against famine. Where grain is grown for export, stocks are held in anticipation of improvement in the market rate, and the failure of the crops in one district can be supplemented by diverting the export produce from other districts. If this is the case, the construction of the proposed docks at Diamond Harbour, which would do more than anything else to facilitate this trade, may be regarded as to some extent a work for insurance against famine.

16. The question then arises, will the existing shipping accommodation in the port of Calcutta be sufficient to deal with the increased traffic the railway will be in a position to bring into Calcutta when the bridge is finished? The change from small timber ships to iron ships and from sailing to steam vessels, and the improvements effected by the Port Commissioners, have provided for the increase of traffic in the last ten years; but it is admitted that to provide for any further considerable increase of the export trade additional accommodation is necessary and it is certain that unless such accommodation be provided, the advantages to be derived from the crossing of the Hooghly by the East Indian Railway will not be fully realized. How and where such additional accommodation should be provided so as to secure the best facilities to trade is the subject to be considered.

17. With the docks at Diamond Harbour entire cargoes of grain and seeds and other produce could be brought down by rail and transferred direct from the railway wagons to the ship's hold, and this service could be undertaken by the Railway Company without the necessity for any other agency.

18. The reduction of the duty on salt will have the effect of sending the Liverpool salt further up-country into districts not reached by boats, and if the Government salt depôt be transferred to docks at Diamond Harbour, the facility of loading direct into railway wagons would result in very largely transferring this traffic from boat to rail, thereby reducing the opportunities for smuggling, and giving the railway a back load for its stock.

The site of the existing golahs at Sulkea is valued at many lakhs of rupees.

19. Naturally any proposal tending to dispense with intermediate agencies will be unfavourably received by those interested, but that does not affect the question under consideration. The East Indian Railway takes delivery of heavy consignments of railway material of every description not only for its own use, but also for the Oudh and Rohilkhand and State Railways, and no difficulty or complications are experienced in doing this work at very low rates even with the present imperfect appliances. With docks at Diamond Harbour these materials could be despatched direct to destination or to a mofussil depôt where they could be economically stored until required. There is no reason why the Railway Company should not in the same manner receive general cargo ex ship and deliver it to order of consignee.

20. Assuming that the proposed site for the docks at Diamond Harbour is open to no insuperable objection from an engineering or nautical point of view, and that satisfactory arrangements can be made for running powers over intervening lines of rail, the Agent of the East Indian Railway would not hestitate to recommend their construction and incorporation as part of the undertaking.

18. In the opinion that a large increase in the accommodation of the port of Calcutta will soon be an urgent necessity, the Committee is unanimous. But when we proceed to the consideration of the question how and where such additional accommodation should be provided, so as to secure the best facilities to trade, we find that the evidence which we have collected shews a great preponderance of opinion amongst the merchants of Calcutta in favour of some scheme which will avoid the removal of the shipping from the present limits of the port. This view is, moreover, advocated by two of our colleagues. But the majority of the Committee, after a careful consideration of all the evidence in favour of the proposal to construct docks at Diamond Harbour, as well as all that has been urged against it, are of opinion that that is the most practicable scheme which has yet been proposed, and the one which offers the best prospect of financial success. We therefore proceed now to consider that scheme in detail and in the order indicated in the letter of instructions from the Government of Bengal.

19. The chief dangers to which vessels are exposed in the Hooghly are very fully described at pages vi to xiv of the appendix in the answers received to the Committee's first question. Those above Diamond Harbour may be summarized as shifting sands, narrow channels with sharp bends, eddies, and the want of good anchoring places. Owing to the volume of water passing through the narrow channels about Diamond Harbour, the risks are intensified during the freshets and particularly at spring tides. The points of greatest danger are the James and Mary and Moyapore Sands, the bad anchorage at Ninian and at Fisherman's Point, and the difficult navigation off Monekhally and Fulta Points.

Risks above Diamond Harbour.

20. The following extracts relate to the navigation above Diamond Harbour. Mr. Milner says "the Muckrapatha Sand of the James and Mary is one of the most dangerous sands in the Hooghly, and the periodical closing up of the Eastern Gut in the months of March, April, May, and June often causes very serious delay." Mr. Elson also describes how these channels open and close with the season, and says "the closing of the James and Mary takes place at that season of the year when the mean half tide level of the river is low, and consequently deep-loading vessels requiring over 22 feet have sometimes had to go to Diamond Harbour to finish loading at such time." He says further that "fortunately the James and Mary has been good of late years, so that much inconvenience has not been felt." Mr. Milner says "Ninian is a most dangerous place as an anchorage, especially in the freshets on account of the strong eddies both on the flood and ebb tides, causing a ship to become quite uncontrollable and heeling her gunwale under on a strong shear if the cable will hold," and Mr. Elson says "Ninian is a forbidden anchorage for all vessels." Mr. Elson gives the names of *ten* vessels lost within the last 20 years between the James and Mary and Fisherman's Point, and says that during this time only *sixteen* have been lost below the James and Mary, thus shewing that out of 26 wrecks in the 110 miles of river below Fisherman's Point, 10 occurred in the dangerous shoals in the short space

of eight miles between that point and the James and Mary. Fewer accidents appear to have occurred lately; for whilst Mr. Milner says that Fisherman's Point is "dangerous on spring tides and in the freshets," and that it was here that the steam ship *Queen Anne* was lost, he goes on to say that to his knowledge this is the only steamer lost here since the opening of the Suez Canal, and that it was in charge of a Junior instead of a Branch Pilot. Mr. Milner says "Moyapore Flat is a dangerous obstruction on account of its liability to sudden changes. Many ships ground here." Mr. Elson says: "Monekhally Point and the usual sand below it is, on account of the whirling eddies found off it, on the ebb tide a formidable danger to vessels passing down on the springs or in the freshets," and on the same subject Mr. Milner says "the river off Monekhally Point on spring tides in the freshets is a place that is much dreaded on account of the uncontrollable eddies, and it is undoubtedly a relief to the pilot on the way down to find himself safely pass this place. Vessels, however, seldom ground on the sand, the tendency being to run on the southern bank near the crossing mark." Mr. Milner remarks generally that "in terminating the voyage at Diamond Harbour, there would undoubtedly be much risk of accident, principally to sailing ships."

21. Other nautical gentlemen mention the same points of danger without going into details. Captain Yates says "the advantages gained by the construction of the docks would be the avoidance of eddies principally above Diamond Harbour, of the narrow navigation of the upper reaches, of anchoring in the narrow channels, which are dangerous in freshets." Captain Wilkinson speaks of the risks to "a long ship rounding Hooghly Point on a strong flood tide, or in going down the river during the freshets, when she has very often stranded at Fisherman's Point." Lieutenant Stiffe says that "to have to anchor at a place like Fisherman's Point during the freshets is highly undesirable." The following standing order to pilots is significant:—"Within three days of the full or change of the moon, no sailing vessel drawing more than 12 feet shall attempt to pass the James and Mary inward-bound on the flood tide, unless in tow of a steamer," and "vessels may not be under weigh at night between Gewankolly Temple and Fultah Point, or over the James and Marys under any circumstances."

22. And yet with all these acknowledged dangers the casualties have been comparatively few, and this must doubtless be attributed to the general efficiency of the Pilot Service, the rigid order about sailing at night, and the fact that vessels are content to wait occasionally at Calcutta for favourable opportunities for sailing.

23. From a special report of the Port Officer, dated 5th May 1881 (appendix, page xlv), it appears that, whilst the number of total losses (omitting collisions) during the last *ten* years have been *two* above Diamond Harbour and *seven* below, the number of groundings in the last three years have been *ninety-six* above Diamond Harbour and *twenty-one* below.

Risks below Diamond Harbour.

24. Many dangers to navigation exist also below Diamond Harbour in the Middle Ground Shoal, the encroachment of the Middleton Sand on to Saugor Roads, the heavy swell sometimes felt in the Gasper Channel, and shifting nature of the sands between Saugor and Kulpee. To this must be added of course a considerable portion of the risk caused by rough weather in the shallows and narrow channels of the Sandheads. There are places below Diamond Harbour with no greater depth of water than above; indeed, during the freshets, the channels above are generally the deeper of the two. The channels below Diamond Harbour, however, are generally wider and not so tortuous.

Delays above Diamond Harbour.

25. The loss of time to which vessels are subject above Diamond Harbour including both the actual time required to steam or tow 50 miles each way, and the incidental delays to which they are liable, has been variously estimated; and as it depends greatly on the season, the state of the tide, the size and speed of the particular vessel, it is difficult to arrive at more than a rough average approximation. Messrs. Geo Henderson & Co. think the saving would be only a "few hours,

and of no practical value." Captain Wilkinson says "vessels are sometimes neaped inward-bound, and have had to wait as much as two days at Diamond Harbour." Mr. Elson says "half a day, and sometimes a day, would be gained by terminating the voyage at Diamond Harbour." Captain Yates says (ships and steamers) from four to five hours up and frequently one day down. Also, "I have known instances in the dry season of P. and O. steamers outward-bound going to Diamond Harbour two or three days before their date of sailing on account of the James and Marys shoal on falling tides. This has not occurred for some years." Mr. Daly says "ships would be saved one or two days and steamers one day at least." Messrs. Duncan Brothers say "steamers one day up and down, sailing ships two days up and down." Lieutenant Stiffe says "four hours up, one day down for large vessels, if not, six hours." Messrs. Jardine, Skinner & Co. say "half a day inwards and one day outwards More in April, May, and June." Captain Thompson says "sailing vessel one day, steamer half a day." Messrs. Hoare, Miller & Co. say "one day up, and half a day down for a steamer." Messrs. Gladstone, Wyllie & Co. say "little more than three or four hours each way, for both ships and steamers." Mr. Grimley says that "the saving in the upward passage would be three and a half hours for a steamer and five for a sailing vessel; but a large vessel might be neaped and detained four or five days."

26. Although it appears from the report of the Port Officer, dated 5th May 1881 (appendix, page xlv), that only six vessels were actually neaped in the river during the last three years, it is well known that a large number of vessels might arrange to leave port earlier than they actually do, if they were not obliged to consider the water available in the river.

27. As a recent instance of the delays in the river may be mentioned the *Vega* drawing 23 feet 6 inches, which the Committee have ascertained left Calcutta on the morning of the 15th March 1882, and did not reach Saugor until the evening of the 17th.

28. Excepting coasting vessels, the Commitee consider that the saving of time may fairly be set down for the double passage at one day for a steamer and two for a sailing ship.

Risks at moorings in the river.

29. Vessels moored in an open river are exceptionally exposed to risk of injury; more or less serious, particularly in times of strong tides, bores, and freshets, being liable to collision with vessels which have broken from their moorings, and with other floating objects. During cyclones immense damage is done; the great cyclone in the Hooghly (1864), it is said, costing the P. & O. Company alone upwards of £100,000.

30. Vessels in any ordinary dock are exempt from many of these risks, and the Committee believe that in the docks, as designed by the Special Engineer, they will be secure also from the effects of a cyclone wave, even higher than that of 1864.

Cost of risks and delays.

31. It is difficult to fix at a money value the saving which would be effected by eliminating the various risks and delays inseparable from the passage from Diamond Harbour to Calcutta and *vice versâ*, although there can be no doubt that it does represent an appreciable amount either to the merchant, ship-owner, or insurance company, and probably more or less to each of them. Perhaps it will be the simplest way to assume that all the expenses of the voyage are to be paid directly or indirectly by "cargo," and that the direct interest of each individual engaged in the transport of the cargo from the one point to the other will arrange itself by the ordinary course of competition.

32. The replies which the Committee have received to questions on this subject do not give the complete information which we could have wished to obtain, but the size and value of the vessels and the requirements of the different trades all vary so greatly that it is perhaps difficult to see how it could well be otherwise.

33. The value of the one day and the reduced distance gained, in the case of a steamer of 3,000 gross register, and carrying 3,700 tons of cargo, appears to be fairly represented as follows :—

	Rs.
One day's internal expenses	200
Eighteen tons of coal, say	324
Pilotage saved (having paid $\frac{8}{16}$ths up and $\frac{7}{16}$ths down) ...	411
One day's insurance, depreciation, and interest on capital, say 22 per cent on £50,000	360
Total ...	1,295
Add in the case of a passenger vessel one day's victualling, say £20	240
Grand Total ...	1,535

34. The value of the two days and the reduced distance in the case of a sailing ship of 1,600 tons register and carrying 2,400 tons of cargo may be safely stated as follows :—

	Rs.
Two days' expenses	160
Pilotage saved (as above)	372
Towage up and down	1,200
Two days' insurance, depreciation and interest on capital, say 20 per cent. on £23,000	302
	2,034

35. In addition to the towage between Diamond Harbour and Calcutta, a sailing vessel will frequently save also the cost of towage from the sea to Diamond Harbour. Mr. Milner says that "all sailing ships up to 20 feet would endeavour to sail up to Diamond Harbour if that were their destination, and even ships over that draught, if not prohibited by the regulations." And, again, "these ships at present would sail up to Diamoud Harbour were it not for the knowledge that they would have to pay nearly as much from there as from Saugor. Saving of towage to the *Cuba*, *Simla* class both ways probably Rs. 3,000 to Rs. 3,500." These are, however, exceptional vessels, but it appears very clear that the greater part of the money now paid for towage might be saved, if a sailing vessel could terminate her voyage at Diamond Harbour.

36. It appears to be generally conceded that there would be no appreciable reduction in the rate of insurance on ships frequenting the dock, but if the voyage were shorter, the risk would of course be reduced by one or two days as the case might be.

Size of vessels frequenting the port.

37. The annual returns of the Port Officer for 1880-81, extracts from which with diagrams are given in the appendix, pages xlv to xlviii, shew that the size of both ships and steamers frequenting the port is steadily increasing, and we have not to look far for the reason. The big ships pay best. Captain Wilkinson says "it has been sufficiently proved to the satisfaction of all ship-owners that the larger a ship is built, with reference to the trade she is employed in, the greater will be the profits in proportion to the capital expended." Messrs. Apcar & Co. say "the tendency is to increase the size of steamers owing to the less proportionate expenses of a larger vessel."

38. There appears to be a very general agreement amongst nautical men that some of the vessels which now come to Calcutta have in point of length about reached the maximum which can be safely navigated above Diamond Harbour. Below that point it is practically conceded that there need be no limit to length. Long vessels are not perhaps, strictly speaking, more *difficult* to steer than shorter ones, but they require both more space and more time to turn through a given curve. For steamers up to Calcutta 400 feet in length is considered a reasonable limit by Captain Wilkinson, Captain Thompson, Mr. Daly, Mr. Elson, and Captain Yates. Mr. Milner goes further and says 450 feet, and as a matter of fact vessels 420 feet long have come to Calcutta. Messrs. Jardine, Skinner & Co. call attention to the steamers of the Hill line.

Their extreme length is 420 feet, but their twin-screws facilitate navigation. The rapid and certain action of steam-steering gear has done much to counteract the difficulty which would otherwise have been experienced with vessels of the present length, and it is possible that without it some of them could only have been brought to Calcutta with the assistance of a tug-boat. It may be mentioned that the *Rome*, one of the last new vessels of the P. & O. Company's fleet, is 430 feet long. It must, however, be borne in mind that some reaction is manifesting itself in ship-building against extreme length. A tendency is being shewn to increased beam, and so far as this may go it will enable ships to carry more cargo without increasing either length or depth.

39. For sailing vessels, from 250 feet to 300 feet appears to be generally allowed to be the greatest length which can without risk be taken above Diamond Harbour.

Facilities within the port.

40. Till within the last 12 years there were no jetties, wharves, warehouses or appliances available generally for loading and unloading vessels in the port of Calcutta. Vessels were moored in the river and cargoes were discharged and taken in by means of cargo boats. The Port Trust was established in 1870, and since then great facilities have been provided by the construction of jetties supplied with suitable goods sheds, hydraulic and steam cranes, and a line of tramway in rear of the jetties connected with the Eastern Bengal Railway. There are now eight of these jetties, and the following statement extracted from the annual report of the Port Trust shews the extent to which they have been annually utilized since their first construction :—

PERIOD.	No. of jetties.	No. of vessels accommodated.	Registered net tonnage.	Total number of days occupied at all jetties.	Total amount contributed by vessels for use of jetties.	Average tonnage of vessels.	Average length of stay at jetties.	Average number of days each jetty was at work throughout the year.	Average amount paid by each vessel for use of jetty.	Total jetty receipts for imports and exports.	Average per vessel.

These jetties and their appliances for loading and unloading are all of the latest approved types of construction, and admirable in all respects. If there were room in the port for extending them from time to time to meet the growing trade, it seems probable that such a course would be adopted in preference to taking up new ground for docks at a distance from Calcutta, and that merchants would be content to trust, at all events till the growing size of vessels exceeded the draft available in the river, to the acknowledged skill of the Pilot Service to overcome the dangers of the navigation of the Hooghly. But the jetty accommodation is not really sufficient even for the existing trade of the port, and the evidence we have collected shews that, although room might be found for some extension, yet it is very doubtful whether the space available in port could be made adequate at any reasonable cost to meet the increased trade that will be brought to Calcutta by the opening of the railway bridge over the Hooghly and the extension of railways in Bengal. On this subject we would refer to Mr. W. Duff Bruce's letter at page xlix of the appendix, than whom there is no more competent authority on any matters connected with the port of Calcutta. In this letter Mr. Bruce, after describing the extent of increase that is possible to the present jetties, proceeds to develope a scheme of docks at Chitpore connected by a ship canal with the Mutlah river. This scheme, with other proposals, will be referred to further on. But in this place the Committee wish merely to describe the nature of the appliances for loading and unloading cargo which are available in the port. The table given above shews that 193

vessels, with a net tonnage of 324,187 tons were accommodated at the jetties in 1880-81. Comparing this with the total number of vessels with their net tonnage that entered the port in the same year, we see that 791 vessels, with a net tonnage of 891,350 tons, did not or could not make use of the jetties, and must therefore have discharged and taken in cargo by means of cargo boats. Of these cargo boats there were 5,548 in the port in 1880-81. As to their charges and the extent of reliance that can be placed on them, we will here quote from Messrs. Hoare, Miller & Co.'s letter at page lv—

"Amidst the many advantages which the jetties have conferred on the trade generally, but chiefly on import trade, there has been this disadvantage, that they have interfered with the boat-owner's business. The jetties have disorganized the private discharging and loading arrangements of the port without having so far furnished a complete or perfect substitute.

"For practical purposes the jetties are sufficient for the import trade. Almost all the vessels which enter from the United Kingdom with general cargoes can be discharged rapidly at the jetties, and, even in time of extra demand for space, steamers can load their export as rapidly as they discharge their import cargo; but this only refers to general or 'Calcutta assorted' cargoes. It does not include whole cargoes outwards.

"The export cargo from Calcutta is bulkier than the import cargo. With very few exceptions every vessel that clears from Calcutta clears full. On the contrary many vessels, notably steamers, enter in ballast. Now, it seems to us that the arrangements of the port stand as if just the contrary were the case: vessels can discharge quickly, and we think cheaply, whereas for loading they mainly depend on cargo boats.

"During periods of excitement in exports, such as periodically occur, the cost of putting cargo on board vessels at moorings often becoms enormous. We have known the hire of cargo boats of 25 tons capacity, which is normally Rs. 6 per day per boat, advance to Rs. 120, and remain at from Rs. 40 to Rs. 60 for weeks together. This is as if the jetties were in times of pressure to raise their rates at will from 400 per cent. to 600 per cent. The export trade is not a steady trade. Periods of excitement occur chiefly in the bulky staples."

41. It will be evident from this that it is impossible to make any reliable estimate of the cost of loading and unloading vessels which are dependent on cargo boats; and, as has just been explained, by far the larger number of vessels are thus dependent. But the jetty charges are known, and may be included in the estimate which we now proceed to make of the present cost of bringing ships into port, unloading and loading and taking them out to sea again, compared with the like charges in the case of ships putting into docks at Diamond Harbour. It is necessary in the first place to ascertain what will be the working expenses of the dock in addition to interest on capital, and the lowest remunerative charge to be made against each ship.

Cost of bringing ships to port.

Annual charge on Dock.

	Rs.	Rs.
Interest on estimated cost, including establishment, 150 lakhs, at 4 per cent.		6,00,000
Staff—		
Dock Master	15,000	
Two assistants	15,000	
Say 200 men (at Rs. 20 per month)	48,000	
European mechanic in charge of machinery ..	6,000	
Proportion of general staff, say	12,000	
		96,000
Dredging	50,000	
Electric lighting	12,000	
Repairs, average, say	25,000	
Coal	12,000	
		99,000
		7,95,000
Deduct rent of sites let for workshops, houses, &c. ..		45,000
Net annual charge		7,50,000

Estimate of Revenue.

Vessels in dock at one time.	Vessels per annum.	Tons per annum.
Say 6 steamers (2,600 average tonnage), each remaining in dock *two* weeks or less	156	405,600
Say 36 sailing ships (1,350 average tonnage), each remaining in dock *six* weeks or less	312	421,200
Total vessels ..	468	
Total tons ..		826,800

$\frac{\text{Revenue required Rs. } 7,50,000}{\text{Total vessels } 468}$ = about Rs. 1,600 per vessel (average), or $\frac{\text{Rs. } 7,50,000}{\text{Tons } 830,850}$ = about 14½ annas per register ton, or approximately 5 annas per ton of cargo inwards and 5 annas per ton of cargo outwards. These charges are intended as an average to cover all dock dues, wharfage, landing charges, &c., and would be apportioned under different heads, but they would not include crane-hire or warehouse rent.

42. Cost of bringing to Calcutta a steamer of 2,000 tons net, 3,000 tons gross register, carrying 3,700 tons of cargo, and drawing 22 feet of water in and 24 feet out—

		924	
			3,895
Difference in favour of docks			2,479

46. In making these calculations, we have been careful to place the most moderate estimate on the saving that will result from terminating the voyage at Diamond Harbour, and what error there may be in the figures is, we are confident, on the side of safety. The calculations shew that a steamer will save Rs. 520, and a sailing ship Rs. 2,479 by the mere shortening of the voyage. We have entered the same charge for stevedorage for vessels loading at the docks as for those coming up to Calcutta, and we have done this because we are unable to make any precise estimate of the saving that will certainly result when vessels are loaded in a well-organized dock. The table on page 12 shews that the revenue derived from 193 vessels that used the jetties amounted in 1880-81 to Rs. 7,14,189, which gives an average for each vessel of Rs. 3,700. Of this amount only Rs. 382 was for the use of the jetty itself, the remainder being charges on cargo for landing, hoisting, and removal of goods. The detail

of the income and expenditure of the jetties for 1880-81 is given as follows in the Port Commissioners' administration report:—

	1880-81. Rs.
INCOME.	
Imports—	
Landing charges	4,24,062
Removal charges and warehouse rent	1,11,604
Jetty hire	73,763
Hoisting charges	35,196
Damages	298
Overtime	2 406
Miscellaneous	5,362
Commissariat jetty hire	6,158
Total ..	6,58,849
Exports	55,340
Miscellaneous—	
Interest on Government securities for Jetty Reserve Fund ..	2,497
Ditto on ditto of Insurance Fund ..	1,476
Ditto temporary loan to Part IV	....
Miscellaneous receipts	2,407
Towing receipts of barges	2,048
Sale of silk damaged at the jetty	....
Rent of new office	2,283
Total ..	7,24,900
EXPENDITURE.	Rs.
Salaries	1,57,169
Proportion of salaries—Control	40,837
Ditto ditto— Dredger	10,033
Ditto ditto— Engineering	3,537
Proportion of municipal taxes and repairs of officers' quarters	969
Ditto ditto ditto of storeyard, workshop, and lascars' quarters..	989
Interest	1,16,645
Repairs	36,579
Working expenses	73,179
Municipal taxes	31,984
Total ..	4,71,921
Net revenue ..	2.52,979
GRAND TOTAL ..	7,24,900

47. It will be seen from this statement that the income amounted to Rs. 7,24,900, the expenditure to Rs. 4,71,021, and the net revenue to Rs. 2,52,979. The circumstances of the Port Trust necessitate the laying aside of a sinking fund for the repayment of the loans received from Government, and the realization of sufficient revenue to cover the cost of part of the new works still being carried out for the improvement of the port. In the case of the docks, it may be assumed that all construction will be charged to Capital, and that the charges levied on ships will be based on a scale only sufficient to yield a reasonable interest. Again, in the port there is a heavy expenditure under the head of Municipal Taxes, the amount shewn in the table given above being about Rs. 33,000. This expenditure would be unnecessary at Diamond Harbour. We think there can be no doubt that the business of loading and unloading, moving and warehousing goods will be conducted on a much more economical scale in docks specially arranged and organized for that purpose than is possible under present circumstances. Such comparison as we have made is only with vessels that use the jetties. The much larger number that discharge into cargo boats and suffer delays and inconveniences of which we can form no estimate have not been brought into the comparison at all. The figures shew that sailing ships will be the chief gainers by using docks at Diamond Harbour, in the mere initial saving that will result from the shorten-

ing of the voyage. But they will be still greater gainers by the saving of time in being able to discharge their cargoes into the dock warehouses at once, and take in export cargo with similar rapidity.

Objections to distance of Diamond Harbour considered.

48. We proceed now to consider the question of the distance that separates Diamond Harbour from Calcutta, and it is in connection with the effect which this distance will have on the success of the scheme that the greatest diversity of opinion exists. It is necessary to consider this question in two aspects—(1) with reference to the cost of transit for the extra distance over which goods will have to pass; and (2) with reference to the inconvenience entailed by the separation of the shipping from the mercantile offices in Calcutta.

49. As regards the first point, we believe that no appreciable increase of cost in transit will occur. The docks at Diamond Harbour would be specially useful for the export trade, and we have every reason to believe that goods from up-country would be delivered by rail at the docks at through rates, which would be very little, if at all, higher for Diamond Harbour than they would be for Calcutta. For any classes of goods which could be thus transported direct to the docks without the necessity of detention and examination in Calcutta, there would be an immense gain, for they would be delivered from the railway wagons into the ship's hold, and all intermediate charges now incurred in the handling and conveying of goods, first from the railway to the warehouse, and again from the warehouse to the ship's side, would be saved. And again as regards the transit of goods from Calcutta itself or its neighbourhood to Diamond Harbour, for which a charge would necessarily have to be made, we believe that (under such a system as is described in the next succeeding paragraph) that charge would not be greater, and that it would probably be less than the expense now actually incurred in moving goods by the very imperfect means of transport afforded by country carts and boats from the merchant's godown to the ship's side. It cannot be doubted that the Railway administration in connection with the docks would make such arrangements as would afford the greatest possible facility for the collection, despatch, and delivery of goods, and that the saving thus effected would constitute a substantial percentage on the value of export produce.

50. Proceeding to the consideration of the question of the inconvenience of Diamond Harbour, if we assume the existence of docks at that place, it appears to us to follow naturally that it would be to the interest of the proprietors of the docks and of the railway to afford every facility to trade. Sooner or later the docks and the railway would be under the same administration, and then undoubtedly a complete agency would be established for the receipt and delivery of goods. Suitable premises and warehouses would most certainly be provided at one or both ends of the railway, *i.e.* at Calcutta and at the docks, where all such operations as examining, cleaning, sorting, packing, and marking could be executed at a comparatively small charge, and at much greater convenience to the merchant. As evidence of the probability of this view being realized, we would refer to the fact that the Port Commissioners have proposed to build a tea warehouse within the jetty premises which will be available for the storage, sampling, sale, and shipment of tea. We would also refer to the recommendations of the Committee lately appointed to discuss the question of a central railway station in Calcutta. We understand that they proposed the erection of a goods depôt at Haisee Bagan alongside the Circular canals, connected with the trunk lines of railway and with the Port Trust and Diamond Harbour Railways. The area proposed to be acquired for the central depôt is 189 acres, with a frontage of 8,250 feet on the canal. It would thus be in direct communication with Diamond Harbour both by rail and by canal, if, as we recommend at the conclusion of this report, the canal be extended to meet the docks.

Mr. Bruce's scheme considered.

51. Before we proceed to express our opinion of the Diamond Harbour scheme generally, we think it desirable to review as briefly as possible the alternative scheme which has been recommended by Mr. W. Duff Bruce, the Vice-Chairman of the Port Commissioners, now absent on leave. The Mutlah ship canal scheme, as now brought forward by him (appendix, page xlix*), deserves careful consideration, for if it, or some modification of it, could be conveniently carried out, and at a reasonable cost, it appears to be capable of providing trading facilities equal to

* Page 305.

any which may be expected from docks at Diamond Harbour. We recognise Mr. Bruce's difficulties in being at a distance, and can only regret that he has not been able to go more fully into the details of the project, for in attempting to consider the matter, however superficially, we are obliged to assume many important particulars which are not even alluded to by him.

52. The chief features in this scheme are—

(1) To remove the Howrah bridge to the north of the Neemtollah ghat.

(2) To dredge a ship canal from Chitpore to a point about six miles below Port Canning on the Mutlah river. The canal to have generally the section of the Suez Canal, and to be deep enough for vessels of from 23 to 25 feet draught of water.

(3) To construct a lock at the junction with the Mutlah.

(4 To construct a dock near Sealdah, apparently about the size of that suggested for Diamond Harbour.

(5) To connect the canal with the existing canals around Calcutta, and

(6) To make a "cut" from the dock to the Hooghly river.

Certain other details appear to follow as a matter of course, such as—

(7) The construction of a lock somewhere between the dock and the Hooghly.

(8) The construction of opening bridges at two places where railways, and at least two other places where main roads, must cross the canal.

(9) The provision of ferries at suitable places along the length of the canal; and

(10) The closing of the Pialee river and other water-courses in the line of the canal.

53. In attempting a rough estimate of the whole of the suggested works, we have assumed that the level of the water in the dock and canal is to be maintained by means of the locks at the same level as that in the present Circular canal, with which it is to be connected, viz. about six feet above mean sea level, or at about four feet below the ordinary level of the ground. We have assumed the latter to be about the same as at Diamond Harbour, and that the sections of the canal will be similar to that of the Suez Canal, viz. 72 feet wide at the bottom, with sides sloping 2½ to 1. The amount of material to be excavated or dredged to form the canal and "cut" will amount to about 6,500 lakhs of cubic feet. We accept Mr. Bruce's estimate (£750,000 or about Rs. 14 per thousand feet) as being approximately correct for this portion of the work, though whether it be sufficient or not must depend a good deal on the distance to which the spoil may have to be carried.

So far as we are in a position to estimate from the data at our command, the total cost of the suggested works, exclusive of the purchase of the land, would probably be about as follows:—

	Lakhs.	Lakhs.
Dredging canal and cut (£750,000)	90	
Removal and lengthening of bridge and provision of new approaches, say	6	
Lock at Mutlah	14	
Well foundation for ditto	11	
Dock	32	
Lock at Hooghly	14	
Wells, foundation for ditto	11	
Pitching slopes of canal	15	
Four opening bridges, each with 80 feet clear water passage, including cylinder foundation and piers, girder approaches over the inclined sides of the canal, and all machinery, &c., say, average 5 lakhs each	20	
Diversion of railways and roads during construction of bridges, say	2	
Ferries, say	0·5	
		215·5
Contingencies, say 10 per cent. ..		21·5
Assumed total for a draught of 25 feet exclusive of land ..		237

54 Admitting for a moment the scheme to be feasible on financial and other grounds, there are two points in which, in our opinion, certain modifications would be necessary, both tending to increase the cost of the undertaking. We consider that, by limiting the canal to the use of vessels not exceeding 25 feet draught of water, its utility would be to a great extent neutralized, seeing that we have it in evidence that vessels drawing 26 feet have lately come to Calcutta. Looking to future requirements, and making allowance for a certain deposit of silt, the canal at the outset should not be less than 28 feet deep. We also consider that, to guard against the possibility of the larger vessels being either imprisoned in or cut off from Calcutta in the event of repairs to the gates, &c., the locks, or at least that at the Mutlah end of the canal, should be in duplicate. These additions bring up the estimate to—

	Lakhs. Rs.	Lakhs. Rs.
Dredging as before	90	
Add for extra depth	13	
	—	103
Removal of bridge as before	..	6
Lock at the Mutlah	14	
Duplicate	14	
	—	28
Wells for lock	11	
Do. for duplicate	11	
	—	22
Pitching slopes of canal		15
Dock (3 feet deeper)		37
Lock at the Hooghly		14
Wells for ditto		11
Bridges as before		20
Diversion of lines, &c., as before		2
Ferries		0 5
		258·5
Contingencies 10 per cent.		25·5
Assumed total for a draught 28 feet, exclusive of land ..		284

55. In estimating the outlay on works situated to a great extent in or near Calcutta, the cost of the land becomes an important item. The dock and appurtenances will probably occupy about 120 acres in a position where property is already of considerable value. About 800 acres will be required for the canal and slopes, and of this the cut to the Hooghly and a portion of the Calcutta end of the canal also pass through comparatively valuable property. Should it be intended to deposit any considerable portion of the spoil from the canal on the banks, it will be necessary, allowing for a safe berm, to take up about 4,000 acres. We fail to see any suitable place of deposit for the spoil from the dock and the Hooghly cut, without carrying it some distance, as for instance to the Salt Water Lakes.

The value of the land which would have to be taken up for the canal and dock, exclusive of any extra space for spoil banks, we estimate at not less than 45 lakhs, bringing up the assumed total cost of the whole scheme to 329 lakhs.

56. With respect to the advantages of the present "warehouses, water-supply, gas, and drainage," there can be no doubt that its proximity to a supply of good *water* gives this scheme an advantage over that at Diamond Harbour, the estimates for which are charged with 5½ lakhs for this item alone; but we attach little importance to the other points alluded to. The existing *warehouses* could be of little use to a dock two or three miles away, except at a considerable cost for transport. *Gas* would probably not be required at Diamond Harbour, as it is intended that the dock should be lighted by electricity as is now done at the Albert Dock on the Thames. And with respect to the *drainage*, seeing that the existing city drainage will necessarily be interfered with and have to be diverted more or less in carrying out the Mutlah scheme, it is probable that under this head the Diamond Harbour scheme will come out best.

57. Apart from the cost of Mr. Bruce's scheme, there are local and other objections which we think should have some weight—

(1) The removal of the Hooghly bridge from its present site. Although on the completion of the East Indian Railway bridge, the purely railway traffic will be almost eliminated, the communities situated on the two sides of the river would be greatly inconvenienced if the present means of communication should be interfered with. This is altogether contrary to the general tendency at the present time, which is for riverside towns to afford every facility for rapid communication between the two banks of the river, and to bring them into the closest relationship.

(2) The partial severance of the roads and railways towards the north of the city, at present its most important outlet.

(3) Our colleague, Mr. Levinge, is of opinion that the channels of the Mutlah will deteriorate, when the Salt Lakes, which at present encourage the tidal flow, are reclaimed,—a work which is now in contemplation, and must ere long be carried out.

(4) As a minor matter, very great difficulty was experienced in closing a bend of the Pialee river cut off by the construction of the Calcutta and South-Eastern Railway bridge.

We believe that some of these objections might be overcome by fixing the site of the proposed Hooghly entrance at Garden Reach instead of at Chitpore, and the professional members of the Committee are of opinion that any ship canal to the Mutlah should be at a high level as suggested by Mr. Dejoux, and be filled with water from the Hooghly only, pumped as required from suitable settling tanks.

58. We now proceed to apply the facts, opinions, and calculations embodied in the foregoing paragraphs to the consideration of the specific questions on which we have been directed to report, and we think that this will most conveniently be done under the three following heads:—

1. Whether it is desirable that wet docks should be constructed in the Hooghly.
2. Whether Diamond Harbour is the best locality for such docks.
3. Whether docks at Diamond Harbour would be financially successful.

59. We have shewn that the want of improved accommodation in the port of Calcutta has been the subject of discussion for upwards of fifty years; that the trade of the port has been increasing rapidly, especially of late years, since the opening of the Suez Canal; that the total tonnage of sailing vessels visiting the port remains much the same, whilst that of steam vessels has increased considerably, and that the tendency is to build both ships and steamers of a larger size, the navigation of which in such a river as the Hooghly is more hazardous, and the loss of which involves the loss of much capital; that the navigation of the Hooghly and the detention of vessels in the open river while in port presents dangers of a very appreciable kind, the avoidance of which is much to be desired; that the improvements effected by the Port Trust since its creation in 1870 have to a considerable extent met the demands of the growing trade up to the present time; that there is not room within the present limits of the port for much further expansion of those improvements; and that it may be anticipated with certainty that when the railway bridge at Hooghly is completed, and the railway systems of Bengal, which are now in progress, are further developed, the need for improved and extended accommodation in the port will become most urgent.

60. On the whole therefore we are of opinion that the first question may safely be answered in the affirmative. We pass to the second question, whether Diamond Harbour is the best situation for the docks.

61. Docks at Diamond Harbour would have three principal advantages: they would enable vessels to escape the intricate and dangerous navigation of the upper reaches; they would effect a saving of time, coal, pilotage, and towage, the money value of which alone would be sufficient to cover the dues payable for the use of the docks; and they could be constructed and maintained at much less cost than docks constructed at Calcutta. These advantages are so important that we think it necessary to dwell upon them.

62. If docks were constructed at Calcutta with an approach only from the Hooghly as at present, it would be found (1) that the dangers of the

navigation of the river would remain as formidable as ever; (2) that there would be less saving to compensate for the cost of using the docks; (3) that the cost of constructing the docks would be very largely increased by the higher price of the land, and by the much more expensive approaches by rail or road leading through populated suburbs, and therefore requiring numerous expensive crossings; (4) that the dues payable for the use of the docks would consequently be much higher; and (5) that their use would be a tax upon trade to a certain extent. If, on the other hand, the dangers of the Hooghly be considered sufficiently formidable to warrant their avoidance by means of the project for a ship canal to the Mutlah, all the disadvantages just enumerated, not even excepting the first, would be intensified; for it is not too much to assume that if, to use Mr. Bruce's expression, we have a second string to our bow, and the approach to the port is affected by two different channels, each of which will require its staff of pilots and tugs, its buoys and lights, the revenue available to maintain the efficiency of these will be spread over a much larger field, and therefore produce less satisfactory results. It is not the object of the Diamond Harbour scheme, nor is it claimed for any scheme that has been brought to our notice, that it should monopolise the trade of the port. The object is merely to supplement the existing conveniences and appliances of the port by providing docks which some of the shipping will find it convenient to use. It appears to us that this object will be best secured by placing the docks on the Hooghly, but at some point sufficiently low down the river to make the shortening of the voyage a tangible saving. In this way the same pilots, the same tugs, the same light-ships, the same buoys, and the same river administration will continue to serve the whole of the shipping. But a scheme like the ship canal to the Mutlah can hardly be considered as merely supplementing the facilities of the port. To be successful financially it must become the port itself to the exclusion of the Hooghly and everything belonging to it. It must have a monopoly of the trade, and on these terms we think its success could not be secured, and that if secured it would ruin the existing property of the Port Trust. This is a risk that is entirely avoided by the Diamond Harbour scheme.

63. On the other hand, our enquiries have shewn us the existence of a strong, though not universal, feeling among the mercantile community that the transfer of a part of the business of the port to Diamond Harbour, or to any similar locality, would be attended with much inconvenience and expense. It would be necessary, it is urged, to keep up double establishments, and to rent a double set of warehouses: matters of importance will either have to be settled by subordinates, who will be unfit to deal with them, or will have to be delayed for the decision of a principal, who will be forty or fifty miles away. The value of the property of the Port Commissioners and of the owners of godowns in Calcutta will be seriously depreciated. The example of Port Canning is sufficient to shew the danger of attempting to divert trade into new channels.

64. While we are not insensible to the force of these arguments, we are not prepared to accept them as conclusive objections to the scheme of constructing new docks. The course of business will accommodate itself in Calcutta, as it has done elsewhere, to the modified conditions which circumstances may render necessary. How it will probably do so we have already indicated in paragraph 50. We are not aware that the London merchants find any obstruction to their business in the fact that their vessels load and unload in docks at Blackwall or North Woolwich,* although almost all imports of produce, such as tea, &c., have to be examined on being landed by clerks or other professional examiners. We do not imagine that double establishments will be required, or that anything more will be necessary than the occasional deputation of a clerk on a railway journey of one or two hours. There is not, in our opinion, the smallest ground for apprehending that the establishment of the docks will have an injurious effect on the value of the property of the Port Commissioners, or of private owners of warehouses. We see nothing extravagant in the supposition that, at the end of another decade of years, the tonnage of the Hooghly may be double what it is at present. There

* Docks are projected still further down at Daggenham and at Purfleet (opposite Gravesend).

will be ample work for all to do, and the new docks will merely provide an outlet for traffic which would otherwise be turned away from Calcutta for want of space. The failure of Port Canning merely shews that trade will not move into new channels without sufficient inducement to do so. It affords no argument against the success of a scheme which offers substantial advantages.

65. The location of the railway terminus at Diamond Harbour indicates that place as the natural position for the docks. But independently of this consideration, there is much to recommend the locality for the purpose. A dock much higher up the river would not save vessels from the dangerous part of the navigation: a dock much lower down would be too far from Calcutta to be convenient. Off Diamond Harbour there is good anchorage and sufficient space for about 30 vessels to moor without interfering with the fairway for navigation. A part of the land which would be required for the docks is already the property of Government, and the remainner could be acquired at comparatively little cost. Finally, Diamond Harbour is already a recognized place of call for ships, especially on the outward voyage.

66. At the same time there are considerations on the other side which should not be overlooked. Diamond Harbour is believed to be unhealthy: the supply of drinking water is bad; the subsoil, although perhaps not worse than in other parts of the delta of the Ganges, does not readily admit of the excavation of docks; the tides are at times so strong that vessels might sometimes have to wait until comparatively slack water before entering the dock, and there is the serious objection that the entrance to the docks would be on a lee shore during the south-west monsoon.

67. We can hardly hope to find a locality free from all drawbacks, and we are not disposed to think that these objections need interfere with the selection of Diamond Harbour as the site for the docks. The alleged unhealthiness of the place will probably disappear when the ground is drained and occupied. A supply of good drinking-water can be secured, partly by digging tanks for rain-water, and partly by laying a pipe from Calcutta, for which provision has been made in our estimate. The unfavourable character of the subsoil (supposing this to be borne out by further experiment) will add somewhat to the cost of the dock, but will not affect its stability. The tides are not stronger at Diamond Harbour than elsewhere in the river, and it may fairly be said that all the foregoing objections would probably apply as forcibly to any other place which might be selected for the docks as they would to the locality which we recommend The difficulty about the lee shore in the monsoon is of a different kind, and it has been strongly pressed upon us by gentlemen who have had many years' experience of the Hooghly. We desire, however, to invite attention to the following remarks recorded by our colleague Mr. Wawn:—

Since the last meeting of the Committee I have enquired more particularly into the reasons urged against the "lee shore," and I am satisfied that whilst some of the local nautical gentlemen appear to see no difficulty, others have, unintentionally, exaggerated the supposed dangers during the monsoon. Men who have spent the greater part of their lives in India have had few opportunities of observing the working of large wet-docks, and naturally revert to *graving* docks as the nearest example. Captain Taylor, I. N., in his letter dated Calcutta, the 8th March, suggests a Committee "including practical men, who have docked vessels either *here* or at Bombay Prince's Dock," and other gentlemen, whom I have since consulted, speak in similar terms. In arriving at a decision on the subject, the Committee should bear in mind that there is little analogy between a light vessel (with comparatively slight hold of the water, and presenting a great surface to the wind) being slowly warped into a graving dock very little larger than herself, and the same vessel steaming or being towed through a wide entrance into a large wet dock. In coming out of dock the conditions are still more favourable. I have no hesitation in saying that Diamond Harbour is not the place which I should choose for the entrance to a *graving* dock.

We are inclined to believe that the apprehensions which have been expressed are in some measure due to a want of practical acquaintance with the working of wet docks. Mr. Wawn has reminded us that, in former days, Diamond Harbour was the recognized port of Calcutta, large vessels seldom coming higher up the river; and he has also brought to our notice that at Sunderland the existence of a lee shore is not (unless under exceptional conditions of weather) found to be an obstacle to the docking and undocking of ships. It

would, we think, be advisable that careful observations of the weather at Diamond Harbour should be made during the approaching monsoon, but we do not consider that the fact that the dock entrance will be on a lee shore need prevent the provisional acceptance of the locality as the site of the docks.

68. If it should be found that these objections are valid as against the precise spot chosen for the docks, we are nevertheless of opinion that the scheme should be adhered to, and some other neighbouring spot free from these objections should be chosen. On this point we would draw attention to our colleague Mr. Wawn's letter at page v of the appendix,* pointing out the advantages of a site near Roychuck, 4½ miles higher up the river than Diamond Harbour Creek. He suggests that if this site should be found preferable, a very profitable river-side railway could be made to it, and connected to the existing Diamond Harbour Railway, thus affording a double means of access to the docks. The profits of these railways would, it is expected, add materially to the financial success of the docks.

69. With regard to the third question, whether docks at Diamond Harbour would be financially successful, we beg to refer to the figures given in paragraph 41 of this report. The calculation there made appears to justify the conclusion that, if the docks can be constructed and maintained at a cost representing an annual expenditure of seven and a half lakhs of rupees, the outlay would be recouped by the receipts from 468 vessels, at an average of Rs. 1,600 each. The figures also shew that, at this rate of payment, which is taken as equivalent to a charge of 14½ annas per register ton, there would be a considerable saving as compared with the present port charges, so as to afford a substantial inducement to vessels to avail themselves of the accommodation provided by the docks. We therefore think that there can be no doubt of the financial success of the undertaking, unless it can be shewn either (1) that the docks would cost more than the estimated sum, or (2) that they would not be used by so many as 468 vessels, or (3) that the saving to each vessel by the use of the docks would be less than our calculation shews it to be. On each of these points we desire to submit some further remarks for the consideration of Government.

70. We have assumed that the outlay upon the docks will not exceed seven and a half lakhs of rupees per annum. It will be observed that we have not taken into account two items—the cost of acquiring the land, and the accumulated interest during the period of construction. We have no data for estimating the former, and the latter will depend upon the activity with which the work of construction may be prosecuted. But the cost will not in either case be large, and our estimates have been framed upon so liberal a scale that we do not anticipate that these items will require any material addition to be made to the total.

71. We have calculated that the cost of the docks will be covered by 468 vessels at an average payment of Rs. 1,600 each. In the year 1880-81 we find that 506 steamers and 478 sailing vessels arrived at Calcutta against 442 steamers and 454 sailing vessels in the previous year. We have already remarked that we anticipate a large increase in the shipping of the port, and we expect that this increase will be stimulated by the recent reduction of the port dues to 1 anna per ton. But it will be seen that even if the number of vessels remained stationary, and only one-half of them used the docks, the number which we have assumed to be necessary would be more than attained. We think it probable that sailing vessels in particular will largely avail themselves of the advantages of the docks, as the benefits in their case are comparatively greater than in the case of steamers. It would not perhaps be an extravagant supposition to conjecture that by the time the docks are completed the number of sailing vessels alone which would enter them would be sufficient to furnish the receipts which we have assumed to be required. While, owing to its proximity to the Suez Canal, Bombay has a great advantage over Calcutta in the matter of steamer freights, the rates of freight between Calcutta and Bombay and England by sailing ships are much the same. Ship freights from England, however, are generally considerably lower than steamer freights, and any facilities tending to cheapen the port and give greater facilities to ships must therefore help to neutralize the geographical advantages possessed by Bombay.

* Page 300.

72. The saving to vessels by the use of the docks would probably (and especially in the case of sailing vessels) exceed the estimate which we have given. We have allowed Rs. 1,200 for towage up and down between the Sandheads and Diamond Harbour; but it is probable that many sailing vessels would dispense with the aid of steam at the Sandheads, and would only incur the charge for towage into and out of the docks and down to sea. On the other hand, it will be seen that we have not allowed for the railway charges between Diamond Harbour and Calcutta. It is difficult to estimate these, as they will probably not affect cargo (either export or import) which may merely be sent through Calcutta without being warehoused there. For example, the railway charge from Cawnpore to Diamond Harbour, or from Diamond Harbour to Cawnpore, may be expected to be the same as between Cawnpore and Calcutta. For goods warehoused in Calcutta, the railway charge between Calcutta and Diamond Harbour may be estimated at about one rupee per ton. We have retained the port hospital due, as it will be necessary to make provision at Diamond Harbour for the treatment of sick seamen, and it is reasonable that the shipping should pay for this charge.

73. The design and size of the docks are discussed in the letter of our colleague Mr. Wawn, which is printed at pages i to iv of the appendix* to this report. That letter and the drawings which accompany it give a complete description of the design, and we need not attempt any further description of it in this place. We agree with our colleague in thinking that the site marked F is preferable to the others, and that the dimensions of the docks should be those which he has recommended for adoption. It will be seen that the design provides effectual protection against a storm-wave, and that there will be sufficient space within the enclosure for warehouses and other necessary buildings. Provision is also made for a supply of drinking water and for drainage.

74. In addition to the cost of the dock itself, it will be necessary to provide for the construction of godowns, &c., from which a separate and remunerative revenue will be collected.

75. To furnish the whole dock we estimate the cost at—

	Rs.
Godowns, 120 feet wide, on each side of the dock (Rs. 2-8 per foot)	24,00,000
Say 5 miles of rails and sidings	1,72,500
Say 40 steam or hydraulic cranes	2,80,000
Total ..	28,52,500

It will be advisable to erect only a portion of these at first, and the remainder from time to time, in answer to the requirements of the traffic.

76. It will also be advisable to acquire and reserve the site of the docks as indicated by plan F, together with a certain portion of the river frontage and to let the ground out only on short leases. If appropriated to railway purposes no permanent structures should be built thereon. We further recommend that steps should be taken for the extension of the boat canal to Diamond Harbour.

* Pages 296—300.

DISSENT.

I REGRET to have to dissent from some of the views of my colleagues expressed in the report—

1st.—I do not consider that there is not room within the limits of the port for much further expansion of improvements, but agree with Mr. W. D. Bruce (*see* appendix, page xlix) that the present accommodation can be considerably increased. My enquiries lead me to believe that it is possible for the Port Commissioners to acquire land on both sides of the river from Garden Reach downward sufficient to double the accommodation of the port and provide sufficient warehouse and jetty room.

Paragraph 59.

2nd.—If docks were to be constructed at Diamond Harbour, and to prove as economical and attractive as indicated in the report, I am convinced that some of my colleagues would find that they had made a mistake in thinking that in favouring the Diamond Harbour scheme they had "entirely avoided" depreciating the value of the existing property of the Port Trust. It is claimed in paragraph 64 that the new docks will merely provide an outlet for traffic, which would otherwise "be turned away from Calcutta for want of space;" but I have no hesitation in saying that Diamond Harbour would fare very badly if it were wholly dependent for its income on vessels which could not find accommodation in Calcutta. It can only be a success if the time and charges which vessels will save by going there make it more profitable for them to use its docks than to proceed to Calcutta, and if more profitable to the extent of the figures shewn, then Calcutta will only get the traffic "turned away from" Diamond Harbour "for want of space." If docks at Diamond Harbour give the advantages indicated in the report, I take it that the accommodation will not remain stationary, but that the building of docks will be proceeded with to meet the demand, and to expect ship-owners to continue to send their vessels to Calcutta and to calculate at the same time that by stopping at Diamond Harbour they can save Rs. 500 to Rs. 2,500 per voyage is to expect ship-owners either not to believe in such calculations or to have no eye to economy, whereas any one who has had experience of them knows that they recognise as quickly as their neighbours that a penny saved is a penny gained. We cannot expect that the ships which now come to the port of Calcutta will always continue to come to it, and that the additional ones which the increased trade will attract will be sheltered exclusively in Diamond Harbour. If the new port is to be successful, it must be used by about 468 vessels at least, and if it hold out sufficient inducement to attract that number, whether from increased trade or from the present trade of Calcutta, as exampled in paragraph 71, it must, in my opinion, do much to lower the value of property in this city. Experience alone will shew whether shippers from home or other outports will pay as high freights and ship as readily to Diamond Harbour as to Calcutta, or whether exporters will pay as high freights and ship as readily from Diamond Harbour as from Calcutta. The concensus of opinion of merchants is against Diamond Harbour, and the calculation for ship-owners, if vessels earn higher freight by coming to Calcutta, will be whether the extra freight earned is a sufficient set-off against the saving the ship would have made by stopping at Diamond Harbour. It is possible that for some cargoes, both inwards and outwards, Diamond Harbour will have the pull, while for others Calcutta will be preferred; but I think one of two things will happen—Diamond Harbour will be a failure or Calcutta will be much injured. If the Port Commissioners, after the adoption of the Diamond Harbour scheme, if adopted, wish to raise another loan, I think they will probably find the views of the public unmistakeably expressed. That the docks, if constructed at Diamond Harbour, and the railway to them, should be under one administration, I grant, but would deprecate permitting any company to construct and work docks at Diamond Harbour. If docks are to be constructed there, or anywhere else, to serve Calcutta, they and the present port property must, in my opinion, be under one administration and worked together for the general good, so that in considering either the Diamond Harbour scheme or Mr. Bruce's scheme, the reduction of income in connection

Paragraphs 62-63.

Paragraph 69.

with the existing property of the Port Trust must be considered along with the probable income from the new scheme

Paragraph 64.

3. I do not think that in weighing the objections to the Diamond Harbour scheme, which Calcutta merchants have advanced on account of the inconvenience and expense of doing business at such a distance from Calcutta, the example of London merchants sending their clerks or professional examiners to vessels loading or unloading in docks at Blackwall or North Woolwich, as put forward in the report, is a happy one. Trains, steamers, and omnibuses run between London and these docks, distant 5 and 8¾ miles respectively, every few minutes, and it is easier and quicker to get to them from the city of London than it is to get to Garden Reach from the city of Calcutta. So many passengers travel that it pays to start trains often, and the speed is greater than here. It is calculated that Diamond Harbour will be reached by a railway journey of one to two hours, but I think we may safely say that it will rarely be accomplished under two hours or more, as we shall probably have mixed trains, partly goods and partly passengers, and many stoppages, so that one might get from London to Brighton and back by the fast expresses which run so often, in the time that it would take to get from Calcutta to Diamond Harbour, while Portsmouth, 75 miles from London, and Southampton, 77, can both be reached quicker and oftener per day than we are ever likely to reach Diamond Harbour if trains travel here as slowly as usual. The P. & O. Co. have found it profitable to give up Southampton, and run their vessels round a long coast to London. North Woolwich and Blackwall are actually parts of London, and docks were only constructed even at these short distances from the city because there was no room nearer. Gravesend, near which new docks are now to be made, is only 22 miles from London, and you can get there almost as quickly as from Calcutta to Barrackpore.

4. The memorandum furnished by Mr. Bradford Leslie and quoted in the report, shews an enormous increase in the railway tonnage in the past five years, and indicates, with good reason, an even greater increase in the next five; but an entire change will have to take place in the system of doing business before whole cargoes of grain, seeds, and other produce are bought up-country, assorted there by the shippers, and despatched right to the ship to be transferred at once from the railway wagons to the ship's hold Mr Morrison has entered into details as to how business is done at present, and it is unnecessary for me to do so, but I would call prominent attention to the fact that Messrs Ralli Brothers, who are the largest exporters from this country, state emphatically that "the proposed scheme far from affording any advantage, would tend to cause many inconveniences both to importers and shippers." They state that at present of the seeds and wheat exported 40 per cent. are not warehoused; but ask it to be noted that whatever quantity is exported direct from the Howrah railway station is subject to examination by the shippers in the presence of the sellers in order to ascertain condition, quality, weight, and refraction of the different parcels before shipment, and that such operation could not be effected satisfactorily at Diamond Harbour unless at the great expense of each shipper and seller keeping a separate establishment there.

Paragraph 47.

As stated by Mr. Morrison, "our exports are the produce of the soil, and scarcely two lots offered to the merchant are quite alike;" and all who have had experience in shipping produce from this country—a country for which a Cotton Frauds Act was drafted—know that vigilance is required before produce is shipped. If Diamond Harbour be made a shipping port, and have the success expected, the system of business pursued in this country cannot fail to make it a great emporium of trade, as well as a place of export; and I doubt if the saving in municipal taxes, calculated on, will be realized, while probably it will be found that the Calcutta Municipality will object to supply the filtered water, for the conveyance of which allowance is made in the estimate.

5. In conclusion, I have to say that I consider the dangers of the river above Diamond Harbour are somewhat magnified, while those below are not sufficiently allowed for. Of 26 wrecks in the river in the last 20 years we are told that only 10 have occurred above, while 16 have taken place below,

and professional opinions have been expressed that if ever the river closes to navigation, the closing is more likely to occur below than above Diamond Harbour. I would advocate, then, that before proceeding further with reference to Diamond Harbour, steps be taken to ascertain what further accommodation can really be provided for shipping by the erection of jetties and warehouses within the limits of the port of Calcutta, and what further land can be acquired on both sides of the river at Garden Reach and below it, suitable for jetties and wet docks, with its probable cost. That wet docks can be constructed at Diamond Harbour, and that they may, by their proximity to the sea, save the time of vessels as well as much expense in towage and pilotage, I believe; but I ask it to be considered whether, if a saving per vessel per voyage of between Rs. 500 and Rs 2,500 is to be effected by stopping at Diamond Harbour, ship-owners will sacrifice it and go to Calcutta. If they will not, how is Calcutta to remain uninjured; and if, on the other hand, such saving cannot be effected by stopping at Diamond Harbour, where will be the inducement to vessels to stop there, and what will warrant an outlay of a crore and a half of rupees in that new place?

CALCUTTA,
The 3rd May 1882.

J. J. J. KESWICK.

DISSENT.

I AGREE generally with Mr. Keswick in his conclusions, but I doubt how far the Port Commissioners of Calcutta could efficiently control docks 45 miles away; and I doubt also whether, having regard to the nature of our river, it would be prudent to spend large sums of money on docks or other such appliances having access to the sea only through the Hooghly.

I think it would become prudent to do this only when it had been decided to excavate a ship canal to the Mutlah, either at once or hereafter, as necessity might appear.

It follows that I am opposed to the construction of docks at Diamond Harbour, and particularly I am so for the following reasons:—

1. Because we cannot confidently say that the channels between Diamond Harbour and the sea will admit of the free passage of vessels of the latest type, much less of the probable type of the future.
2. Because safe entrance into, and egress from, the docks will, during a sensible portion of the year, be questionable.
3. Because docks at Diamond Harbour, if successful, would gravely prejudice Calcutta as a centre of trade, and probably ultimately destroy it as a port.
4. Because it is probable that the interests of Bengal at large can be effectually provided for, not only without impoverishing, but by means which must greatly enrich its capital.

I have fully dealt with these points in a letter to the President of the Committee, printed in the appendix* at pages vi to x.

I dissent entirely from paragraph 62. If the Mutlah scheme were found feasible, "(1)" the dangers of this river, "the Hooghly," would cease altogether to be formidable, because they would be avoided; "(2)" there would be, on everything landed and shipped, a saving at least equal to that which could be effected at Diamond Harbour; and on much of our imports and exports a greater saving, viz. greater by the charge for railway transit between Calcutta and Diamond Harbour, and by the costs and losses attendant upon extra handling of goods; "(5)" the "tax on trade," which the Mutlah scheme would impose, would be simply the price paid for a much larger benefit. The docks of the ship canal would be in the port and part of the port, and the "ruin" they might inflict on the existing property of the Trust (so far as it did not prove imaginary) would be the "ruin" which a capitalist inflicts on his old plant when he introduces into his own concern and for his own profit the most improved of modern machinery. I think the jetties would continue

* Pages 301—305.

to be used; but if not, the dock dues would amply maintain the Commissioners' income and their credit. How it can be said that stopping vessels 45 miles from Calcutta avoids the risk of ruining the property of the Calcutta Port Trust I am unable to understand!

Paragraph 57.—I feel much diffidence in approaching the objections to Mr. Bruce's scheme which have been raised by our professional colleagues; but I would say—

(1) That the cost of the ship canal system must be considered in the light of the advantages it will yield, and the general depreciation of property which it will obviate. I think, too, that no estimate of cost should be accepted until Mr. Duff Bruce had had an opportunity of explaining his views in greater detail, nor until a more deliberate estimate had been made of the cost of acquiring the necessary land.

(2) That the removal of the Hooghly bridge is no necessary part of the scheme.

(3) That the severance of the important outlets to the north of the city could obviously be avoided by cutting the canal from a point towards the southern end of the port.

(4) That if draining the Salt Lakes would spoil the Mutlah, it might be better to leave the Salt Lakes undrained.

Paragraph 50.—The scheme adverted to here, and which in paragraph 49 is relied upon as destined to effect great savings in cost of transit, viz. to construct in proximity to the Circular canal, and in communication with all the railways, a monster depôt or range of godowns, in which facilities should be provided for storing, examining, cleaning, sorting, packing, and marking, would no doubt prove of great benefit to Calcutta. But I do not think that any such arrangements would ultimately prevent our trade from leaving us; and if they failed to do this, much of the cost of the Calcutta depôt would be wasted. Moreover, as compared with the Mutlah canal scheme, the Hulsee Bagan godowns must necessarily leave upon trade a removable burden of at least Re. 1 per ton, viz. the cost of carriage to Diamond Harbour; and this, calculated upon the commerce of our port, would more than cover the difference between the annual income necessary to give a satisfactory return upon the capital required for the Diamond Harbour docks and the revenue necessary to give a like return upon the cost of completely carrying out the Mutlah project.

G. H. MORRISON.

OPINION OF MR. ROBERT STEEL.

I QUITE agree with the Committee that something must be done to accommodate the increased trade of the Port of Calcutta, which we must look for in the early future. The practical question at issue is whether this object can be best attained by the construction of docks at Diamond Harbour.

The alternative scheme, which was most prominently brought before the attention of the Committe, involved the construction of a dock in Calcutta itself, connected by a ship canal with the Mutlah, and also connected with the river Hooghly. I can offer no opinion as to the practicability of this scheme or its cost. Assuming, however, that the cost would be £3,000,000 as against £1,500,000 for the Diamond Harbour docks, I would consider the larger expenditure far preferable in every way. The canal from the Mutlah would evade the dangers of the Hooghly altogether; whereas the other scheme would not avoid the difficult navigation of the lower part of the Hooghly—the part where the channels are subject to the greatest disturbance, and where there seems to be the greatest fear of permanent deterioration.

At the same time, while expressing a decided preference for docks at Calcutta rather than at Diamond Harbour, I am of opinion that both schemes are premature, and that the means exist for providing for the accommodation of a trade, double in extent of that hitherto carried on, by improving the port of Calcutta itself. The first step in this direction should be the removal of the floating Hooghly Bridge to a point higher up the river. This bridge at

present strangles the port, and renders a large part of the river frontage comparatively valueless on account of the delays, dangers, and expense of bringing vessels through the bridge. The next step should be the utilization of the river bank below Chandpal Ghat. At present no use is made of this invaluable frontage, and Government has hitherto insisted that no scheme of port improvement shall be allowed to touch the frontage between Chandpal Ghat and Prinsep's Ghat. It appears to me that the time has now come for the removal of this restriction. The space in question should be made use of for the construction of jetties and for the loading of cargo boats. If this involves the removal of the Eden Gardens, the throwing back of the Strand Bank road, and even the removal of the Fort itself, still it appears to me the proper solution of the difficulty. The Fort has already been moved from the site of the Custom House to its present position, because it was in the way; and sooner or later it must for the same reason be moved again. Such value as it has consists in its capacity to prove a rallying ground in case of tumult, and a barrack for soldiers, rather than in any necessity for commanding the river approaches. Some time or other it may be desirable to construct a wet dock, either at Garden Reach or on the site of the present Fort.

I will not go over the detailed objections to the Diamond Harbour dock scheme which have been laid before the Committee. I will, however, state that, in my opinion, the scheme would not induce a large direct business between Diamond Harbour and up-country markets. Imports would continue to come to Calcutta and be distributed from thence. Exports would continue to come to Calcutta for assortment, packing, and sale. In my opinion any gain from saving of risk and expense by terminating a voyage at Diamond Harbour will be more than counterbalanced by the expense of railway carriage between Calcutta and Diamond Harbour. In expressing this opinion, I assume the correctness of the Committee's estimate of Re. 1 per ton for railway carriage. At the same time I believe that this estimate is quite inadequate, and I cannot think that the Committee have taken into consideration the great outlay which would be necessary for trebling the line of rails and providing in a suitable situation in Calcutta extensive godowns for receiving and delivering goods. If full use is to be made of such a dock as that specified for the Calcutta goods station would require to have almost as much accommodation as the East Indian Railway station at Howrah, and would involve very great expenditure.

In my opinion the proposed docks at Diamond Harbour would be unpopular on all hands, both with the owners of ships and also with shippers and importers of goods. As a ship-owner, I would not accept a lower rate of freight for a voyage terminated at Diamond Harbour if an expense of Re 1 per ton on the cargo for railway carriage was thrown on the ship. As an importer of goods, or an exporter of produce, I would by no means employ a ship or steamer terminating her voyage at Diamond Harbour, unless at a lower rate of freight than that charged by ships coming to Calcutta. The detailed reasons for these objections on the part of merchants to the employment of Diamond Harbour have been put before the Committee by others and need not be repeated. It follows from what I have said that in my opinion docks in Diamond Harbour would not be made use of until trade was reluctantly driven there by an absolute deficiency of accommodation at Calcutta.

The Committee was appointed to consider the Diamond Harbour scheme only, and had no instructions to examine alternative schemes in detail. In consequence the Committee has been unable to cover the ground absolutely necessary to give practical value to its report. The *real* question at issue involves the detailed examination of all the practicable alternatives—a task which, in the absence of instructions, the Committee could not attempt.

ROBERT STEEL.

No. 1, dated Calcutta, the 4th March 1882.

From—CHARLES WAWN, ESQ., M. INST., C.E.,
To—The President of the Committee on Docks at Diamond Harbour.

As a perliminary to the preparation of the general report of the Committee on Docks at Diamond Harbour, of which I have the honour to be a member, it appears to me desirable that I should recapitulate, in a letter to yourself, the various suggestions which I as the Special Engineer have at different times made to the Committee, and at the same time explain generally the special features of the designs which I have prepared.

GENERAL SCHEME OF THE DOCKS.

The general arrangement as shewn on the drawings is based on the supposition that although the dock as constructed at first may be comparatively small, it will shortly be found necessary to enlarge it, and, as the trade increases, eventually to supplement it by another. The space proposed to be enclosed provides for considerable extension of dock area and also for the construction of graving docks, which are certain sooner or later to follow. The locks and entrances have also been designed with these probabilities in view, although, at the same time I consider that duplicate entrances and gates are almost indispensable in any dock intended for first class shipping—the one affording a means of carrying on the traffic during repairs, and the other ensuring the safety of the shipping in the event of an accident preventing the closing of one of the gates.

I am decidedly of opinion that any dock constructed on the Hooghly would be a failure if it did not afford protection, not only from the ordinary dangers incidental to a tidal river but also from the much greater, though less frequent, effects of a cyclone wave. To meet this necessity, I propose to enclose the dock and appurtenances with an embankment or "bund" formed of the spoil from the excavation, and continued across the lock entrances where there must necessarily be a break, by gates of the same height opening outwards like those of a graving dock.

The most exact information which I have been able to obtain as to the height of the 1864 inundation is from a mark on one of the buildings at Diamond Harbour, which shews the maximum height of the water to have been about 13 feet above the general level of the ground. My suggestion is that the dock bund should be eight feet higher than this, and that for strength and general utility it should be not less than 30 feet wide at the top with slopes of at least 3 to 1. Such an embankment, 21 feet above high tide of ordinary springs may eventually come to be of use to carry a high level railway, should coals ever be shipped in the dock; or huts may be built on it, as sleeping places for the sailors during the hot weather.

In view of the increasing length of the vessels for which accommodation is to be provided, it is a matter of importance that the course into the dock should be as easy and as nearly straight as possible. Much valuable time at the best part of the tide is lost in warping even a short vessel into an awkwardly constructed dock. Further, where it is practicable to make dock walls straight, there is a certain economy in doing so; vessels of different lengths are berthed without loss of quay space, and moveable steam and hydraulic cranes traverse the whole length of the quay without interruption.

It is desirable that an outer or half tide basin should form part of any dock establishment at Diamond Harbour, where at certain seasons of the year the water begins to fall rapidly immediately after high tide. The basin as designed is of sufficient width to afford also a turning place for vessels too long to be turned in the dock.

As the district around Diamond Harbour has (or had) the reputation of being unhealthy during the rains, the surplus material from the excavation may, with advantage, be applied to raise a portion of the land near the river to about the level of the dock bund affording a secure and comparatively healthy site for dwelling-houses, Custom House, &c., and at the same time a place of refuge in case of a cyclone flood.

Notwithstanding the extension of the railway system, and the increased proportion of goods carried by rail, there will always remain a considerable trade both in distributing and collecting, to be carried on in the rivers by the native craft. If the Committee should recommend the construction of docks at Diamond Harbour, I think they ought to consider also by what means these small vessels are to be saved the dangerous passage between that place and Calcutta. I would suggest, for consideration, that a shallow canal, from Tolly's Nullah to Diamond Harbour Creek, could be made by the side of the existing road at comparatively little cost, a considerable portion of the suggested site having been already excavated to form the road embankment. A siding and small landing jetty at the point where the railway to Diamond Harbour crosses Tolly's Nullah would also be of service.

SITE.

The small scale drawings which accompany this letter shew the different sites which on various grounds suggested themselves after my first visit to Diamond Harbour, and after carefully weighing the advantages of each, I am of opinion that that marked F is on the whole the most suitable. The principal reasons which led me to this conclusion, and the comparative merits and demerits of the various sites, may be briefly stated.

Sites A, B, and C, utilize the creek either wholly or in part, with the saving of about *one-third* of the total excavation (and that the cheapest part) near the top in the case of A, and of about *one-fourth* in B and C. Owing to the bends in the creek, however, a dock

so constructed, particularly in the case of A, would be far from satisfactory, and in any case we should have the cost of providing another outlet for the drainage water now passing through the creek.

Beyond the saving in excavation, which in this instance does not exceed three or four lakhs of rupees, there would be nothing gained in dockizing the creek. It would be altogether different if, as is sometimes the case, it were already used as a commercial harbour, and provided with wharfs, godowns, &c., and required only a greater depth of water at low tide to convert it into a first class dock.

In designs A and B I should be apprehensive also of an unequal settlement of the masonry of the locks.

Against site D, which utilizes the creek as a tidal basin, and which would otherwise have been very suitable, is the cost of widening and deepening the channel in the creek, involving dredging to the amount of about 300,000 square yards; the cost of a bridge about 300 feet long, and the danger of the creek deviating from its present course to an extent sufficient to necessitate a considerable annual outlay in keeping open the approach. That the creek is liable to alterations of this kind is, I think, shewn by an examination of the old bunds.

The site shewn on drawing E suggested itself as a means of utilizing the railway and both the stations as designed without alteration. It is, however, open to objection in the want of a straight course through the basin, and in the comparatively narrow anchorage ground opposite the entrance.

Site F appears to possess the balance of advantages. The drainage of the country is not interfered with. The creek remains to be used for subsidiary purposes, *i.e.* as a tidal basin for the smaller craft, &c The entrance through the basin is nearly straight, and the anchorage good. The current from the creek will assist the dock sluices in keeping the entrance free from deposit, and should the creek at any time materially alter its course, the dock entrance is near enough to the river to be easily kept open. The railway station would be in a position on the bund convenient for the dock entrance, for the ferry, and for boats landing passengers from vessels in the river.

A certain amount of erosion of the Hooghly bank at Diamond Harbour was to be expected, and on comparing the oldest survey which can be found (30th June 1858) with that made last year, it appears that the bank on the west side of the entrance to the creek has suffered considerably, the old post-office building, which was then standing at a little distance from the bank, being now a heap of ruins below high water-mark. On the east side of the creek entrance, however, on which it is proposed to construct the dock, the loss has been comparatively small—as nearly as can be measured on the drawings, about 10 feet altogether, or less than half a foot per annum. Even should this rate of progress shew a tendency to increase, which is not unlikely, seeing that the protection of the opposite point has been to some extent reduced, many years must elapse, and probably other changes take place, before any question can arise as to the necessity for further protecting the dock works. The line of the river bank as it existed in 1858 is shewn on drawing No. 1.

During the south west monsoon the river bank at Diamond Harbour will be exposed to the full force of the wind, and present to a certain extent a lee shore. After consulting Mr. Yates, the Harbour Master, who has had many years' experience on the river as a pilot, it appeared to me that the difficulty would be sufficiently met by putting down buoys with screw moorings to check or steady the vessels whilst entering the locks during the monsoon months. Since that, however, Mr. Milner, another gentleman of experience as a pilot, says in his reply to the circular of the Committee that being to leeward in the monsoon, "it is a most unsuitable place for docking vessels." This is a question for a seaman rather than for an engineer, and not having had the opportunity of seeing the river during the monsoon I feel a difficulty about giving an opinion. I understand, however, that in the olden time the India men received and discharged cargoes here—presumably during the whole year—and that it was to all intents and purposes the port of Calcutta. The South Dock at Sunderland is successfully worked under what appear to be much worse conditions, for it is entered directly from the German Ocean, and except when a continued gale from the east raises a sea which would make it dangerous to vessels in the dock for the gates to be opened, no difficulty is experienced in entering or leaving the dock. Altogether, it is a point demanding careful consideration and the best nautical opinion we can get. If it should be made clear that the situation is *really* so rough and exposed as to make it unsafe for a vessel to enter a dock, I think we may dismiss at the same time any idea of jetties and coal wharfs, except on a small scale and as a temporary expedient to be used in fine weather only.

Foundations.

The trial wells and borings undertaken to ascertain the nature of the deposit at Diamond Harbour have been delayed through various causes, and I am only now in possession of any real information on the subject. The operations are not yet complete, but so far as they have gone, I regret to say that the favourable opinion entertained by several gentlemen of experience has not been altogether confirmed. The walls of the dock, and possibly those of the basin, may, I think, be got in dry, but the locks, and the passages from the basin to the dock, will have to be founded on brick walls, which should be carried to a depth sufficient to afford a support equal to two tons per square foot over the whole surface. Each

well, after being filled with concrete, should be individually tested with this load; but the weight should in no case be applied until all the wells in the immediate vicinity have been sunk.

Details.

In anticipation of the report of the Committee being favourable to the construction of a dock, I have prepared, in addition to the small scale drawings of the different sites, a series of drawings enumerated in the margin, showing generally the arrangement which I propose, and going to some extent into details of construction.

No. 1. Site of dock and sections.
,, 2. Locks and Sections.
,, 3. Entrance to dock and sections of walls.
Nos. 4, 5, 6. Gates.
No. 7. Diagram of tides.

"Datum," as in the case of the Diamond Harbour Railway, refers to *mean sea level.*

Accompanying the drawings is a diagram showing the highest and lowest tide in each month from 1872 to 1880, as recorded by the self-acting tide gauge at Diamond Harbour, and on which I have marked (arbitrarily of course) "H.T. rains," "H.T. dry season, springs," "H.T. neaps," and "L.T." Disregarding exceptional tides, these are, I believe, fair approximate levels, and are those to which I have worked in preparing the drawings. "Coping level" is placed at three feet above "H.T. rains," or two feet above the highest tide recorded by the gauge.

The bottom of the main dock is designed to be 23 feet below datum, giving a depth of 26 feet of water at H.T. neaps. The basin and locks are intended to be three feet deeper.

The dock, as constructed at first, is intended to be 4,000 feet long by 500 feet wide, the basin approximately 800 feet square, and the entrance locks respectively 560 feet long by 80 feet wide and 400 feet long by 60 feet wide.

The land for about 300 feet back from the walls is intended to be raised to the level of the coping. Provision must be made for draining the remainder, and this, I think, it will be safest to do by sluices into the basin, rather than through the bund.

It is intended that the excavation shall be got out, as far as possible, dry in the usual way, and that the remainder be dredged to the requisite depth after the water is admitted to the dock.

I desire here to refer more particularly to certain details of construction, necessitated by the peculiar features to be dealt with: (1) The nature of the foundation; (2) the great variation in the level of high tide; and (3) the cyclone wave. The two former affect chiefly the height and width of the walls. It is desirable in all cases, and more particularly in dealing with a deposit like that of the Ganges delta, to distribute the weight as evenly as possible over the foundation. The walls, as shown on the drawings, have been designed with special reference to this requirement, the line of pressure passing approximately through the centre of the base, not only when the wall is standing alone, but by reason of the steps at the back which receive increments of weight nearly in proportion to the horizontal thrust; also when exposed to the whole pressure of the earth behind.

I may mention that in designing the wall I have not considered it safe to assume that the earth backing, saturated with water as it will be, would naturally stand at a more favourable slope than about 4 to 1. The top of the piling is intended to be embedded in the concrete of the wall, and not placed in the front as a mere toe, which would be easily thrust out of the perpendicular.

Should the progress of the work on a large scale show that there will be any real difficulty in keeping the excavation sufficiently dry to get in the concrete foundations for the dock and basin walls as designed, it will be necessary to carry them on wells, in which case I should prefer to adopt the triangular section lately used successfully in the construction of the Stobcross Dock at Glasgow, and which I have shown, with alternative sections of the walls, on drawing No. 3. I trust, however, that it will not be necessary to resort to wells, at least for the dock walls, which are only five feet lower than the foundation of the lock at Chitpore, where no great difficulty has been experienced.

In order that the storm-gates when open may be no obstruction to the passage to and fro of the men attending on the vessels passing through the locks, it is intended, as shown on the drawings, that they be set back into the wall five feet further than the other gates, and that the break in the quay line be made good by a platform on the front of the gate. The gap at each end of the platform is intended to be bridged by a small moveable timber gangway, so constructed as either to be moved by the gate, or (if neglected) to form no impediment to the closing of the gate. The gangways should be such as will float in the event of their being accidentally thrown into the lock, lest by falling on the sill they should obstruct the closing of the gates. To ensure their being in working order, the storm-gates should be closed at least once in every 24 hours. The sluice doors at this point must hold water both ways.

I have not shown on the drawings the hydraulic or other machinery for working the gates, sluices, or swing bridge, the details of which depend greatly on the manufacturers.

Fresh Water-supply.

I estimate that for some time to come it will be sufficient to provide good fresh water (in addition to what may be impounded in tanks during rain in the usual way) for an average of one passenger vessel and eight other large vessels per day, with an addition of 10 gallons per day for about 2,000 resident inhabitants. To bring this quantity from Calcutta will require, if supplied from a head of 40 feet, a pipe about 10 inches in diameter, which, in case of accidents, should deliver into a tank large enough to contain at least one

week's supply. When the demand increases beyond what the 40 feet head will supply, the quantity of water delivered by the same pipe may be increased by pumping to a pressure equal to a head not exceeding 120 feet.

ESTIMATED COST.

Subjoined are the heads of my estimate, in which I have included the cost of eight hydraulic capstans for hauling vessels through the locks, &c.

From the tentative character which part of the work must necessarily assume, it is difficult to estimate with accuracy the cost of the well foundations.

It should be noted that the bund, storm-gates, and water-supply, although necessary in this particular case and included in the estimates, are additions beyond the requirements of an ordinary dock.

	Lakhs.
Dock	42
Basin	17
Passages between dock and basin, and gates	6
Locks and gates	24
Wing walls	½
Hydraulic machinery and pipes	4
Bollards	½
Coffer dam	2
Granite for quoins	2
Swing bridge	½
Fresh water-supply	5½
Well foundations, say	23
	127
Contingencies, say, 10 per cent.	13
Total	*Rs. 140

The locks with their foundations are the most expensive part of the design. By reducing them to 200 feet long each, the total cost may be brought down to about 118 lakhs. I do not, however, think it would be desirable to do this, for, although there would still be duplicate gates and locks through which small vessels could be passed at low tide, the want of the larger lock would at times be greatly felt.

Pray bear in mind that this is to be considered merely as an *interim* report, and that both drawings and estimates have been prepared on the supposition that the borings, &c., now in progress, will show no more unfavourable results than those already completed.

BENGAL CLUB,
The 4th March 1882.

DIAMOND HARBOUR DOCK SCHEME.

MEMO. BY THE SPECIAL ENGINEER.

SINCE the last meeting of the Committee I have enquired more particularly into the reasons urged against the "lee-shore," and I am satisfied that whilst some of the local nautical gentlemen appear to see no difficulty, others have, unintentionally, exaggerated the supposed dangers during the monsoon. Men who have spent the greater part of their lives in India have had few opportunities of observing the working of large wet-docks, and naturally revert to *graving* docks as the nearest example. Captain Taylor, I.N., in his letter, dated Calcutta the 8th March, suggests a Committee "including practical men, who have docked vessels either *here* or at Bombay Prince's Dock," and other gentlemen, whom I have since consulted, speak in similar terms. In arriving at a decision on the subject, the Committee should bear in mind that there is little analogy between a light vessel (with comparatively slight hold of the water, and presenting a great surface to the wind) being slowly warped into a graving dock very little larger than herself, and the same vessel steaming or being towed through a wide entrance into a large wet-dock. In coming out of dock the conditions are still more favourable. I have no hesitation in saying that Diamond Harbour is not the place which I should choose for the entrance to a *graving* dock.

There is one point which has not been brought out at all clearly in the replies to the questions of the Committee. Mr. Steel showed that *time* would be saved in working cargo in dock rather than at jetties in the river, and in this he is corroborated by Mr. Morrison. But in addition to this there is a clear saving of *cost*, for the vessel being always practically at the same level with relation to the quay, gangways can be laid on to her decks and the greater part of certain descriptions of cargo lifted by her own steam cranes and wheeled or carried direct into godowns, or *vice versâ*.

BENGAL CLUB,
The 3rd April 1882.

C. W.

* *The Committee have added 10 lakhs for establishment during construction.*

No. 2, dated Calcutta, the 27th April 1882.

From—CHARLES WAWN, ESQ., M. INST., C.E., Special Engineer,

To—The President of the Committee on Docks at Diamond Harbour.

I BEG to report to you, for the information of the Committee, that since my letter of the 4th March, three borings have been made on the site of the proposed dock on the south side of Diamond Harbour creek, each to a depth of 82 feet, and a brick well, now in process of sinking, has reached a depth of 25 feet. The positions of the borings and well are shewn approximately on Drawing No. 1. The results generally shew a mixture of silt and sand in varying proportions. At the surface and towards the bottom of the borings the material has much the appearance of blue clay, whilst at the level of the bottom of the proposed dock wall (about 40 feet down) it contains a large preponderance of sand. In the first boring a good deal of water appeared to be present with the sand, and on visiting the works yesterday I found that the well at a distance of 120 feet from the boring had reached at a depth of 25 feet, a stratum of watery sand much the same apparently as that passed through by the boring. As seen through the better facilities afforded by the well, it appears at this point to be little better than a quick-sand. In borings Nos. 2 and 3 the sand was not in the same semi-liquid condition as was noticed in No. 1, and it is probable that, when the excavation is opened out on a large scale and suitable pumping power and other appliances brought to bear, no great difficulty will be experienced from this source. At the same time, the condition of affairs disclosed by the borings and well, should it prove to be alike over any considerable portion of the area, introduces an element of uncertainty as to the cost of at least one part of the contemplated works.

I think it is desirable that some further observations should be made during the approaching monsoon season to determine whether the oft-repeated objection to the dock, on the ground of its exposure towards the south-west, be well-grounded or not. I have already stated (appendix pag· iv)* that in my opinion the danger has been greatly over-estimated, chiefly from want of experience in the working of such docks, and in this I am confirmed, to a great extent by letters from the nautical men printed in the Appendix. This leads me to suggest that, if possible, any party deputed to make the observations should include three or four captains of merchant vessels, both sailing and steam, who have had general experience in different ports where wet docks are in operation; and that, as a matter of detail, the direction and width of the two proposed entrances should be at the time conspicuously indicated by poles, easily recognized from the anchorage ground.

As the matter stands at present, there are two objections of more or less weight to the site suggested for the dock at Diamond Harbour—the state of the foundation, and the fact of its being on a lee shore during the monsoon. It appears to me that the Committee would be quite within their powers in suggesting the examination of an alternative site, which, though not actually at Diamond Harbour, is sufficiently near to be easily brought within reach of the railway.

A point about half way between Roychuck and Ramchunderpore, four and a half miles to the west of Diamond Harbour, whilst avoiding the James and Mary's and other dangers of the upper reaches is less exposed during the monsoon, and appears to be generally well situated for the entrance to a dock. I would suggest that (1) any observations during the monsoon directed to Diamond Harbour should be extended also as far as Roychuck: (2) that a special survey of the surrounding district be made: and (3) that trial wells and borings be at once (before the rains) commenced on the site I have indicated on the accompanying plan. Should better results be obtained here than at Diamond Harbour, *i.e.*, should the firmer material be sound at a less depth, I should recommend it is generally the more desirable site of the two. The anchorage ground is not so wide as that off Diamond Harbour, but it is not a generally recognised anchoring place for vessels proceeding up or down, and no ships, except those intending to enter the dock, would as a rule bring up here. The Diamond Harbour Railway would of course be extended to the dock, but in addition to this, I would suggest the construction at an early date of a riverside line from the dock to Calcutta, taking in Fultah, Acheepore, Budge-Budge, Acra, and other places of importance. Such a line, passing through a populous manufacturing and trading district, would probably pay well, independently of any traffic from the dock.

On the accompanying river survey plan I have shewn approximately, subject to modification on the completion of the suggested survey, the site which appears to me to be the most suitable. The size of the dock, basin, locks, &c., and the details of locks, bund, storm-gates, &c., would be the same as at Diamond Harbour, and the boat canal suggested in my last could be as easily made to this point as to Diamond Harbour.

I ought to have mentioned in my former letter that the rates on which the estimates are founded were, after consulting several gentlemen of experience, fixed by me at an average of Rs. 16 per thousand cubic feet for excavation, including transport, with an addition of 25 per cent. for pumping, making Rs. 20 in all. The rate for ordinary brick-work was taken at Rs. 36, and for brick-work in cement at Rs 50 per hundred cubic feet.

* Page 299.

Dated Calcutta, the 24th April 1882.

From—G. H. MORRISON, ESQ.,
To—THE HON'BLE H. J. REYNOLDS, C.S.,

President, Committee on Docks at Diamond Harbour.

As desired by you, I now beg leave to submit my views upon this question.

I yield to no member of the Committee in appreciation of the immense benefits that would result from docks well designed and well placed, but I do not think well of docks at Diamond Harbour—

1. Because we cannot confidently say that the channels between Diamond Harbour and the sea will admit of the free passage of vessels of the latest type, much less of the probable type of the future.
2. Because safe entrance into and egress from the docks will, during a sensible portion of the year, be questionable.
3. Because successful docks at Diamond Harbour would gravely prejudice Calcutta as a centre of trade and probably ultimately destroy it as a port.
4. Because there is reason to think that the interests of Bengal at large can be effectually provided for, not only without impoverishing, but by means which must greatly enrich its capital.

I will proceed to deal with these points *seriatim*.

I.—*Access to the Sea.*

In considering this point, I imagine that we must keep in view the requirements of the largest vessel which can pass the canal, viz. 26 feet draught; for if our river is closed to vessels which can visit other ports, we must be shut out from such cheapening of freights as developments in ship-building are calculated to effect.

The evidence before us is as follows:—

(*a*) Between Diamond Harbour and Saugor, since 1871, it has been necessary to change the route taken by vessels at least three times. After being in use for periods varying in length, each channel in turn has closed itself by throwing up a bar, and in none of the combined channels at any time has the depth of water been sufficient to allow a deep-laden ship to pass except towards the top of the flood.

(*b*) Saugor roads have distinctly deteriorated, so that it is now difficult to find safe anchorage for large vessels.

(*c*) The outer channels from Saugor to the sea are changeable and dangerous. The main channel—Gasper—has had 19 feet of water, reduced since 1870, but is noticed to be shoaling and narrowing. In 1853, 1854, 1855, soundings gave only 12 to 15 feet reduced, and on a patch only 10½ feet. It has been shown that if the Gasper were again to shoal to 16 feet, vessels drawing over 25 feet would be unable to pass during 71 days out of the first six months of the year, and vessels drawing over 26 feet would, during the same period, practically be excluded.

A glance at a good coloured chart of the Hooghly seems instructive. The "patchy," broken, and sinuous character of the deep water channels is very remarkable. Not one continuous!

It has been said that we have managed to get ships in and out for a hundred years: why not therefore for another hundred? Yes; but not habitually such ships as are now being built. We are at the point which allows no margin for development; any shoaling of our approaches or any step in advance by shipbuilders puts us out of the race.

It may be possible to improve our river or at least to protect it from deterioration; but, till satisfied that this is practicable, is it wise to spend two millions sterling on docks and warehouses, and to induce a large additional expenditure on railway works and other buildings, public and private; on water-works, sanitation, and all the needs of a township, which, if anything at all, will be an important settlement?

II.—*Safe entrance and egress at all times is doubtful.*

The preponderance of nautical evidence is, that in the S.-W. monsoon it will be a work of difficulty and danger to dock, whilst it will not be practicable at that season to provide safe anchorage for more than a limited number of vessels waiting to dock.

But *to wait* is to frustrate the very *raison d'être* of the dock.

It is said that at Sunderland the existence of a lee shore is not an obstacle to docking and undocking, unless under exceptional conditions of weather; but before accepting this as conclusive, I submit that it would be desirable to know more about the Sunderland docks, and to ascertain whether such weather as prevails at Diamond Harbour during the S.-W. monsoon is or is not sufficiently "exceptional" to interfere with docking.

III—*Injury to Calcutta.*

There is a notion that the docks will be, so to speak, an adjunct to, or suburb of, Calcutta. The London docks are instanced as in point, and it is asked why a run by rail should in India separate interests which in London are identical in spite of people using a train.

The answer is that the two cases are about as diverse as can well be imagined.

In the first place there is not to my knowledge any instance in the world of the two parts of one port being separated by a distance of 45 miles. To compare the aggregate of continuous townships, called London, with the snipe marshes between this place and Diamond Harbour surely suggests nothing but a contrast.

The incidents of trade at home are totally different from those that obtain here.

England practically exports nothing raw, for coal does not affect the present argument. The manufacturer submits his goods for approval before they are packed, and once packed they are not opened till at the foreign market. Thus there is little necessity for the merchant to visit the dock.

Here, on the contrary, we deal in the produce of the soil, and scarcely two lots offered to the merchant are quite alike.

Now, trade in this produce may take one of three channels.

To illustrate them let us fix attention on a buyer of wheat, &c., in the Cawnpore market—

1. He may sell to a Calcutta merchant who has chartered a vessel to take the wheat to England. Of course it is as easy for the Cawnpore man to send the wheat to Diamond Harbour as to Calcutta; but when the wheat arrives at the port, the merchant must be present to take it over, not only to see that justice has been done to him in respect of quality, but also to arrange with the ship those questions as to condition which are constantly arising. It will readily be seen that a merchant who has frequent transactions of this sort (that is to say, every merchant doing any considerable business) will be forced to have his representative permanently located at Diamond Harbour.

2. The Cawnpore man may refuse to sell his wheat, &c., at Cawnpore. In point of fact much wheat, &c., at present comes unsold to Calcutta; and that from many places. But if the ships are at Diamond Harbour it is evident that wheat sent to Diamond Harbour will save many intermediate charges to which wheat sent to Calcutta would be subjected. Thus by degrees a market will spring up around the docks which will be able to undersell the Calcutta market, and thus a further exodus from Calcutta of merchants and dealers will be brought about.

3. The Cawnpore man may establish connections in England and make his own arrangements for through freight. It is only in such a case that the presence at the dock of the Calcutta merchant will be unnecessary, but not to his own benefit.

General Import Trade.

The procedure is as follows:—

After examination at the ship's side for chafage or other damage, in respect of which there may be a claim on the ship, goods are removed to the merchant's godowns, where they remain a shorter or longer time according to the markets. They are then bought by dealers who distribute to the various marts of the interior.

Now, it is quite conceivable that the Railway Company, by accepting some rather risky responsibilities, and making some rather costly arrangements, might reconcile the Calcutta merchant to receiving his goods at a Calcutta railway station. It would, however, before long be found that by placing the centre of distribution at Diamond Harbour docks instead of at Calcutta, many expenses could be saved, and that merchants established there could undersell their Calcutta competitors.

The obvious result would be the gradual migration of another set of traders.

Salt is imported by merchants in entire cargo loads. It is, however, not usually sold by the cargo, but in small parcels, to many dealers, day by day. These dealers pay the duty, and each man brings his boat alongside the vessel and takes his salt. The Customs Preventive Service watch the discharge to secure the revenue; the merchant's clerk watches it to see that no man gets salt for which he has not paid; and the captain weighs out the salt to fix his freight.

The boats which carry this salt away into the interior are those which have brought produce down.

This trade could not be carried on from Diamond Harbour so long as merchants and dealers were here, nor so long as the salt was sent up-country by boats which have discharged in Calcutta. We have, however, seen that a produce market is likely to spring up about the docks, and as arrangements could be made to discharge ships' cargoes into bounded warehouses alongside the docks, and to deliver from bond direct into boat or railway wagon (whereby very great savings would be effected), it is certain that, sooner or later, the salt trade would leave Calcutta.

The coal trade would naturally follow the steamers.

Jute baling, now an important industry here, must of necessity place itself near the ships for the simple reason that the railways carry jute by weight, whilst the ship is paid freight by measurement. Hence the object is to bale it as short a time as possible before shipment, in order that the least possible re-expansion may take place before measurement for sea freight.

Marine engineering.—Ship agency establishments and all the miscellaneous trades and industries dependent upon the custom of the ships are bound to move down the river.

Thus, the results of successful docks at Diamond Harbour must be the complete, though gradual, disintegration of many trades now pursued at Calcutta. It is indeed a

condition precedent to their success that they shall take from us nearly the half of the vessels that now come here, and we may safely say that the process of despoilment of our shipping once begun, must continue, for when dock No 1 overflows, No 2 will be excavated, and the "dockizable" space is practicably unlimited.

If these views as to trade are sound it follows that property in Calcutta generally, but particularly that very large portion which rests upon our present position as the chief port of Bengal, must suffer very serious deterioration.

IV.—Is this injury to Calcutta called for

Of course if the expanding commerce of Bengal could not be provided for without sacrificing Calcutta we might have to accept the situation, but things have not yet come to this.

Various schemes have been propounded for increasing the resources of the present port by such expedients as extending the jetties to Garden Reach and utilizing the Howrah foreshore, &c, &c. They deserve careful consideration, but they are open to the serious objection that they leave untouched the delays and dangers of the Hooghly.

The same cannot, however, be said of Mr. Bruce's scheme to connect the Hooghly with the Mutlah by a ship canal; although, as regards the points of entrance into the respective rivers, his proposals might perhaps be modified with advantage.

Such a canal would be about 30 miles in length. The distance from Calcutta to sea by this route would be rather less than *viâ* Saugor, and according to the latest chart the least depth of water anywhere would be 22 feet reduced.

Comparatively speaking, not much appears to be known about the Mutlah beyond the facts that when last surveyed the channels were broad and deep and the water salt up to Port Canning. There seems, however, reason to look upon it rather as an arm of the sea than a river, and if so, there is little fear of its silting up or water failing.

The canal scheme would offer the following advantages:—

1. The dangers and delays of the Hooghly would be at once and for ever turned.
2. Vessels could proceed to sea at almost any time of any tide.
3. The navigation would be so easy that any steady seafaring man with local knowledge rapidly acquired could be trusted to pilot vessels in and out, so that pilotage charges would be susceptible of great reduction.
4. The port estate in which so much public and private money is invested would be safeguarded.
5. The organization of the Port Commissioners would be available for managing the canal and any docks connected therewith.
6. The extensive appliances now in the port might continue to be utilized, and further improvements might proceed without being checked by fear of their being superseded or rendered valueless by the creation of a rival port.
7. The revenues of canal (and docks) would go into one common purse, with jetty tolls and other port receipts, so that the surplus of one department would be available to cover any deficit in another.
8. The enormous cost of establishing a new town with its buildings, streets, lighting, conservancy, water, &c., would be avoided.
9. Property in Calcutta instead of deteriorating would be enhanced in value
10. No interest (unless it were that of the present pilot establishment) would be assailed, and no man's business would be destroyed or violently disturbed, but the good of all would be promoted.
11. If the expense of constructing a dock as well as a canal were thought too great, the dock might be left for a subsequent undertaking. Meantime most of the advantages of docks would be secured by an enlargement or enlargements of the canal sufficient to allow of ships lying alongside a quay or jetty without impeding the navigation.

It has been objected that the project, however otherwise good, must be set aside by reason of its cost. It does not so strike me. I have already advanced certain considerations to the contrary, and may here point out that, through all but a short section of the canal, ground could be cheaply acquired. Near Calcutta any surplus land taken up would be re-sold at an enormous profit. The docks would in fact be the chief centre of business life, and land around them and on either side of the canal would be eagerly sought after for such purposes as—

Jute presses,	Petroleum stores,
Factories,	General warehouses,
Warehouses,	Inland steamer wharves,
Offices,	Emigration depôts,
Coal yards,	Timber yards,
Engineering shops,	Graving docks, &c., &c.

I propose, however, to show that such an undertaking, even though more costly than can reasonably be anticipated, would still be remunerative, and this may probably best be done by attempting an estimate of the gross savings which would result to the shipping and to the mercantile public.

To make the estimate intelligible, it should be explained that it is assumed that (either in docks or alongside quays or jetties) provision is made (*a*) for berthing every vessel that

enters the port; (*b*) for receiving her cargo at once into sheds or warehouses; (*c*) for loading such cargo out of sheds into boats or railway wagons or carts according to the destination of such cargo; (*d*) in other warehouses for receiving from boats or railway wagons a vessel's export cargo in advance, if need be, of her arrival; (*e*) and generally for proceeding uninterruptedly with discharge and loading. (It would be easy in dock to employ the electric light so as to work in the cool air of night, even better than by day.)

It is also assumed that trade would readily accommodate itself to the new conditions; that both imports and exports would be warehoused on the banks of the canal; that jute would be pressed there; that the railways inter-urban and external, the boat canals, the ship canal, and the docks would all be so connected and worked in harmony as to facilitate and cheapen to the utmost the movement of goods, and generally that such arrangements would be made as to eliminate the double carting and boating charges, which nearly all our imports and much of our exports have now to pay.

A.—Savings by Vessels.

It is estimated that the tonnage annually visiting this port will be not less than—

400	canal steamers.	The numbers for 1881 were	... ...	280
350	coasting steamers.	Do. do.	... ...	292
400	sailing ships.	Do. do.	.. ...	462
1,150	vessels.		Total ...	1,034

Of these, the coaster could afford the least for dock or canal dues She now loads as rapidly in the stream as could be hoped for in dock, and her comparatively light draught minimizes detention.

		Rs.	Rs.	Rs.
She would, however, by using the canal save probably half a day, valued at	...	225		
And in pilotage,* say ...	...	400		
		625	× 350	= 2,18,750
The larger canal boat would save—				
1 day in the river, valued at	...	560		
2 days in loading and discharging		1,120		
In pilotage,* say	...	550		
		2,230	× 400	= 9,92,000

The sailing vessel would gain most of all.

Of the ships which came here in 1881—

40% were in ballast and averaged 33 days in port. These could save at least 20 days.
37% „ salt laden „ 49 „ „ „ 29 „
15% „ with general cargo „ 45 „ „ „ 25 „
8% „ „ coal „ 40 „ „ „ 20 „

So that the average saving per ship in time might be 24 days.

		Rs.	Rs.	Rs.
24 days, at say, Rs. 200	...	4,800		
Pilotage saved* ...	...	450		
Saving in tug hire, say	...	1,000		
		6,250	× 400	= 25,00,000

Saving by ships ... Rs. 37,10,750

B.—Savings by Merchants on Boat and Cartage expenses.

	Rs.
SALT.—The imports now are over 300,000 tons, whereof about one-third has to be warehoused. Taking credit for only 10 per cent. increase in consumption, the saving in charges on the one-third portion bonded would be	1,40,000
COAL.—The saving would only be on the portion used by steamers, say, 100,000 tons, at Re. 1	1,00,000
GENERAL IMPORTS exclusive of salt and coal. (No figures showing the number of tons imported seem to be available.) I assume 500,000 tons, at Re. 1-12	8,75,000
JUTE.—Present export 334,385 tons. We may pretty safely reckon on an increase of export to 500,000 tons. Let us take the saving in charges at Re. 1-8, although, if the jute presses were located on the canal banks, the saving would be very much larger	7,50,000

* *Memo.*—If it were considered essential to maintain the present staff of Hooghly pilots, the saving in pilotage here shown (amounting in all to Rs. 5,40,000) could not be fully realized; but I believe that after a time it would be found unnecessary to maintain the Hooghly establishment.

	Rs.
GRAIN, SEEDS, &c., BROUGHT INTO CALCUTTA BY RAIL.—Mr. Leslie has shown that the East Indian Railway alone will bring in 1,250,000 tons. From all railways therefore let us say 1,500,000 tons, at Re. 1-8	22,50,000
OTHER PRODUCE NOT BROUGHT IN BY RAIL.—If stored in godowns on the canal bank, there would be large savings in cartage, boat hire, &c.; but let us say only	3,00,000
	81,25,750

If now we imagine the cost of land, canal, docks, and warehouses to amount to the surely excessive sum of 350 lakhs, the account will stand thus—

	Rs.	
Interest on 350 lakhs at 4 per cent.	14,00,000	
Maintenance, conservancy, and working staff, say ...	4,00,000	
Sinking fund, say	7,00 000	
Per annum		25,00,000
Balance available for lightening charges on shipping and on trade generally, after providing for deficit (if any) in the accounts of the Port Trust, viz., deficit caused by a falling off in receipts owing to transfer of business to the new docks ...		56,25,750

I need scarcely say that this is the roughest of estimates, and that it may probably need correction on both sides of the account. There are figures necessary for nearer estimates which are not available to me. The savings of trade have, however, not knowingly been overstated. On the contrary, present charges are not set down at their full amount per ton, nor have I included in the account such items of legitimate canal revenue as tolls on inland steamers, and other craft using the canals. Then, again, I have tried to put down the cost of the canal system, and of its maintenance, at figures not open to challenge, on the score of being too low, and I may have erred largely on the safer side. Lastly, I have not attempted to state the depreciation of property at Calcutta, which would follow upon the diversion of trade to Diamond Harbour; nor the rise in the value of such property which must naturally come about if we can succeed in preserving to Calcutta her character as the port and chief distributing centre for the whole of the rapidly-increasing commerce of Bengal.

I submit, however, that I have made out a *primâ facie* case in favour of Mr. Bruce's scheme; that such a project, commanding as it would the vote of the Calcutta interest, would pay more certainly and more rapidly than one which involves dragging merchants and dealers against their will away from this port; and that, at all events, we should advise Government to consider exhaustively the merits of the Mutlah and other alternatives before proceeding with the construction of docks at Diamond Harbour.

Dated 9, Victoria Chambers, Westminster, the 15th March 1882.

From—W. D. BRUCE, Esq.,
To—The Vice-Chairman to the Port Commissioners.

I FIND among the papers submitted to the Commissioners at the 354th meeting a letter from the President of the Committee on Docks at Diamond Harbour, in which the Port Commissioners are requested to answer a series of questions relating to the Hooghly and the accommodation for the trade of port now available in Calcutta Most of the questions can best be answered by the pilots and merchants, but there are two (10 and 11) which, it seems to me, the Port Commissioners are in the best position to answer; and, with the view of assisting them in the discussion of these questions, I trust they will excuse my submitting to them the views which I now hold on this important subject. During the last twelve years that I have been connected with the Trust, the subject of port improvements has been constantly before my mind, and I feel now that I can speak with some confidence on the subject.

The first question (No. 10) runs as follows:—

"Having in view the probable increase of traffic on the Calcutta side of the river on the completion of the railway bridge over the Hooghly, do you think that the space now at the disposal of the Port Commissioners will be sufficient for wharfage and general accommodation?"

I am of opinion that it will not. But the present accommodation can be considerably increased, and will be used by a certain class of vessels, so long as they can get up the Hooghly to the Commissioners' wharves.

To increase the present accommodation I would, on the completion of the new railway bridge, remove the floating bridge from its present site to one immediately to the north of the Neemtollah Burning Ghat.

This would enable the Commissioners to lay down a large number of new moorings immediately abreast of the town and the East Indian Railway Company's premises in

Howrah, and save many vessels from the great inconvenience they are now put to by mooring them in Kidderpore and Garden Reach.

There would then be no obstruction between the shipping and the docks in Howrah, and vessels would be saved the expense to which they are now put when it is necessary for them to dock. On the completion of the railway bridge the bulk of the traffic will come direct to Calcutta, and the floating bridge can then be moved from the Armenian Ghat site to the site I indicate without inconvenience to the general public or the railway traffic.

The railway pontoon at Armenian Ghat can also be removed from its present site either to Howrah or to a site in front of the Commissioners' workshop at Meerbahar Ghat, if it is considered necessary to maintain the ferry in this position.

Another jetty could then be erected to the north of No. 1 jetty, and the whole frontage of the East Indian Railway Company in Howrah would be available for jetties should it be deemed advisable to erect such jetties for the loading of coal or other exports brought down by the railway for direct shipment. If an export trade in coal ever arises, the coal could be as easily shipped over jetties in this position as in the proposed docks at Diamond Harbour. To the south of the jetties, or between No. 8 and Chandpal Ghat, the accommodation for boat traffic is at present limited, and could not be encroached upon for the use of sea-going vessels without causing great inconvenience in the shipment of goods by cargo boats. The purchase of the Chandpal Ghat pumping station and the extension of the inland vessels wharf to Baboo Ghât will afford a certain amount of relief. But I can see no good reason for confining the boat traffic within these limits; the boat wharf might be extended without any inconvenience to the public, or encroaching on the drive, to the point opposite the north end of the carriage stand at the Eden Gardens, and, if this were allowed, another jetty might be constructed to the south of No. 8. This, with a new jetty north of No. 1, would give ten jetties for sea-going vessels, at eight of which vessels of 400 feet in length could be discharged.

This in my opinion is all that can be done to extend the accommodation on the Calcutta bank of the river abreast of the town, and it will not, when completed, provide for more than 250 or 260 general cargo vessels annually.

No wharfage accommodation can be provided for salt ships or to vessels employed in the coasting trade, and there is practically no river frontage available to provide accommodation for the increase in the trade of the port generally, except at Garden Reach, which is inconveniently suited for communication with the business quarters of Calcutta.

The next question then arises—

"If not, can you suggest any means of supplying the deficiency otherwise than by constructing the proposed docks?"

Docks at Diamond Harbour have often been proposed, but last, I believe, by Mr. Simms, nearly thirty years ago. He went fully into the subject, but nothing came of it, and it is my opinion that if they are carried out now they will prove as great a failure as Port Canning.

All experience has shown that it is most difficult to move a great and established centre of trade, and also that, while it is possible to bring ships within easy distance of the merchants, the merchants won't move to the ships. It will, no doubt, be argued that it is not intended to move the merchants from Calcutta to Diamond Harbour. The ships will stop there, but the goods are to be delivered by the railway in Calcutta, just as they are now delivered at the jetties; but such a system won't work. The merchant or his shipping clerk must be near the ship and in constant communication with those on board. Disputes as to breakage, damage by water, and short delivery are constantly arising, and have to be settled between the captain or agent of the ship and the consignees of the goods, and it would, it seems to me, be impossible for any cargo importer or exporter of goods to work with ships at Diamond Harbour without having an office on the spot, which would lead to extra expense, division of establishment, and interfere seriously with the conduct of business.

I have no doubt such reasons will be considered trivial objections to the scheme, but I have during the last twelve years seen so much of the worry and annoyance these disputes cause, even when working ships directly under the eye of the merchants, and I am certain they would lead to such serious detention or loss if the proper parties were not on the spot to settle them, that I feel convinced no ship will stop to discharge or load at Diamond Harbour so long as she can get up the Hooghly to Calcutta even at some little risk to herself. The question then arises, how can they best be provided with proper accommodation in Calcutta? The space available for moorings within easy distance of the business quarter of the town is limited, and I have already shown that only a very slight increase in the length of the wharves for sea-going vessels can be made on the Calcutta bank near the town without encroaching on the Maidan. Jetties or docks in Howrah will never answer when the East Indian Railway runs into Calcutta. The great bulk of the East Indian Railway traffic will leave Howrah when the bridge is completed, and whatever is done to facilitate the landing and shipping of goods must be done in connection with the railway system on the Calcutta bank of the river.

The space available for jetties or wharves on the river bank being limited, it seems quite certain that docks must sooner or later be constructed if the ships are to be brought within easy distance of the merchant offices. Many sites for docks have been proposed and reported on from time to time, but the site which seems to offer the greatest advantage, and which has been reported on most favourably, is that at Chitpore. Any site in Calcutta is, however, now objected to on the ground, apparently, that the James and Mary shoal will prevent

vessels of greater length and draft than those now running to come up to Calcutta; and that, looking to the probable increase in the size of vessels trading with Calcutta, docks for the accommodation of such vessels should be constructed at Diamond Harbour.

I quite agree with the proposers of this scheme in thinking that, in considering the question of extensive improvements for the shipping trade of Calcutta, the dangers and shoals of the Hooghly, likely to lead to any interruption of traffic, should be taken into account. But I cannot agree in the opinion that by establishing docks at Diamond Harbour the worst shoals or the greatest dangers in navigating the Hooghly will be avoided. The answers of the pilots to the first nine questions will, I hope, have convinced the Committee that the most changeable shoals in the Hooghly, and those most likely to interrupt traffic, lie between Diamond Harbour and the sea. Between Calcutta and Diamond Harbour the Hooghly is now practically in the same state as it was a hundred years ago. Changes take place annually in the James and Mary sands, but they are well understood, and pilots can guard against them. Below Diamond Harbour, in the Rangafullah channels, the case is very different. These channels are constantly changing, and in 1879-80 the Bellary channel—the only channel by which vessels could cross these sands—was rather worse than the James and Mary shoal. Hitherto it has generally been found that as one channel across these sands closed up another opened out; but a study of the charts showing the great and constant changes that take place between Culpee and Mud Point should, I think, convince the Committee that the closing of one channel need not necessarily be immediately followed by the opening of another, and that at any moment a bar might be thrown up which would cause a serious delay to (if it did not entirely prevent) the crossing of deeply laden vessels. The evidence collected by the Committee of 1853-54, and again by Mr. Leonard in 1864, all go to show that the chances of interruptions to traffic are greater below than above Diamond Harbour. The Committee that sat in 1854, in their report, divided the Hooghly channels into three classes:—1st, the stationary; 2nd, the fluctuating; and 3rd, the deteriorated; and then go on to say—"The portion of the river between Calcutta and Culpee may be considered to embrace all the channels of the first class, for though within it are found the dangerous and variable sands that lie between Fisherman's Point and Diamond Harbour, and the minor obstacles at Rayapoor and Mayapoor, yet there is an apparent permanence of character in the remainder of that section of the river which is not found lower down.

"The channels between Culpee and Kedgeree constitute the second or fluctuating class, and their changes are constant and rapid both in character and position." Below Kedgeree the report goes on to say that "the preponderance of evidence decides that they have deteriorated."

In the report submitted by Mr. Obbard, River Surveyor, on the condition of the Rangafullah channel between 1755 and 1836, he says—"December 1796. Outer channel so bad that ships of draught cannot use it, and inner so narrow that they cannot be laid across it to drop. Master-Attendant therefore recommends that none of the Company's ships be brought above Kedgeree."

It would be a serious matter if such an interruption to traffic occurred now. But the use of steam renders it possible for vessels to navigate narrow channels which without steam they dare not attempt. It would not therefore now necessarily follow that if the channels got into the same state that they were in 1796 there would be any interruption to the traffic; but I think it is a very significant fact, bearing on the general condition of these channels, that whereas in former years vessels of any draught could be brought up without steam, the pilots are now prohibited from taking any vessel drawing more than 21 feet either up or down the river without a tug.

Bearing all these facts in mind, it appears to me that the first question to be decided, when considering the question of improvements on the large scale now proposed, is whether all such improvements are to be left entirely at the mercy of the changing channels of the Hooghly, or whether it would not be advisable to have a second string to our bow and to connect Calcutta by a ship canal with the Mutlah. I am decidedly of opinion that the latter is the proper and wisest course to adopt. If docks are now to be constructed to meet the great increase in trade, which it is anticipated that the construction of new railway bridge will bring into Calcutta, such docks should be in a position to communicate either with the Mutlah or the Hooghly.

Docks at Diamond Harbour are just as likely to be cut off from communication with the sea as the port of Calcutta, and this fact alone is to my mind a sufficient reason against their construction, even were it probable that they would be used by vessels with cargoes for Calcutta, which I feel confident they would not, so long as such vessels even at some risk to themselves can get up to Calcutta.

My suggestion then to supply the deficiency in space otherwise than by the proposed docks at Diamond Harbour would be (1) to dredge a ship canal of the same section as the Suez Canal from the Mutlah to Sealdah; (2) to excavate a large dock on the east side of the railway in the position shown on the tracing which accompanies this letter; and (3) to connect this dock with the Hooghly by a cut joining the river at Chitpore to the north of the present entrance to the canal. Vessels could then enter the dock either from the Hooghly or the Mutlah, and take berths either in the dock or at the jetties. The depth of water in the canal should be sufficient for vessels drawing 24 or 25 feet. Vessels could then proceed to sea by the Mutlah at any time of tide, there being sufficient water at all times from a

point on the Mutlah about five miles below Port Canning, where I propose the canal to start from to the sea.

To properly carry out this scheme, the Calcutta canals from the entrance lock at Dhappa to Chitpore should be made over to the Port Commissioners, and form part of the port of Calcutta. The Commissioners might recoup Government the expenditure recently incurred in improving the canals, and in return charge all boats discharging in the canal the same wharfage fees as are now charged on the inland vessels wharves in the Hooghly.

Boats that now pass through the canal to discharge on the river wharves pay all the canals dues and the port dues as well, and there seems no good reason why the boats discharging in the canal should not pay for the facilities they there receive. The revenue at present derived from the canals, and which is really paid for keeping open the communication through the Sunderbuns, would still be charged by Government and be available for improving the canals and channels which would remain under the Irrigation Department. The locked portion of the canal would then form part of the dock system I propose, and there would be free and easy communication between the boats in the canal and the vessels in the dock, as the water in the canals and in the dock would all be at the same level.

This is an outline of the works I would suggest to meet the future requirements of the trade of Calcutta. The proposed dock would be in the most convenient position for railway traffic and within easy distance of the merchants' offices, while the construction of the canal would render Calcutta for ever independent of the freaks of the Hooghly.

What the actual cost of the docks would be, I am not in a position to say, but they can be constructed in the position I have indicated as cheaply as at Diamand Harbour, while the actual outlay of capital on all the buildings and accessories, which it would be necessary to construct at Diamond Harbour, would be far greater than in Calcutta, where warehouses, water-supply, gas, and drainage already exist.

The cost of dredging the canal would be, I estimate, about £750,000. Interest on this sum at 4½ per cent. would be £35,750; and if to this is added £12,000 for annual repairs and dredging, the total cost of maintenance would be 4½ lakhs per annum. The saving in pilotage alone by the Mutlah route would cover a great part of this, and as the trade of Calcutta is gradually becoming a steam trade, there is practically very little necessity to consider the question of towage in connection with their proposed works.

The construction of docks would, I believe, tend very much to increase the number of steamers. If the Commissioners had proper arrangements for the discharge of salt steamers, they could then come out laden with salt. At present they cannot, as salt has to be discharged into boats and as the consignee requires it. So far the Commissioners derive no revenue whatever beyond mooring hire from any vessels trading to the port, except those bringing general cargoes. With a dock and greater facilities for loading vessels direct from the railway wagons, they would at once secure the landing and shipping charges from vessels employed in the salt trade and on the coast and China trades. There is therefore, it will be seen, ample room for a great extension of improved appliances without in any way encroaching on the revenue derived from improvements already constructed. But such further improvements should be made where they will afford the greatest conveniences to those employed in the trade of the port, and where they can form part of and utilize to a great extent the facilities which have already been provided—not in a position where, if they are used at all, they will be in opposition to the works already constructed, and where I believe they would never be profitable unless a great part of the trade of Calcutta, and the merchants who conduct it, removed to Diamond Harbour.

REPORT ON THE EXPERIMENTAL CULTIVATION OF CAROLINA PADDY IN KHORDA IN ORISSA.

THE following papers are published in the *Calcutta Gazette* for general information :—

No. 193, dated Cuttack, the 10th February 1883.

Memo. by A. SMITH, Esq., Commissioner of the Orissa Division.

COPY forwarded to the Secretary to the Government of Bengal, Financial Department (Agriculture), for information, in continuation of this office No. 887 of the 19th June 1882. The instructions solicited in paragraph 18 of Mr. Taylor's report as to the disposal of the paddy will be awaited.

2. The samples of the paddy noted in paragraph 17 are transmitted in a separate packet.

No. 9, dated Khoorda, the 22nd January 1883.

From—W. C. TAYLOR, Esq., Settlement Officer,
To—The Commissioner of the Orissa Division.

IN continuation of my No. 251 of the 31st May last, I have the honour to report the result during the past season of experimental cultivation of the so-called Corolina paddy from Ceylon, forwarded by the Government of India for trial in Khoorda.

2. As stated in my last letter, only two seers of good seed were obtained from the half seer of seed originally received

3. After keeping a sample of the first year's produce for comparison, I treated the rest, nearly two seers, as follows.

4. Nearly one seer was sown broadcast on the 2nd June 1882 on 3,000 square feet of 13″ class single-cropped dhan land. After the land had been ploughed up twice, and as the place was near an irrigation dam, and in the line of drainage where it would receive washings from the high land, I gave no manure in order to check over luxuriance of growth.

5. This dhan germinated a little slower than the dhan of indigenous varieties in the surrounding fields, but when up, it continued to grow very well, and produced remarkably strong healthy plants, which were bushy and of a dark green colour with very stout straw.

6. On the 15th July the crop was puddled by passing the plough through and through it, after the local fashion called *bebasan*. This had the effect of killing most of the grass and weeds, and when the plants stood up again and began to grow, it was weeded (called *bacha*), and the plants where too thick were thinned out, and replanted where too thin, called (*khela*). This was at the end of July.

7. After the *bacha khe'a* nothing was done, except one weeding to the crop through which there was a constant flow of water night and day which, owing to the swampy nature of the soil, could not be cut off, as I should have liked doing occasionally.

8. This constant flow of water and the washings from the high land caused the plants to become too large and leafy, and although the grain ripened by about the middle of November, I was not able to cut it until the 29th of that month, and even then the straw was quite green.

9. The outturn from this experiment weighed, after it was thoroughly dried, 60½ seers, the whole of which I have preserved.

10. With the other half of last year's seed I tried the planting out system called *rud*

The seed, a little less than one seer, was sown in a seed bed, well manured, on the 16th June 1882.

The plants were taken up and planted out on the 5th August last on 2,500 square feet of 13″ class single-cropped dhan land, which had been previously puddled and prepared for them.

11. This land also was commanded by irrigation from the dam mentioned above, and also from another spring, but the soil was different. The plants grew well, though not so luxuriantly as in No. 1 experiment. They were twice weeded, and were frequently irrigated; the grain was ripe and the straw dry by the 15th November, but owing to press of other work the dhan was not cut until the 23rd. The outturn, when dry, weighed 52 seers, but two or three seers must have been lost, as I saw a good deal of grain lying in the field which had been eaten by rats.

12. From the above, it will be seen that from the two seers of seed obtained by me from the experiment made in 1881, I have obtained 112½ seers of good seed, or about fifty-six fold, or at the rate of about 22½ maunds of dhan to the acre.

13. The total weight of the straw, when thoroughly dried, was 211 seers of 80 tolahs, or at the rate of more than 40 maunds to the acre.

14. This sample of paddy I find comprises four varieties; they are all coarse rice, but the plants are strong and the yield very fair, and I have been asked for seed by several ryots.

15. I am now trying to grow a small field or two of this paddy as a spring crop, and will report the result in due course.

16. This "Carolina paddy" is totally different from any of the many varieties of "Carolina paddy" before reported on by me, and I very much doubt its being Carolina paddy at all.

17. In conclusion, I beg to enclose small samples as follows :—

No. 1. Sample of the two seers seed obtained in 1881.

} Samples of the dhan grown in 1882 showing the four varieties contained in the seed obtained from Government of India in 1880.

18. Instructions are solicited as to the disposal of the seed obtained. I can spare about two maunds; the cost will be Rs. 5, which will quite satisfy the cultivators who worked the experiment under my supervision. The rest of the seed I should like to keep for distribution and further experiments.

ADMISSION INTO THE SUBORDINATE EXECUTIVE SERVICE.

APPOINTMENT DEPARTMENT.

Dated Calcutta, the 23rd February 1883.

RESOLUTION.

THE Lieutenant-Governor has for some time past been of opinion that the system under which the Subordinate Executive Service in these Provinces is at present recruited is not satisfactory, inasmuch as it affords Government no sufficient means of estimating the qualifications of the candidates for employment. Changes in this system have from time to time been made, and the following statement gives succinctly a history of the subject :—

2. In 1868, Sir William Grey, as Lieutenant-Governor, introduced a plan under which candidates were appointed to the Subordinate Executive Service partly by nomination and partly by the results of a competitive examination. The object of the examination was to test the general education and intelligence of the candidates, as well as their knowledge of English and of one of the vernacular languages of these Provinces. The candidates were required to compose an English and a vernacular essay, and to answer questions on general subjects. The first examination was held on the 26th May 1868. Sixty-nine persons were admitted to it, and 12 European and 18 native candidates were selected for appointment. Upwards of 2½ years elapsed before the last of these persons could be provided with appointments, and in consequence no more examinations were held during Sir William Grey's administration.

3. In 1871, Sir George Campbell, who succeeded Sir William Grey as Lieutenant-Governor, declared his intention of establishing a system of examination for candidates for appointment to the Subordinate Executive Service. Rules for the examination, dated the 26th September and 3rd October 1871, were duly published in the *Calcutta Gazette*. In 1872 these rules were so far modified that every candidate was required to produce a certificate of character, a health certificate, and another certificate showing that he was able to ride 12 miles at a rapid pace or walk 12 miles within three and a half hours. Persons who could produce these certificates were required to pass a preliminary examination in English, unless they had passed a University Examination, in which case they were exempted from the preliminary examination. An examination (1) in the Vernacular, and (2) in Drawing, Surveying, and Engineering was compulsory on all candidates. Examinations in Law, Elementary Botany and Chemistry, and Gymnastics were optional, with the reservation that no one who failed in Law could get an appointment on a salary over Rs. 100, and that no one who failed in Chemistry and Botany could be appointed to the Opium Department. At the examination held in February 1872, nine European and 37 native candidates presented themselves for examination. Of these 17 were declared to be eligible for appointment to the Subordinate Executive Service. Under the revised rules issued for the examination of 1873, two classes of appointments were thrown open to competitive examination—one on a salary of Rs. 100 per mensem and upwards, and the other on salaries of less than Rs. 100. At the examination held in January 1873, 238 candidates appeared, of whom 123 competed for the higher and 115 for the lower class of appointments. Of these 58 candidates passed for the higher and 86

for the lower grade. In the rules for the Native Civil Service Examination for 1874, it was declared that all appointments in the Subordinate Executive Service, and all posts of Rs 50 and upwards in the sub-divisional establishments, both in the regulation and in the non-regulation districts, would ordinarily be reserved for persons who passed the Native Civil Service Examination.

4. In 1874, out of 423 candidates who obtained permission to present themselves for examination, 285 actually appeared and were examined. Of these 67 were declared to have passed in the higher and 133 in the lower grade. The first three examinations held in Sir George Campbell's time thus rendered 361 men eligible for appointments The deputation to sub-divisions of sub-executive officers, however, enabled the Government to secure appointments for almost all those who passed the first two examinations, while the operations for the relief of the famine in 1874 afforded the opportunity of employing temporarily a considerable number of those who passed the examination in that year. The number of the officers who had been selected was, however, largely in excess of the ordinary requirements of the service. The resolution, therefore, reviewing the results of the examination of 1874, stated that it had been decided to raise the standard of proficiency with a view to reducing the number of candidates likely to present themselves for examination. Accordingly, at the examination held in February and March 1875, the candidates were required to obtain two-thirds of the marks in each subject, to entitle them to be passed by the higher standard, and one-half marks in each subject to be passed by the lower standard. Ninety-two candidates were permitted to appear at the examination, but 78 only went through it Of these, five were declared to have passed the higher grade and 15 the lower grade. In the resolution on the results of the examination of 1875, it was stated that about 80 passed candidates had to be provided with higher grade, and 120 with lower grade appointments, and that in consideration of this large number of passed candidates, no further examination would be held until further notice.

5. Subsequently, in a minute dated the 25th September 1875, Sir Richard Temple reviewed the principle on which examinations had been previously conducted, and pointed out that it had resulted in the passing of a larger number of candidates who came up to a given standard, than could be provided for in any reasonable time. He therefore decided that in future the number of places in the higher and the lower class to be competed for should be fixed, and that they should be allotted to the corresponding number of candidates who stood first at the examination, and that for those who were thus passed employment would be found. The rules for the examination, published under date the 23rd November 1875, were not otherwise materially altered, but candidates passed at any previous examination were permitted to appear at the examination under the revised rules in the grade in which they had previously passed. The number of places offered for competition was four in the higher and seven in the lower grade. As, however, the rules had not been made public sufficiently early in the year to afford candidates much time for preparation, the number of candidates who appeared at the examination held in 1876 was less than the number of appointments offered. Only eight candidates appeared, of whom two were declared eligible for appointments in the higher grade, and four for appointments in the lower grade. In November 1876 a notification was published declaring that of the candidates who might present themselves for examination in 1877, four would be selected and declared eligible to hold first class appointments, and six to hold second class appointments, the places being awarded to candidates according to their order of merit in the examination, provided that none would be selected for a vacancy in the higher class of appointments unless he obtained at least two-thirds, or for one in the lower class, at least half, of the total number of marks obtainable upon the whole examination. Thirteen candidates appeared at the examination held in March 1877, ten for the higher and three for the lower grade, but none were successful in the former, but the three who went up for the lower grade were declared to have passed.

6. Sir Ashley Eden, who succeeded Sir Richard Temple, considered that the competitive system of examination had been a failure, and he adopted the system at present in force, under which the names of candidates

who appear from their position, training, and educational acquirements to be persons eligible for appointment either as Deputy Magistrates and Deputy Collectors, or as Sub-Deputy Collectors, are entered in two registers, and from amongst the names so entered a selection is made on the occurrence of a vacancy. At the present time both lists contain a large number of names, some of which have been on the registers for many years. Partly owing to this fact, and partly because the qualifications of the candidates were not always fully recorded, the information which the Government now has on this point is not sufficient to ensure a satisfactory selection. The object in view is to obtain the best men for the public service. No mere system of examination as regards educational qualifications is sufficient for this purpose, and the Lieutenant-Governor's desire is to combine with educational tests some practical experience of fitness for the official work which falls to the lot of officers of this class. In the Subordinate Judicial Service no person is appointed a Moonsiff who has not, besides the attainment of a B. L. degree, shown his aptitude for judicial duty by a three years' training as a pleader in the judicial courts; and some arrangement of a similar kind is necessary to secure efficiency in men selected for the executive work under Government. Mr. Rivers Thompson has therefore determined on gradually introducing a system under which appointments to the Subordinate Executive Service as Deputy Magistrates and Deputy Collectors shall again be thrown open to competition. To meet the claims of those who, under the nomination system, have been waiting their turn for appointment, all vacancies during the current year (1883) will be filled by candidates now borne on the Government lists. In January 1884, those on the lists who have not succeeded in getting an appointment will be, together with the men in the first and second grades of Sub-Deputy Collectors, allowed to compete for the appointments that will fall vacant in that year. In January 1885, all appointments in the Subordinate Executive Service will be thrown open to public competition. Two months previous to the examination to be thus held, notice will be given as to the number of vacancies expected during the ensuing year, and these vacancies, as they occur, will be filled up according to the results of the examination. Ordinarily there are six or seven substantive vacancies in the year.

7. The examinations of January 1885 and subsequent years will be open to all natives of India, including Eurasians, who have passed the Entrance Examination of the Calcutta University, who can produce certificates of health, respectability and good moral character, and who are not more than 25 years of age. Each candidate will pay a fee of Rs. 10 to cover the expenses of examination, and applications to be allowed to appear at it, accompanied by the fee and the necessary certificates, must be sent not later than the 1st December in each year to the Under-Secretary in the Appointment Department, or to such other person as the Lieutenant-Governor may appoint. To those whose applications are rejected the fee will be returned. For the examination to be held next January a fee of Rs. 5 will be charged, and intimation of intention to appear at it must be sent in to the Under-Secretary not later than the 1st of December next. It must be distinctly understood that at this examination only those persons whose names are now entered in the list of registered candidates, or who hold appointments in the first or second grades of Sub-Deputy Collectors, will be allowed to compete. Henceforward no fresh names will be added to the existing list of candidates. Particulars as to the subjects and standard of examination will be published hereafter.

8. So far as regards the competitive examinations. It remains to consider what plan shall be adopted for the training of the candidates who have succeeded according to the number of vacancies assigned, after the examination. The Lieutenant-Governor proposes to attach them at once to different duties in districts. They may be usefully employed as subordinates to the Personal Assistants of Commissioners of Divisions, as Assistants to Managers of Government and Wards' estates, as Assistants to Superintendents of Surveys and Settlements, or in any other capacity where they will have an opportunity of learning the practical duties of every day work which belongs to the Subordinate Executive Service. During such employment they will be

regarded as probationers, and their eventual appointment to a substantive post will depend upon the manner in which they discharge their duties. Until they obtain a substantive appointment, they will receive a small subsistence allowance of Rs. 50 per mensem. In ordinary course all such probationers would be absorbed into the regular service in twelve months from the time of passing the examination.

9. These proposals apply only to persons seeking the appointment of Deputy Magistrate and Deputy Collector. Sub-Deputy Collectors form an entirely distinct class, and have no claim by right to promotion to the superior grade in the Subordinate Executive Service, though it will be open to them to obtain it through the system of examination now contemplated. The Government, however, reserves to itself the right, under special circumstances, of rewarding meritorious services by direct appointment or by promotion.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Commissioners of Divisions for information and for communication to the District Officers.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,
Offg. Secretary to the Govt. of Bengal.

PUBNA RIOT CASE.

Dated Calcutta, the 27th February 1883.

From—F. B. PEACOCK, Esq., Officiating Secretary to the Government of Bengal, Judicial, Political, and Appointment Departments,

To—The Commissioner of the Rajshahye and Cooch Behar Division.

I AM directed to acknowledge the receipt of Mr. Metcalfe's letter No. 2J, dated 16th January last, submitting his report on the serious case of rioting which occurred at Dulai, in the district of Pubna, on the 10th December last. The occurrence was first reported by you to Government on the 20th December, and Mr. Metcalfe, who shortly afterwards was appointed to act for you during your absence on leave, was requested by the Lieutenant-Governor to proceed to Pubna, and submit a further report on the case, giving the result of the proceedings in the Magistrate's Court against the accused. This report he has submitted with his letter under acknowledgment, and the Government has been put in possession of the entire facts of the case. The Lieutenant-Governor, however, considered it advisable to reserve his remarks upon the case until the decision of the appeal pending before the Sessions Judge of the 24-Pergunnahs, who has now upheld the conviction, though he has modified the orders of the Magistrate.

2. The present occurrence is the latest outcome of the litigation in which Azeem Chowdhury, the zemindar of Dulai, has been involved for more than twenty years in connection with his first wife's claim to the dowry promised to her on marriage. The original suit for the dowry was institut d before 1860 in the Court of the Subordinate Judge of Furreedpore. It was dismissed by the Subordinate Judge, but was decreed by the High Court on appeal, and this decree was subsequently confirmed by the Privy Council in 1876-77. Another suit was then instituted for the mesne profit of the estates decreed. This case also was decided in favour of the wife by the High Court, and the decision was upheld by the Privy Council in 1881. Before the termination of the first suit, the wife having had to borrow money from Mr. N. Pogose of Dacca, sold him the High Court's decree in satisfaction of her debt. Mr. Pogose, however, died before the litigation was finally concluded, and his estate came under the control of the Official Assignee, who appointed Mr. Brae as his agent. This gentleman appears to have since been engaged in enforcing the decrees, and, notwithstanding the most persistent resistance on the part of Azeem Chowdhury, by the commencement of December last the latter's estates had been sold, and an order had been issued by the Judge for

the attachment of all his remaining property at Dulai, consisting of his residence, cash and furniture, and for his arrest.

3 It appears that Azeem Chowdhury had in his possession promissory notes of the value of several lakhs, which he had some years before endorsed in favour of his son by his second wife, for the purpose of avoiding their attachment in execution of the first decree. These, however, he was unable to negotiate without his son's consent, and the ill-feeling existing between them prevented any arrangement being made on the subject. It appears from the Magistrate's memorandum, quoted in the report, that an effort was made by him in September last to effect an agreement between the father and the son, with the view of disposing of some of the notes for the payment of the money decreed. Mr. Barrow had an interview with them at Pubna; but, although he had reason to hope at the time that the advice which he then gave them would lead to a settlement of the decrees, no such result followed. The dispute between Azeem Chowdhury and his son continued, and the Magistrate found it necessary to make special police arrangements for the preservation of peace in Dulai and the neighbourhood.

4. In November Mr. Brae obtained the order for the attachment of Azeem Chowdhury's house, which resulted eventually in the serious rioting under notice. He applied to the Magistrate for police assistance to carry out the order, but this was refused, and he was referred to the Civil Court. The Lieutenant-Governor approves of Mr. Barrow's action in thus declining to place any police at the disposal of the decree-holder without a request from the Civil Court, and considers that the orders which he issued on the occasion were judicious and sufficient. Eventually the Naib Nazir of the Court, who was deputed to attach the house, was resisted in a formal way by some of Azeem Chowdhury's men, and abandoned further proceedings. The Judge thereupon sanctioned the prosecution of the men who had opposed him, and also requested the Magistrate to direct the police to give proper protection to the Nazir, who was now deputed to deliver possession of the house to Mr. Brae and to arrest Azeem Chowdhury. The Magistrate accordingly issued warrants against the men accused of resisting the Naib Nazir, and directed the Inspector and subsequently the District Superintendent himself to accompany the Nazir with a force of constables, and support him in the execution of his duty. Such, briefly, is the history of the case up to the day of the rioting.

5. The Lieutenant-Governor has no desire to enter into the family concerns of Azeem Chowdhury, but it is clear that the discord which prevailed in his household led him into difficulties, not so much of a pecuniary as of a domestic character; and that, though able from the money at his command to satisfy the decrees against him, he preferred, apparently from animosity to his first wife, to resist the execution of the decrees by every means in his power. Probably if the decrees had not come into the hands of the Official Assignee, Azeem Chowdhury's pertinacity in resistance to the law would have been successful for a much longer period. As it was, notwithstanding earnest endeavours on the part of the Magistrate to adjust the differences between the father and son, the former remained obdurate and refused a settlement which he had ample means to effect peaceably. He still resisted the attachment of his house, and, when after a first successful show of opposition, he learnt that the Judge's officers were coming under the protection of the police, he made arrangements of a formidable character to prevent them from obtaining access to it and so fulfilling the duty to which they were deputed at the instance of the Civil Court.

6. What occurred when the Nazir proceeded to the house with the police on the 10th December is described in detail in Mr. Metcalfe's report. He was accompanied by Mr. Rattray, the District Superintendent, Mr. Brae, and the Sub-Registrar of Dulai, who was specially requested by Mr. Rattray to go with them. The police force consisted of the Inspector, a Sub-Inspector, two head constables and 18 constables, of whom six only were armed with muskets. Before starting, the District Superintendent, having heard of the preparations made for resistance, sent a warning to Azeem Chowdhury that the police would fire if attacked. The party were met at the entrance to the premises by a number of unarmed men, out of whom a few

respectable persons came forward and entreated the District Superintendent not to proceed, as they feared there would be bloodshed, and he would be killed. Mr. Rattray, however, explained the circumstances which rendered the presence of the police necessary, and pushed on. A clubman then rushed unarmed among the police and was knocked down, whereupon a number of men with spears and sticks advanced, shouting and yelling in a threatening and defiant manner. The constables were then directed to load in the presence of these men, and to continue their advance. They were, however, assailed with brickbats and other missiles, and being confronted by a large number of men armed with spears, and seeing others similarly armed crowding the balcony and terrace above, several of them fell back among the crowd, leaving only four men with the District Superintendent. As the rioters again advanced, Mr. Rattray took his gun from his orderly and fired a charge of snipe-shot at their legs. The party aimed at retreated behind a wall, but another party rushed forward, and Mr. Rattray fired his second barrel. At this moment, without any orders from the District Superintendent, four shots were fired by the constables who had fallen back, and who, it is stated, would not advance on account of the brickbats thrown at them. The clubmen then ran inside the house and closed the door, blocking it up with timber and bales of jute, and the police took shelter under the balcony.

7. A party of men subsequently came forward to endeavour to arrange terms between Azeem Chowdhury and Mr. Brae, and while these discussions were going on, the police moved to the entrance to the premises. The negotiations failed; and, late in the afternoon, the premises having in the meantime been vacated by the rioters, the doors were taken off their hinges or broken down, and the Nazir entered and attached all the property found in the house, amongst which were three chests of money, containing no less than Rs. 1,29,000. In one of the courtyards two men were found wounded, who stated that they had been shot by the police. One had a bullet wound in his body, and has since died. The other, who was wounded by a bullet through the fleshy part of the leg, has, it seems, recovered under treatment in hospital. There were also found on the premises 15 swords, 16 spears, three guns (one of which was loaded), a great number of sticks, and some bows and arrows.

8. Two days after Azeem Chowdhury was arrested by the Magistrate in a mat house adjoining his own, which was included in the Civil Court decree, and there is apparently no reason to doubt that he was actually on the premises when the resistance was offered to the police. He was subsequently tried and convicted of abetment of resistance to the taking of property by the lawful authority of a public servant, of employing or conniving at the employment of persons to commit rioting with deadly weapons, and of abetting such rioting, and sentenced to six months' imprisonment and fines aggregating Rs. 3,000. The Judge of the 24-Pergunnahs, to whom the appeal was transferred as the offence had been committed in contempt of the order of the local Judge, has modified the finding and sentence, convicting the accused of not having, as the owner or occupier of the premises for whose benefit the rioting with deadly weapons was committed, used the means in his power to prevent such rioting, and sentencing him to a fine of Rs. 2,000.

9. Mr. Rivers Thompson refrains from entering into any discussion of the judicial decisions in the case. He deems it sufficient to note that the Appellate Court has found that an offence of rioting with deadly weapons, which is punishable with imprisonment extending to three years, was committed, and that Azeem Chowdhury, though technically not liable to punishment for the rioting itself, was responsible for that offence. The Lieutenant-Governor's immediate concern is with the conduct of the police in respect to the firing on the rioters, and on that point, after the most careful and anxious consideration of the circumstances of the case, he feels bound to record his opinion that the police cannot be censured, and that the responsibility for the death of the unfortunate man who was shot rests entirely with those who, after a protracted defiance of the law through a long series of years, eventually organized armed resistance to the execution of the Civil Court's orders. The police did not proceed to the spot unlawfully, but under proper and legal authority: Azeem Chowdhury and his men were quite well aware that the police were supporting the Nazir at the request of the Judge; and the District Superintendent had taken

the precaution of warning them before starting for the house that, if attacked, the police would fire upon their assailants. Nevertheless, when the police arrived, there was no indication of any intention on the part of Azeem Chowdhury to abandon his determination to resist the law. The District Superintendent was, on the contrary, told at the entrance to the premises that there would be bloodshed if he entered; and when the police moved on, as they were bound to do, they found themselves confronted, threatened and attacked by a large body of armed men, reported to have exceeded 250 in number. The District Superintendent's attempts to frighten the rioters, first, by ordering the police to load in their presence, and next, by discharging his gun, loaded with small shot, proved unavailing, and it was at this stage that some of the constables fired. The Lieutenant-Governor, while deploring the loss of life which resulted, cannot, under these circumstances, condemn the police for having used their arms. The notoriously lawless character of Azeem Chowdhury, the remark of his men to the District Superintendent at the entrance to the premises, the crowds of armed retainers inside, and their aggressive movements, were quite sufficient to show that a determined and desperate resistance was intended, and that even for self-defence only they must meet force with force. It is easy enough to criticise the conduct of the police at a distance, and to contend, as the Lieutenant-Governor has seen it contended, that the resistance offered was no sufficient justification of the course adopted by them. If a continuous and deliberate opposition to the execution of the law is to be allowed to prevail, the criticism may be justified. But the police here were brought into a great difficulty, not of their own choosing, by the violent acts of a man who, from his position in the district, should have been on the side of obedience and order. The alternative before Mr. Rattray was either to recede from the duty imposed upon him (which certainly would have involved censure and punishment), or to break down the opposition; and he rightly, in the Lieutenant-Governor's judgment, chose the latter. The regular enforcement of legal claims is as fundamental a policy of good civil administration as the maintenance of the peace. Both were in jeopardy here, at the instance of a leading zemindar from whom the Government had a right to expect support and not hostility; and the only regret is that the exact technicalities of the law have rendered any mitigation of the primary sentence necessary.

10. In paragraph 43 of his report, Mr. Metcalfe raises the question whether the Magistrate should not himself have gone with the Civil Court officers and taken a larger force of police. It appears, however, that the force sent consisted of all the men in the reserve but three, and that a responsible officer was sent in charge of them. The Lieutenant-Governor does not think that any blame attaches to Mr. Barrow either on one point or the other.

11. I am to request that the result of the proceedings against the other men arrested for complicity in the rioting may be communicated in due course for the information of Government.

No. 2J, dated Pubna, the 16th January 1883.

From—C. T. METCALFE, ESQ., C.S.I., Offg. Commissioner of the Rajshahye and Cooch Behar Division,

To—The Secretary to the Government of Bengal, Judicial Department.

IN accordance with the instructions contained in your letter No. 3831J, dated 30th December 1882, I have visited Pubna, and in continuation of my letter No. 1J, dated 3rd January 1883, informing you of the result of the criminal proceedings taken against Azeemuddin Choudhury, I have now the honour to submit the report called for on the very serious riot which occurred in the village of Dulai on Sunday, the 10th December last.

2. I have visited the locality 23 miles from Pubna, and have had an opportunity of becoming acquainted with the position occupied by the different parties; also of ascertaining the previous civil litigation, as also of the particulars of the resistance offered to the Civil Court Nazir.

3. The history of the litigation which has ruined Azeem Choudhury, and led up to the present case, may be prefaced by a narrative of his family history.

Fakeeruddin Mahomed Asan Choudhury, *alias* Azeem Choudhury, is a son of Munshi Rahimuddin, Meer-Munshi of the Nattore Court, and subsequently Sheristadar of the Rajshahye Court. He amassed a large fortune, bought estates in the year 1219B.S., *i. e.* 70 years age, and built a Musjid and other buildings. Azeem was his sole heir. His forefathers had been at Dulai for many generations, and were poor, and not of any note.

The case of Munshi Rahimuddin is to this day quoted among the natives as an instance of the very large fortunes formerly made by natives in the service of Government. With the fortune realized, he dug a very wide quadrangular moat, and erected a large masonry pile of buildings consisting of two double-storied houses connected by high walls concealing four interior courtyards, which again have double storied rooms constructed around them. The various parts of the house are reached by private staircases concealed in the thickness of the walls. The interior courtyards are reached only through dark and narrow passages. The exterior walls of the buildings enclose walled gardens with masonry tanks and privies for the use of the females of the establishment. The buildings are of a very substantial character, and strong gates protect the entrances to the several parts of the house. The two larger houses facing the main entrance have overhanging balconies. The main courtyard is entered through high gates under an arch. With this stronghold Azeem Choudhury inherited 18 large revenue-paying estates in Pubna, yielding a gross rental of Rs. 90,733 in accordance with former rent-rolls, besides other estates in Rajshahye, Bogra, and Furreedpore.

4. He married many years ago the daughter of a respectable zemindar of Singha in Goalundo, by name Bala Meah Azeem Choudhury by this wife had one son, Ahmed Jan, and two daughters. Before his marriage with this lady (Mussamat Najumanessa Choudhurain) he executed a deed of kabeennama (dowry) under which his wife was entitled to a half-share in his estates. Some time after this marriage, Azeem contracted a second marriage (*nika*) with an Armenian lady of Dacca. In consequence of this second marriage discord arose in the family, the particulars of which it is not necessary to describe; and eventually the wife instituted a suit in the Furreedpore Subordinate Judge's Court on the kabeennama, the original of which was filed with the plaint, but the plaintiff kept a certified copy. During the pending of the suit the original document was stolen and removed from the record. An official enquiry was held, and the whole of the Subordinate Judge's amlah dismissed. This occurred, so far as I can ascertain, in 1858.

5. The Subordinate Judge dismissed the plaintiff's suit, but on an appeal to the High Court the case was decreed to the plaintiff, and that decree was subsequently confirmed by the Privy Council about 1876-77.

6. The original decree was for a small sum, but Azeem Choudhury, although well able to pay up the amount, refused to do so through sheer obstinacy, and allowed the decree of the High Court to run on at 12 per cent. interest, hoping the decision of the Privy Council might be in his favour.

7. To enable her to defend her decree both before the High Court and the Privy Council, Mussamat Najumanessa Choudhurain borrowed money from Mr. N. Pogose of Dacca, and sold him the decree in payment of her debt.

8. This suit for declaration and possession on the kabeennama was instituted in 1858, and was decided about 1878. A second suit was then instituted for mesne profits of the estates decreed by the Privy Council, which suit was decreed both by the High Court and the Privy Council in favour of Mussamat Najumanessa. The decision of the Privy Council was given in 1881.

9. During the pendency of these suits, Mr. N. Pogose had died, and his estate came into the hands of the Official Assignee in Calcutta, who appointed Mr. Brae as his agent.

Although Azeem Choudhury might at any time during the last 20 years have settled the claims against him for a comparatively small sum of money, he has persistently fought, step by step, and availed himself of every device to delay the payment of the Civil Court decrees.

10. His conduct shews that, although possessed of large sums of ready cash, quite sufficient to satisfy his creditors, he has deliberately allowed every part of his landed property to be sold, bit by bit, rather than unbend in any degree and satisfy his creditors.

11. Some time about 1873-74, fearing lest the promissory notes which he held might be attached in satisfaction of the Civil Court decree, he endorsed them over to his son Hyder Jan, the son of the Armenian Jewess previously referred to. Further, to escape arrest himself, Azeem left Dulai and took refuge in Chandernagore, leaving his son in charge of his house and property.

I am informed that the father charges his son with having taken advantage of this trust and confidence to possess himself of money from the father's treasury to buy back his father's estates, which were then being sold for satisfaction of the Civil Court decrees. After purchase the son claimed the estates as his own. Hitherto the father had allowed his son Rs. 75 a month for maintenance. He discontinued the allowance and swore eternal enmity to his son. The son retaliated by claiming the promissory notes which had been endorsed to him to save them from attachment; but as the securities were with the father, neither father nor son could draw the interest, which has never been drawn, and which amounts to several lakhs.

12. Further complications next arose, when the son attempted to realize the rents due on account of the estates he had purchased. The father interfered, and *vice versâ*. The influence of Azeem Choudhury had been very great, and his tenantry at large combined to pay no rents to the persons who had purchased the estates. The result is that no rents have been realised, I am told, for some years.

13. For years past Azeem Choudhury has been implicated in serious cases, and his determined resistance to the Civil Court process is quite in accordance with the lawless character of his previous life.

15. The position of his affairs in last December was this, that all his estates together with his house had been sold, and there was nothing left to him but promissory notes of the value of several lakhs, all endorsed to a son with whom he was on bad terms, and therefore to him valueless. His sole possessions were the cash he had in his house at Dulai, together with the furniture, &c.; but an order had been issued for the attachment of all his property and for the arrest of his person.

16. He was closely watched by the decree-holder, as also by his son, and he could remove nothing. For the last three years he had more or less been in concealment to evade arrest, and he had no resource left but to allow his person to be arrested and the property to be attached, thus allowing of the whole of the promissory notes falling into the hands of his son; or to defend his stronghold, hoping that the terror of his name, and a show of force, would

intimidate the Civil Court Nazir, and the police in support, from effecting his arrest and attachment.

17. At this place it is best that I should preface reference to the occurrences of the 10th December by the following extract from a memorandum drawn up by the Magistrate of Pubna, Mr. F. H. Barrow :—

Memorandum on affairs connected with Azeem Choudhury.

"When I came to the district in May last, the sale of the estates of "Azeem Choudhury had been lately effected, and consequent on them many dis-"turbances were pending. There had lately been a murder case arising from "these disputes, and between 50 and 100 persons had been called upon to shew "cause why they should not give security. There were also many criminal "charges of violent crop-taking, &c., under trial. These cases were variously "disposed of. I had thus my attention at an early period drawn to the need of "watching this part of the country.

"In September I got a letter from Azeem Choudhury himself, saying he was "in confinement, and wishing me to come and see him. To this I replied he "might come in to me. He had also said his enemies wished to make away with "all his money, and his letter was soon followed by a request for a police guard "to bring his treasure into Pubna. This I granted. He accordingly came in, "though not with any treasure, and I gave him an interview. To it I invited "his son, Hydar Jan, who was fighting with him.

"I had understood that Azeem, though owning only between two or three "lakhs of decretal money, for which he was still being harassed, all his property "being attached, and body-warrants against him being at times taken out, had "some seven or eight lakhs in Government promissory notes. I immediately "suggested to him that he should pay off the decree; and as the sole difficulty "of utilising the promissory notes for this purpose was some question of who "was the real holder, the father or son, I attempted to induce them to come to "an agreement. While the father had the notes, they stood endorsed by him "to his son. It seemed therefore that the son had only to re-endorse them back, "when they would be available for clearing off the debt. The son at this time "readily assented to do his part, and I hoped that soon Azeem Choudhury would "be free from the processes of the Civil Court.

"I should mention that I had invited Mr. Brae, the attorney of the Official "Trustee, to come and meet me at the same time, that I might have the advant-"age of hearing from him, while in communication with Azeem Choudhury and "his son, what terms of payment would be accepted. I am sorry to say that "Mr. Brae resented my invitation as an uncalled for interference, and said that "Azeem Choudhury had only to pay the amount of the decree into Court, and "that he would not, owing to his conduct of a fraudulent character in the past, "meet him or discuss the matter through me. By the time Azeem Chowdhury "sent me in two lakhs of promissory notes for the son's endorsement, the latter "declined to fulfil his part and to sign the notes, on the ground that they had "been endorsed to him as a trustee for his father's wives.

"Owing to this my attempts to get the debt cleared off promised to be "unsuccessful. Mr. Brae applied to me for the numbers of the notes, and I "readily gave them. He thereupon applied to the Civil Court, and they were "attached.

"After Azeem Choudhury left Pubna, Mr. Brae obtained a body-warrant "against him, having applied for it whilst he was at Pubna in communication "with me. But nothing came of this warrant.

"In October affairs between Azeem Chowdhury and his son in their disputes "about collections in the estates purchased by the son became threatening. The "father was declaring that his estates thus purchased by his son had been "purchased only *benami* with money supplied by him; consequently he insisted "on continuing collections, and as the son insisted on stopping them, there was "serious danger to the peace. I accordingly asked the District Superintendent "to depute the Inspector of Police to remain at Dulai, and appointing special "constables in all the affected villages, I ordered daily reports to be taken from "the chowkidars of all events happening.

"In the meantime Mr. Brae, as attorney of the Official Assignee, was pur-
"suing his course; and in November he procured an order for the re-attachment
"of the house of Azeem Choudhury. Hearing that the warrant was to be served,
"I consulted with the District Superintendent about the means to be taken to
"preserve the peace. The orders I passed were that the police should be present
"near at hand, but should not aid in giving possession, and should merely inter-
"fere if there was an actual breach. I also ordered that Mr Brae was not to
"go in force to the spot.

"The Naib Nazir of the Civil Court was resisted: that is, some four or five
"men appeared and barred his way; beyond this there was no show of force,
"and the resistance was of a purely formal character.

"Before this attempt to take possession was made, Mr. Brae put in a petition
"to me to grant him police assistance, and I had recorded a memorandum refus-
"ing it, and referring him to the Civil Court. The above resistance therefore
"having taken place, the Civil Court was moved to apply to the Magistrate, and
"permission was also granted to prosecute those who had resisted the Naib
"Nazir.

"On the petition therefore of the pleader of Mr. Brae, I issued warrants
"against those charged with resistance of the Naib Nazir. This was on
" . Subsequently on the I received the order of the
"Judge to render the Nazir assistance to deliver possession. I accordingly
"passed an order to that effect, and the District Superintendent passed it on.
"What happened afterwards I have already detailed in my former report. It
"should be noted that this first denial of police help till the order of the Civil
"Court was obtained must have been known publicly, and I feel sure that the
"subsequent order for police assistance to be given was equally well known.
"As therefore the various proceedings leading up to my ordering the police to
"actively assist must have been known, I considered that the order when
"once passed would be executed without difficulty. Azeem Choudhury in his
"interviews with me gave me no reason to suppose he would oppose himself
"to the law. In fact, from the way he suddenly decamped, hearing of the
"warrant from the Civil Court, I conceived his possessing a dread of the Civil
"Court. He had applied to me to protect him in his journey back from Civil
"Court arrest, and owing to my informing him that I could not, he had so
"hurriedly left. Subsequently I heard that he had left Dulai altogether. The
"resistance to be expected I fancied was of the nature of barring the door, and
"such that a force of 20 police, headed by the District Superintendent, would
"immediately dissipate. That men armed with latties and spears should assemble
"in hundreds never entered my head. There were no questions in dispute
"between two angry parties, which might be set at rest by advice and declara-
"tion of the law, but only the simple order of the Civil Court to be enforced;
"and, as I thought, only the obstruction of a few retainers and domestics to be
"prevented by a judicious show of force. Even if Azeem Choudhury had desired
"to oppose the police, I could not have believed that he would have found persons
"insane enough to assist him in his obstinacy. However, for some reason or
"other, his servants and followers appear to have been possessed with law-
"lessness, and the old man's obstinacy by their aid became an attempt at armed
"defence."

18. This last attempt at arrest, referred to by Mr. Barrow, was not then the first attempt which had been made.

In the early part of 1881 there had been an attempt at the arrest of Azeem Choudhury. An application had been made in May for police aid to protect the peon. The orders of the Magistrate, Mr. Clay, were that two policemen under a superior officer should accompany the Civil Court peon, and if, after effecting entrance in a legal way into the house, he saw signs of resistance, he should retain his footing and send back for further assistance. The Magistrate's instructions were very clear that no aid whatever was to be given by the police in breaking open an outer door, as both section 271 and section 336* forbid the breaking open of any outer door of a dwelling-house. In the case alluded to, a head-constable was degraded by the Magistrate, Mr. Clay, for exceeding his

Civil Procedure Code.

authority, inasmuch as he had stationed constables to prevent ingress and egress to and from the premises.

19. Again in July 1881 the Judge asked for assistance to be given by the police.

20. Again in December 1881 a warrant was taken out for the arrest of Azeem Choudhury, and the Magistrate was requested by the Judge, in his letter No. 22J, dated 10th January 1882, to give proper protection to the peon. The Magistrate's order was that no attempt was to be made to scale any wall or to enter by a window; if resistance was made to the peon on approaching the outer door, or if, having found the outer door open and having entered, obstruction is met with, then further assistance should be called for. If the doors were found to be closed on entering the premises, the police were forbidden to remain on the premises. On all these occasions the doors were found closed. In August 1881 the Magistrate, Mr. Clay, wrote to the Judge of Pubna: "I am aware on the 6th that there was a considerable show of force on the part of Azeem Choudhury, and that the peon and the party with him were in some danger of being ill-treated, but that he (Mr. Clay) did not find that any act was done to disturb the peace, or which can be called an obstruction in the execution of the process of the Civil Court." The letter concluded by enquiring in what way the police could give further assistance.

21. In November 1882 the Naib Nazir had again been deputed to arrest the person of the judgment-debtor, with a view to watch the proceedings, and to render any legal assistance he could. The District Superintendent, on the 18th of November, remained several days on the spot. The Naib Nazir was unable to carry out his orders, and returned to Pubna.

22. In the meantime the wives of Azeem Choudhury petitioned to the Civil Court that the premises at Dulai belonged to themselves by virtue of a purchase they had made at an auction for sale of the judgment-debtor's property in execution of a decree. This plea was set aside, and again a warrant was issued for the arrest of the judgment-debtor and for attachment of his house and moveable property.

In the meantime the Judge had taken proceedings under section 328, and had referred the case to the Magistrate for trial. That case, in which the parties are charged with obstruction and resistance, is still pending.

23. Early in December the Civil Court issued a process under section 318, of the Civil Procedure Code, to deliver possession of the dwelling-house of Azeem Choudhury to the auction-purchaser, and also for the arrest of the person of Azeem Choudhury, and for the attachment of his moveable property.

24. On the 4th of December, the District Judge of Pubna addressed the Magistrate, and requested him to direct the police to give proper protection to the Nazir, and those officers of the Court who may accompany him, in the *discharge of the duty of delivery of the judgment-debtor's residence to the decree-holder*, and also in execution of the warrant of arrest of Azeem Choudhury.

On this requisition the Magistrate passed the following order to the District Superintendent:—"Who is requested to see that protection asked for is granted. He should enquire of the Judge's Nazir about dates. Dated 6th December 1882."

25. On the 7th, the District Superintendent issued the necessary orders to the Sub-Inspector of Dulai, the Inspector being absent engaged on another case. On his return the Magistrate deputed the Inspector, who arrived at Dulai at 3 A.M. on the morning of the 9th December, where Mr. Brae, the Agent of the Official Trustee, was, and also the Civil Court Nazir. The Inspector, after his arrival, sent in a report, in which he stated his apprehension "that there will be a strong and desperate resistance even at the loss of lives on both sides if the Civil Court process was to be actually enforced, or if the Nazir or Mr. Brae's men should attempt to break open the door of the house to effect a forcible entrance in the act of delivering possession." The Inspector further, in his report which I have before me, stated that he heard "that there are about 400 sirdars at hand to make the resistance."

The Inspector further stated that the force of the police he then had (the ordinary strength at the thana) was not strong enough to keep the peace amongst such a crowd of men." He also asked for the presence of the District Superintendent direct, to ensure peace and safety. The report thus concluded: "The Nazir will not proceed to his work till the receipt of an order from you."

On this report the Magistrate wrote as follows:—

"I have spoken to the District Superintendent on the subject of this letter. There is also a letter from Mr. Brae himself confirming the statement of the Inspector. Under these circumstances, I think it is as well that the District Superintendent himself should go, taking with him a force of eight or ten constables. *Possession must then be delivered immediately*, and should the Nazir refuse then and there to proceed to the execution of his duty under the support of the police, the District Superintendent is requested to withdraw the police force, and I will communicate with the Judge and hear his wishes on the subject." Mr. Brae also wrote to the District Superintendent: a copy of his letter is appended.

26. On the morning of the 10th, Mr. Rattray, in accordance with his instructions, reached the place about 10 o'clock A.M.

He found Mr. Brae and the Nazir near the registry office in a tent, with a number of his personal servants—not peons.

As the police were tired after a 20 miles' march at night, they were halted till 11-30, when the Nazir and Mr. Brae went towards the house of Azeem Choudhury. The police force present consisted of the District Superintendent, the Inspector, one Sub-Inspector, two head-constables, and 18 constables, of whom six were armed with muskets. The Sub-Registrar also went with the District Superintendent at his request.

27. When the District Superintendent first arrived at Dulai thana, he was informed by the Inspector, the Rural Registrar, and the Nazir, that Azeem Choudhury's house was full of armed latials, that a cannon had been dragged in, placed behind the main-gate and loaded, and that the inmates of the house were determined to resist to the very last. The report was made when the police party was at a distance of one mile from the house. As the party approached, the bazar in front of Azeem Choudhury's house was found full of people, who appeared very much excited. Before the District Superintendent started at or about 10 o'clock, he had sent word to Azeem Choudhury by persons who represented themselves to be his servants, that if any violence was used or his party was fired upon, he would fire upon the rioters. The police found the front of Azeem Choudhury's house crowded with people, ordinary spectators in appearance, who were ordered to disperse, and warned that they would be dispersed if they continued to mob the place. The crowd broke to re-form behind the police in a dense throng. A guard was left here to prevent the crowd from surging in after the police, but the sentries were unable to resist the pressure, and gave way.

27. The entrance to the premises is through a high arch. This place was blocked by unarmed people, most of whom were half-naked, their bodies oiled. A few were well-dressed, respectable looking men, who advanced to the District Superintendent and clasped hold of his legs, detained him, and begged of him not to proceed, as, if he did, there would be bloodshed, and Azeem Choudhury's people would kill him. The half-naked men were all this time yelling and shouting so that it was difficult to hear or give orders. Mr. Rattray explained to the men who were detaining him the reason why the police were present, and ordered the police to go on in support of the Nazir. A half-naked latial next ran at the police with his head down, with a loud shout; he was unarmed, but charged right into the police rank, and was then knocked down. His companions then ran back turning to the right, and joined a number of men who advanced brandishing latties and spears and shouting according to the Inspector, "*Ali, ali*"; according to the Nazir, "*Dhor, Dhor*." The District Superintendent, thinking the men meant

mischief, halted the police, and ordered them to load, with a view of frightening the crowd. After loading he pushed on, and ordered the police to arrest the armed men. As the police, in order to get at these men, advanced, the men separated; one party, about 25, ran round to the right, and others joined a body standing in front of a small doorway. As the police came near, they were assailed with brick-bats, the police party being struck repeatedly. Over the little door was a balcony running the whole length of the house. This was filled with people, as also an open low terrace on the left, densely crowded with people armed with spears, who were holding themselves up as if in the act of throwing them.

28. As Mr. Rattray halted his police, the clubmen advanced, brandishing their spears. The constables began falling back, getting mixed with the crowd; only four men remained with the District Superintendent. The head-constable, a Punjabee, raised his musket to fire. Mr. Rattray forbade him to fire, but believing he would be speared, took his gun out of the hands of his orderly, and fired a charge of snipe-shot at the men's legs in front of the door as they advanced. The shot was fired low. The men then rushed behind a wall.

29. The entrance to the door had been narrowed by piles of jute having been piled up. Behind these a number of spearmen were stationed guarding the passage to the door. After the first shot was fired a number of men armed with spears again rushed forward at the police. Mr. Rattray, seeing them coming, fired a second barrel of shot, hoping to stop them. Of the eighteen men who formed the police, only three constables, an orderly, and the head-constable were at this time with the District Superintendent; the rest were hanging back, unwilling to advance. The men were all scattered. Four shots were then fired by these men from behind without orders. Mr. Rattray states he was unable to get his men on because of the brick-bats which were being thrown.

30. After the shots were fired, the clubmen ran for the small door, blocking it up with timber and bales of jute. The police then rushed forward, and took shelter under the balcony to escape the brick-bats. The party was still outside the house, and there they remained some time. A deputation of men, whose names are known, then came to Mr. Rattray, and begged again of him not to try and enter the house, and that they would try and induce Azeem Choudhury to come to terms with Mr. Brae. The police then moved to the main entrance, and remained there outside for several hours, during which time one Abdul Suttur came backwards and forwards, offering the decree-holder various sums of money. Through the crevices of the gate a large number of spearmen were seen, who kept up a yelling and shouting.

31. It appears that during this time Azeem Choudhury was removing his wives, and some portion of his treasure, from another part of the house by a way at the back. The negotiations failing, and Abdul Suttur not again appearing, and the day closing, about 5 o'clock the Nazir ordered the doors to be taken off their hinges. The masonry was broken down, and the gates lifted off their hinges. The Civil Court Nazir then entered the premises. Two other doors were found barred, and were broken before entrance was obtained. In one of the inner courtyards, after the third gate was forced, two men were found lying wounded, who said they had been shot by the police; one had a bullet wound through his body, who has since died. The second man found was wounded with a bullet through the fleshy part of the leg. He is convalescent in hospital.

32. Inside were found 15 swords, 16 spears, three guns (one loaded), a great number of latties, also bows and arrows.

33. The property in the house was then attached by the Civil Court peons. Three iron chests were also found, which, when opened two or three days afterwards, were found to contain Rs. 1,29,000. A police guard was left that night in the house. The District Superintendent, after despatching the wounded men in palkies to Pubna, remained that night on the spot, and early proceeded to Pubna to report the matter to the Magistrate. On

the 12th, the Magistrate arrived. It was reported that Azeem Choudhury was then in concealment at the house of Kurshed Alum, a mat house adjoining his own, and connected with a doorway, which house was included in the Civil Court decree. The inmates denied he was there, but on the premises being searched he was found inside and arrested.

34. Azeem Choudhury stated before the Magistrate that he was not responsible for the riot, but that his servants had it in their power to appoint whom they pleased, and that they must have collected the clubmen.

35. No spears were thrown at the police, or any gun fired from the inside of the house Had the police forced their way into the house, the resistance must have ended in much greater bloodshed. Many of the spears found were English hog-hunting spears by Manton.

It is reported that there were upwards of 250 armed spearmen.

36. In making this enquiry. I have had the advantage of discussing the matter with the counsel for the Official Assignee, as also with the Counsel for Hydar Jan, the son of Azeem Choudhury, and with Hydar Jan himself, as also with the counsel of Azeem Choudhury and with the Sub-Registrar of Dulai, who was an eye-witness of the riot. The better to understand what occurred, I visited Azeem Choudhury's house, and went over the premises and the scene of the riot with the Magistrate, District Superintendent, the Police Inspector, and the Sub-Registrar.

The points to which in the course of this enquiry I have directed my special attention are—

1st.—The causes which have led to the litigation which placed Azeem Choudhury in the power of the Civil Court.

2nd.—Whether there is any reason to believe that Azeem Choudhury has been the victim of any conspiracy.

3rd.—Whether there was anything reprehensible in the conduct of the police in their support to the Nazir of the Civil Court on the 10th of December, or on any subsequent date.

4th.—Whether any order of the District Magistrate passed in connection with this case was illegal, or, if legal, unduly severe.

37. The first point has been fully explained. On the second point, of conspiracy, I find no suspicion whatever of such a contingency, or that Azeem was forced into resistance with a view to involve him in criminal proceedings. I find that Mr. Barrow did his best to bring Azeem Choudhury to reason, and advised him to put an end to all future harassment by payment. The decree was for Rs. 2,36,000. Subsequent events have shown that he had in loose cash Rs. 6,000, in his treasury Rs. 1,29,000, and Government notes about his person said to aggregate Rs. 2,00,000, so that he could have compromised the decree and freed himself from all apprehensions regarding the arrest of his person, or the attachment of his household goods, but he would not be guided by Mr. Barrow's advice.

38. The reason being that Azeem hoped to induce his son to re-endorse part of the notes back to him with a view to satisfy the decree. Azeem wished also to conceal the possession of the cash and notes amounting to some Rs. 3,35,000, his object in wishing to obtain re-endorsement of some of the promissory notes, being that he hereafter might use that act of his son as evidence to refute his son's contention in Court that he could not re-endorse the notes as he held them *on trust* for members of his family.

39. Mr. Barrow failed as a conciliator, because the son contended that, as the interest due on the notes was sufficient to pay the decree, it was wasteful to sell the notes. To this proposal the father would not agree, because it would have placed the notes and the interest in the hands of his son. Rather than do this, he preferred once more to bar the doors of his house against the process of the Civil Court, and trust to the chapter of accidents to help him.

40. As to the third point, I find that, with the exception of four or five men, the conduct of the rest of the police was marked by extreme timidity. The shots were fired more in self-defence than aggressively. Had the District Superintendent and the four men alluded to showed any irresolution, very fatal

results would have followed, considering the excited state of the men armed with clubs and spears.

41. The determined character of the defence was the more marked by use having been made of piles of bales of jute, which the father had taken by force from Hydar, his son, some days previously, and which were used as gabeons to narrow the passage to the entrance door, and to give protection to the spearmen who lined the narrow passage.

42. In my opinion, the use of a shot-gun is to be regretted, for the reason that a shot-gun is not a legal weapon of legal defence or for enforcing a legal executive order. If it was necessary for defence muskets should have been fired. The District Superintendent no doubt was placed in a difficult position: his orders were to assist in giving possession, if the Civil Court officers were resisted; they were seriously resisted. No doubt the District Superintendent might have advised the Civil Court Nazir to desist from enforcing his process and have sent for the Magistrate, and for such further reinforcement as he might be able to bring, but the evidence shews clearly that the police were attacked, and acted in self-defence.

43. I have considered also whether Mr. Barrow was justified in only sending the District Superintendent of Police. Ought he to have gone himself, and employed a large force of police? The daily state of the police strength shews that only three men more were available from the reserve. The conduct of Azeem Choudhury in seeking the advice of the Magistrate, and in coming in person to the station a short time previously, and placing Government securities in Mr. Barrow's hands, appears to have misled the Magistrate; such conduct gave no grounds for any presumption that a determined opposition would be made. Mr. Barrow regarded the Inspector's statements as exaggerated.

44. As regards the fourth point, I find the Nazir was armed with three powers—(*a*) to give possession of the dwelling-house to the purchaser under section 318 of the Civil Procedure Code, (*b*) to attach moveable property, (*c*) to arrest. To carry out attachment and arrest, the Civil Procedure Code, sections 271 and 336, gives no power to break open any outer door. Under these sections, when the Civil Court Nazir found the outer doors blocked, no further steps could have been taken. Under section 318 the occupant of the house may be removed if necessary to give possession. In approaching the house the police were attacked.

Possession was taken of the house after it had been vacated by the occupants.

45. The following extract from the Magistrate's decision disposes of the point whether the orders passed were unduly severe:—

"He himself* is said to be 70 years of age, and his look is that of a very old man. Though holding him as criminally liable, I could not inflict on him a heavy sentence.

* Azeem.

The real criminality I conceive rests with those who managed the affairs of the vast establishment, and whose orders the servants obeyed. These are still at large, and have so far evaded all attempts to arrest them."

Dated the 9th December 1882.

Demi-official from—T. Brae, Esq.,
To—B. Rattray, Esq., District Superintendent of Police.

The Inspector informs me that serious resistance is likely to be made when the Civil Court Nazir proceeds to execute the warrant for possession of the house. He has ascertained that a large body of lattials has been collected, and the small police force here, even if to be relied on, of which there are doubts, is quite unable for the duty required. He is therefore reporting to you, and will ask you to come out with a large force of constables armed.

A small number of men will not suffice to overawe Azeem's party into obedience to law, and with but a small force to protect, the attempt to execute the warrant for possession may result in loss of life.

Rough sketch-plan of Azeem Choudhury's house and premises at Dulai, the scene of the riot on December the 10th.

A. Circular-fronted double-storied house with balcony filled with armed men, windows defended by men throwing brick-bats.

B. and C. Doors barred.

D. Passage defended by spearmen. The roof of this passage above also defended by spearmen.

E. Large masonry house with overhanging verandah, in which police took shelter from brick-bats. Filled with spearmen.

o o Piles of jute.

F. Small door through which spearmen re-entered the house.

The bricks were thrown from A and E. Large piles of bricks found in the rooms above.

No. 656G, dated Pubna, the 4th December 1882.

From—C. A. KELLY, ESQ., District Judge of Pubna and Bogra,
To—The Magistrate of Pubna.

I HAVE the honour to request that you will be good enough to direct your police to give proper protection to my Nazir, and those officers of the Court who may accompany him, in the discharge of the duty of delivery of the judgment-debtor (Azeemuddin Choudhury's) residence to the decree-holder, and also in execution of the warrant of arrest of the said Azeemuddin Choudhury.

Magistrate's order.

To the District Superintendent, who is requested to see that the protection asked for is granted. He should enquire of the Judge's Nazir about dates, &c.

6-12-82. F. H. B.

Order issued on Sub-Inspector of Dulai.

6-12-82. B. R.

JUDGMENT OF THE MAGISTRATE OF PUBNA

EMPRESS *versus* FAKIRUDDIN CHOWDHURY *alias* AZIM CHOWDHURY.

THIS is a most serious case of riot in which the Nazir of the Civil Court was resisted when he went to give possession to the decree-holder, and the police, under the District Superintendent himself, were opposed by a crowd of lattials and others armed with spears. The accused Azim Chowdhury is a large zemindar of the district, living at Dulai, and owes a large sum of money to the Official Trustee on behalf of the estate of N. P. Pogose. The Nazir of the Judge's Court tells us that he proceeded to Dulai on the 8th to deliver possession of the house of Azim Chowdhury and of 34 beeghas of land attached. In the meantime the Judge had addressed the Magistrate of the district, asking that the police should assist the Nazir in delivering possession. The Inspector of Police says he had been at Dulai for some time attempting to keep the peace between Azim Chowdhury and his son. First the Naib Nazir came on 18th November to deliver possession The police stood by to see there was no breach, but not being ordered to help did nothing. The Naib Nazir consequently, after giving notice of the possession and proclaiming the sale, had to return and report that he could not give possession. He tells us that he saw and spoke to Mojizuddin, the admitted dewan of Azim Chowdhury, at the time he was going through the formalities mentioned. However, he was opposed by men, who said the house had been purchased by Azim Chowdhury's wives, and he had no power to overcome their opposition. On the 8th, the Inspector received the order of the Magistrate to assist the Nazir. Mr. Brae, the decree-holder, appeared on the 9th. By this time the Inspector had made enquiries, and anticipating serious resistance he applied to the District Superintendent for extra police. The Inspector says every one knew of the decree, and there was great excitement. Mr. Rattray tells us that he passed on the Inspector's report to the Magistrate, and received orders himself to take a body of police and render assistance. On the morning of the 10th he arrived at Dulai, and there met the Nazir and Mr. Brae, the attorney of the decree-holder.

Mr. Rattray immediately on his arrival prepared to assist the Nazir. He gave out publicly, and before those whom he believed to be servants of the accused Azim Chowdhury, that he had come to give possession, and would, if necessary, use firearms. Then about midday he started with the force of 20 men or so to the house of which possession was to be delivered. First he was met by a crowd, then by a band of ruffian-like-looking men then unarmed; and men with them besought him not to enter as the house had women inside; that the people would resist him and there would be bloodshed, "khun" no doubt being the word used. The District Superintendent put these men aside, and advancing passed the "deori" into a kind of yard in front of the house. I myself have seen the house, as after the occurrence the District Superintendent came into Pubna, and on hearing his statement I ordered the issue of warrant, and myself left for Dulai next morning, the 12th. On that day I arrested Azim Chowdhury, and the same day began the trial.

The house is a large two-storied one, with a broad moat round it. The front, which presented the only means of ingress, is partly flanked by walls. Straight in front of the entrance gate or "deori" of the yard stands the massive entrance of the house. The accompanying sketch will give some idea of the place.

HOUSE.

To advance and gain an entrance by the main gate would have been a most dangerous attempt. It was commanded by balconies, and when the gate was reached no entrance could have been effected without a strong body of workmen. The whole face of the house was also strong, and the flanking walls gave cover to adversaries.

When the District Superintendent advanced through the first archway, he saw a large crowd of men armed with latties. It is said by the Inspector that the first opponents retreated to accused Kurshed Allum's house on the right, and, returning armed, joined the general body. The Nazir puts it that the first party, 25 or so, were joined by a reinforcement of about 50 men with latties. These men were shouting—*már*, *dhor*. The Nazir says

the Inspector gives their battle shout as *Ali Ali*. At the same time that this large armed crowd below were threatening immediate violence, a large body of men armed with spears and brick-bats came in view. It appears that the spearmen occupied the roof of a one-storied house to the right of the main gate, while the men with brick-bats held the balconies There was great confusion and shouting, and the somewhat severe cross-examination of Mr. Bell has necessarily brought out some discrepancies as to who had spears and as to the number of men occupying the various points. The District Superintendent and all the witnesses say that their advance was not unattended with anxiety and fear of danger to the lives of themselves and the force generally. Most dreadful threats were used; men armed with spears, latties, and brick-bats were visible; and the police force were all in the open, while their enemies were either skirmishing round them, or securely posted up on a roof or balcony. It cannot, therefore, be expected that there would be a complete agreement about the details. About the serious nature of the resistance, however, there is no doubt. There were crowds of opponents in the open, and besides the balcony, which was a very long one, and the one-storied roof being closely occupied by armed defenders, there was the reasonable inference that the house itself contained others unseen. No firearms were seen; but who could feel sure that men in the house had not firearms. Brick-bats were thrown, and some hit the constables. Spears were threateningly pointed. Mr. Rattray had the orders of the Magistrate to assist the Nazir to deliver possession, besides the assembly before him was an unlawful, riotous one; and as a police officer he was bound to disprese it. Even apart from the execution of the warrant of possession, a substantive crime had now been committed. One hundred or two hundred men were rioting armed with deadly weapon. At this time, had the decree-holder and the accused come to terms, and the order of possession been stayed, the duty of the District Superintendent to disperse the unlawful assembly remained.

He tells us that he considered affairs most critical and accordingly fired his gun loaded with small shot. This had no effect, and he fired a second barrel. The constables then without waiting for orders fired three or four shots. Unfortunately the guns were loaded with ball. Even then there was no immediate giving in; brick-bats were still thrown. Soon after a cry arose that a man was killed and the defence collapsed. The police advanced to the main gate and negotiations were again opened. Of course, it was still open to the decree-holder to accept payment. Messengers passed, and two or three hours thus passed before the big gate was forced; some of the masonry had to be broken, and the gate was taken off its hinges. The police then entered, and the place was found well nigh deserted. One or two servants of the house appeared, and two wounded men were found. These were first tended there, and then sent in to the Pubna Dispensary, where one has since died.

The above is an account of the transaction, and it now remains to consider whether the present accused Azim Chowdhury has made himself criminally liable. Accused has been defended since the 18th by Mr. Bell, Barrister. On the 19th much of the evidence was gone into afresh; the charge was drawn up on the 20th, and Mr. Bell then intimated that he should not call any witness for the defence: and he merely cross-examined Mr. Rattray, the District Superintendent, after the charge had been drawn. He then addressed the Court, and his address occupied some time, and was concluded on the 21st. As there was no more evidence to be produced I adjourned the case till to-day for orders.

The charges this Court thought fit to draw up are (1) abetment of resistance to public servant, the abetment consisting of the accused not giving information of the unlawful assembly, and by other means; (2) conniving at hiring, &c., of persons to join in an unlawful assembly, which connivance is shown by not giving information and by allowing his servants and agents to be concerned in the resistance; (3) abetting a riot with deadly weapons, the abetment consisting of the same acts and omission as the connivance in the former charges.

Mr. Bell meets these charges by arguing that Azim Chowdhury was neither owner nor occupier of the house and consequently had no liability of giving information laid on him, and cannot be held to have had any share in the resistance, as he was nothing but a visitor or lodger in the house. It is admitted that the house and grounds were sold in 1878 and purchased by Azim Chowdhury's wives, and Mr. Bell has sought to show from a few statements made by Iddu Khan, a witness called for the prosecution, that since that date Azim Chowdhury has had nothing to do with the management of the house, and that Abdul Chutter and Mojizuddin, the principal amlah, have been the servants of accused's wives. It is therefore reasoned that since the house was sold in 1878, Azim Chowdhury has ceased to be the proprietor, and has also relinquished all management, that therefore he is not owner or occupier, and can in no ways be held responsible for the riot.

It is also urged that Azim Chowdhury is an old man of impaired faculties, and could not be expected to manage.

To prove the ownership of the house, the prosecution put in, though the Counsel for the defence objected, the judgment of the Judge of Pubna dismissing the claim of the wives. When the house was attached again, they objected to the attachment. This objection was overruled by the Judge on the 27th January 1882. If I am right in admitting this document, it forms very strong proof of the accused's ownership. I admitted it on the following grounds. The defence is that the house is not accused's, but his wives, but the claim of the wives to hold the house had just been dismissed. Ownership after all can only be decided by the law. The law had said his wives do not own the house; it disproves the assertion therefore of the defence that they do, proving a fact inconsistent with the defence.

However, the liability of the accused does not depend on ownership. It was never intended that the criminal court should decide such difficult questions before a person could be convicted. Under section 155 the occupier is equally liable, and I have therefore only to determine whether Azim Chowdhury was the occupier of this house, and, as such, connived at and promoted the hiring and engaging of the persons who committed the riot.

The proofs of occupancy, if not of ownership, are that the house is known as his; the Inspector immediately before had interviews with him there, and people even on the day and at the time of the riot spoke of him as the person interested in the delivery or non-delivery of possession. The decree on which the warrant of delivery of possession of this house was granted was against him. Mojizuddin, whom he admits to be his dewan, came and spoke to the Naib Nazir, when he went to deliver possession; and it is Mojizuddin who appoints the servants, was also arrested in a house adjoining; and there is no attempt to show that he was not present at the time of the riot. And, moreover, the chests of treasure attached and opened by the Nazir, and found to contain Rs 1,29,000, belonged to Azimuddin, for he gave the Nazir the keys.

So that, even if the judgment dismissing the claim of the Bibis is not evidence, there is still ample proof that Azim Chowdhury is the occupier of the house intended by the law. It is clear that, having been once the proprietor, he never relinquished the possession in favour of his wives. In fact, even if there were no proof of his occupancy, it might be presumed that the purchase by his wives had not deprived him of it.

A note in MacPherson's Morgan's Penal Code says, under section 150, "the ordinary law of abetment might be sufficient to punish those who by engaging and hiring others instigate them to join an unlawful assembly. But if the prime agent keeps aloof, and the work of hiring, though known to him, is left entirely to his managers or servants, he will probably succeed in evading the ordinary law. The terms of this section therefore extend not only to acts of instigation by the master, but to acts of instigation when done by others (his agents) and knowingly permitted or connived at by him"

The above remarks appear completely to cover this case, as it says further on "direct acts of hiring may not be often procurable The relation of the parties, their conduct, and the circumstances generally must furnish grounds of presumptive proof."

In the present case there are the strongest grounds of presumptive proof connecting Azim Chowdhury with the occupancy of the house and ground attached, and with an interest in it, and that for his benefit therefore the riot was committed. It may be safely asserted that if he cannot be held guilty as the occupier, nobody can. Were he acquitted, the Bibis would plead that their holding the house was only *benami*, and no principle could be reached

I hold therefore that Azim Chowdhury was the occupier of the house in the sense intended by the law. Though the fact of disproving the strong presumption of possession raised by the evidence of the prosecution lies peculiarly in his power, his Counsel has chosen to call no defence witnesses. The strong presumption therefore remains unrebutted, and this Court must consider the occupancy proved.

And if accused was the occupier, he must be presumed to have hired, engaged, or connived at the hiring and engagement of the persons forming the unlawful assembly. It was his duty actively to co-operate with the law. This of course he never did, and *under the circumstances* his neglect to do so is a proof of abetment.

The argument that he is an old man, unfit to manage his affairs, has some weight. He is evidently a self-willed, obstinate old man, whose resistance to the legal decisions of the Courts amounts almost to imbecility. But he is still responsible for his perversity and obstinacy, which have now become criminal. I am willing to believe that he has had unprincipled and active advisers; and while I shall take this fact into consideration in awarding the punishment, I cannot let this be accepted as a defence to the charge.

He is a man also of wealth and position in the district, and though the resistance to lawful authority that he has abetted is of a very criminal nature, I shall inflict on him only imprisonment of a simple kind I have forgotten to mention in my judgment that 16 spears, 15 swords, and 3 guns were found in the house when entered; and this armoury of weapons was evidently in the hands of the rioters. One of the guns was loaded, and the swords were of a very serviceable description. From these preparations and from the weapons found it is evident that nothing but a large force of police, backed up with determination, could have taken possession of the house. That none of the police were killed or dangerously wounded is an extremely fortunate occurrence for the accused. Had any lattial rashly hurled a spear, there might have been serious loss of life, or again, had not the police force been so large and headed by a European officer, this undisciplined mob might have been emboldened to make a very effective resistance, which would either have driven off the police, or caused great loss of life. However, the accused is entitled to benefit by the slightness of the actual resistance.

I am clearly of opinion that accused's offence comes under section 150, and is not of the less serious nature covered by section 155. He would have been guilty under the latter section even if he had been absent, if his occupancy had to be still proved. But accused was actually on the spot, and must have witnessed all the preparations or heard of them, and exactly occupies the position of the person sought by the law to be made responsible for a riot, though not actually and bodily present in the affray. I shall therefore convict under all the charges

The Court finds Fakiruddin *alias* Azim Chowdhury guilty of the first charge, and under sections 183 and 109, sentences him to 6 (six) months' simple imprisonment and Rs. 1,000

(one thousand) fine, and in default of payment to suffer another one month's simple imprisonment.

The Court finds Fakiruddin *alias* Azim Chowdhury guilty of the second charge under sections 150 and 148, and sentences him to a fine of Rs. 1,000 and in default to one month's simple imprisonment.

The Court finds Fakiruddin *alias* Azim Chowdhury guilty of the third charge under sections 148 and 109, and sentences him to a fine of Rs. 1,000, and in default to one month's simple imprisonment.

PUBNA,
The 23rd December 1882.

F H BARROW,
Offg. Magistrate.

JUDGMENT OF THE JUDGE OF THE 24-PERGUNNAHS

AZIMUDDIN CHOWDHURY ... ... *Appellant.*

PRISONER, appellant, has been charged and convicted under section 183, coupled with sections 109, 155; under section 148, coupled with sections 150 and 155; and lastly under section 148 coupled with section 109 of the Penal Code.

The Court is decidedly of opinion that the above charges as they stand have not been established. The prosecution had to show that prisoner was guilty of abetment under section 109, and of connivance under section 150. They certainly have not sufficiently proved any act of connivance under section 150, and all that they have satisfactorily shown in the way of abetment under section 109 is that the prisoner did not give any information to the police. Looking to the undoubted fact that the police were notoriously possessed of full information as to the probability of an illegal assembly taking place, it seems clear that prisoner cannot be said to have been guilty of abetment simply because he did not tell the police what they already knew.

The Court, however, after careful consideration of the evidence, has arrived at the conclusion that the prosecution has established certain facts which support the conviction of prisoner under sections 148 and 155. It has been satisfactorily shewn that, when the police arrived on the spot, they there found on the premises of which they had to deliver possession an assembly of persons who behaved in such a manner as to produce the impression that resistance to lawful authority was intended. It has also been shown that the result of the conduct and attitude of the said assembly was a disturbance which resulted in a serious loss of life. Lastly, there is in the opinion of this Court sufficiently good testimony to show that the prisoner was the owner of the land, respecting which the riot took place for his benefit, and that he did not use all the lawful means in his power to prevent such illegal assembly and riot from taking place.

Messrs. Branson and Bell have appeared for the prisoner, and have contended in the first place that there was no illegal assembly in the premises when the police arrived on the spot. Only the usual household servants were present, and all they did, it is argued, was to entreat Mr. Rattray, the District Superintendent of Police, not to enter the house.

This Court, however, cannot concur in this view of the case. It was well known that the decree-holder had a clear legal right to be put into possession; that he had once already failed to obtain possession; and that the Judge had applied for police assistance in effecting the execution of the decree. Under such circumstances it was evidently the duty of the owners, occupiers, and household servants to avoid any such assemblage or demonstration as would justify the inference that further resistance was intended. Instead of this, not only were a considerable number of persons collected on the premises, but they behaved in a manner likely to excite the large crowd of sympathisers who had assembled outside. They indulged in loud protestations, threw themselves at Mr. Rattray's feet, and although they certainly asked him not to come in, they added to their entreaties the very significant words that if he did come in there would be murder, or, as the defence interpret the words used, that certain ladies would kill themselves. Looking to the whole circumstances of the case, this Court has no hesitation in holding that the assembly was at the very outset an illegal one, got up with the intention of impeding in some way or other, if not of actually resisting to the very end, the execution of the decree.

Messrs. Branson and Bell have further contended that even if it be admitted that there was an illegal assembly when the police first arrived on the spot, the riot which took place afterwards was caused by the injudicious conduct of Mr. Rattray in then and there knocking down an individual who, he says, rushed to the centre. It was only after this display of violence on the part of the police that, so it is argued, brickbats began to fly about and the disturbance actually began.

With reference to this argument, this Court holds that it is of no real weight. It is possible, but by no means certain, that the brickbats should not have been thrown if Mr. Rattray, instead of knocking down the man who rushed forward, had had him quietly arrested. But even supposing that a less violent course than that adopted by Mr. Rattray, at the early stage of the affair might have had the effect of preventing a disturbance, or that greater forbearance later on, when the brickbats were flying about, might have rendered the disturbance less serious, those persons who by their unwarrantable behaviour caused the police (so it it said) to lose their presence of mind must be held primarily responsible for what occurred. Want of coolness on the part of members of the public force on such diffi-

cult occasions may expose them to blame on the part of their superiors, or to severe criticism on the part of the public at large, but can in no way give immunity to persons who bring about circumstances of a nature clearly calculated to produce in the minds of persons entrusted with the execution of orders issued by the tribunals of the land the impression that illegal resistance is intended, the Court has no hesitation in holding that, whatever might be the view taken as to the action of the police, its judiciousness or otherwise, the persons who first formed the illegal assembly on this occasion must be looked upon in the eye of the law as having caused the riot which subsequently took place.

Messrs. Bell and Branson have lastly contended that the prisoner is not liable under the provisions of section 155, because it has not been shown that he is an owner or occupier of the premises where the disturbance took place. They also argue that the finding of the Civil Court to the effect that the prisoner is the rea owner, is not evidence against him in this case. Mr. Bell specially argues that prisoner could not be held to be an occupier, and, as such, liable under the provisions of this section. Either his wives are the real owners, or the prisoner is. If the former are owners, they and they only are responsible.

With reference to the above arguments, the Court has to remark that it quite concurn with the learned Counsel for the prisoner in thinking that the finding of the Civil Court is not evidence, and also in the view that the prisoner could not well be held liable as as occupier

It is, however, of opinion, after a very careful consideration of the evidence, that it cannot be for a moment held that the prosecution have in no way proved the prisoner to be the real owner Putting altogether aside the finding of the Civil Court, there is a body of evidence on the part of the prosecution, which, taken as a whole, irresistibly leads, *in the absence of rebutting evidence*, to the conclusion that prisoner is the real owner, and that the recent purchase in the name of his wives was a mere make-believe which did not effect any actual and *bonâ fide* change of proprietorship. It has been shown that prisoner resided till very recently. indeed though perhaps not at the very moment of the riot, in the premises which formerly belonged to him in name as well as in fact that his position before the world continued to be the same as before, that a large sum of money belonging to him was kept in the house, that he in a conversation with the Sub Inspector spokò of the house as his. Lastly, there is the sworn evidence of Iddu Khan as to the house being now actually the property of prisoner. All the general circumstances and features of the case also tend to support such an inference. In short, it can hardly be denied that the prosecution have established a very strong and not a mere *primâ facie* case of ownership as against the prisoner which he was bound to disprove by material evidence of some sort, the more so as the facts necessary to establish his wives' real ownership were peculiarly within his knowledge, indeed so much so that very direct evidence on the subject could not fairly be expected at the hands of the prosecution.

It would, however, appear from the record that the prisoner has done absolutely nothing to show that the ladies, his wives, are the real owners, except to state in the most general way that on a very recent occasion, when the premises were put up for sale by a judgment-creditor, they were bought up in the name of the ladies. The mere allegation of such a circumstance, though it certainly has the effect of throwing the legal burden of proof on those who assert that the purchase was effected by others than those whose name appears in the affair, does not seem to this Court, in the absence of any good corroborative proof, and looking to the great prevalence in this country of such nominal purchases, especially under circumstances similar to those which existed in the present instance, to be of any great weight. or to have any great probative force as compared with the evidence to the contrary put forward by the prosecution and commented upon above. The Court has no hesitation in holding, with reference to this the last and certainly the strongest point raised in prisoner's favour, that he has not succeeded in rebutting, as he might easily have done, had the property been really transferred to his wives, the case of real ownership set up against him by the prosecution.

The Court having for the above reasons arrived at the opinion that the facts established by the prosecution are sufficient to support a conviction under section 148 and section 155, it only now remains to decide as to the amount of punishment which should be inflicted. Looking to the very serious results of the disturbance, and to the fact that the prisoner is a person of position and education who ought to have thoroughly well understood the necessity of at once conforming to the orders of a legally constituted tribunal, it is quite clear that a very material fine ought to be imposed. The sentence of this Court therefore is that prisoner do pay two thousand rupees fine or in default do suffer two months' simple imprisonment.

J. F. BROWNE,

Sessions Judge, 24-Pergunnahs.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 24th February 1883.

	No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVN.	1	Burdwan, Feb. 24 '83	Nil	Weather—seasonable. Sugarcane and *rubbee* crops being cut. Cholera reported from several thanas.
	2	Bankoora, „ 24 „	Nil	Weather—bright at the beginning of week, but latterly cloudy. Pressing of sugarcane still going on. Prospects of crops on the ground fair. Fever abating.
	3	Beerbhoom „ 24 „	Nil	Weather—seasonable. Cold-weather crops being harvested with a fair outturn. Sugar manufacture going on. Public health good.
	4	Midnapore „ 24 „	Nil	Weather—seasonable. *Boro* rice is being sown. Public health good.
	5	Hooghly, „ 24 „	Nil	Weather—getting unseasonably warm. Harvesting of winter crops nearly over. Public health good; but cholera is reappearing in a few villages.
		Howrah „ 26 „	Nil*	Weather—still cool; heavy rain on Sunday night (25th) State and prospects of crops good General health good.
		Central Districts.		
PRESIDENCY DIVN.	6	24-Pergunnahs, Feb. 26 '83	Nil*	Weather—seasonable. Harvesting of late rice completed. *Rubbee* crops being gathered. Fever and cholera have abated.
	7	Nuddea, „ 24 „	Nil	Weather—clear and cold after a few days of hot weather. Prospects of crops good. Fever decreasing
	8	Khoolna, „ 24 „	Nil	Weather—seasonable. Cold-weather crops are being stored. Outturn average. Public health fair.
	9	Jessore, „ 24 „	Nil	Weather—warmer; bright. Winter crops almost harvested. Spring sowings going on. General health good.
	10	Moorshedabad, „ 24 „	Nil	Weather—getting warmer, but fine. Prospects of winter crops good. *Boro* rice cultivation has commenced. There are a few cases of small-pox in thanas Dowlatabad and Gowas.
RAJSHAHYE AND COOCH BEHAR DIVN.	11	Dinagepore, Feb. 23 '83	Slight rain on 22nd.	Weather—cool. Prospects of pulses good. Preparation of land for *bhadoi* rice going on. Price of rice has risen slightly; it sells at from 19 to 28 seers per rupee.
	12	Rajshahye, „ 24 „	Nil	Weather—seasonable. Sugarcane crop good. *Rubbee* crops fair. Fever prevalent. Cholera in outpost Tahirpore.
	13	Rungpore „ 23 „	Nil	Weather—uncertain and at times cloudy. Mustard, sugarcane, ginger, &c., are still being harvested. Rain would benefit wheat and pulse. Mango trees are in blossom No cholera reported.
	14	Bogra, „ 24 „	Nil	Weather—still cold and bracing. Hemp and sugarcane good; *kaon*, *kherachi* and pulses fair. Public health good. A few cases of cholera reported from thana Bogra, and of chicken-pox from thana Sherinkandi.
	15	Pubna, „ 24 „	Nil	Weather—cool and fine Crops good throughout the district.
	16	Darjeeling, „ 24 „	Nil	Weather—high wind for part of week, otherwise fine. Wheat and barley coming on well.
	17	Julpigoree, „ 24 „	Nil	Weather—clear and getting warm, though somewhat variable. Standing crops doing well. Land being prepared for *bhadoi* paddy. Public health good.
		Cooch Behar, „ 22 „	Nil	Weather—becoming warm West wind during day. Prospects of tobacco and other standing crops favourable. Harvesting of mustard-seed still going on. Public health good.
		Eastern Districts.		
DACCA DIVN.	18	Dacca Feb. 24 '83	Nil.	Weather—seasonable. Prospects of *boro* paddy and winter crops good. Harvesting of mustard-seed continues.
	19	Furreedpore, „ 24 „	Nil	Weather—cold and clear. Standing crops doing well Ploughing for *aus* is going on. General health fair. A few cases of cholera reported from Palong.
	20	Backergunge, „ 22 „	Nil	Weather—hot for the season of year. Outturn of *amun* rice good. Prices moderate. General health satisfactory.
	21	Mymensingh. „ 23 „	Nil	Weather—getting warm. State and prospects of crops good. Public health generally good.
CHITTAGONG DIVN.	22	Chittagong. Feb. 27 '83	0·78†	Weather—seasonable till 25th, since which rainy. Prospects of spring crops fair. Prices have somewhat risen. A few cases of cow-pox reported. Public health generally good.
	23	Noakholly, „ 22 „	Nil	Weather—rather warmer; occasionally cloudy; mornings generally foggy. Winter crops are suffering a great deal from the long drought. Rain is wanted throughout the district.
	24	Tipperah, „ 23 „	Nil	Weather—fair; temperature changeable. State and prospects of crops good. Rape seed being harvested. Cultivation in good progress
	25	Chittagong Hill Tracts. „ 20 „	Nil	Very hot clear weather. Sugar still being worked off. Mustard crop reaped. Tobacco doing fairly *Jhums* nearly cut.
		Hill Tipperah. „ 21 „	Nil	Weather—getting warmer. Sugarcane still being cut. Prospects of chillies and tobacco favourable. Public health good.

* For week ending 24th instant.
† For week ending 26th evening.

	No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.				
PATNA DIVN.	26	Patna, Feb. 24 '83	Nil	Weather—seasonable. Reaping of mustard, pea and *mussoor* is fast going on. Wheat and barley are ripening. Collection of opium has commenced. Public health good.
	27	Gya, „ 24 „	Nil	Weather—pleasant. Thrashing of paddy almost finished. Prospects of *rubbee* crops promising. General health good.
	28	Shahabad, „ 24 „	Nil	Weather—fair, except in Bhaboua sub-division, where fair and cloudy at intervals. Harvesting of pea crop in progress. Prospects of other *rubbee* crops generally favourable, except in Bhaboua sub-division, where wheat, barley and linseed are reported to have been damaged by blight owing to cloudiness of weather.
	29	Durbhunga, „ 24 „	Nil	High west wind blowing. Barley and wheat are ready to be cut. Tobacco crop being cut. Prices stationary. Public health generally good.
	30	Mozufferpore, „ 24 „ Hajeepore ...	Nil 0·09	Weather—getting warm. *Rahar*, wheat and poppy slightly injured by frost. Other *rubbee* crops doing well. Fever still reported from Seetamarhi and elsewhere, otherwise public health good
	31	Sarun, „ 24 „ Gopalgunge ...	Nil 0·10	Weather—bright and clear; west wind blowing. Prospects of *rubbee* crops continue favourable. Linseed rather poor. Indigo sowings commenced. General health good.
	32	Chumparun, „ 24 „	N	Weather—seasonable. Prospects of all crops, with the exception of poppy, continue favourable. Public health generally good.
BHAGULPORE DIVN.	33	Monghyr, Feb. 24 '83	Nil	Weather—seasonable. Westerly wind blowing. Pulses slightly damaged by late rain. Prospects of wheat and barley good. Public health good.
	34	Bhagulpore, „ 24 „	Nil	Weather—seasonable. State and prospects of crops fair. Public health good.
	35	Purneah, „ 24 „	Nil	Weather—cold; westerly wind. Prospects of crops good. Health good.
	36	Maldah, „ 24 „	Nil	Weather—cold and clear, but getting warm in the day *Rubbee* crops looking well. Prices of food-grains stationary. General health good.
	37	Sonthal Perghs. „ 24 „	Nil	Weather—getting rapidly warmer in the day; nights still cool. There are very little crops now on the ground. Some cases of small-pox reported from Godda sub-division.
ORISSA.				
ORISSA DIVN.	38	Cuttack, Feb. 23 '83	Nil	Weather—seasonable. Reaping of *sarad* crop completed. *Rubbee* crops being gathered. Wheat, *dalua* rice and tobacco growing well. Common rice selling at from 22 to 30 seers per rupee. Public health generally good, except in pergunnah Romito, where cholera is reported to have appeared.
	39	Pooree, „ 22 „	Nil	Weather—seasonable. Harvesting of *sarad* crop still going on. *Dalua* rice plants growing well. Miscellaneous crops good. Prices stationary. Cholera and cattle-disease still reported
	40	Balasore, „ 23 „	Nil	Weather—morning and evening cool, hot in the daytime. *Rubbee* crops are being thrashed. Sugarcane-pressing still going on. Small-pox reported from some places.
CHOTA NAGPORE.				
South-West Frontier Agency.				
	41	Hazaribagh, Feb 23 '83	Nil	Weather—clear and cold. Prospects of standing crops good. Cases of small-pox still reported from some of the thanas. General health good.
	42	Lohardugga, „ 24 „	Nil	Weather—seasonable. Rain wanted for spring ploughings in the head-quarters sub-division. *Rubbee* harvest in progress. Public health good, but cattle-disease is on the increase in Palamow.
	43	Singbhoom, „ 23 „	Nil	Weather—seasonable. Cold-weather crops doing well. Small-pox continues in the district, but is decreasing. General health otherwise good.
	44	Manbhoom, „ 24 „	Nil	Weather—fine and cool, but getting gradually warmer. Cane-pressing continues: outturn good. Wheat and other standing crops doing well. Small-pox reported from Raghunathpore and Bagmundi, and cattle-disease from Jaipore.

Published for general information.

The total fall from 1st January to 24th February 1883	0·07
The average fall of the corresponding period for 24 years, S. G. Office	1·36

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≡ fog, ◬ dew.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

METEOROLOGICAL OFFICE, INDIA,
The 26th February 1883.

		Inches.
The total fall of rain from 18th to 24th February 1883	.. ...	Nil.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA,
The 26th February 1883.

HENRY F. BLANFORD,
Meteorological Reporter to the Govt. of India.

Report of Fluctuation of Traffic on the Tirhoot State Railway for the month of January 1883.

THE total quantity of goods carried during the month of January 1883 aggregated maunds 3,09,000 as compared with maunds 2,30,950 carried during the corresponding period of 1882, and maunds 1,91,056 carried during the previous month, showing an increase of maunds 78,050 and 1,17,944 respectively.

Of the several increases and decreases, the following are the most prominent ones and worthy of special notice:—

INCREASE.

Coal ... ... Mds. 13,230

This large increase is principally due to heavy despatches to Durbhanga for the Civil Buildings and to the Eastern and Western Extensions for brick burning

Food-grains ... ... Mds 4,724

The brisk trade has been done during the month in oats to Calcutta.

Hides and Horns ... ... Mds. 2,456

During the first-half of the month there was a brisk demand for Durbhunga hides, and very favourable rates for despatches were obtained; but at the close of the month prices declined by about eight annas, and despatches fell off somewhat, or the increase would have been much larger.

Indigo ... ... Mds. 3,314

The increase under this head is explained in last month's traffic report.

Piece-goods ... ... Mds. 3,207

A total weight of 12,783 maunds of this class of traffic has been carried during the month against 9,576 maunds for the corresponding month of last year—a result that must be looked upon as satisfactory.

Railway materials ... ... Mds. 18,116

Permanent-way material is still being pushed forward for the extensions.

Salt ... ... Mds. 25,998

Prices have been easier at the port, and dealers have, no doubt, taken advantage of the opportunity to supply the up-country golahs.

Saltpetre ... ... Mds. 6,299

The demand in Calcutta for shipment has been brisk during the month under review, and prices have been good—both causes likely to stimulate despatches.

Tobacco ... ... Mds. 2,822

As anticipated in November's report, an increased traffic, under this head is still being carried

DECREASE.

Lime and kunker ... ... Mds. 7,913

This is a fluctuating traffic, and depends entirely on building or road operations

TRAFFIC DEPARTMENT.

Statement showing Increases and Decreases in Maundage of principal Staples carried over the Line during the month of January 1883 as compared with the corresponding period of 1882.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTICE.

The 27th February 1883.—It is hereby notified, for general information, that the Lieutenant-Governor intends, in accordance with the recommendation of the Municipal Commissioners of Sitamarhi, in the district of Mozufferpore, made at a meeting, to sanction the levying by them, under section 77 of the Municipal Act, of a tax upon persons occupying holdings within the municipality according to their circumstances and property within the municipality in lieu of the rate at present levied on the annual value of all holdings situated within the municipality.

COLMAN MACAULAY,
Secy. to the Govt. of Bengal

NOTICE.

The 1st March 1883.—It is hereby notified, for general information, that the Lieutenant-Governor intends, after one month from this date, to confirm the following bye-law, framed by the Commissioners of the Suburban Municipality under section 256, Act V (B.C.) of 1876:—

"No hut or other building the external roof or walls of which are made of grass, leaves, mats, or other inflammable materials, shall be erected, renewed, or thoroughly repaired within the limits of the municipality, except with the sanction of the Commissioners."

"Any person infringing this bye-law shall be liable to a fine not exceeding Rs. 20, and to a daily fine not exceeding Rs. 5 for continued infringement."

COLMAN MACAULAY,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 2nd March 1883.—With reference to the rules under the Petroleum Act, 1881, published under the notification dated the 18th July 1882, at pages 617-18, Part I of the *Calcutta Gazette* of the 19th idem, the Lieutenant-Governor is pleased, with the previous sanction of the Governor-General in Council, to notify that, for a period of six months from this date, the declaration required in Rule 2 of the said rules may be submitted to the Port Officer by the agents or consignees of the vessels.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 5th March 1883.—In exercise of the power conferred upon him by section 85 of Act VII of 1871 (The Indian Emigration Act), the Lieutenant-Governor is pleased to appoint the senior Covenanted Civil Servant, other than the Magistrate of the district, exercising the powers of a Magistrate of the first class at the head-quarters of the district of Sarun, to perform the functions of a Magistrate under that Act.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 6th March 1883.—Notification dated the 28th October 1863, published in the *Calcutta Gazette* of the 7th November 1863, which declares that no inward bound vessel, wind and weather permitting, shall pass Diamond Harbour without delivering to the pilot, Customs officer, or other person duly authorized to receive it, the manifest or report required by section 33 of the Customs Act, VI of 1863 (corresponding with section 53 of Act VIII of 1878), is hereby withdrawn.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 6th March 1883.—Plans and an estimate, amounting to Rs. 2,06,120, for the construction of a new dredger required for use in connection with the Wharves and Jetties of the Commissioners for Making Improvements in the Port of Calcutta, having been submitted by their Officiating Vice-Chairman with his letter No. 4017, dated the 6th January 1883, the Lieutenant-Governor, with the previous approval of the Governor-General in Council, sanctions the expenditure under the provisions of section 35 of Act V (B.C.) of 1870.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 2nd March 1883.—In supersession of the Notification dated the 8th January 1883, published at page 22, Part I of the *Calcutta Gazette*, dated the 10th idem, the following amended order, issued by His Excellency the Governor in Council of the Straits Settlements, dated the 2nd February 1883, is republished for general information :—

GOVERNMENT NOTIFICATION—No. 56.

THE following Order by His Excellency the Governor in Council, in substitution for the similar Order dated the 8th September 1882, and published as Government Notification No. 474 in the *Government Gazette* of the 10th of November 1882, is published for general information.

By His Excellency's command,

C. J. IRVING,
Acting Colonial Secretary.

COLONIAL SECRETARY'S OFFICE,
Singapore, 2nd February 1883.

WHEREAS by Indian Act No. XIII of 1854 it was, among other things, enacted that it shall be lawful for the Governor-General of India in Council, from time to time, to reduce the tolls payable under the said Act in respect of all vessels passing "The Straits Lights: And Whereas by Ordinance No. II of 1867 the powers vested by the said Act in the Governor-General of India in Council were vested in the Governor in Council of the Straits Settlements: And Whereas it is expedient to reduce the tolls payable under the said Indian Act:

It is hereby ordered by the Governor in Council, that on and after the 1st day of January 1883, the tolls payable in respect of all vessels liable, under the said Indian Act, to pay tolls for passing the Straits Lights shall be as follows :—

1.—If the voyage be one in the ordinary course whereof such vessel would pass the whole of the said Lights, at the rate of two cents of a dollar or eight pies of a rupee for every ton of her burden.

2.—If the voyage be one in the ordinary course of which she would pass any one or more of the said Lights, but not all of them, at the rate of one cent of a dollar or four pies of a rupee for every ton of her burden.

By His Excellency's command,

A. P. TALBOT,
Clerk of Councils.

COUNCIL CHAMBER,
Singapore, 2nd February 1883.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 6th February 1883.—It is hereby notified for general information that the Lieutenant-Governor proposes to issue the following revised rule as rule 16 of the rules regarding salt, on which duty has not been paid, conveyed under bond from Chittagong to Naraingunge.

Revised Rule 16.

IT is to be understood also that before permission can be given to transport salt to Naraingunge under bond, the bonder will be required to construct a suitable warehouse at Naraingunge, to be approved and licensed by the Collector, together with suitable accommodation for the warehouse establishment, also to be approved by the Collector. He will also be required to enter into an engagement with the Collector to defray the cost to Government of the establishment noted in the margin, which will be appointed by the Collector for the guard and supervision of the warehouse.

	Rs.
1 Darogah on	50
2 Peons at Rs. 6 each ...	12
Cost per mensem ...	62

The rules contained in paragraphs 5, 11, and 13 of section II of the Salt Manual shall apply generally to the appointment and payment of this establishment, and to the construction and repair of the warehouse and establishment accommodation.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 24th February 1883.—The following additional Port Rule under section 7 of Act XII of 1875, fixing the scale of charges for mooring, &c., in the port of Chandbally, having been approved by the Lieutenant-Governor, is notified for general information :—

Rule.

THE charge for the use of buoys Nos. 1, 2, and 3, laid in mid-stream, and off the jetties of the India General Steam Navigation Company and the Orissa Steam Packet Company, and of Messrs. Macneill and Company, shall be at the rate of Rs. 15 per mensem.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 26th February 1883.—The following notice is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

BAY OF BENGAL.

Hooghly River Notice.

THE Port Commissioners of Calcutta hereby notify that in consequence of the extension of Middleton Sand, a temporary light vessel will be moored in the following position from the 15th March to the 10th November, both days inclusive :—

Gasper light-vessels, in line N. W. ½ N.
Saugor light-house, N. E. by N., distance $4\frac{3}{10}$ miles.
Long Sand Spit Buoy, N. by W., distance 1 mile.
Middleton Spit Buoy, S. E. ¼ E., distance 2¼ miles.

22 feet of water at lowest low-water spring tides.

The light is a fixed white light elevated 21 feet above the sea, and should be visible in clear weather from a distance of six miles.

During the day this light-vessel will exhibit from the mainmast head a small black ball over a larger one, the hull painted red, and "Long Sand" painted in white letters upon her side.

By order of the Commissioners,

E. W. PETLEY,
Deputy Conservator, Port Approaches.

PORT COMMISSIONER'S OFFICE, *the 27th January* 1883.

[Second Publication.]

NOTIFICATION.

The 27th February 1883.—The following notice is published for general information :—

KRISHNA SHOAL LIGHT VESSEL.

PORT OF RANGOON.

Notice to Masters of Vessels.

THE light ship *Colombo* having been sent to Calcutta for repairs, her place has been taken by the schooner *Alguada*, which vessel will show the usual lights. Her masthead light is not so bright as the *Colombo's*, consisting of only four instead of eight lanterns placed horizontally.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situated in the district of Backergunge, will be put up to sale at the Backergunge Collectorate on Tuesday, the 27th March, corresponding with 14th Chaitra 1289.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

BANK OF BENGAL,
Calcutta, the 1st March 1883

J. GORDON, Chief Acctt. & Dy. Secy.
(964—1)

By order of the Directors,
R. HARDIE,
Secretary and Treasurer.

Forest Department, Bengal, Sunderbun Division.

NOTICE.

ONE teak, one deodar log, and thirty-one pieces of pine are now lying at the Government Timber Depôt of Tangara khal station, and twelve teak, one sal, and two deodar scantlings at the sub-station of Tangara khal.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the officer in charge of the depôt, or at the office of the undersigned, and after paying salvage, &c., upon the logs to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

G. W. STRETTELL,
Dy. Consr. of Forests, Sunderbuns Divn.

Dated Calcutta, the 10th January 1883;
No. 3, Hungerford Street.

Forest Department, Bengal, Sunderbun Division.

NOTICE.

ONE teak log is now lying at the Government Timber Depôt of Khulna station.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the officer in charge of the depôt, or at the office of the undersigned, and after paying salvage, &c., upon the log to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

G. W. STRETTELL,
Dy. Consr. of Forests, Sunderbuns Divn.

Dated Calcutta, the 22nd February 1883;
No. 3, Hungerford Street.

Notice.

Oudh Forest Department.

BYRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHUND RAILWAY.

FROM this date the prices of sâl beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet in length, at Rs. 2-10 per cubic foot.
22 „ „ 2-12 „
23 „ „ 2-14 „
24 „ „ 3 „

Above the lengths given two annas per foot run will be charged.

Any inches over the foot will be charged as a foot.

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at „ 2-4 „
Under 7 feet, at „ 2 „

The above prices are for ordinary building purposes.

For *Planking, Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, Oudh Circle.

KANHYA LAL, in charge Byramghat Depôt.

The 22nd May 1879.

These rates will remain in force till further notice.

CAMP BANDGAON,
The 14th February 1883.

A. L. HOME,
Offg. Conservator of Forests, Bengal.

BENGAL CIVIL FUND.

At the Half-yearly General Meeting of Subscribers to the Bengal Civil Fund, held at the Town Hall, on Monday, the 29th January 1883, *at* 10 A.M.

PRESENT:—The Hon'ble W. F. McDonell, V.C.; the Hon'ble L. R. Tottenham; the Hon'ble A. T. Maclean; H. L Harrison, Esq., B.A.; D. R. Lyall, Esq.; the Hon'ble J. O'Kinealy; J. Westland, Esq.; A. C. Tupp, Esq., B.A.; A. P. MacDonnell, Esq., M.A.; H. J. S. Cotton, Esq.; C. A. Wilkins, Esq.; F. W. Badcock, Esq.; the Hon'ble Colman Macaulay, M.A.; C. W. Bolton, Esq.; W. D. Blyth, Esq., B.A.; C. S. Bayley, Esq.

D. R. Lyall, Esq., in the Chair.

The following report was submitted by the Managers:—

REPORT.

1. The Managers submit the proceedings for the past half-year for the consideration and sanction of the meeting.

2. Subject to the approval of the subscribers, they have admitted to the benefits of the Fund the following families:—

Mrs. Alexander	£ 300	The widow of the late Mr. R. Alexander, C.B., Annuitant of 1861, who died on the 16th August 1882.
Mrs. Trotter	£ 300	The widow of the late Mr. R. Trotter, Annuitant of 1852, who died on the 4th October 1882.
Mrs. Finch	£ 300	The widow and one daughter of the late Mr. R. H. Finch, who died on the 15th November 1882.
One daughter	30	
Total ...	330	
Miss Hathorn	£ 150	The daughter of the late Mr. H. V. Hathorn, Annuitant of 1852, who died on the 23rd November 1882.
Mrs. Rivaz	£ 300	The widow and two daughters of the late Mr. J. T. Rivaz, Annuitant of 1851, who died on the 29th November 1882.
Two daughters	200	
Total ...	500	

3. An application has been received by the Managers from Mr. George Harper, on behalf of Mrs. Margaret F. Campbell, an Incumbent under the Old Rules, to allow him and Mrs. Campbell's son, Lieutenant-General J. D. Campbell, to draw Mrs. Campbell's Annuity, as she has become incapable, owing to illness, of managing her own affairs. There is no provision made in the Old Rules for cases of this description. Under the special circumstances of the case, however, the Managers have consented, subject to the approval of this meeting, to allow Mr. Harper and Lieutenant-General Campbell to draw Mrs. Campbell's Annuity on their signing an agreement to indemnify the Fund against any loss which may be incurred in consequence of the permission given. The Agents have since intimated the death of Mrs. Campbell.

4. A letter has been received from Mr. R. B. Chapman, C.S.I., an Annuitant, in which it is suggested that the Agents of the Fund in London should be authorized, in anticipation of the sanction of the Managers and Service, to advance an instalment of Annuity as well as the donation of £200 or £300, as the case may be, to the families of Subscribers becoming Incumbents on the Fund. The Managers have informed Mr. Chapman that they are unable under the existing Rules, to carry out his suggestion. With a view, however, to lessen the delay which now takes place, an arrangement has been made with the Agents for the transmission to the Civil Fund Office, by telegram, of the news of the death, in Europe, of any subscriber who has recorded, under Article V in the Fund Office the evidence necessary for the admission of his family to Fund benefits. In such cases the Managers will issue the necessary instructions to the Agents by telegraph. The following Circular on the subject has been addressed to all Married and Widower subscribers.

No.

FROM C. S. BAYLEY, ESQ.,
Secretary, Bengal Civil Fund,

TO

Calcutta, the

SIR,

IT has been brought to the notice of the Managers of the Fund that inconvenience is not unfrequently caused to the families of subscribers dying in Europe owing to the delay involved in obtaining the instructions of the Managers regarding their admission to Fund benefits, and it has been suggested that the Agents should be authorized, in anticipation of formal sanction, to pay at once an instalment of the pension and any donation to which such families may appear to be entitled.

2. The adoption of this course is, the Managers believe, not open to them under the Rules of the Fund. With a view, however, to lessen the delay which now takes place, and thus as far as possible to obviate hardship to the families of deceased subscribers, they have made arrangements with the Agents that intimation shall be given by telegraph of the decease in Europe of any subscriber who may, under the last clause of Article V of the Rules of the Fund,* have recorded in the Fund office the necessary evidence regarding his marriage and the age of his wife. In all such cases the Managers will ordinarily telegraph the necessary instructions to the Agents for the admission of the family to the benefits of the Fund and for the payment of pension and donation. In such cases it is believed that very little time will be lost.

* Every married subscriber shall be at liberty to submit, for the examination of the Managers, a certificate of his marriage, and a certificate of baptism or other evidence of the date of birth of his wife. Should such certificates or evidence be accepted, the dates shall be recorded, and it shall not ordinarily be necessary thereafter to give evidence regarding the facts.

3. A list will be transmitted to the Agents of those subscribers who have, up to the present time, taken advantage of the last clause of Article V. This list will contain the necessary particulars as to the number and ages of the persons who, in the event of decease of such subscribers, would be entitled to become incumbents on the Fund, and supplementary lists containing similar information will from time to time be forwarded to the Agents.

4. The number of married subscribers to the Fund who have hitherto availed themselves of the permission given by the Rule, is not very great, and the Managers desire me therefore to point out to you the advantage which you may secure to your family by taking steps for the registration of the required evidence. Evidence of the date of birth or baptism of children is not required under the Rules.

I have, &c.,

(Signed) C. S. BAYLEY,

Secretary.

A copy of this Circular will in future be forwarded to all subscribers on marriage.

Mr. Chapman has also suggested that the subscription of Annuitants, if paid at home, should be accepted at £10 8*s* 4*d* as the equivalent of £12 10*s*. Mr. Chapman states that taking 1*s* 8*d* as the exchange of the day, an Annuitant must either pay his subscription in India or lose £2 1*s* 8*d* a year, being one-fifth of the payment due from him in India. The Managers have informed Mr. Chapman that as his suggestion would involve a considerable loss to the Fund they are unable to accept it. It has, however, been pointed out that under Article IX of the Rules of the Fund it is always open to any Annuitant to pay his subscription in India and thus to gain any benefit which may result from the state of the exchange.

5. The Managers will propose the following addition to, and amendment of, the rules:—

After Article III add—

"In the case of subscribers holding appointments of which the pay has been fixed on a basis which specially exempts the holder from the 4 per cent. Annuity Fund deduction the salary shall, for the purposes of this Rule, be taken as if the said 4 per cent. were added to the nominal amount."

6. An application has been received from Mrs. Chapman, widow of Mr. C. Chapman, for the continuance, under Article XXIX of the Rules of the Fund, of her son, Edmund Frere Chapman's pension beyond the age of 21 years. The certificate received from Dr. Christie states that Mr. Chapman is suffering from amentia, and is as well now as he ever will be. In all probability the disease will increase as life advances. Subject to the approval of subscribers, Mr. Chapman's name will be retained on the list of Incumbents.

7. The Managers desire to report for the information of the subscribers that a reply, No. 59, dated the 11th January 1883, has been received from the Government of India to their letter No. 65, dated the 5th April 1882, regarding the proposed transfer of the Fund to Government. The Managers will at an early date circulate for the information of the service copies of the letter and of the extract from the Secretary of State's despatch which accompanied it, together with a memorandum on the subject by Major-General Hannygton. Copies of the papers will also be circulated to all Annuitants with the same object as the terms which are now proposed will materially affect their interests. A reply will at once be given to the Government of India stating the course which has been adopted, and a further communication will be made to that Government when the wishes of the service and of Annuitants have been ascertained.

8. Mr. G. J. B. T. Dalton has incurred the penalty specified in Article XXXVII of the Rules by his omission, for more than one year, to pay the subscriptions from his furlough allowances necessary to keep up his interest in the contingent benefits of the Fund. Mr. Dalton has explained that the copy of Article XXXVII which was sent to him was not received, and that he was under the impression that all subscriptions due to the Fund were deducted from his furlough pay.

The Managers submit the question of his re-admission on payment of all arrears of subscription with interest at 8 per cent. for the decision of the meeting.

The accounts for 1881-82 are submitted.

Abstract of the Accounts of the Bengal Civil Fund for 1881-82.

CIVIL FUND OFFICE,
The 29th January 1883.

E. E.
CHARLES S. BAYLEY,
Secretary and Accountant.

Proposed by *Mr. Wilkins*, seconded by *Mr. Badcock*, and carried—

That the Managers' proceedings in admitting the families of the late Messrs. R. Alexander, C.B., R. Trotter, R. H. Finch, H. V. Hathorn, and J. T. Rivaz, to the benefits of the Fund be confirmed.

Proposed by *Mr. Harrison*, seconded by *Mr. Blyth*, and carried—

That the action of the Managers in the case of Mrs. Margaret F. Campbell, an incumbent under the old rules, be confirmed.

Mr. Cotton then on behalf of the Managers proposed the following addition to and amendment of the rules:—

After Article III add—

"In the case of subscribers holding appointments of which the pay has been fixed on a basis which specially exempts the holder from the 4 per cent. Annuity Fund deduction, the salary shall, for the purposes of this rule, be taken as if the said 4 per cent. were added to the nominal amount."

Mr. Cotton observed that the change which would be effected by the rule was purely nominal, the rule being designed to meet the case of certain appointments from the holders of which subscriptions were no longer demanded on account of annuity; the nominal salary of the appointments having been reduced by the orders of the Government by an amount equivalent to the subscription which was previously levied.

Mr. Westland observed that the proposal at present affected Members of Council, Judges of the High Court, and one or two other officers, the nominal salary of whose appointments had been reduced by 4 per cent., and from whom no subscriptions on account of annuity are now required; but apparently more salaries would in future be regulated on the same principle.

The *Hon'ble C. Macaulay* seconded the proposal, which was carried unanimously.

Proposed by *Mr. Harrison*, seconded by *Mr. MacDonnell*, and carried—

That the action of the Managers in allowing Mr. Edmund Frere Chapman's name to remain on the list of incumbents be approved and confirmed.

The *Hon'ble W. F. McDonell* observed with reference to the Secretary of State's despatch, received with the letter No. 59, dated the 11th January 1883, that the Managers might receive great assistance in dealing with the proposals made by the Secretary of State and now under consideration, if they were permitted to associate with themselves any Members of the service at large whom they might wish to consult; and he requested the subscribers present to authorize the Managers to do this.

Mr. Wilkins observed that there was nothing in the Rules to prohibit the Managers from consulting anyone from whose advice they might anticipate assistance. *Mr. Westland* considered, however, that it was very desirable that any step of this kind which the Managers might take should be taken with the approval of the subscribers present at the meeting.

The proposal was approved by those present.

Proposed by *Mr. Wilkins*, seconded by the *Hon'ble W. F. McDonell*, V.C., and carried—

That Mr. G. J. B. T. Dalton be restored to the full rights of a subscriber on payment of all arrears of subscription with interest at 8 per cent.

Proposed by the *Hon'ble C. Macaulay*, seconded by *Mr. Cotton*, and carried—

That the accounts for the year 1881-82 be approved.

Proposed by the *Hon'ble A. T. Maclean*, seconded by *Mr. Wilkins*, and carried—

That the following gentlemen be elected Managers for the ensuing year:—H. A. Cockerell, Esq., C.S.I.; The Hon'ble L. R. Tottenham; H. L. Harrison, Esq.; The Hon'ble J. O'Kinealy; H. J. S. Cotton, Esq.

A vote of thanks to the Chairman was—

Proposed by the *Hon'ble A. T. Maclean*, seconded by *Mr. Cotton*, and carried.

BENGAL CIVIL FUND OFFICE,
The 29th January 1883.

D. R LYALL,
Chairman.

(972—1)

NOTICE is hereby given that the rents due from tenants of Government estate Sahiban Bagicha, known as Garden Reach, Khiddirpur, Aripnuggur, Dum-Dum, Paharpur, Alipur, Jerat, Pulta, &c., are payable on 30th September and 28th March each year in half-yearly instalments. If not paid on or before that date into the Alipore treasury the arrears will be realized according to law.

2. The next instalment is due on 28th March 1883.

C. C. STEVENS, Collector.

24-Pergunnahs Collector's Office, the 19th Feb. 1883.

Notice.

IT is proposed that the usual mêla shall be held a Titalya between the 6th and 28th Choit 1289 B.S., corresponding to the 19th March and the 10th April 1883. Huts will be erected for the convenience of travellers and police will be on the ground to keep order.

J. T. BABONAU, Deputy Magistrate, in charge Julpiguri.

Dated Julpiguri, 22nd February 1883.

Notification.

IN supersession of the notification published at page 849, Part II, of the *Calcutta Gazette*, dated 21st May 1879, the following is published for general information:—

Under the provisions of section 2, Act VI of 1876 (Chota Nagpore Encumbered Estates Act), Baboo Adhur Kally Mukerjee is appointed to be the manager, and the management is vested in him, with retrospective effect, from the 9th May 1879, of the immoveable property of the late Tekait Churamon Singh of Gadi Doranda, in the district of Hazareebagh, and of any other moveable property to which the said Tekait was entitled in his own right, or which he was entitled to redeem, or which might have been acquired by or devolve on him, or which may be acquired by or devolve on his heir during the continuance of such management.

J. F. K. HEWITT, Commr. of Chota Nagpore

Chota Nagpore, the 15th February 1883. (961—1)

LOST CURRENCY NOTES.

THE following Currency Notes of the Government of India, Calcutta Circle, are stated to have been lost, and payment of their value has been claimed by the persons whose names are placed against the numbers; any other person having these Notes in his possession, or claiming a right to them, is warned to communicate at once with the undersigned:—

H. E. STOKES,
Acting Collector.

Calcutta Port Trust.

DEBENTURE LOAN.

THE Calcutta Port Improvement Act, 1870, Act V (B.C.) of 1870, and the Calcutta Port Improvement Act Amendment Act of 1880, Act IV (B.C.) of 1880, amended by Act I (B.C.) of 1881, issue of twenty lakhs of rupees, 4½ per cent. debentures, having a currency of thirty years.

Tenders are invited for twenty lakhs of rupees in 4½ per cent. debentures, to be issued under the provisions of Act IV (B.C.) of 1880 and Act I (B.C.) of 1881 to provide for the cost of works sanctioned by His Honor the Lieutenant-Governor of Bengal, which loan, and the interest thereon, will be a charge on the property of the Commissioners.

The debentures will be for sums of Rs. 100 each or multiples of Rs. 100, as may be desired, made payable to order, and carrying interest at the rate of 4½ per cent. per annum, payable half-yearly (on the first day of April and first day of October) at the office of the Port Commissioners, upon presentation of the debentures. Two per cent. of the amount tendered for to be paid on application, and the balance on the 1st of April 1883, from which date interest will run.

The deposit of two per cent. will be returned if an allotment is not made, and it will be forfeited if an allotment after being made is not fully taken up.

In case a less number of debentures is allotted than is applied for, the excess of the deposit will be applied in or towards payment of the balance due upon such number as may be allotted.

Tenders in the annexed form should be filled up and sent to the Secretary to the Port Commissioners before noon of Wednesday, the 14th day of March 1883, accompanied by a receipt from the Bank of Bengal for deposit of two per cent upon the amount of each debenture applied for. The tenders will be opened in the presence of the Port Commissioners.

The minimum rate at which tenders will be accepted will be recorded under the signature of the Chairman, and before the tenders are opened, but will not be made public unless some tender is rejected only because it is below the recorded minimum.

Forms of tenders can be obtained on application to the Secretary to the Port Commissioners, and the form of debenture can be seen at the office of the Secretary. A separate tender must be made for each rate.

By order of the Commissioners,

G. H. SIMMONS, Secretary.

Port Commissioners' Office, dated 21st February 1883.

FORM OF TENDER.

CALCUTTA PORT TRUST 4½ PER CENT. DEBENTURE LOAN OF 1883.

To

The Secretary, Port Commissioners,
Calcutta.

Sir,

I beg to apply for _____ debentures of Rs. _____ each of the above issue in the terms of the advertisement issued by you dated February 21st, 1883, and I send herewith Bank of Bengal receipt for Rs. _____ being 2 per cent. deposit per debenture, and I undertake to accept the same or any less number the Commissioners may allot to me, and to make the full payment in respect thereof to the Bank of Bengal on or before the 1st of April 1883. The amount I undertake to pay for these debentures is Rs. _____ per cent. or Rs. _____ for each debenture.

Yours faithfully,

Name _____

Address _____

Dated _____ 1883. (920—3)

Notification.

THE Corporation of the Town of Calcutta are prepared with the sanction of the Lieutenant-Governor of Bengal, under the provisions of section 334 of Act IV (B.C.) of 1876, to receive tenders for a Debenture Loan for 3,00,000 (three lacs of rupees) on the security of the Rates, Taxes, and Dues imposed and levied under the said Act to be expended on the drainage improvements of the town of Calcutta.

2. Debentures will be issued for the said amount bearing interest at the rate of 4½ per cent. per annum, payable on the 1st April and 1st October of each year and having a currency of 20 years.

3. The form of the debenture bonds will be that given in the seventh schedule of the aforesaid Act.

4. No debenture will be issued for any sum less than Rs. 500 (five hundred) and above that amount. Debentures will be issued only for even sums of Rs. 100 (one hundred).

5. Subscriptions will be received by the Bank of Bengal and debentures will be issued as soon as possible in exchange for the receipts.

6. Tenders for the whole or any part of the above-named sum of Rs. 3,00,000 (three lacs) will be received by the Secretary to the Corporation up to 2 o'clock P.M. of the 21st March 1883.

7. Each tender must be made out in the form annexed to this notification and enclosed in a sealed cover superscribed "Tender for Municipal Loan for 1882-83."

8. Tenders will be opened at the Municipal office on Wednesday, the 21st of March 1883, at 2 o'clock P.M., a minimum rate having been previously fixed.

9. Each tender must be accompanied by Government promissory notes or currency notes equivalent to 2 per cent of the amount tendered.

10. The deposits or tenders which may not be accepted will be returned on application

11. In case of two or more tenders at the same rate (being not below the minimum) a *pro rata* allotment will be made.

12. The rate stated in a tender must not contain any fraction of an anna. If a rate containing a fraction of an anna is inserted in any tender such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

13. In order to avoid mistakes a separate tender must be made at each rate tendered and a separate deposit must accompany each such tender. It is desirable that the tender or at least the name of the person making the tender and the amount and rate tendered should written in English.

C. W. HOPE,
Acting Secretary to the Corporation.

Form of Tender.

I HEREBY tender for rupees of the loan advertised in the notification published in the *Calcutta Gazette*, dated 7th March 1883, and agree to pay for the same subject to the conditions notified at the rate of Rs. annas* for every hundred rupees allowed to me.

* Fractions of one anna not allowed.

2. I enclose Government promissory notes or currency notes for Rs. and engage, if my offer be accepted, to pay to the account of the Municipality at the Bank of Bengal, Calcutta, on or before Saturday, the 31st March next, the amount of the accepted tender.

N.B.—A separate tender must be made at each rate tendered and a separate deposit must accompany each tender. In order to avoid mistakes it is desirable that the tender or at least the name of the person making the tender, and the amount and rate tendered, should be written in English. (973—1)

Wanted

The Indian Law Reports.

Published under Authority of the Governor-General in Council.

THE Reports appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series.

The Parts of each series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set.

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series...	Rs. 35	Rs. 40
" Madras Series ...	" 8	" 9
" Bombay Series...	" 8	" 9
" Allahabad Series	" 8	" 9
Complete set	45	" 50

The Price of each part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	Rs.	A.
For a part of the Calcutta Series ...	3	8
" " Madras Series ...	1	0
" " Bombay Series ...	1	0
" " Allahabad Series ...	1	0
Complete set	4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

Messrs. Thacker, Spink and Co., Calcutta;
" Thacker, Vining and Co.;
" Higginbotham and Co., Madras;
The Government Central Book Depôt, Bombay;
The Government Book Depôt, Allahabad.

Notes on Forestry

BY C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

☞ The following publications are for sale at the Office of the Superintendent, Government Printing, No. 166, Dhurrumtollah-street. No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every rupee's worth of stamps for discount in exchanging them for cash. Service labels are not received.

Books required on the public service are only supplied when authorized by Local Governments and Administrations.

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 16th February, 1883, and is hereby promulgated for general information :—

ACT No. IV OF 1883.

An Act to amend the Indian Railway Act, 1879.

Preamble.

WHEREAS it is expedient to amend the Indian Railway Act, 1879, in manner hereinafter appearing; It is hereby enacted as follows :—

Short title. Commencement.

1. This Act may be called the Indian Railway Act, 1883; and it shall come into force at once.

New sections substituted for section 5 of Act IV of 1879.

2. For section five of the said Act the following sections shall be substituted, namely :—

Railway when to be opened.

"5. A Railway, or portion or extension of, or addition to, a Railway, shall not be opened for the public conveyance of passengers until the Railway Administration has given to the Governor General in Council notice in writing of the intention of opening the same, and until the Governor General in Council has by order sanctioned the opening of the same.

Governor General in Council may appoint Inspecting-officers.

"5A. The Governor General in Council may from time to time appoint, by name or by virtue of their office, officers to be Inspecting-officers under this Act.

Sanction not to be given until after report by Inspecting-officer.

"5B. (1) The sanction referred to in section five shall not be given until an officer appointed under section 5A has, after inspection of the Railway, portion, extension or addition, as the case may be, reported to the Governor General in Council that in his opinion the opening of the same would not be attended with danger to the public using it.

"(2) Notwithstanding anything hereinbefore contained, the Governor General in Council may, in any particular case or in any particular class of cases, by special order, confer on any officer appointed under section 5A power to sanction the opening of a Railway, portion, extension or addition, if in the officer's opinion the opening of the same will not be attended with danger to the public using it.

"(3) In such case it shall not be necessary to make the report required by sub-section (1); but the Governor General in Council may by order cancel the sanction given under sub-section (2), or direct that the sanction shall be subject to such conditions as he thinks fit.

"(4) The sanction given under this section may be either absolute or subject to such conditions as the Governor General in Council, or the officer appointed under section 5A, as the case may be, thinks necessary for the safety of the public.

"(5) When sanction for the opening of any Railway, or portion or extension of, or addition to, any Railway is given subject to conditions, and the Railway Administration fails or neglects to fulfil, or comply with, those conditions, the sanction shall on the failure or neglect forthwith be deemed to be void, and the Railway, or portion, or extension, or addition, as the case may be, shall not be used unless and until sanction is again obtained under this section for the opening thereof.

When alterations affecting safety of passengers are made in Railway, sanction to be again obtained for opening.

"5C. If, after a Railway has been opened as hereinbefore provided, any portion of it is so altered by the Railway Administration as to cause danger to, or affect the safety of, passengers carried thereon, the portion so altered shall not be used for the public conveyance of passengers, unless and until sanction is obtained, in accordance with the provisions of section 5B, for the opening of it.

Powers of Inspector of Railways.

"5D. (1) Every officer appointed under section 5A shall, for the purpose of the inspection, be deemed to be a public servant within the meaning of the Indian Penal Code, and XLV of 1860.

shall, subject to the control of the Governor General in Council, have the following powers, namely:—

"(a) he may enter on and inspect any Railway or portion thereof which has been opened for the public conveyance of passengers, or any rolling-stock used thereon;

"(b) he may, by an order in writing under his hand, require the attendance of any Railway-servant whom he thinks fit to call before him and examine for the said purpose, and may require any such servant to answer, or furnish returns regarding, such inquiries for the said purpose as he thinks fit to make;

"(c) he may require and enforce the production of all books, papers and documents belonging to or in the possession of any Railway Administration which in his opinion are necessary for the said purpose.

"(2) Every Railway Administration whose Railway or rolling-stock is being inspected under this Act shall afford all reasonable facilities for making the inspection to the officer making it.

Governor General in Council empowered to close Railway.

"5E. When, after inspecting any Railway or portion of a Railway, or any rolling-stock used thereon, any officer appointed under section 5A reports to the Governor General in Council that in his opinion the use of the Railway or portion or of any specified rolling-stock will be attended with danger to the public using it, the Governor General in Council may, by order, direct that the Railway or portion be closed for the public conveyance of passengers, or that the rolling-stock so specified shall no longer be used, as the case may be.

Re-opening of Railway.

"5F. (1) When a Railway or portion of a Railway has been closed under section 5E, it shall not be re-opened for the public conveyance of passengers unless and until it has been inspected, and its opening sanctioned, in accordance with the provisions of section 5B.

"(2) When the Governor General in Council has directed under section 5E that any rolling-stock shall not be used, the rolling-stock shall not be used unless and until an officer appointed under section 5A reports that it is fit for use and the Governor General in Council sanctions its use."

Amendment of, and addition to, section 8.

3. In section eight of the said Act, in clause (d), the word "and" shall be omitted, and after clause (d) the following clause shall be, and be deemed to have always been, inserted:—

"(dd) for regulating the conduct of the Railway-servants, and."

New section to be substituted for section 21 of Act IV of 1879.

4. For section twenty-one of the said Act the following section shall be substituted:—

Penalty for opening or re-opening Railway in contravention of sections 5 and 5F, and keeping open after order under section 5E.

"21. Any Railway Administration opening or using, in contravention of section five, section 5B, or section 5C, any Railway, or any portion or extension of, or addition to, a Railway, or keeping, in contravention of an order of the Governor General in Council under section 5E, any Railway or portion thereof open, or re-opening, in contravention of section 5F, sub-section (1), any Railway or portion thereof, or using, in contravention of section 5F, sub-section (2), any rolling-stock, shall forfeit to Government the sum of one thousand rupees for every day during which the Railway, portion, extension or addition remains open or is used in contravention of any of those sections or of the order of the Governor General in Council, as the case may be, or during which the rolling-stock is so used."

R. J. CROSTHWAITE,

Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd February, 1883, and is hereby promulgated for general information:—

ACT No. V OF 1883.

THE INDIAN MERCHANT SHIPPING ACT, 1883.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Extent.
   Commencement.
2. Repeal of enactments.
3. Definitions.
4. Saving and provision as to powers for removal of master.

CHAPTER II.

INVESTIGATIONS INTO SHIPPING CASUALTIES.

5. Chapter not to apply to certain ships.
6. Report of casualties to be made to Local Government.
7. Power for local Government to appoint special Court of Investigation.
8. Power for other Courts to hold investigations into casualties, when so directed.
9. Power for Court of Investigation to inquire into charges against masters, mates and engineers.
10. Power for Local Government to direct investigation into charges of incompetency or misconduct.
11. Person accused to be heard.
12. Powers of Courts as to evidence and regulation of proceedings.
13. Assessors.
14. Power to arrest witnesses and cause entry and detention of vessels.
15. Power to commit for trial and bind over witnesses.
16. Depositions.
17. Report by Court to Local Government.

CHAPTER III.

SUSPENSION AND CANCELLATION OF CERTIFICATES AND GRANT OF FRESH CERTIFICATES.

18. Saving of power to cancel and suspend certificates under English Acts.
19. Power to issue local certificates in lieu of cancelled or suspended certificates.
20. Power for Local Government to suspend or cancel certificates in certain cases.
21. Obligation to deliver up cancelled or suspended certificate.
22. Report to other Local Governments.
23. Report to Board of Trade.
24. Power to revoke cancellation or suspension and grant new certificate.

CHAPTER IV.

AGREEMENTS WITH SEAMEN.

25. Chapter to be read with Act I of 1859.
26. Masters to enter into agreements with seamen.
27. Form and contents of agreement.
28. Scale of provisions to be furnished to lascars.
29. Stipulation where lascars are shipped.
30. Forms for British or Colonial ships.

CHAPTER V.

HEALTH-OFFICERS.

31. Addition to Act XII of 1875.

CHAPTER VI.

MISCELLANEOUS.

32. Power to appoint persons to sue.
33. Proceedings to be instituted in name of Secretary of State for India in Council.
34. Amendment of section 10 of Act I of 1859.
35. Addition to section 11 of Act I of 1859.
36. Amendment of section 79 of Act I of 1859.
37. Provisions as to examinations, &c., of masters not to apply to certain ships.
38. Amendment of Act X of 1841, sections 2, 15, 17 and 23.

Merchant Shipping Act, 1883.

(*Chapter II.—Investigations into Shipping Casualties.*)

An Act for the further amendment of the law relating to Merchant Shipping.

WHEREAS it is expedient to amend the law relating to investigations into casualties affecting ships and charges against masters, mates and engineers;

and whereas it is also expedient to provide, in other respects hereinafter appearing, for the regulation and control of Merchant Shipping;

It is hereby enacted as follows :—

CHAPTER I.

PRELIMINARY.

Short title.

1. (*1*) This Act may be called the Indian Merchant Shipping Act, 1883.

Extent.

(*2*) It extends to the whole of British India;

Commencement.

(*3*) and it shall come into force on the first day of January, 1884.

IV of 1875.

Repeal of enactments.

2. (*1*) The Indian Merchant Shipping Act, 1875, and Act XIII of 1878 (*an Act to provide for the recovery in British India of wages due to, and expenses incurred in respect of, certain seamen and apprentices, and to amend the Indian Merchant Shipping Act, 1875, and the Indian Ports Act, 1875*), are hereby repealed.

(*2*) But all proceedings commenced, officers appointed, powers conferred, investigations held, certificates cancelled or suspended, agreements made and persons authorized under the said Acts or either of them, shall be deemed to have been respectively commenced, appointed, conferred, held, cancelled or suspended, made and authorized under this Act.

Definitions.

3. In this Act—

"ship" includes every description of vessel used in navigation not propelled by oars; and

"master" means any person (except a pilot or harbour-master) having for the time being control or charge of a ship.

Saving and provision as to powers for removal of master.

17 & 18 Vic., c. 104.

4. (*1*) Nothing in this Act shall affect the powers conferred by section two hundred and forty of the Merchant Shipping Act, 1854, or by section eighty of Act I of 1859 (*for the amendment of the law relating to Merchant Shipping*), on Courts having admiralty jurisdiction in India.

(*2*) The powers conferred by the last-mentioned enactment may, at any port in British India where there is no Court having admiralty jurisdiction, be exercised by the principal Court of ordinary criminal jurisdiction at that port.

CHAPTER II.

INVESTIGATIONS INTO SHIPPING CASUALTIES.

Chapter not to apply to certain ships.

5. Nothing in this chapter shall apply to any ship belonging to, or in the service of, Her Majesty or of the Government of India, or belonging to any foreign Prince or State.

Report of casualties to be made to Local Government.

6. (*1*) Whenever any Magistrate, or any officer appointed by the Local Government in this behalf, receives credible information that—

(*a*) any ship has been lost, abandoned, stranded or materially damaged on or near the coasts of British India; or

(*b*) by reason of any casualty happening to or on board of any ship on or near those coasts, loss of life has ensued; or

(*c*) any ship has caused loss or material damage to any other ship on or near those coasts; or

(*d*) any such loss, abandonment, stranding, damage or casualty has happened elsewhere to, or on board of, any British ship, and any competent witnesses thereof have arrived or are to be found at any place in British India; or

(*e*) any British ship is supposed to have been lost, and any evidence can be obtained in British India as to the circumstances under which she proceeded to sea or was last heard of;

he shall forthwith report in writing the information to the Local Government.

(*2*) In the cases mentioned in clauses (*a*), (*b*) and (*c*), the master, pilot, harbour-master, or other person in charge of the ship, or (where two ships are concerned) in charge of each ship, at the time of the loss, abandonment, stranding, damage or casualty, and

in cases under clause (*d*), where the master of the ship concerned, or (except in the case of a loss) where the ship concerned, proceeds to any place in British India from the place where the loss, abandonment, stranding, damage or casualty has occurred, the master of the ship,

shall, on arriving in British India, give immediate notice of the loss, abandonment, stranding, damage or casualty to the nearest Magistrate, or, when he arrives at a port in British India, to the officer appointed as aforesaid at that port.

(*3*) Any person bound to give notice under this section and wilfully failing to give the same shall be punished with fine which may extend to five hundred rupees, and, in default of payment, to simple imprisonment for a term which may extend to three months.

Power for Local Government to appoint special Court of Investigation.

7. (*1*) If in any such case a formal investigation into the facts mentioned in section six, clause (*a*), (*b*), (*c*), (*d*) or (*e*), appears to the Local Government to be requisite or expedient, the Local Government (whether the notice is given or not) may appoint a special Court, consisting of not less than two nor more than four persons, and direct that Court to make the investigation, and may fix the place for making the same.

(*2*) One of the members of the Court shall be a Magistrate acting in or near the place where the investigation is made; another shall be some person conversant with maritime affairs; and the

Merchant Shipping Act, 1883.

(Chapter II.—Investigations into Shipping Casualties.)

other or others (if any) shall be conversant with either maritime or mercantile affairs.

Power for other Courts to hold investigations into casualties when so directed.

8. Every Court having admiralty jurisdiction in British India, and the principal Court of ordinary criminal jurisdiction at every port of British India where there is no Court having admiralty jurisdiction, is hereby authorized, when so directed by the Local Government, to make the investigations referred to in section seven.

Power for Court of Investigation to inquire into charges against masters, mates and engineers.

9. (*1*) Any Court making an investigation under section seven or section eight may inquire into any charge of incompetency or misconduct arising, in the course of the investigation, against any master, mate or engineer, as well as into any charge of a wrongful act or default on his part causing any such loss, abandonment, stranding, damage or casualty as aforesaid.

(*2*) In every case in which any such charge, whether of incompetency or misconduct, or of a wrongful act or default, as aforesaid, arises against any master, mate or engineer in the course of an investigation, the Court shall, before the commencement of the inquiry, cause to be furnished to him a copy of the report or statement of the case upon which the investigation has been directed.

Power for Local Government to direct investigation into charges of incompetency or misconduct.

10. (*1*) If the Local Government has reason to believe that there are grounds for charging any master, mate or engineer, holding a certificate granted by the Board of Trade or a Local Government, with incompetency or misconduct, otherwise than in the course of an investigation under section seven or section eight, it may transmit a statement of the case to any Court mentioned in section eight, at or nearest to the place at which it may be convenient for the parties and witnesses to attend, and may direct that Court to make an investigation into that charge.

(*2*) Before commencing the investigation, the Court shall cause the master, mate or engineer so charged to be furnished with a copy of the statement transmitted by the Local Government.

Person accused to be heard.

. For the purpose of an investigation under this chapter into any charge against a master, mate or engineer, the Court may summon him to appear, and shall give him full opportunity of making a defence either in person or otherwise.

Powers of Courts as to evidence and regulation of proceedings.

12. For the purpose of any investigation under this chapter, the Court making the investigation, so far as relates to compelling the attendance and examination of witnesses and the production of documents and the regulation of the proceedings, shall have—

(*a*) if the Court is a special Court—the same powers as are exercisable by the principal Court of ordinary criminal jurisdiction for the place at which the investigation is made;

(*b*) if the Court is a Court having admiralty jurisdiction or a principal Court of ordinary criminal jurisdiction—the same powers as are exercisable by that Court in the exercise of its admiralty or criminal jurisdiction (as the case may be).

Assessors.

13. (*1*) When any investigation involves, or appears likely to involve, any question as to the cancelling or suspension of the certificate of a master, mate or engineer, the Court making the investigation shall constitute as its assessors for the purpose of the investigation two persons having experience in the Merchant Service; and in every other investigation the Court making it may, if it thinks fit, constitute as its assessor for the purposes of the investigation any person conversant with maritime affairs and willing to act as its assessor.

(*2*) The assessors shall attend during the investigation and deliver their opinions in writing, to be recorded on the proceedings. But the exercise of all powers conferred on the Court by this Act or any other enactment for the time being in force shall rest with the Court.

Power to arrest witnesses and cause entry and detention of vessels.

14. (*1*) If any Court making an investigation under this chapter thinks it necessary for obtaining evidence that any person should be arrested, it may issue a warrant for his arrest, and may, for the purpose of effecting the arrest, authorize any officer (subject, nevertheless, to any general or special instructions from the Local Government) to enter any vessel.

(*2*) Any officer so authorized may, for the purpose of enforcing the entry, call to his aid any officers of Police or Customs, or any other persons, and may seize and detain the vessel for such time as is reasonably necessary to effect the arrest; and every such officer or other person shall be deemed to be a public servant within the meaning of the XLV Indian Penal Code, section 186.

(*3*) No person shall be detained by virtue of this section for more than forty-eight hours.

Power to commit for trial and bind over witnesses.

15. (*1*) Whenever, in the course of any such investigation, it appears that any person has committed within the jurisdiction of any Court in British India an offence punishable under any law in force in British India, the Court making the investigation may (subject to such rules consistent with this Act as the High Court may from time to time prescribe) cause him to be arrested, or commit him or hold him to bail to take his trial before the proper Court, and may bind over any person to give evidence at the trial, and may, for the purposes of this section, exercise all the powers of a Magistrate of the first class or of a Presidency Magistrate.

(*2*) For the purposes of this section the Recorder of Rangoon shall, within the local limits of his ordinary civil jurisdiction, be deemed to be the High Court.

Depositions.

16. (*1*) Whenever, in the course of any such trial, the testimony of any witness is required in relation to the subject-matter, any deposition previously made by

Merchant Shipping Act, 1883.

(Chapter III.—Suspension and Cancellation of Certificates, &c.)

him in relation to the same subject-matter before any Court making an investigation under this chapter shall, if authenticated by the signature of the Magistrate or presiding Judge, be admissible in evidence on proof—

(*a*) that the witness cannot be found within the jurisdiction of the Court before which the trial is held; and

(*b*) that it was made in the presence of the person accused and that he had an opportunity of cross-examining the witness.

(*2*) A certificate by the Magistrate or presiding Judge that the deposition was made in the presence of the accused and that he had that opportunity shall, unless the contrary be proved, be sufficient evidence that it was so made and that he had that opportunity.

Report by Court to Local Government.

17. (*1*) The Court shall, in the case of all investigations under this chapter, transmit to the Local Government a full report of the conclusions at which it has arrived, together with the evidence.

(*2*) In cases in which, under the Merchant Shipping Acts, 1854 to 1882, the Court is required to send a report to the Board of Trade, the report shall be sent through the Local Government, and the transmission of the report to the Local Government shall be a sufficient compliance with this section.

CHAPTER III.

SUSPENSION AND CANCELLATION OF CERTIFICATES AND GRANT OF FRESH CERTIFICATES.

Saving of power to cancel and suspend certificates under English Acts.

18. Nothing in this Act shall affect the powers conferred by the Merchant Shipping Acts, 1854 to 1882, on the Courts conducting investigations under sections seven, eight, nine and ten of this Act, to cancel or suspend certificates granted under any of the said Merchant Shipping Acts, or certificates to which the provisions of any such Act have been made applicable under the Merchant Shipping (Colonial) Act, 1869. 32 & 33 Vic., c. 11.

Power to issue local certificates in lieu of cancelled or suspended certificates.

19. (*1*) When any such Court cancels or suspends any such certificate, the Local Government may, if it thinks fit, and if it is so empowered by any enactment of a British Indian legislature for the time being in force, grant under that enactment, but without examination, to the holder of the certificate, when the certificate is a certificate as master, a certificate as mate, and, when the certificate is a certificate as mate or engineer, a certificate as mate or engineer, as the case may be, of a grade lower than that which he held at the time of the cancellation or suspension.

(*2*) A certificate so granted shall have the same effect as if it had been granted after examination, but shall not have the effect of a certificate granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under that Act. 32 & 33 Vic., c. 11.

(*3*) The Local Government may act under this section either in pursuance of a recommendation from the Court, or of its own motion.

Power for Local Government to suspend or cancel certificates in certain cases.

20. Any certificate (whether of competency or service) which has been granted by any Local Government to any master, mate or engineer, but has not been granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under the said Act, may be suspended or cancelled, by that or any other Local Government, in the following cases, that is to say:— 32 & 33 Vic., c. 11.

(*a*) if, on any investigation made under this Act, the Court reports that the loss, stranding or abandonment of, or damage to, any ship, or loss of life, has been caused by his wrongful act or default, or that he is incompetent, or has been guilty of any gross act of drunkenness, tyranny or other misconduct;

(*b*) if, on any investigation made under the Merchant Shipping Acts, 1854 to 1882, or on any investigation made by any Court or tribunal for the time being authorized by the legislative authority in any British possession to make inquiry into charges of incompetency or misconduct on the part of masters, mates or engineers of ships, or as to shipwrecks or other casualties affecting ships, the Court or tribunal reports that the master, mate or engineer is incompetent, or has been guilty of any gross act of misconduct, drunkenness or tyranny, or that the loss, stranding or abandonment of, or damage to, any ship, or loss of life, has been caused by his wrongful act or default;

(*c*) if he is proved to have been convicted of any offence which, if committed in British India, would be non-bailable, or, if committed in England, would be a felony; and

(*d*) if (in case of a master) he has been superseded by the order of any Admiralty Court, or of any Naval Court constituted as provided by the Merchant Shipping Act, 1854, or by any other law for the time being in force: 17 & 18 Vic., c. 104.

Provided that, in any case in which an investigation has been made into a charge against any master, mate or engineer, a certificate shall not be suspended or cancelled under clause (*a*) unless the Local Government is satisfied that the holder of the certificate has been furnished before the commencement of the investigation with the copy of the report or statement required by section nine or section ten, as the case may be.

Obligation to deliver up cancelled or suspended certificate.

21. Every master, mate or engineer whose certificate is cancelled or suspended under section twenty shall deliver it to the Shipping Master or to such other person as the Local Government which cancelled or suspended the certificate directs, and in default of such delivery shall, for each offence, be punished with fine which may extend to five hundred rupees.

Merchant Shipping Act, 1883.
(Chapter IV.—Agreements with Seamen.)

Report to other Local Governments.

22. If the Local Government which cancels or suspends, under section twenty, a certificate of a master, mate or engineer is not the Local Government that granted the same, the Local Government so cancelling or suspending the certificate shall report the proceedings, and the fact of cancellation or suspension, to the Local Government which granted the certificate.

Report to Board of Trade.

23. Every Local Government cancelling or suspending under section twenty the certificate of a master, mate or engineer shall, as soon as may be practicable, report to the Board of Trade the fact of such cancellation or suspension.

Power to revoke cancellation or suspension and grant new certificate.

24 (*1*) Any Local Government may at any time revoke any order of cancellation or suspension which it may have made under section twenty, or grant, without examination, to any person, whose certificate it has so cancelled, a new certificate of the same or of any lower grade.

(*2*) A certificate so granted shall have the same effect as if it had been granted after examination, but shall not have the effect of a certificate granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under the said Act.

2 & 33 Vic., c. 11.

(*3*) A certificate of competency for a Home-trade ship under Act I of 1859 shall be deemed, for the purposes of this section, to be of a lower grade than a certificate of competency for a foreign-going ship under the same Act.

CHAPTER IV.

AGREEMENTS WITH SEAMEN.

Chapter to be read with Act I of 1859.

25. This chapter shall be read with, and taken as part of, Act I of 1859.

Masters to enter into agreements with seamen.

26. The master of every ship, except ships of a burden not exceeding three hundred tons employed only in the Home-trade, shall enter into an agreement with every seaman whom he engages in, and carries to sea from, any port in British India as one of his crew, in the manner hereinafter mentioned.

Form and contents of agreement.

27. (*1*) Every such agreement shall be in a form sanctioned by the Governor General in Council, and shall be dated at the time of the first signature thereof, and shall be signed by the master before any seaman signs the same, and shall contain the following particulars as terms thereof, that is to say :—

(*a*) either the nature and, as far as practicable, the duration of the intended voyage or engagement, or the maximum period of the voyage or engagement, and the places or parts of the world, if any, to which the voyage or engagement is not to extend;

(*b*) the number and description of the crew, specifying how many are engaged as sailors;

(*c*) the time at which each seaman is to be on board or to begin work;

(*d*) the capacity in which each seaman is to serve;

(*e*) the amount of wages which each seaman is to receive;

(*f*) a scale of the provisions which are to be furnished to each seaman; and

(*g*) any regulations as to conduct on board, and as to fines, short allowance of provisions or other lawful punishments for misconduct, which have been sanctioned by the Governor General in Council as regulations proper to be adopted, and which the parties agree to adopt.

(*2*) Every such agreement shall be so framed as to admit of stipulations to be adopted at the will of the master and seaman in each case (not being inconsistent with the provisions of any enactment for the time being in force relating to Merchant Shipping), as to advance of wages and supply of warm clothing, and may contain any other stipulations which are not contrary to law.

Scale of provisions to be furnished to lascars.

28. (*1*) In the case of such agreements with lascars or other Native seamen, the scale of the provisions agreed to be furnished to each of such seamen shall not be less than a scale to be from time to time fixed and published by the Local Government with the previous sanction of the Governor General in Council.

(*2*) Any master entering into an agreement with any lascar or other Native seaman for a scale of provisions less than the scale so fixed and published shall be punished with fine which may extend to two hundred rupees.

Stipulation where lascars are shipped.

29. (*1*) Whenever it is agreed that the service of any lascar or other Native seaman shall end at any port not in British India, the agreement shall, in addition to the particulars specified in section twenty-seven, contain a stipulation that fit employment shall be provided for him on board some other ship bound to the port at which he was shipped, or such other port in British India as may be agreed on; or

that a passage shall be provided for him to some port in British India free of charge, or on such other terms as may be agreed on.

(*2*) Every such stipulation shall be signed by the owner of the ship, or by the master on his behalf.

(*3*) In this section the word "seaman" shall include also any Native of British India carried to sea from any port in British India as one of the crew of a ship.

Forms for British or Colonial ships.

30. If the master of any ship belonging to the United Kingdom or any British possession has an agreement with his crew, made in due form according to the law of the place to which the ship belongs, or in which her crew were engaged, and engages a single seaman, not being a lascar or other Native seaman, in any port in British India, the seaman may sign the agreement so made, and it shall not be necessary for him to sign an agreement under this Act.

Merchant Shipping Act, 1883.
(Chapter V.—Health-Officers.)

CHAPTER V.

HEALTH-OFFICERS.

XII of 1875.

Addition to Act XII of 1875.

31. In the Indian Ports Act, 1875, after section eighteen, the following section shall be inserted, that is to say:—

Appointment and powers of Health-officer.

"18A. The Local Government may, from time to time, appoint, at any port subject to this Act, an officer to be called the Health-officer, and may suspend or remove from office any officer so appointed.

"A Health-officer shall, subject to the control of the Local Government, have the following powers within the limits of the port for which he is appointed, that is to say:—

"(*a*) with respect to any ship, the powers conferred on a Shipping Master by Act I of 1859, section 71

"(*b*) power to enter on board any ship and medically examine all or any of the seamen or apprentices on board the ship;

"(*c*) power to require and enforce the production of the log-book and any other books, papers or documents which he thinks necessary for the purpose of enquiring into the health and medical condition of the persons on board the ship;

"(*d*) power to call before him and examine for any such purpose all or any of those persons and to require answers to any inquiries he thinks fit to make;

"(*e*) power to require any person so examined to make and subscribe a declaration of the truth of the statements made by him.

CHAPTER VI.

MISCELLANEOUS.

Power to appoint persons to sue.

17 & 18 Vic., c. 104.

18 & 19 Vic., c. 91.

17 & 18 Vic., s. 104.

1 of 1872.

32. (*1*) Where any wages or expenses recoverable under section 213 of the Merchant Shipping Act, 1854, or under section 16 of the Merchant Shipping Act Amendment Act, 1855, are, under the same sections, a charge upon any ship, or recoverable from any master, owner or other person, within the jurisdiction of any Court in British India, the Governor General in Council may from time to time, by notification in the *Gazette of India*, authorize, either generally or specially, such persons as he thinks fit to sue for and recover, in manner in the Merchant Shipping Act, 1854, section 213, provided, those wages or expenses.

(*2*) Every person so authorized shall be entitled to sue and recover accordingly in any such Court, and shall be deemed to be a person filling a public office within the meaning of the Indian Evidence Act, 1872, section 57, clause 7.

Proceedings to be instituted in name of Secretary of State for India in Council.

33. All suits and proceedings under section thirty-two shall be instituted and carried on in the name of the Secretary of State for India in Council.

Amendment of section 10 of Act I of 1859.

34. In section 10 of Act I of 1859, for the words "Fees at the following rates shall be paid by all applicants for examination:—

For a certificate as master	...	ten rupees.
Ditto ditto as mate	...	five „ "

the following shall be substituted, namely:—"Fees at such rates as the Local Government may, from time to time, with the previous sanction of the Governor General in Council, fix in this behalf shall be paid by all applicants for examination."

Addition to section 11 of Act I of 1859.

35. To section 11 of Act I of 1859 the following shall be added, namely:—

"Provided that the Local Government may, in any case in which it has reason to believe that such report has been unduly made, require, before granting a certificate, a re-examination of the applicant or a further inquiry into his testimonials and character."

Amendment of section 79 of Act I of 1859.

36. For the last fifteen words of section 79 of Act I of 1859, the following shall be substituted, namely:—"punished with fine which may extend to one thousand rupees, or with imprisonment for a term which may extend to two years, or with both."

Provisions as to examinations, &c., of masters not to apply to certain ships.

37. Sections 9 to 16 (both inclusive) of Act I of 1859 shall not apply to ships registered under Act X of 1841 and trading between ports in India and the coasts of Arabia, when such ships are navigated and manned exclusively by Arabs, lascars or other Asiatic masters and seamen.

Amendment of Act X of 1841, secs. 2, 15, 17 and 23.

38. In sections 2, 15, 17 and 23 of the said Act X of 1841, for the words "on information in any Court of Her Majesty or the East India Company by the Advocates General of the respective Presidencies," "by information as aforesaid," "on information as aforesaid," "upon information as aforesaid," in each of the places where they occur, the following words shall be substituted, namely:—"on conviction before a Presidency Magistrate or a Magistrate of the first class."

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd February 1883, and is hereby promulgated for general information:—

ACT No. VI OF 1883.

An Act to give power to arrest persons whose evidence is needed under Act XII of 1859.

Preamble.

WHEREAS it is expedient to empower the Judges holding trials under Act XII of 1859 (*An Act to make better provision for the trial of Pilots at the Presidency of Fort William in Bengal for breach of duty*) to arrest persons whose evidence is required on such trials; It is hereby enacted as follows:—

Addition to Act XII of 1859, after section 14.

1. The following section shall be inserted immediately after section 14 of the said Act, namely:—

"15. (*1*) Whenever the Judge of the said Court thinks it necessary for obtaining evidence that any person should be arrested, he may issue a warrant for his arrest, and may, for the purpose of effecting the arrest, authorize any officer (subject, nevertheless, to any general or special instructions from the Local Government) to enter any vessel.

"(*2*) Any officer so authorized may, for the purpose of enforcing the entry, call to his aid any officers of Police or Customs, or any other persons, and may seize and detain the vessel for such time as is reasonably necessary to effect the arrest; and every such officer or other person shall be deemed to be a public servant within the meaning of the Indian Penal Code, section 186. XLV of 1860.

"(*3*) No person shall be detained under this section for more than forty-eight hours."

Commencement of Act.

2. This Act shall come into force on the first day of January, 1884.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd March, 1883:—

No. 5 OF 1883.

THE BENGAL TENANCY BILL, 1883.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Commencement.
   Local extent.
2. Repeal.
3. Construction of Act.
4. Saving of custom, special law, &c.

CHAPTER II.

OF THE DISTINCTION BETWEEN KHÁMÁR AND RAIYATÍ LAND.

5. Khámár land defined.
6. All other land to be raiyatí.
7. Power to order survey and register of khámár lands.
8. Mode of making survey.
9. Publication of register.
10. Appeals.
11. Submission of register to Board of Revenue and Local Government.
12. Approval of register.
13. Consequence of notification of approval.

CHAPTER III.

OF TENURE-HOLDERS GENERALLY.

A.—Of the Right to hold at fixed rents.

14. Land held at rent unchanged since Permanent Settlement not liable to enhancement.

SECTIONS.

15. Presumption from twenty years' holding at unchanged rent.
16. Application of sections 14 and 15 when rent is paid in kind.
17. Effect of separation or amalgamation of holding.
18. Tenure held since Permanent Settlement liable to enhancement only in certain cases.
19. Saving as to land held under terminable agreement.
20. Saving as to land held in a district not permanently settled.

B.— Of the enhancement of rent.

21. Limits of enhancement of rent of tenures.
22. Enhanced rent not to be more than double the previous rent.
23. Power to order gradual enhancement.
24. Rent once enhanced may not be altered for ten years.

C.—Incidents of permanent tenures.

25. Incidents of permanent tenures generally.
26. Permanent tenure-holder not liable to ejectment.

D.—Of the registration of transfers of, and succession to, permanent tenures.

27. Landlord bound to register voluntary transfer or succession on application.
28. Application may be served through Revenue-officer.
29. Registration in case of transfer by sale in execution of decree other than decree for rent.
30. Registration in case of transfer by sale in execution of decree for rent or by summary sale.
31. Effect of omission to register voluntary transfer.
32. Application to Court to compel landlord to register.
33. Application by landlord to compel registration.
34. Landlord to give copies of entries in the register.
35. Power to make rules regarding registration.

SECTIONS.

CHAPTER IV.

OF PATNÍ TENURES.

36. Definition of patní tenure.
37. Incidents of patní tenures.
38. Right of landlord of patní tenure to demand security from transferee.
39. Landlord may refuse registration of voluntary transfer when security is not given.
40. Landlord may attach tenure sold in execution or by summary sale when security is not given.
41. Application to Civil Court, if security tendered is refused.
42. Recovery of arrears by summary sale.

CHAPTER V.

OF OCCUPANCY-RAIYATS.

43. Interpretation.
44. Present occupancy-raiyats to become occupancy-raiyats under Act.
45. Acquisition of status of settled raiyat of village or estate.
46. Loss of status of settled raiyat.
47. Settled raiyat to have occupancy-right in raiyatí land held by him in village or estate.
48. Acquisition of occupancy-right by grant.
49. Acquisition of occupancy-right in khámár land.
50. Incidents of occupancy-right generally.
51. Landlord's right of pre-emption on voluntary sale of occupancy-right.
52. Landlord's right of pre-emption on sale in execution.
53. Landlord's right to take the place of mortgagee on foreclosure.
54. Landlord's right to purchase in case of gift of occupancy-right.
55. Landlord's right to purchase where occupancy-right is bequeathed.
56. Raiyat of land of which landlord has acquired occupancy-right to be an occupancy-raiyat.
57. Acquisition of status of settled raiyat by succeeding to occupancy-right.

CHAPTER VI.

OF THE RENT PAYABLE BY OCCUPANCY-RAIYATS.

A.—Of money-rents generally.

58. Existing money-rents payable until altered as herein provided.
59. Enhancement of money-rents by contract.
60. Money-rents not enhanceable except as provided.
61. Limit of money-rent payable by settled raiyat taking new holding.

B.—Of the preparation of a table of rates and produce, and of suits to enhance money-rents where such a table is in force.

62. Power to direct preparation of table.
63. Contents of table.
64. Principle on which rent-rates are to be fixed.
65. Local publication of the table.
66. Revenue-officer to deal with objections.
67. Table to be submitted to superior Revenue-authorities.
68. Proceedings of Board of Revenue thereupon.
69. Publication of table after final sanction.
70. Period for which Table remains in force.

SECTIONS.

71. Table to be conclusive evidence.
72. Expenses incurred in preparing table how defrayed.
73. Suit to enhance where table is in force.

C.—Of suits to enhance money-rents where a table of rates and produce is not in force.

74. Grounds on which landlord may sue to enhance where table is not in force.
75. Rules for enhancement under section 74.

D.—Rules applicable to suits to enhance money-rents generally.

76. No enhancement beyond double the rent previously payable.
77. Power to order progressive enhancement.
78. Rent enhanced or commuted not enhanceable for 10 years.

E.—Of suits for the reduction of money-rents.

79. Occupancy-raiyat when entitled to reduction of rent.

F.—Special rules regarding money-rents payable for pasture-lands.

80. Special rules for pasture-lands.

G.—Of rents payable in kind or varying with the crop.

81. Limit to amount of rent payable in kind or varying with crop.
82. Commutation of rents.

H.—Supplementary provisions.

83. Collectors to prepare annual price lists of staple crops.
84. Power to make rules.

CHAPTER VII.

OF THE RIGHT OF A SETTLED RAIYAT IN BASTU LAND.

85. Settled raiyat to have permanent right in *bastu* land.
86. Provisions regarding ejectment.
87. Rule for enhancing the rent of land.

CHAPTER VIII.

OF ORDINARY RAIYATS.

88. Ordinary raiyat defined.
89. Rents regulated by agreement.
90. Grounds on which an ordinary raiyat may be ejected from raiyatí land.
91. Notice of enhancement to be served through Civil Court.
92. Raiyat may agree to enhancement. If he does not, landlord may sue to eject.
93. Procedure in suit.
94. Decree when absolute: when to become void.
95. Fresh proceedings not to be taken for ten years.

CHAPTER IX.

PROVISIONS REGARDING RENT APPLICABLE TO SEVERAL CLASSES OF TENANTS.

A.—Of alterations of rent consequent on alterations of the area of the holding of a tenure-holder or occupancy-raiyat.

96. Additions to, and deductions from, rent in respect of alteration of area.

SECTIONS.

B.—Instalments in which money-rents are payable by tenure-holders, raiyats and under-raiyats.

97. Rent of tenure-holder in what instalments and on what dates payable.
98. Rent of raiyat or under-raiyat in what instalments and on what dates payable.
99. Making and publication of orders under sections 97 and 98.

C.—Of the receipts and accounts to be given to tenants.

100. Tenant making payment to his landlord entitled to a receipt.
101. Tenant entitled to statement of account at close of the year.
102. Penalties and fine for withholding receipts and statements of accounts and failing to keep counterparts.

D.—Of the deposit of rent by a tenant in a public office.

103. Application to deposit rent in public office.
104. Receipt granted by public officer for rent deposited to be a valid acquittance.
105. Notification of receipt of deposit.
106. Deposit to whom payable.
107. Refund to depositor.

E.—Of arrears of rent.

108. Interest on arrears.
109. Power to award damages on rent withheld without reasonable cause.
110. Power to award damages to defendant improperly sued for rent.
111. Ejectment from non-transferable holding for arrears.

F.—Of rent taken by division or estimation of the crop.

112. Commission for dividing or estimating crops.
113. Appointment of assessors, &c.
114. Remedy for error in division.
115. Procedure when crop has been estimated or appraised.
116. Costs of proceedings under foregoing sections.
117. Interference with produce of land otherwise than under section 112, criminal trespass.
118. *Danabandí* or appraisement papers in Bihár to be deposited in Collector's office.

G.—Further provisions regarding rent.

119. Limit to rents of raiyats and under-raiyats.
120. Presumption that rent continues unchanged.
121. Power to alter rent in case of new assessment of revenue.
122. Tenant not liable to transferee of landlord's interest for rent paid to former landlord without notice of the transfer.
123. Abwáb, &c., illegal.
124. Penalty for exaction by landlord from tenant of sum in excess of the rent payable.
125. Rent first charge on tenures, occupancy-holdings and *bastu* holdings.

CHAPTER X.

OTHER PROVISIONS APPLICABLE TO SEVERAL CLASSES OF TENANTS.

A.—Of improvements on raiyats' holdings and compensation therefor.

126. "Improvement".
127. Right to make improvements in case of occupancy-holding.
128. Right to make improvements in case of ordinary raiyats' holding.
129. Compensation for improvements payable to raiyat on ejectment.
130. Power to make rules for appointment of assessors.
131. Principle on which compensation is to be estimated.
132. Certain stipulations in contracts to be void.

B.—Of the landlord's right to measure land.

133. Landlord entitled to measure land unless restrained by contract.
134. Tenant bound to point out boundaries.
135. Remedy when landlord is obstructed or tenant does not point out boundaries.
136. Presumption against tenant not attending to point out boundaries.
137. Measurement in suits between landlord and tenant to be made according to Government measure.
138. Determination of the length of the standard in case of dispute.

C.—Of surrender and abandonment.

139. Surrender by raiyat.
140. Non-transferable holding in certain cases to be deemed surrendered.

D.—Of Merger.

141. Merger of tenant's interest in landlord's interest.

E.—Of the appointment of a manager on behalf of co-owners of an estate or tenure.

142. Power to call upon co-owners to show cause why they should not appoint a common manager.
143. Power to order them to appoint a manager if cause is not shown.
144. Power to appoint manager if order is not obeyed.
145. Power to nominate person to act in all cases under section 144 (*b*).
146. The Court of Wards Act, 1879, applicable to management by Court of Wards under section 144 (*a*).
147. Provisions applicable to manager appointed under section 144 (*b*).
148. Power to restore management to co-owners.

F.—Miscellaneous.

149. No ejectment except in execution of decree.
150. Portion of holding not transferable.

CHAPTER XI.

OF THE SETTLEMENT OF RENTS BY A REVENUE-OFFICER.

151. Power to order Revenue-officers to settle rents.
152. Bar to jurisdiction of Civil Courts while order is in force.
153. Rents of certain tenants to be fixed.
154. Rents of other tenants to be ascertained and recorded.
155. Power to refer question to Civil Court or leave case to be dealt with by Civil Court.
156. Preparation of jamabandí.
157. Publication of jamabandí and objections thereto.
158. Submission of jamabandí and petitions of objection to the Commissioner and Board.
159. Sanction to and final publication of jamabandí, and date from which it comes into force.
160. Rent fixed under foregoing provisions to be deemed the rent payable.
161. Rent ascertained under foregoing provisions to be presumed to be the rent payable.
162. Certain other entries in jamabandí to be presumed to be correct.
163. Expenses incurred in proceedings under this chapter how defrayed.

SECTIONS.

CHAPTER XII.

OF THE PREPARATION OF A RECORD-OF-RIGHTS BY A REVENUE-OFFICER.

164. Power to order preparation of record-of-rights.
165. Presumption as to entries in record.

CHAPTER XIII.

OF THE RECOVERY OF RENTS FROM RAIYATS AND UNDER-RAIYATS BY DISTRAINING THE PRODUCE OF THE HOLDING.

166. Cases in which an application for distraint may be made.
167. Form of application and fee payable.
168. Procedure on receipt of application.
169. Procedure if application is admitted.
170. Service of demand and account.
171. Right to reap, &c., produce.
172. Sale-proclamation to be issued unless demand is satisfied.
173. Place of sale.
174. Power to sell produce before it is reaped or gathered.
175. Manner of sale.
176. Postponement of sale.
177. Payment of purchase-money.
178. Certificate to be given to purchaser.
179. Proceeds of sale how to be applied.
180. Certain officers may not purchase.
181. Procedure where demand is paid before the sale.
182. Amount paid by under-tenant for his lessor may be deducted from rent.
183. Conflict between rights of superior and inferior landlords.
184. Distraint of property which is under attachment.
185. Penalty for illegal distraint.
186. Persons benefitting, &c., by offences under section 185 liable to punishment.
187. Power to suspend provisions of sections 166 to 184.

CHAPTER XIV.

SPECIAL RULES OF PROCEDURE APPLICABLE TO SUITS BETWEEN LANDLORD AND TENANT.

A.—Rules applicable to suits between landlord and tenant generally.

188. Place of suing.
189. Náibs or Gumáshtas to be authorised agents.
190. Special register of suits.

B.—Rules applicable to particular classes of suits between landlord and tenant

191. Sections 121 to 127, 129, 194 to 197, 305 and 320 to 325C of Code not to apply in suits for possession, rent or damages.
192. Particulars to be specified in plaint in such suits.
193. Summons in such suits to be for final disposal.
194. Service of summons in such suits by registered letter.
195. Written statements not to be filed in such suits without leave.
196. Mode of recording evidence in such suits.
197. Execution in such suits on oral application.
198. No appeal in certain suits for arrears and penalties.
199. Defendant in suit for arrear admitting arrear is due, but disputing plaintiff's title to pay into Court.
200. When assignee of decree for arrears may apply for execution.
201. Date from which decree for enhancement takes effect.
202. Relief against forfeitures.
203. Rights of ejected raiyats in respect of crops and land prepared for sowing.
204. Payment by raiyat for occupation of land under section 203.
205. All claims between landlord and tenant to be determined in ejectment proceedings.
206. Procedure when, on ejectment, money is due by the landlord to the tenant.

C.—Suit to determine status, &c., of tenant.

207. Suit to determine status, &c., of tenant.

CHAPTER XV.

OF THE SALE OF TRANSFERABLE HOLDINGS IN EXECUTION OF DECREES FOR ARREARS DUE ON THEM.

208. Definitions.
209. Application for sale of holding.
210. Proclamation announcing sale.
211. Sale of tenure subject to registered incumbrances and effect thereof.
212. Sale of tenure with power to avoid all incumbrances and effect thereof.
213. Sale of occupancy-holding with power to avoid incumbrances and effect thereof.
214. Procedure for annulling incumbrances under the foregoing sections.
215. Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.
216. Rules for disposal of the sale-proceeds.
217. Holding to be released from attachment only on payment into Court of amount of decree with costs; or on confession of satisfaction by decree-holder.
218. Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the holding.
219. Inferior tenant paying into Court may deduct from rent.
220. Decree-holder may bid at sale; judgment-debtor may not.
221. Operation of sections 313 and 326 of Code of Civil Procedure excluded.
222. Registration of certain instruments creating incumbrances.
233. Registration-officers to serve copies of instruments creating incumbrances.

CHAPTER XVI.

ON LIMITATION.

224. Limitation in suits, appeals and applications in Schedule IV.
225. Portions of the Indian Limitation Act not applicable to such suits, &c.

CHAPTER XVII.

SUPPLEMENTARY.

226. Saving as to service-tenures.
227. Power to make rules regarding procedure and powers of officers.
228. Procedure for making, publication and confirmation of rules.
229. Náibs and gumáshtas of landlords.
230. Rights of pasturage, forest-rights, &c.

SCHEDULE I.—Repeal of enactments.
SCHEDULE II.—Extract from preamble to Regulation VIII of 1819.
SCHEDULE III.—Summary sale of patní tenures.
SCHEDULE IV.—Limitation.

Bengal Tenancy Bill.

(Chapter I.—Preliminary. Sec. 3.)

Explanation of abbreviations in margin.

D. means Mr. Field's Digest.

C. B., the Bill prepared by the Commission.

B. B., the Bill submitted by the Bengal Government with letter No. 849, dated 27th July, 1881.

A

BILL

TO

Amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the Territories under the Administration of the Lieutenant-Governor of Bengal.

WHEREAS it is expedient to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. (1) This Act may be called the Bengal Tenancy Act, 1884.

B., s. 1. B., s. 1.

Commencement.

(2) It shall come into force on such date (hereinafter called the commencement of this Act) as the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the local Gazette, appoint in this behalf.

Local extent.

(3) It shall extend by its own operation to all the territories for the time being under the administration of the Lieutenant-Governor of Bengal, except the Town of Calcutta, the Division of Orissa, and the Scheduled Districts specified in the third part of the First Schedule of the Scheduled Districts Act, 1874; and the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local Gazette, extend the whole or any part of this Act to the Division of Orissa.

B., s. 2. B., s. 2.

Repeal.

2. (1) The enactments specified in Schedu hereto annexed are repealed in the territories to which this Act extends by its own operation.

(2) When this Act is extended to the Division of Orissa, such of those enactments as are in force in that Division, or, where a part only of this Act is so extended, so much of them as is inconsistent with that part, shall be repealed in that Division.

(3) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

(4) The repeal of any enactment by this Act shall not revive any right, privilege, matter or thing not in force or existing at the commencement of this Act.

Construction of Act.

3. The following definitions and rules shall apply in the construction of this Act unless there is something repugnant in the subject or context:— C. B., s. 3. B. B., s. 3.

(1) "Estate" means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands, prepared and maintained under the law for the time being in force by the Collector of a district:

(2) "Proprietor" means a person or a number of persons owning an estate:

(3) "Tenure" includes an under-tenure and the interest of every tenant of the class referred to in section 14. New.

Illustrations.

(a)—A *durpatni* or *sipatni* interest or a mokurrerree holding is a tenure.

(b)—A *dar-ijarah* or a farm for a term of years is a tenure.

(4) "Tenure-holder" means a person or a number of persons owning a tenure.

(5) A person shall not be deemed to be a raiyat, in respect of any land, or to hold that land as a raiyat, unless he holds it for the purpose of agriculture, horticulture or pasture, or he or his predecessor in interest came into possession of it for such purpose: C. B., s. 3 "raiyat" and "land." B. B., s. 3 "raiyat" and "land."

Provided that a person shall be deemed to hold as a raiyat any *bastu* or homestead land included in the same holding with other land held by him as a raiyat.

Explanation.—A person may hold land for a purpose mentioned in this clause though he has sublet it.

(6) "Under-raiyat" means a tenant holding land whether immediately or mediately below a raiyat.

(7) "Bastu holding" means bastu or other homestead land held by a tenant having the right provided for by Chapter VII. New.

(8) "Tenant" does not include any person who is not a tenure-holder, raiyat or under-raiyat, or the tenant of a bastu holding. New.

(9) "Landlord" means a person or a number of persons immediately under whom a tenant holds.

Bengal Tenancy Bill.

(*Chapter I.—Preliminary, Chapter II.—Khamar and Raiyatí Land.* Secs. 4—8.)

(*10*) "Rent" means whatever is payable or deliverable in money or kind by a tenant to his landlord on account of the use or occupation of the land held by the tenant.

(*11*) "Pay," "payable" and "payment," used with reference to rent, include "deliver," "deliverable" and "delivery."

D. s. 101. C. B. s. 56. B. B. s. 48.

(*12*) "Arrear" means an instalment, or part of an instalment, of rent which is not paid before sunset of the day on which it is payable.

(*13*) "Holding" means a parcel of land held by a tenant of a landlord under one lease or one set of conditions.

New.

(*14*) "Agricultural year" means, where the Bengalí year prevails, the year commencing on the first day of Bysáck, and where the Faslí or Amlí year prevails, the year commencing on the first day of Asin.

C. B. ss. 60 & 16. B. B. ss. 6 & 15.

(*15*) "Permanent Settlement" means the Permanent Settlement of Bengal, Bihár and Orissa made in the year 1793.

(*16*) "Transfer" includes sale, whether voluntary or in execution of a decree, and mortgage and gift.

(*17*) "Succession" includes both intestate and testamentary succession.

(*18*) "Bihár" means all the districts of the Patna Division, and such district or parts of districts of the Bhágalpur Division as the Lieutenant-Governor of Bengal may from time to time, by notification in the official Gazette, declare to be included in Bihár for the purposes of this Act.

(*19*) "Signed" includes "marked" when the person making the mark is unable to write his name; it also includes "stamped" with the name of the person referred to.

(*20*) "Prescribed" means prescribed by the Local Government by notification in the official Gazette.

(*21*) "Collector" means the Collector of a District or any other officer appointed by the Local Government to discharge the functions of a Collector under this Act.

(*22*) "Revenue-officer" in any provision of this Act means such officer as the Local Government may appoint to discharge the functions of a Revenue-officer under that provision.

C. B. s. 4 Report of Rent Commission, s. 3. B. B. s. 4.

Saving of custom, special law, &c.

4. Nothing in this Act shall affect—

(*a*) any custom or customary right not inconsistent with, or not expressly or by necessary implication modified or abolished by, its provisions;

(*b*) the powers and duties of Settlement-officers as defined by any law not expressly repealed by this Act;

(*c*) any enactment regulating the procedure for the realization of rents in estates belonging to the Government, or under the management of the Court of Wards or of the revenue-authorities;

(*d*) any enactment relating to the avoidance of tenancies by a sale for arrears of the Government revenue;

(*e*) any enactment relating to the partition of out revenue-paying estates;

(*f*) any other special or local law not repealed either expressly or by necessary implication by this Act or

(*g*) any incident of a ghátwálí or other service tenure.

Illustration.

The custom that an under-raiyat should, under certain circumstances, acquire a right of occupancy is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That custom accordingly, wherever it exists, will not be affected by this Act. C. B. s. 19 Expl. 4 (*f*). B. B. s. 19, Expl. 4 (*c*) proviso.

CHAPTER II.

OF THE DISTINCTION BETWEEN KHAMAR AND RAIYATÍ LAND.

Khamar land defined.

5. "*Khamar land*" means—

1st, land situated elsewhere than in Bihár which a proprietor has held, whether under the name of khamar, nij-jote, ser or otherwise, as his private land for twelve continuous years before the commencement of this Act, and C. B. s. 81. B. B. ss. 3 & 75.

2nd, land situate in Bihár which—

(*a*) is recognized as zeraat by a village custom established before the commencement of this Act: or

(*b*) is proved to have been held by a proprietor as zeraat for twelve continuous years immediately before the commencement of this Act.

All other land to be raiyatí.

6. All land which is not khamar land of some estate shall be deemed to be raiyatí land, and all land shall be presumed to be raiyatí land until the contrary is proved. & 75.

Power to order survey and register of khamar lands.

7. The Local Government may direct that a survey and register shall be made of all khamar land situate in any district or part of a district. B. B. s. 76.

Mode of making survey.

8. The survey shall be made by the Collector or by an officer authorized by the Collector in that behalf, under such rules as may from time to time be prescribed by the Local Government for the conduct of such surveys; and the Collector or such officer may exercise any of the powers conferred upon a Collector by the Bengal Survey Act of 1875, except the powers in Part IV of the said Act relating to the apportionment and recovery of expenses. B. B. s. 77. V. (B. C. of 1875

Bengal Tenancy Bill.

(*Chapter III.—Tenure-holders generally. Secs. 9—20.*)

B. s. 78.

Publication of register.

9. The Collector shall make a register, in such form as the Local Government may from time to time prescribe, of such lands in each village as he may ascertain to be khamar lands within the meaning of the definition contained in section five; and copies of that register shall be published in such manner as the Local Government may direct.

B. s. 79.

Appeals.

10. (*1*) Any person dissatisfied with any entry in the register may appeal to the Commissioner within one month after the publication; and the Commissioner shall make such enquiry as he considers necessary, and may direct the register to be amended in such manner as he thinks fit.

(*2*) An appeal shall lie to the Board of Revenue from any order passed by the Commissioner under this section, if preferred within one month from the date of the order.

B. s. 80.

Submission of register to Board of Revenue and Local Government.

11. If no appeal is preferred to the Commissioner, or after such appeals as have been so preferred have been disposed of, the Commissioner shall submit to the Board of Revenue a copy of the register, with a report showing how the survey and register have been made; and, if the Board are satisfied that the register is correct, they shall transmit the same to the Local Government for its approval.

B. s. 81.

Approval of register.

12. If the Local Government approves the register, it may direct that its approval of the same be notified in the official Gazette: Provided that its approval shall not in any case be given until after three months from the date of the publication under section nine.

B. s. 82.

Consequence of notification of approval.

13. When the approval of a register by the Local Government has been notified under section twelve, all land entered in the register shall, notwithstanding anything in the foregoing sections, be deemed to be khamar land, and all other land situate in the local area for which the register has been prepared shall, notwithstanding anything as aforesaid, be deemed to be raiyati land.

CHAPTER III.—OF TENURE-HOLDERS GENERALLY.

A.—Of the Right to hold at fixed rents.

D., 20 & 21. C. B. ss. 6 & 16. B. B., ss. 6 & 15.]

Land held at rent unchanged since Permanent Settlement not liable to enhancement.

14. Where land has been held by a tenant and his predecessors in interest at a rent which has not been changed from the time of the Permanent Settlement, then, subject to the provisions of this Act, the rent shall not be liable to enhancement, and the tenant shall be deemed to be a tenure-holder for the purposes of this Act.

D. ss. 21 & 38. C. B. ss. 6 & 17. B. B. ss. 6 & 16.

Presumption from twenty years' holding at unchanged rent.

15. Where land has been held by a tenant and his predecessors in interest at a rent which has not been changed for twenty years, then, subject to the provisions of this Act, it shall be presumed, until the contrary is shown, that it has been held by them at that rent from the time of the Permanent Settlement.

D. s. 38. C. B. s. 16. B. B. s. 15. Expl. I.]

Application of sections 14 and 15 when rent is paid in kind.

16. When a tenant has paid as rent a fixed share or the value of a fixed share of the produce of the land, the rent shall not be deemed to have been changed within the meaning of sections fourteen and fifteen merely by reason of the amount paid having varied from year to year, or by reason of the rent having been commuted to a fixed money-rent.

[D. s. 37. C. B. s. 16, Expl. II. B. B. s 15, Expl. II.]

Effect of separation or amalgamation of holding.

17. The operation of the foregoing sections of this chapter shall not be affected by the fact of land having been separated from other land which formed with it a single holding, or amalgamated with other land into one holding.

[D. s. 19. C. B. s. 7. B. B. s. 7.]

Tenure held since Permanent Settlement liable to enhancement only in certain cases.

18. (*1*) Where a tenure has been held from the time of the Permanent Settlement, its rent shall not be liable to enhancement except on proof—

(*a*) that the landlord under whom it is held is entitled to enhance the rent thereof either by the special custom of the district, or by the conditions under which the tenure is held, or

(*b*) that the tenure-holder, by receiving reductions of his rent, has subjected himself to the payment of the increase demanded, and that the lands are capable of affording it.

(*2*) A reduction of rent granted to a tenure-holder, on account of diluvion or for land taken under the provisions of any enactment for the time being in force for the acquisition of land for public purposes or companies, shall not be deemed a reduction within the meaning of this section.

[D. s. 20. C. B. s. 6. B. B. s. 6.]

Saving as to land held under terminable agreement.

19. Nothing in the foregoing sections of this chapter shall apply to land held under a terminable agreement.

[C. B. ss. 6 & 17, Exception. B. B., ss. 6 & 16, Exception.]

Saving as to land held in a district not permanently settled.

20. Where the area comprised in a tenure is situate in an estate which has never been permanently settled, nothing in the foregoing sections of this chapter shall prevent the enhancement of the rent upon the expiration of a temporary settlement of the revenue, unless the right to hold beyond the term of the settlement at a fixed rate of rent has been expressly recognized in settlement-proceedings by a Revenue-authority empowered by the Government to make definitively or confirm settlements.

Bengal Tenancy Bill.

(*Chapter III.—Tenure-holders generally. Secs. 21—28.*)

B.—Of the enhancement of rent.

[D. s. 23. C. B. ss. 9 & 12. B. B. ss. 9 & 10.]

Limits of enhancement of rent of tenures.

21. (*1*) Where the rent of a tenure-holder is liable to enhancement, it may, subject to any contract between the parties, be enhanced up to the limit of the customary rate payable by persons holding similar tenures in the vicinity.

(*2*) Where no such customary rate exists, it may, subject as aforesaid, be enhanced up to such limit as the Court thinks fair and equitable.

(*3*) In determining what is fair and equitable under sub-section two, the Court shall not, except as provided in sub-sections four and five, leave the tenure-holder as profit more than thirty per centum or less than ten per centum of the balance which remains after deducting from the gross rents payable to him the expenses of collecting those rents.

(*4*) If more than half the land included in the area of the tenure was unreclaimed at the time when the tenure was created, and if the reclamation of the unreclaimed land was one of the objects of the creation of the tenure, and that land was reclaimed accordingly, the Court, in determining what is fair and equitable under sub-section two, shall not leave the tenure-holder as profit less than twenty per centum of the balance mentioned in sub-section three, and may leave him as profit any share of that balance whether it exceeds thirty per centum thereof or not.

(*5*) If, in any case to which sub-section four does not apply, the tenure-holder has made improvements on the land, the Court, in determining what is fair and equitable under sub-section two, may leave him as profit any share of the balance mentioned in sub-section three it thinks fit, provided it be not less than ten per centum of the balance.

(*6*) If the tenure-holder himself occupies any portion of the land included in the area of his tenure, or has made a grant of any portion of the land either rent-free or at a beneficial rent, a fair and equitable rent shall be calculated for that portion and included in the gross rents aforesaid.

[C. B., s. 10. B. B., s. 11.]

Enhanced rent not to be more than double the previous rent.

22. Where the rent of a tenure-holder is liable to enhancement, the enhanced rent fixed under section 21 shall not be more than double the rent previously payable.

[C. B., s. 10. B. B., s. 11.]

Power to order gradual enhancement.

23. The Court may, if it thinks that an immediate increase of rent would produce hardship, direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the enhancement allowed has been reached.

[C. B., s. 10. B. B., s. 11.]

Rent once enhanced may not be altered for ten years.

24. When the rent of a tenure-holder has been enhanced under section 21 or by contract, it shall not be again enhanced under that section during the ten years next following the date on which it has been so enhanced.

C.—Of the Incidents of permanent tenures.

Incidents of permanent tenures generally.

25. Every permanent tenure shall, subject to the provisions of this Act in respect of registration, be capable of being transferred and bequeathed in the same manner and to the same extent as other immoveable property. [C. B., s. 13. B. B. ss. 12 & 14.]

Permanent tenure-holder not liable to ejectment.

26. A holder of a permanent tenure shall not be ejected by his landlord except under a decree of a Civil Court passed in accordance with this Act on the ground that he has broken a condition on breach of which he is, under the terms of a written contract between him and his landlord, liable to be ejected.

D.—Of the registration of transfers of, and succession to, permanent tenures.

Landlord bound to register voluntary transfer or succession on application.

27. (*1*) When a transfer of a permanent tenure (other than a transfer by sale in execution of a decree or by a summary sale under Chapter IV) or a succession to such a tenure takes place, the landlord shall, subject, in the case of a patní tenure, to the provisions of section 39, register the same on application made to him by the transferor and transferee, or by the person succeeding, as the case may be, and on payment by the applicant of the fee next hereinafter prescribed. [D. s. 25. C. B., s. 46. B. B. s. 37.]

(*2*) The fee payable on an application under this section shall be as follows, namely :— [D. s. 27. C. B., ss. 47, 49. B. B., ss. 39, 41.]

(*a*) When the application is made not more than six months from the date of the transfer or succession, a fee of two per centum upon the annual rent of the tenure: provided that no such fee shall be less than one rupee or more than one hundred rupees.

(*b*) When the application is made more than six months from the date of the transfer or succession, a fee of twenty per centum upon the annual rent of the tenure: provided that no such fee shall be less than ten rupees or more than one thousand rupees.

(*3*) When a landlord refuses to comply with an application for registration, made as required by sub-section one, he shall deliver to the applicant a statement in writing of the reasons for his refusal. [New.]

Application may be served through Revenue-officer.

28. (*1*) An application for the registration of a transfer of or a succession to a tenure may, instead of being made to the landlord under section 27, be made to such Revenue-officer as the Local Government may from time to time appoint in this behalf; and, on its being so made, and on the fee payable under section 27 being paid to the officer, he shall cause a notice to be served [New.]

Bengal Tenancy Bill.

(*Chapter III.—Tenure-holders generally. Secs. 29—35.*)

on the landlord, requiring him to register the transfer or succession, and informing him that the fee has been received and will be paid to him on demand when the registration has been effected.

(*2*) A landlord on whom a notice is served under this section shall, subject in the case of a patní tenure to the provisions of section 39, be bound to comply forthwith with the requisition therein contained.

B. ss. 47, (a) B., ss. 39, (a).]

Registration in case of transfer by sale in execution of decree other than decree for rent.

29. (*1*) When a permanent tenure is sold in execution of a decree other than a decree for arrears of rent due in respect thereof, the Court shall, before confirming the sale under section 314 of the Code of Civil Procedure, require the purchaser to pay into Court the registration fee prescribed by section 27, clause (*a*), and such further fee for service of notice of the sale on the landlord as may be prescribed by the rules under section 35.

IV of 1882.

(*2*) When the sale has been confirmed, the Court shall forthwith cause to be served on the landlord a notice of the sale, requiring him to register the same, and informing him that the registration-fee has been received and will be paid to him on demand when the registration has been effected; and the landlord shall be bound to comply with the requisition forthwith.

Registration in case of transfer by sale in execution of decree for rent or by summary sale.

30. When a permanent tenure is transferred by sale in execution of a decree for arrears of rent due in respect thereof, or by summary sale under Chapter IV, the landlord shall be bound to register the transfer without any application or requisition being made to him in this behalf, and without the payment of any fee.

§ 10. B., ss. 46, (a), 49. B., ss. 37, (a) and 41.]

Effect of omission to register voluntary transfer.

31. When a transfer of a permanent tenure (not being a transfer by sale in execution of a decree or by summary sale under Chapter IV) has taken place, the landlord may, until the transfer has been registered under section 27, or a Revenue-officer has ordered a notice to be served under section 28, hold the transferor and transferee jointly and severally liable for arrears of rent accruing subsequent to the transfer.

B., s. 35. B., s. 44.]

Application to Court to compel landlord to register.

32. (*1*) When a landlord refuses or neglects for a period of one month to register a transfer or succession which he is bound to register under the foregoing sections, the transferor or transferee, or, as the case may be, the person succeeding, may apply to any Civil Court having jurisdiction in the local area within which the land is situate to compel such registration.

(*2*) The Court to which an application is made under sub-section one may issue a notice to the landlord, and, when the application is made by one party to a transfer, also to the other party or parties to the transfer, requiring him or them, as the case may be, to show cause, at a time and place therein specified, why the transfer or succession should not be registered.

(*3*) If no cause as aforesaid is so shown, the Court may make an order directing the landlord to register the transfer or succession, and the order so made shall have the force of a decree in a suit.

Application by landlord to compel registration.

33. (*1*) When a transfer (other than a transfer by sale in execution of a decree or by summary sale under Chapter IV) or a succession, registrable under the foregoing sections, has taken place, and no application is made for its registration within the six months following the date on which it has taken place, the landlord may apply to any Civil Court as aforesaid to compel the parties to the transfer, or the person succeeding, as the case may be, to consent to its registration and pay the fee mentioned in section 27, clause (*b*). [C. B., ss. 50 and 51. B. B., ss. 42 and 43.]

(*2*) The Court to which an application is made under sub-section one may issue a notice calling upon the parties to the transfer, or the person succeeding, as the case may be, to show cause, at a time and place specified in the notice, why they or he should not consent to the registration and pay the fee.

(*3*) If no cause as aforesaid is so shown, the Court may make an order authorising the landlord to register the transfer or succession, and directing the transferee, or the person succeeding, as the case may be, to pay the fee; and the order so made shall have the force of a decree in a suit.

Landlord to give copies of entries in the register.

34. When a transfer of, or a succession to, a tenure has been registered under the foregoing sections, every person to or from whom the tenure or any share thereof is transferred, or (as the case may be) every person succeeding to the tenure, shall be entitled to receive free of charge from the landlord on demand a copy of the entry in the register relating to the tenure, certified under his hand as a true copy, and to receive from time to time in like manner as many additional copies as he may demand: provided that for every such additional copy he shall pay to the landlord such fee, not less than *eight annas* or more than *five rupees*, as the Board of Revenue may from time to time fix in this behalf. [C. B., s. 54. B. B., s. 46.]

Power to make rules regarding registration.

35. (*1*) The Board of Revenue may from time to time, by rules consistent with this Act and published in the official Gazette, prescribe forms for the registers to be maintained under the foregoing sections, and determine the mode in which, and the place at which, applications are to be made under section 27, and generally the procedure to be followed in regard to registration. [C. B., s. 54. B. B., s. 46.]

Bengal Tenancy Bill.
(Chapter IV.—Patní Tenures. Secs. 36—45.)

(2) In making any rule under sub-section one the Board may provide that any breach thereof shall be punishable with fine which may extend to fifty rupees.

CHAPTER IV.

OF PATNÍ TENURES.

D s. 26. C. B., ss. 14 & 15. B. B., ss. 13 & 14.]

Definition of patní tenure.

36. "Patní tenure" means a tenure of the kind described in Schedule II annexed to this Act, and includes the darpatní and other similar under-tenures referred to in that schedule.

D s. 26. C. B., s. 14. B.B., s. 13.

Incidents of patní tenures.

37. (1) Every patní tenure shall be deemed to be a permanent tenure.

(2) The holder of a patní tenure may, subject to the provisions of this Act, let the land comprised in his tenure or any part thereof.

[B. B. s. 45 (a).]

Right of landlord of patní tenure to demand security from transferee.

38. When a patní tenure is transferred, whether voluntarily or by sale in execution of a decree, or by summary sale under section 42, the landlord may require the transferee to furnish substantial security, to the amount of one half year's rent of the tenure, for the payment of the rent and the fulfilment of the other conditions of the tenure.

[B. B. s. 45 (a).]

Landlord may refuse registration of voluntary transfer when security is not given.

39. When a patní tenure is transferred otherwise than by sale in execution of a decree, or by summary sale under section 42, the landlord may refuse to register the transfer under Chapter III of this Act until the security required under section 38 is furnished.

[B. B. s. 45 (b).]

Landlord may attach tenure sold in execution or by summary sale when security is not given.

40. (1) In the case of a transfer by sale in execution of a decree, or by summary sale under section 42, if security is demanded by the landlord from the purchaser under section 38, and is not furnished within one month from the date on which it is so demanded, the landlord may attach and hold possession of the tenure to the exclusion of the transferee until the security is furnished.

(2) While an attachment under this section continues, the landlord may collect the rents from the undertenure-holders or raiyats, and, after deducting therefrom the cost of the attachment, the expenses of collection and the rent due to himself, he shall hold the balance in trust for the purchaser.

(3) If the rents so collected are not sufficient to discharge the cost of the attachment, the expenses of collection, and the rent due to the landlord, the purchaser shall be liable for the deficiency, and the landlord may proceed against him for the recovery of the same.

[B. B. s. 45 (c).]

Application to Civil Court, if security tendered is refused.

41. (1) If the security tendered under section 38 by any transferee is rejected by the landlord, the transferee may, within three months from the date of the rejection, apply to the Civil Court for an order directing the landlord to receive the security, and the Court, if satisfied of the sufficiency of the security tendered, may make such order, or, if not so satisfied, may make an order rejecting the application.

(2) No appeal shall lie from any order under this section.

Recovery of arrears by summary sale.

42. If default is made in payment of the rent due in respect of a patní tenure, held immediately from a proprietor, the landlord may, in addition to any other remedy given him by law, apply for the summary sale of the tenure in accordance with the rules for the sale of patní taluqs at the instance of zemindars, contained in Schedule III annexed to this Act.

Provided that nothing in those rules shall entitle a purchaser at any such sale to eject an occupancy-raiyat or cancel any contract entitling him to hold at a rent which was fair and equitable at the time the contract was made.

CHAPTER V.—OF OCCUPANCY RAIYATS GENERALLY.

[B. S. 19, Expl. II.]

Interpretation.

43. For the purposes of this chapter—

(a) "village" means an area included in a village-map of the revenue-survey within the same exterior boundary, and, where no such maps have been prepared, such area as the Local Government or any officer appointed by the Local Government in this behalf may determine: and [New.]

(b) where two or more estates have been created by one or more partitions taking place since the first day of January, 1853, the area comprised in the parent estate of which they would have formed part if no such partition had taken place, shall be deemed to be a single estate.

[B.B. s. 19 & Expl. IV proviso.]

Present occupancy-raiyats to become occupancy-raiyats under Act.

44. Every raiyat who, immediately before the commencement of this Act, has, by the operation of any enactment, by custom having the force of law, or otherwise, a right of occupancy in any land shall, when this Act comes into force, become, for the purposes of this Act, an occupancy-raiyat of that land.

Acquisition of status of settled raiyat of village or estate.

45. (1) Every person who, for a period of twelve years, whether before or after the commencement of this Act, has continuously held, as a raiyat, raiyatí land situate in any village or estate, shall, notwithstanding any contract to the contrary, and though the land so held by him at different times during that period may have been different, be deemed to have become, on the expiration of that period, a settled raiyat of that village or estate.

Bengal Tenancy Bill.

(*Chapter V.—Raiyats with Right of Occupancy. Secs. 46—52.*)

(2) A person shall be deemed for the purposes of this section to have held as a raiyat any raiyatí land held as a raiyat by a person whose heir he is.

(3) Raiyatí land held by two or more co-sharers as a raiyatí holding shall be deemed for the purposes of this section to have been held as a raiyatí holding also by each such co-sharer.

Loss of status of settled raiyat.

46. If a settled raiyat of a village or estate has ceased for a period of one year, whether before or after the commencement of this Act, to hold raiyatí land as a raiyat in that village or estate, either alone or as a co-sharer with others, he shall be deemed to have ceased, on the expiration of that period, to be a settled raiyat of that village or estate.

Settled raiyat to have occupancy-right in raiyatí land held by him in village or estate.

47. Every settled raiyat of a village or estate holding after the second day of March 1883 as a raiyat any raiyatí land comprised in that village or estate shall, notwithstanding any contract to the contrary, be deemed to acquire or have acquired in that land a right of occupancy under the law for the time being in force:

[s. 40, Expls. V. B. s. 19, pl. IV.]

Provided that a person shall not acquire a right of occupancy under this section in respect of any land held by him alone as owner, tenure-holder or ijáradár.

Acquisition of occupancy-right by grant.

48. (1) A proprietor or permanent tenure-holder, from whom a person takes land as a raiyat, or immediately under whom a person holds land as a raiyat, may grant to that person an occupancy-right in respect of that land.

(2) An occupancy-right granted under this section shall be deemed to be an occupancy-right within the meaning of this Act.

[s. 40, pl. V. B. s. 19, pl. III (b), pl. IV (c).]

Acquisition of occupancy right in khamar land.

49. (1) Every person who, for a period of twelve years ending after the commencement of this Act, has held khamar land as a raiyat shall, unless he has held it for any portion of that period under a lease for a fixed period, acquire a right of occupancy in that land.

(2) The holding of the father or other person from whom a raiyat inherits shall be deemed to be the holding of the raiyat for the purposes of this section.

Incidents of occupancy-right generally.

50. When a raiyat has an occupancy-right in respect of any land, the following provisions shall, notwithstanding any contract between him and his landlord to the contrary, apply, namely:—

[B. s. 69.]

(a) he may use the land in any manner which does not render it unfit for the purposes of the tenancy:

(b) he may make improvements on the land as by this Act provided:

(c) he shall pay rent at fair and equitable rates determined as by this Act provided: [B. B. s. 21. (d).]

(d) he shall not be ejected by his landlord from the land, except in execution of a decree for ejectment passed in accordance with this Act on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with the provisions of this Act and on breach of which he is, under the terms of a written contract between him and his landlord, liable to be ejected: [B. B. s. 21 (e)., 31, 69 (a).]

(e) he may sub-let the land or any part thereof: [B. B. s. 71.]

(f) his interest in the land shall, subject to the rights reserved to the landlord by this Act, be capable of being transferred, and bequeathed by will in the same manner and to the same extent as other immoveable property: [B. B. s. 21 (a) and (b).]

(g) his interest in the land shall, if he dies intestate in respect of it, descend in the same manner as any other immoveable property: provided that, in any case in which, under the law of inheritance to which he is subject, his other property goes to the Crown, his interest in the land shall go to his landlord. [B. B. s. 21 (c).]

Landlord's right of pre-emption on voluntary sale of occupancy-right.

51. (1) When an occupancy-raiyat intends to sell his occupancy-right to any person other than the landlord, he shall file in the office of the Collector, or of the officer in charge of the sub-division, for service on the landlord, a written notice of his intention, stating the person to whom he intends to sell the right, and shall defer proceeding with the sale for one month from the date on which he files the notice.

(2) The officer in whose office the notice is filed shall forthwith cause it to be served on the landlord.

(3) The landlord may, within the period of one month from the date of the notice being filed, claim to purchase the occupancy-right from the raiyat at such price as may be agreed on between them, or, if they cannot agree on a price, at such price as may be fixed by the Civil Court on an application made to it in this behalf by the landlord within the said period of one month; and, if the landlord so claims, the raiyat shall sell the right to him accordingly.

(4) If a raiyat sells his right of occupancy in contravention of this section, the landlord may, within six months from the date of the sale, claim to purchase the right from the purchaser or any other person into whose hands it may have passed at a price ten per centum below its estimated value, and, if the landlord so claims, the purchaser or that person, as the case may be, shall sell the right to him accordingly.

Landlord's right of pre-emption on sale in execution.

52. Where an occupancy-right is sold in execution of a decree, and two or more persons, one of whom is the landlord, respectively ad-

Bengal Tenancy Bill.

(*Chapter V.—Raiyats with Right of Occupancy. Secs. 53—59.*)

vance the same sum at any bidding, the bidding shall be deemed to be the bidding of the landlord.

Landlord's right to take the place of mortgagee on foreclosure.

53. (*1*) Where a right of occupancy has been mortgaged by the raiyat and an order absolute for foreclosure is applied for in respect of it under section 87 of the Transfer of Property Act, 1882, the Court shall, if it proposes to make the order, cause a notice of the application to be served on the landlord, and shall defer making the order for a period of one month from the service of the notice.

IV of 1882.

(*2*) If the landlord within the said period of one month pays into Court the amount requisite to redeem the mortgage, the Court shall pay that amount to the plaintiff in the suit, declare the landlord entitled to stand in the place of the plaintiff, and pass an order absolute for foreclosure in favour of the landlord.

(*3*) An order absolute passed under sub-section two shall have the same effect as if the landlord had been the mortgagee and the plaintiff in the suit.

Landlord's right to purchase in case of gift of occupancy-right.

54. (*1*) When an occupancy-raiyat makes a gift of his occupancy-right to any person other than his landlord, he shall forthwith file in the office of the Collector, or of the officer in charge of the sub-division, for service on the landlord, a written notice of the gift, stating the person to whom he has made it.

(*2*) The officer in whose office the notice is filed shall forthwith cause it to be served on the landlord.

(*3*) The landlord may, within the period of one month from the date on which the notice is filed, claim to purchase the right from the donee, or any other person into whose hands it may have passed, at such price as may be agreed on between them, or, if they cannot agree on a price, at such price as may be fixed by the Civil Court on an application made to it in this behalf by the landlord within the said period of one month, and, if the landlord so claims, the donee or other person as aforesaid shall sell the right to him accordingly.

(*4*) If a raiyat makes a gift of his occupancy-right, and does not comply with the provisions of this section, the landlord may, within six months from the date on which the gift is made, claim to purchase the right from the donee, or any other person into whose hands it may have passed, at a price ten per centum below its estimated value; and, if the landlord so claims, the donee or that person, as the case may be, shall sell the right to him accordingly.

Landlord's right to purchase where occupancy-right is bequeathed.

55. When an occupancy-raiyat dies, and any person, other than a person to whom, if the raiyat had died intestate, the occupancy-right would have descended, acquires that right under a bequest made by the raiyat, the landlord may, within the period of six months from the date on which the right is so acquired, claim to purchase the right from the legatee, or any other person into whose hands it may have passed, at such price as may be agreed upon between them, or, if they cannot agree upon a price, at such price as the Civil Court may, on the application of the landlord, made within the said period of six months, fix in this behalf, and if the landlord so claims the legatee or other person as aforesaid shall sell the right to him accordingly.

Raiyat of land of which landlord has acquired occupancy-right to be an occupancy-raiyat.

56. Notwithstanding any contract to the contrary, when the landlord of an occupancy-raiyat acquires, under the foregoing sections or otherwise, the occupancy-right in any of the land comprised in the holding, any person thereafter holding the land as a raiyat shall have a right of occupancy in respect of it, and, if immediately before the acquisition of the right by the landlord the rent of the land was a money-rent, shall be entitled to hold at a money-rent fixed in accordance with the provisions of this Act.

Acquisition of status of settled raiyat by succeeding to occupancy-right.

57. Every person succeeding by way of intestate succession to the occupancy-rights, or any share of the occupancy-rights, of a settled raiyat of a village or estate, in respect of any land situate in that village or estate, shall become a settled raiyat of the village or estate:

Provided that, when a person so succeeding holds as a raiyat at the time when he so succeeds other land in the same village or estate, he shall not, merely by reason of becoming a settled raiyat of the village or estate under this section, acquire, under section 47, an occupancy-right in that other land.

CHAPTER VI.

OF THE RENT PAYABLE BY OCCUPANCY-RAIYATS.

(*A*).—*Of money-rents generally.*

Existing money-rents payable until altered as herein provided.

58. A money-rent payable by an occupancy-raiyat shall be presumed to be fair and equitable, and shall continue to be paid by him until it is enhanced under this Act or reduced. [B. B. 21

Enhancement of money-rents by contract.

59. (*1*) A money-rent payable by an occupancy-raiyat may be enhanced by a contract in writing approved of, and registered by, a Revenue-officer appointed by the Local Government in this behalf. [New]

(*2*) A Revenue-officer shall not, under this section, approve or register any contract by which a raiyat engages to pay a rent more than *six* annas per rupee greater than that previously payable, or more than one-*fifth* of the estimated average annual

Bengal Tenancy Bill.

(Chapter VI.—Rent payable by Occupancy-raiyats. Secs. 60—67.)

value of the gross produce of the land in staple crops, calculated at the price at which raiyats sell at harvest-time, or any contract, until he has satisfied himself that it is fair and equitable, and that the raiyat in entering into it acts as a free agent.

B. s. 21 **60.** Except as provided by section 59, or on account of an addition to the area of the holding by alluvion or otherwise, a money-rent payable by an occupancy-raiyat shall not be enhanced otherwise than by a decree passed under this chapter.

Money-rents not enhanceable except as provided.

61. (*1*) When raiyati land which has previously been held by a tenant at a money-rent is let to a settled raiyat of the village or estate in which it is situate, that raiyat shall not be bound to pay therefor any rent higher than that which was paid by the previous tenant, unless the higher rent has been fixed by a contract in writing, approved of and registered by a Revenue-officer appointed by the Local Government in this behalf.

Limit of money rent payable by settled raiyat taking new holding.

(*2*) A Revenue-officer shall not under this section approve of or register any contract by which a raiyat engages to pay a rent more than one-*fifth* of the estimated average annual value of the gross produce of the land in staple crops, calculated at the price at which raiyats sell at harvest-time, or any contract, until he has satisfied himself that it is fair and equitable, and that the raiyat in entering into it acts as a free agent.

B.—Of the preparation of a table of rates and produce, and of suits to enhance money rents where such a table is in force.

B. B. ss. 131 & 132.] **62.** The Local Government may, by an order in the official Gazette, direct a Revenue-officer to prepare for any local area, with the aid of such assessors as the Local Government may appoint in this behalf, a table showing for each class of land comprised in that area the rate of rent fairly and equitably payable by occupancy-raiyats, the average gross produce of the land and the average value of that produce.

Power to direct preparation of table.

Contents of table. **63.** The table shall specify—

B. B. s. 133.] (*a*) the several classes of land for which, having regard to the nature of the soil, situation, means of irrigation and other like considerations, it is necessary to fix different rates of rent;

(*b*) the rate, or the maximum and minimum rates, of rent fairly and equitably payable by occupancy-raiyats holding land of each such class; and

(*c*) the estimated average amount, or the maximum and minimum estimated average amounts, of the gross produce in staple crops of land of each such class, and the estimated average value or values of that produce.

Principle on which rent-rates are to be fixed.

64. In fixing the rate of rent for any class of land under section 63 regard shall be had— [B. B. s. 133.]

(*a*) to the rates of rent ordinarily payable by occupancy-raiyats for land of that class at the time the table is prepared;

(*b*) to the value of the average annual gross produce of land of that class and the cost of raising such produce about the time at which those rates were fixed, or, if that time or the value and cost about that time cannot readily be ascertained, to the value of the average annual gross produce and the cost of raising such produce about any other time which it may appear equitable to take for the purpose of comparison;

(*c*) to the value of the average annual gross produce of land of that class and the cost of raising such produce at the time at which the table is prepared; and

(*d*) to the following rule, namely, that when the rate of rent for any class of land is raised on account of an increase in the value of the average gross produce of land of that class, the new rate shall not bear to the old rate a higher proportion than the increased value of the produce bears to the former value:

Provided that the rate fixed for any class of land shall not in any case exceed one-*fifth* of the estimated average annual value of the gross produce in staple crops of land of that class, calculated at the price at which raiyats sell at harvest-time. [B. B. s. 24, cl. (c).]

65. When the Revenue-officer has prepared the table, he shall publish it in the local area to which it relates in the vernacular language prevailing in that local area, in such manner as the Board of Revenue may from time to time prescribe. [B. B. s. 137.]

Local publication of the table.

66. Any person objecting to any entry in the table may present a petition to the Revenue-officer within a period of one month after the publication; and the Revenue-officer, with the aid of the assessors, shall consider any such objection, and may alter or amend the table. [B. B. s. 138.]

Revenue-officer to deal with objections.

67. If no objection is made within the said period of one month, or, where objections are made, after those objections have been disposed of, the Revenue-officer shall submit the table, together with his proceedings, a report setting forth the grounds of his decision on each point, and any petitions of objection which may have been [B. B. s. 139.]

Table to be submitted to superior Revenue-authorities.

Bengal Tenancy Bill.

(Chapter VI.—Rent payable by Occupancy-raiyats. Secs. 68—73.)

received, through the Commissioner of the Division, to the Board of Revenue for approval.

[B. B. s 140.] **68.** The Board of Revenue may amend the table submitted under section 67 in any manner which appears to it proper, and may allow in whole or in part any objection forwarded therewith or subsequently made, or may return the case for further enquiry.

Proceedings of Board of Revenue thereupon.

[B. B. s. 141.] **69.** When a table of rates has been sanctioned by the Board, it shall be submitted to the Local Government, which may amend the same in any manner it thinks fit, and may direct, if it thinks fit, that the table or amended table shall be published in the official Gazette with a specification of the local area to which it applies.

Publication of table after final sanction.

[B. B. s. 143.] **70.** A table for any local area published under section 69 shall come into force on the date on which it is so published, and shall continue in force for such period, not less than ten or more than thirty years, as the Local Government at the time of publication may direct.

Period for which table remains in force.

[B. B. s. 142.] **71.** The publication of a table under section 69 shall be conclusive evidence in any proceeding under this Act—

Table to be conclusive evidence.

(1) that the proceedings for the preparation of the table have been duly conducted in accordance with this Act:

(2) that, except as in this Act provided, the rates shown in the table for each class of land are the fair and equitable rates payable for land of that class by occupancy-raiyats within the local area to which the table applies:

(3) that the average gross produce of land of any class, and the average value thereof, are in accordance with the gross produce and the value specified in regard to that class in the table.

72. All expenses incurred by the Government in preparing a table of rates and produce for any local area, including the salaries of all officers employed exclusively in its preparation, and such portions as the Local Government may from time to time fix of the salaries of officers employed in its preparation in addition to their other public duties, shall be defrayed by occupancy-raiyats and their landlords in that local area in such proportions as the Local Government may from time to time determine; and the proportion of those expenses so to be defrayed by any person shall be recoverable from him as if it were an arrear of land-revenue due by him.

Expenses incurred in preparing table how defrayed.

[B. B. s. 144.] **73.** When a table is in force under the foregoing sections for any local area, the landlord of any holding within that area, held by an occupancy-raiyat at a money rent, may, subject to the provisions of section 78, institute a suit to enhance the rent then payable on the ground that it is below that which would be payable at the rates shown in the table; and the Court shall enhance the rent in accordance with the rates shown in the table, or, where for any class of land a maximum and a minimum rate are entered in the table, to such rate, not higher than the maximum and not lower than the minimum, as it thinks fit: Provided that—

Suit to enhance where table is in force.

1st.—Where the rent of any land comprised in the holding would, by reason of a change having taken place in or in regard to the land since the raiyat or his predecessor in interest began to hold it, be fixed under this section at a higher rate, and would, but for that change, have been fixed under this section at a lower rate, the following rules shall apply, namely:—

(*a*) if the change has been effected solely by the agency or at the expense of the raiyat or his predecessor in interest, the Court shall fix the rent of that land at the lower rate; [B. B. s. 23, cls. (3) & (4).]

(*b*) if the change has been effected partly by the agency or at the expense of the landlord or his predecessor in interest, and partly by the agency or at the expense of the raiyat or his predecessor in interest, the Court shall fix the rent of the land at such rate intermediate between the higher rate and the lower rate as, having regard to all the circumstances of the case, it thinks fair and equitable; and [New.]

(*c*) if it is not proved that the change has been effected by the agency or at the expense of the landlord or the raiyat, or the predecessor in interest of either of them, the Court shall fix the rent of the land at a rate equal to the lower rate, together with half the difference between the higher rate and the lower rate. [B. B. s. 24 (*a*).]

2ndly.—When the raiyat proves that by contract or by custom, or on some equitable ground, he is entitled to hold at a rate lower than the rate applicable under this section, the Court shall fix the rent at the lower rate. [B. B. ss. 24(*c*), 142, proviso.]

Illustrations.

(*a*) The rates shown in the table for land of a certain description are—

when the land is irrigated from a well ... Rs. 4 per acre.
when the land is not so irrigated ... Rs. 2 „

The holdings of *A*, *B*, *C* and *D*, occupancy-raiyats, are composed of land of that description irrigated from wells constructed on these holdings respectively.

Bengal Tenancy Bill.

(*Chapter VI.—Rent payable by Occupancy-raiyats. Secs. 74—76.*)

The well on A's holding is an ancient one existing from a time anterior to the tenancy: that on B's holding has been constructed by the landlord since the commencement of the tenancy: that on C's holding has been constructed by the raiyat: that on D's holding has been constructed by the landlord and raiyat, each contributing some portion of the labour and materials. The rents of the holdings of A and B must be fixed at Rs. 4 per acre, that of C's holding at Rs. 2 per acre, and that of D's holding at such rate intermediate between Rs. 2 and Rs. 4 as the Court thinks fair and equitable.

(*b*) The rates shown in the table for land of a certain description are as follows:—

when such land is irrigated from a branch of a river ...	... Rs. 4 per acre.
when such land is not so irrigated	... Rs. 2 per acre.

The holdings of E and F, occupancy-raiyats, are composed of land of that description, and were not irrigable until 40 years ago, when, owing to a change in the course of a neighbouring river, a new branch established itself contiguous to them. E has been in occupation of his holding 50 years, F only 30; the rent of E's holding must be fixed at Rs. 3, that of F's holding at Rs. 4.

C.—Of suits to enhance money rents where a table of rates and produce is not in force.

B. ss. 23 (3) and 4 (*e*) 2.]

Grounds on which landlord may sue to enhance where table is not in force.

74. (*1*) The landlord of a holding held at a money rent by an occupancy-raiyat and situate in a local area for which a table of rates and produce, prepared under the foregoing sections, is not in force, may, subject to the provisions of section 78, institute a suit to enhance the rent on one or more of the following grounds, namely:—

(1) that the rate of rent paid by the raiyat is below the prevailing rate payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity;

(2) that the productive powers of the land held by the raiyat, as compared with those powers at the time when the rent was fixed, or, when that time or the productive powers at that time cannot readily be ascertained, with the productive powers at any other time which it may appear equitable to take for purposes of comparison, have increased otherwise than by the sole agency or at the sole expense of the raiyat or his predecessor in interest and from causes not merely temporary or casual; and

(3) that the average prices of produce in the locality, or at the usual markets, as compared with similar prices about the time when the rent was fixed, or, when that time or the prices prevailing about that time cannot readily be ascertained, with the similar prices about any other time which it may appear equitable to take for purposes of comparison, have increased otherwise than by the sole agency or at the sole expense of the raiyat or his predecessor in interest, and from causes not merely temporary or casual.

(*2*) Nothing in this section shall affect any contract binding a landlord not to enhance the rent of a tenant.

Illustrations of Ground (1).

(*a*.) A's paternal grandfather seventy years ago reclaimed the land which A, an occupancy-raiyat, now holds, and which came to him by inheritance from such paternal grandfather. B is an occupancy-raiyat who holds land which was in a culturable state when B was first let into possession thereof. There is evidence that the hereditary descendant of a raiyat who, being the first settler, reclaimed the land has a special privilege. A and B are not raiyats of the same class.

(*b*.) A is in possession of a holding which has descended to him from his great-grandfather, who held it at the time of the Permanent Settlement. B was let into possession of his holding twenty years ago. There is evidence that the descendants of raiyats who were in possession at the time of the Permanent Settlement customarily hold at rates less than raiyats who have come into possession at a later period. A and B are not raiyats of the same class.

[B. B. s. 24 (*a*) and (*c*).]

Rules for enhancement under section 74.

75. All enhancements of rent on the second or third of the grounds specified in section seventy-four shall be subject to the following rules, namely:—

(*a*) If the increase of the productive powers of the land, or of the prices of produce, has been effected wholly by the agency or at the expense of the landlord or his predecessor in interest, the landlord shall be entitled to the whole benefit of the increase:

(*b*) If the increase has been effected partly by the agency or at the expense of the landlord or his predecessor in interest, and partly by the agency or at the expense of the raiyat or his predecessor in interest, the benefit shall be divided between the landlord and the raiyat in such shares as the Court, having regard to all the circumstances of the case, thinks fair and equitable:

(*c*) If it is not proved that the increase has taken place by the agency or at the expense of the landlord or the raiyat, or the predecessor in interest of either of them, each shall be entitled to one-half of the benefit: Provided that in any such case the enhanced rent shall not bear to the rent previously payable a higher proportion than the increased productive powers or increased prices bear (as the case may be) to the former productive powers or former prices:

(*d*) The enhanced rent shall not in any case exceed one-*fifth* of the estimated average annual value of the gross produce of the land in staple crops, calculated at the price at which raiyats sell at harvest-time.

D.—Rules applicable to suits to enhance money rents generally.

[B. B. s. 24 (*b*).]

No enhancement beyond double the rent previously payable.

76. The rent of a holding shall not be enhanced in a suit under any of the foregoing sections of this chapter so that the enhanced rent shall be more than double the rent previously payable.

Bengal Tenancy Bill.

(Chapter VI.—Rent payable by Occupancy-raiyats. Secs. 77—82.)

[B. B. s. 24 (d).]

Power to order progressive enhancement.

77. When a Court passing a decree for enhancement under any of those sections considers that the immediate enforcement of the decree in its full extent would be attended with hardship to the raiyat, it may direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the enhancement decreed has been reached.

[B. B. s. 143.]

Rent enhanced or commuted not enhanceable for 10 years.

78. When the rent of an occupancy-holding has been enhanced by a decree under any of those sections or under any enactment repealed by this Act, or by contract, or has been commuted under section 82, a suit for its enhancement shall not be instituted under this chapter within the ten years next following the date on which it has been so enhanced or commuted, except on the ground that since the rent has been so enhanced or commuted an improvement has been made by the landlord which, but for this section, would entitle him to an enhancement.

E.—Of suits for the reduction of money rents.

[B. B. s. 25. (2) & (3).]

Occupancy-raiyat when entitled to reduction of rent.

79. (*1*) An occupancy-raiyat holding at a money rent may, notwithstanding any contract to the contrary, institute a suit for the reduction of his rent on either or both of the following grounds, and, except as provided by section 96, not otherwise, namely:—

(*a*) on the ground that the productive powers of the land, as compared with those powers at the time when the rent was fixed, or, when that time or the productive powers at that time cannot readily be ascertained, with the productive powers at any other time which it may appear equitable to take for purposes of comparison, have decreased from some cause beyond the raiyat's control, and not merely temporary or casual;

(*b*) on the ground that the average prices of produce in the locality or at the usual markets, as compared with similar prices about the time when the rent was fixed, or, when that time or the prices prevailing about that time cannot readily be ascertained, with the average prices prevailing about any other time which it may appear equitable to take for purposes of comparison, have decreased from some cause beyond the raiyat's control, and not merely temporary or casual.

(*2*) In any suit instituted under this section the Court may direct such reduction of the rent as it thinks fair and equitable.

F.—Special rules regarding money rents payable for pasture lands.

[B. B. s. 23, Expl. II. & s. 24 (e).]

Special rules for pasture lands.

80. (*1*) Sections 62 to 79, both inclusive, shall not apply to land fit to be used, or which in accordance with local usage is used, only as pasture; but when such land is held at a money rent by an occupancy-raiyat, the landlord may, subject to any contract between the parties, institute a suit to enhance the rent on the ground—

(*a*) that the rate of rent payable by the raiyat is below the prevailing rate payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity, or

(*b*) that, having regard to the increase of rent on arable land in the vicinity since the rent payable by the raiyat was fixed, it is reasonable to enhance that rent.

(*2*) Where an enhancement is applied for on the ground mentioned in clause (*b*), the Court shall fix the rent at such rate as it thinks fair and equitable.

G.—Of rents payable in kind or varying with the crop.

Limit to amount of rent payable in kind or varying with crop.

81 (*1*). Where an occupancy-raiyat pays rent in kind, or pays as rent the value of a certain share of the actual gross produce, the following rules shall apply, namely:—

(*a*) notwithstanding any contract or custom to the contrary, the landlord shall not be entitled to recover, in respect of any portion of the holding on which staple crops are grown, more than half the gross produce or its value, as the case may be;

(*b*) the landlord shall not, except under a contract in writing, be entitled to recover, in respect of any portion of the holding on which other crops are grown, any other description or any greater amount of rent than a sum equal to one-half of the estimated average value of the produce of that portion of the holding if staple crops were grown on it.

(*2*) Nothing in this section shall prevent a landlord recovering the value of any seed, labour or other assistance he may have contributed towards the production of the crop.

C. R. and 92.

Commutation of rents.

82 (*1*). An occupancy-raiyat whose holding consists of raiyatí land, and who pays rent in kind, or pays as rent the value of a certain share of the actual gross produce of the holding, may, notwithstanding any contract to the contrary, sue to have his rent commuted into a money-rent.

(*2*) The money-rent shall be fixed at the discretion of the Court—

(*a*) according to the prevailing money-rent payable by the same class of raiyats for land of a similar description and with similar advantages in the vicinity, or

Bengal Tenancy Bill.

(Chapter VII.—Right of Settled Raiyat in Bastu Land and (Chapter VIII.—Ordinary Raiyats. Secs. 83—90.)

(*b*) according to the average value of the rent actually received by the landlord during the preceding five years.

(*3*) When a money-rent is fixed under clause (*b*), a reasonable deduction shall be made by the Court from the average value aforesaid in consideration of the whole risk of cultivation being taken by the raiyat.

II.—Supplementary provisions.

[B. B. s. 45.] Collectors to prepare annual price-lists of staple crops.

83. (*1*) The Collector of every district shall prepare annually lists of the market-prices at harvest-time of staple crops grown in such local areas as the Board of Revenue may from time to time direct, and shall submit them to the Board of Revenue for approval or revision.

(*2*) The price-lists shall, when approved or revised by the Board of Revenue, be published in the official Gazette under the signature of one of the Secretaries to the Board.

(*3*) Any such price-list so published shall, in any proceedings under this chapter, be conclusive evidence of the prices prevailing in the local area at harvest-time in the year to which it relates.

[B. B., ss. 134, 145 and 24 (c).] Power to make rules.

84. The Board of Revenue may from time to time, subject to the approval of the Local Government and to the control of the Governor General in Council, make rules—

(*a*) for the guidance of officers engaged in the preparation of tables of rates and produce under this chapter;

(*b*) for the guidance of officers engaged in the preparation of price-lists under section 83;

(*c*) determining what crops shall be deemed to be staple crops for the purposes of this chapter in any local area;

(*d*) for the guidance of Revenue-officers registering contracts under section 59 and section 61.

(*e*) for the guidance of Revenue-officers and Courts in estimating the average annual value of the gross produce of land for the purposes of sections 59 and 61 and section 75, clause (*d*).

CHAPTER VII.

OF THE RIGHT OF A SETTLED RAIYAT IN BASTU LAND.

[New.] Settled raiyat to have permanent right in *bastu* land.

85. (*1*) A person who is under Chapter V a settled raiyat of a village or estate as defined in that chapter shall, notwithstanding any contract to the contrary, have a right permanent, heritable and capable of being transferred and bequeathed, in any *bastu* or other homestead land in that village or estate which is not comprised in an occupancy-holding and which is held by him as the site of, or for the purpose of erecting, a dwelling-house suitable for himself and his family, together with all necessary out-offices.

(*2*) A person having a right under sub-section one in any land in a village or estate shall not lose that right merely by reason of his ceasing to be a settled raiyat of that village or estate.

[B. B. s. 32.] Provisions regarding ejectment.

86. (*1*) Notwithstanding any contract to the contrary, a person having in respect of any land a right under section 85 shall not be ejected from that land except in execution of a decree for ejectment passed in accordance with this Act on the ground that he has broken a condition consistent with the provisions of this Act and on breach of which he is, under the terms of a written contract between him and his landlord, liable to be ejected, and, if he is so ejected, shall be entitled to compensation for any house or offices of the description referred to in section 85 which may have been erected on the land by him or his predecessor in interest whether before or after the commencement of this Act.

(*2*) A Court passing a decree for the ejectment of such a person shall determine the amount of compensation (if any) due to him under sub-section one and shall make the decree conditional on the payment of that amount by the decree-holder.

[B. B. s. 33.] Rule for enhancing rent.

87. When a person has in respect of any land a right under section 85, and the rent of the land has not been enhanced during the previous ten years, the landlord may, unless barred by any contract between the parties, enhance the rent, so that it may be equal to the rent paid by other tenants for land in the neighbourhood having similar advantages and used for similar purposes, or at his option so that it may be equal to five per centum of the market-value of the land.

CHAPTER VIII.

OF ORDINARY RAIYATS.

Ordinary raiyat defined.

88. Every person holding raiyatí land as a raiyat and not having a right of occupancy in respect of it shall be deemed to hold it as an ordinary raiyat.

Rents regulated by agreement.

89. An ordinary raiyat shall, subject to the provisions of section 119, pay such rent as may, from time to time, be fixed by agreement between him and his landlord.

[B. B. ss. 26, 72 (5).] Grounds on which an ordinary raiyat may be ejected from raiyatí land.

90. Notwithstanding any contract to the contrary, an ordinary raiyat shall not be ejected from raiyatí land by his landlord as such except—

(*a*) as hereinafter provided for arrears of rent,

(*b*) in execution of a decree for ejectment passed in accordance with this Act on the ground

Bengal Tenancy Bill.

(Chapter VIII.—Ordinary Raiyats and Chapter IX.—Rent of several classes of Tenants. Secs. 91—96.)

that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with this Act and on breach of which he is, under the terms of a written contract between him and his landlord, liable to be ejected, or

(*c*) in execution of a decree for ejectment passed on the ground that he has refused to agree to an enhancement of rent demanded by his landlord in accordance with the provisions next hereinafter contained.

Notice of enhancement to be served through Civil Court.

91. When a landlord wishes to enhance, within the limit fixed by section 119, the rent of an ordinary raiyat holding raiyati land at a money-rent not fixed for a term by agreement, and the raiyat does not agree to the enhancement, the landlord may cause to be served on the raiyat through the Civil Court a notice of the enhancement not less than six months before the commencement of the agricultural year in which the landlord desires the enhancement to take effect.

Raiyat may agree to enhancement. If he does not, landlord may sue to eject.

92. (*1*) If, within the period of one month from the service of a notice under section 91, the raiyat on whom the notice has been served presents to the Court issuing the notice a statement in writing declaring his willingness to pay the enhanced rent, he shall be deemed to have agreed to pay that rent from the commencement of the agricultural year next following.

(*2*) If the raiyat does not, within the said period of one month, present to the Court a statement as aforesaid, the landlord may, not less than ten weeks before the commencement of the agricultural year next following, institute a suit to eject the raiyat.

Procedure in suit.

93. (*1*) If, in any suit instituted under section 92, the defendant appears and agrees to pay the enhanced rent demanded, his agreement shall thereupon be recorded, and he shall not be ejected, but shall be liable to pay that rent from the commencement of the agricultural year next following the date of the agreement.

(*2*) If the defendant does not appear, or if, on appearing, he does not agree to pay the enhanced rent demanded, the Court may pass a decree for his ejectment on condition that, within fifteen days from the date of the decree, the landlord deposits in Court—

(*a*) such sum (if any) as may be declared by the decree to be payable to the raiyat as compensation for improvements; and

(*b*) a further sum as compensation for disturbance equal to *ten* times the yearly increase of rent demanded.

Decree when absolute:

94. (*1*) If these sums are so deposited, the decree shall be made absolute, and the sums deposited shall be paid to the raiyat.

when to become void.

(*2*) If these sums are not so deposited, the decree shall become void, and the raiyat shall remain in occupation of his holding at the rent previously paid by him.

Fresh proceedings not to be taken for ten years.

95. When a raiyat has agreed, under section 92 or section 93, to pay an enhanced rent for his holding, or a decree to eject him from the holding has become void under section 94, no notice shall be served on him under section 91 in respect of that holding during the ten years next following the date on which he has so agreed, or the decree has become void, as the case may be.

CHAPTER IX.

PROVISIONS REGARDING RENT APPLICABLE TO SEVERAL CLASSES OF TENANTS.

A.—Of alterations of rent consequent on alterations of the area of the holding of a tenure-holder or occupancy raiyat.

Additions to, and deductions from, rent in respect of alteration of area.

96. (*1*) Notwithstanding anything in Chapter III or Chapter VI, every tenure-holder shall, in the absence of a contract to the contrary, and every occupancy-tenant shall, notwithstanding any contract to the contrary,— [D., ss. 19 and 24. C. B., ss. 8 & 18 B.B., ss. 8, 18, 23 (2) & 25 (1).]

(*a*) be liable to pay additional rent for all land added to the area of his holding by alluvion or otherwise, unless he can show that the land has reformed on the site of land which was formerly included in that area, and for the loss of which he has had no abatement of rent; and

(*b*) be entitled to a reduction of rent in respect of any diminution of the area of his holding caused by diluvion or otherwise, unless it is proved that the land lost was added to the area of the holding by alluvion or otherwise, and that an addition has not been made to the rent in respect of the addition to the area.

(*2*) The amount added to the rent shall be calculated at the rates payable by occupancy-raiyats for lands of a similar description and with similar advantages in the vicinity, less a deduction, in the case of a tenure-holder, of thirty per cent. for profits, risk and cost of collection.

(*3*) The amount abated from the rent shall bear the same proportion to the rent previously payable

Bengal Tenancy Bill.

(Chapter IX.—Rent of several classes of Tenants. Secs. 97—102.)

as the diminution of the total yearly value of the holding bears to the previous total yearly value thereof, or, in default of satisfactory proof of the yearly value of the land lost, shall bear to the rent previously payable the same proportion as the diminution of area bears to the previous area of the holding.

B.—Instalments in which money-rents are payable by tenure-holders, raiyats and under-raiyats.

B. s. 47.] 97. A money-rent payable by a tenure-holder shall be paid in such instalments and on such dates as may have been agreed upon between the tenure-holder and his landlord; in the absence of agreement, in such instalments and on such dates as may be customary; and, in the absence of any agreement or custom, in such instalments and on such dates as the Board of Revenue may fix in this behalf for any local area.

Rent of tenure-holder in what instalments and on what dates payable.

s. 47 98. A money-rent payable by a raiyat or under-raiyat shall, notwithstanding any contract or custom to the contrary, be paid in such instalments, and on such dates, not being more than four in each year, as the Board of Revenue may fix in this behalf for any local area:

Rent of raiyat or under-raiyat in what instalments and on what dates payable.

Provided that, when the instalments in which, and the dates on which, rent is payable are fixed by an agreement made before the commencement of this Act, or by a custom which has prevailed from before the commencement of this Act, the amount payable on each date fixed by the Board under this section for the payment of an instalment shall be equal to the aggregate of the instalments which would, under the agreement or custom, have fallen due since the date so fixed by the Board for the payment of the last previous instalment.

s. 47.] 99. (1) Every order made by the Board of Revenue under section 97 or section 98 shall be made after a consideration of the prevailing customs and the time of harvest in the local area to which it is to apply.

Making and publication of orders under sections 97 and 98.

(2) Every such order shall be published in manner prescribed not less than three months before the commencement of the agricultural year in which it is to take effect.

C.—Of the Receipts and Accounts to be given to tenants.

61. s. 57. s. 49 (b).] 100. (1) Every tenant who makes a payment on account of rent to his landlord shall be entitled to obtain forthwith from the landlord a written receipt for the amount paid by him.

Tenant making payment to his landlord entitled to a receipt.

(2) The receipt shall specify—

(a) the date of payment;

(b) the amount paid on account of principal and interest respectively, or, where the payments are made in kind, the quantity and description of produce delivered;

(c) where other money recoverable under any enactment for the time being in force is paid with the rent, the amount so paid.

(d) the holding in respect of which the rent is paid;

(e) the name of the person (if any) registered in the landlord's serishta as the tenant;

(f) the annual rent payable for the holding and the amount of rent then in arrear; and

(g) the instalment and year on account of which the payment is declared by the tenant to be made, or, in the absence of any such declaration, the instalment and year on account of which it has been credited by the landlord.

(3) The landlord shall prepare and retain a counterpart of the receipt containing similar particulars.

(4) Every receipt which does not contain substantially the above particulars shall be deemed to be an acquittance in full of all demands for rent up to the date on which the receipt was given.

101. (1) Every tenant shall be entitled to receive from his landlord, within three months after the expiry of each agricultural year, a statement of account for that year showing— [B. B. s. 49 (c).]

Tenant entitled to statement of account at close of the year.

(a) the holding for which the tenant pays rent to the landlord;

(b) the name of the person (if any) registered in the landlord's serishta as the tenant;

(c) the annual rent payable for the holding;

(d) the amount of rent in arrear at the beginning of the year;

(e) the payments made during the year on account of principal and interest respectively, or, when the payments are made in kind, the quantity and description of produce delivered;

(f) the portion of each payment credited to the rent of the year, and the portion credited to the arrears of previous years; and

(g) the amount, if any, remaining unpaid at the close of the year.

(2) The landlord shall prepare and retain a counterpart of the statement containing similar particulars.

102. (1) If a landlord refuses or neglects to deliver to a tenant demanding the same a receipt containing the particulars prescribed by section 100 for any rent paid by the ten- [D. s. 65. B. B. ss. 49 (d) and 94.]

Penalties and fine for withholding receipts and statements of accounts and failing to keep counterparts.

Bengal Tenancy Bill.

(Chapter IX.—Rent of several classes of Tenants. Secs. 103—109.)

ant, the tenant may, within six months from the date of the demand, institute a suit to recover from him such penalty, not exceeding double the amount or value of that rent, as the Court thinks fit.

(2) If a landlord refuses or neglects to deliver to a tenant demanding the same the statement of account for any year prescribed in section 101, the tenant may, within six months from the date of the demand, institute a suit to recover from him such penalty as the Court thinks fit, not exceeding double the aggregate amount or value of all rent paid by the tenant to the landlord during that year.

(3) If a landlord fails to prepare and retain a counterpart of a receipt or statement as required by section 100 or section 101, he shall be punished with fine which may extend to fifty rupees.

D.—Of the deposit of rent by a tenant in a public office.

[D. s. 99. C. B. ss. 58 & 59. B. B. ss. 50 & 51.]

Application to deposit rent in public office.

103. (1) In any of the following cases, namely :—

(a) when a tenant bound to pay money on account of rent has reason to believe that the person to whom his rent is payable will not be willing to receive the same and to grant him a receipt therefor :

(b) when the money is payable to co-sharers jointly, and the tenant is unable to obtain the joint receipt of the co-sharers therefor, and no person has been empowered to receive the rent in their behalf : or

(c) when the tenant entertains a *bonâ fide* doubt as to who is entitled to receive the rent :

the tenant may present, to such officer as the Local Government from time to time appoints in this behalf for the local area in which the holding is situate, an application in writing for permission to deposit in his office the full amount of the money then due.

(2) The application shall contain a statement of the grounds on which it is made, shall be signed by the tenant or, where he is not personally cognizant of the facts of the case, by some person so cognizant, and shall be accompanied by a fee of eight annas.

[D. ss. 99 & 100. B. B. s. 52.]

Receipt granted by public officer for rent deposited to be a valid acquittance.

104. (1) If it appears to the officer to whom an application is made under section 103 that the applicant is entitled under that section to deposit the rent, he shall receive the rent and give a receipt for the same under his official seal.

(2) A receipt given under this section shall operate as an acquittance for the rent payable by the tenant and deposited as aforesaid, in the same manner and to the same extent as if the rent had been received—

(a) in case (a) of section 103 by the person specified in the application as the person to whom the rent was payable ;

(b) in case (b) of section 103 by the co-sharers jointly ; and

(c) in case (c) of section 103 by the person entitled to it.

Notification of receipt of deposit.

105. (1) The officer receiving a deposit under section 104 shall forthwith cause to be affixed in a conspicuous place in his office a notification of the receipt thereof, containing a statement of all material particulars contained in the application under section 103, and, when the deposit is made under section 103, clause (a), shall send a copy of the notification by post in a registered cover to the person to whom the rent is alleged by the depositor to be payable.

(2) If the amount of the deposit is not paid away under section 106 within the period of fifteen days next following the date on which the notification is affixed as aforesaid the officer shall cause a notice of the receipt of the deposit to be served (free of charge) upon every person who he has reason to believe claims or is entitled to the deposit.

Deposit to whom payable.

106. (1) The officer may pay the amount of the deposit to any person appearing to him to be entitled to the same, or may, if he thinks fit, retain the amount pending the decision of a Civil Court as to the person so entitled.

(2) No suit or other proceeding shall be instituted against the Secretary of State for India in Council, or against any officer of the Government, in respect of anything done by a Revenue-officer under this section ; but nothing in this section shall prevent any person entitled to receive the amount of any such deposit from recovering the same from a person to whom it has been paid under this section.

Refund to depositor.

107. If no payment is made under section 106 before the expiration of three years from the date on which a deposit is made, the amount deposited may, in the absence of any order of a Civil Court to the contrary, be repaid to the depositor upon his application and on his returning the receipt given under section 104.

E.—Of arrears of rent.

[D. s. 101. C. B. s. 6[illegible] B. B. s. 4[illegible]

Interest on arrears.

108. Every arrear of rent shall, unless otherwise provided by a written contract between the parties, be liable to interest at the rate of twelve per centum per annum.

[D. s. [illegible] C. B. s. [illegible] B. B. s. 9[illegible]

Power to award damages on rent withheld without reasonable cause.

109. If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the defendant has, without reasonable or probable cause, neglected or refused to pay the amount

Bengal Tenancy Bill.

(Chapter IX.—Rent of several classes of Tenants Secs. 110—118.)

of rent due by him, the Court may award to the plaintiff, in addition to the amount decreed for rent and costs, such damages, not exceeding twenty-five per centum on the amount of rent decreed, as it thinks fit:—

Provided that, when damages are awarded under this section, interest shall not be decreed under section 108.

[D. s. 69. C. B. s. 91. B. B. s. 97.]

Power to award damages to defendant improperly sued for rent.

110. If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the plaintiff has instituted the suit without reasonable or probable cause, the Court may award to the defendant, by way of damages, such sum not exceeding twenty-five per centum on the whole amount claimed by the plaintiff as it thinks fit.

[D. ss. 12 (5) & 93. C. B. ss. 79(5) & 152. B. B. ss. 72 (5) & 169.]

Ejectment from non-transferable holding for arrears.

111. (*1*) When an arrear of rent remains due in respect of a non-transferable holding at the end of the Bengali year where that year prevails, or at the end of the month of Jeyt where the Fusli or Amli year prevails, the landlord may, whether he has obtained a decree for the recovery of the arrear or not, and whether he is entitled by the terms of any contract to eject the tenant for arrears or not, institute a suit to eject the tenant.

(*2*) A decree passed in favour of the plaintiff in any such suit shall specify the amount of the arrear together with the interest (if any) due thereon, and the decree shall not be executed if that amount and the costs of the suit are paid into Court within fifteen days from the date of the decree, or, when the Court is closed on the fifteenth day, on the day upon which the Court re-opens.

F.—Of rent taken by division or estimation of the crop.

Commission for dividing or estimating crops.

112. Whenever rent is taken by division of the produce, or by estimate or appraisement of the crop, if either the landlord or the tenant neglects to attend, either personally or by agent, at the proper time for making the division, estimate or appraisement, or if there is a dispute about the division of the produce, or the quantity or value of the crop, the Collector may, on the application of either party, and on his depositing such sum on account of expenses as the Collector may require, issue a commission to such person as he thinks fit, to divide, estimate or appraise the crop.

Appointment of assessors, &c.

113. (*1*) When a Collector appoints a commissioner for any of the purposes mentioned in section 112, the Collector may, in his discretion, direct the commissioner to associate with himself any other persons as assessors, and may give him instructions regarding the number, qualifications and mode of selecting those assessors (if any), and the procedure to be followed in making the division, estimate or appraisement.

(*2*) The commissioner so appointed shall make the division, estimate or appraisement in accordance with those instructions, and submit a report of his proceedings to the Collector.

Remedy for error in division.

114. (*1*) If in any division under section 113 either party receives less than the share to which he is entitled, he may, within three months from the date on which the division is completed, institute a suit against the other party to recover the value of the additional portion of the crop due to him at the price which prevailed on that date.

(*2*) If no such suit is instituted within the said period of three months, the division shall for all purposes be deemed as between the parties thereto to have been rightly made.

Procedure where crop has been estimated or appraised.

115. (*1*) When a crop has been estimated or appraised under section 113 the estimate or appraisement shall be reduced to writing and signed by the commissioner making the same, and shall be submitted to the Collector by whom the commission was issued.

(*2*) The Collector shall consider the commissioner's estimate or appraisement, and, after such hearing and inquiry (if any) as he may think necessary, shall pass an order thereon either confirming or varying the estimate or appraisement; and that order shall be final.

Costs of proceedings under foregoing sections.

116. All expenses incurred in carrying out the provisions of sections 112 to 115 (both inclusive) shall be payable by the landlord or tenant, or partly by one and partly by the other, as the Collector may in each case direct; and the amount payable by any person under such a direction shall be recoverable from him as if it was an arrear of land-revenue due by him.

Interference with produce of land otherwise than under section 112, criminal trespass.

117. If the landlord of any land of which the rent is payable in the manner mentioned in section 112, or any other person, interferes in any way, without the consent of the tenant, with the cutting or harvesting of any produce of the land except by an application to the Collector under section 112, he shall be deemed to have committed criminal trespass within the meaning of the Indian Penal Code. XLV of 1860.

Danabandi or appraisement papers in Bihár to be deposited in Collector's office.

118. When the rent payable for land in Bihár is the equivalent money-value of a fixed proportion of the actual gross produce thereof, and such equivalent

Bengal Tenancy Bill.

(Chapter IX.—Rent of several classes of Tenants and (Chapter X.—Other Provisions applicable to several classes of Tenants. Secs. 119—126.)

money-value is determined by an estimate or appraisement (*danabandi*) of the standing crop, or by some similar proceeding, the *danabandi* or appraisement papers shall, within fifteen days after the making of the appraisement, be lodged in the office of the Collector of the district.

G.—Further provisions regarding rent.

[B. B. s. 30.] 119. Notwithstanding anything in the foregoing sections of this Act, or in any contract made after the second day of March, 1883, a raiyat or under-raiyat shall not be bound to pay for his holding a money-rent exceeding *five*-sixteenths of the estimated average annual value of the gross produce of the holding in staple crops, calculated, in such manner as the Board of Revenue may from time to time, by rules, direct, at the prices at which raiyats sell at harvest time.

Limit to rents of raiyats and under-raiyats.

120. The rent payable by a tenant in any agricultural year shall be presumed to be the rent payable by him in the following agricultural year until the contrary is shown.

Presumption that rent continues unchanged.

[New.] 121. When a landlord grants a lease, or makes any other contract, purporting to entitle the tenant of land not included in an area permanently settled to hold that land free of rent or at a fixed rent, and while the lease or contract is in force—

Power to alter rent in case of new assessment of revenue.

(*a*) land-revenue is for the first time made payable in respect of the land, or,

(*b*) land-revenue having been previously payable in respect of it, a fresh settlement of land revenue is made,

a Revenue-officer may, notwithstanding anything in the contract between the parties, by order, on the application of the landlord or of the tenant, fix a fair and equitable rent for the land in accordance with the provisions of this Act.

[B. B. s. 70.] 122. (*1*) A tenant shall not, when his landlord's interest is transferred, be liable to the transferee for rent which became due after the transfer and was paid to the landlord whose interest was so transferred, unless the transferee has given notice of the transfer to the tenant.

Tenant not liable to transferee of landlord's interest for rent paid to former landlord without notice of the transfer.

(*2*) When there is more than one tenant paying rent to the landlord whose interest is transferred, a general notice from the transferee to the tenants published in the prescribed manner shall be a sufficient notice for the purposes of this section.

123. All impositions upon tenants under the denomination of *abwab*, *mahtut*, or other like appellations, in addition to the actual rent, shall be illegal, and all stipulations and reservations for the payment of such shall be void. [B. B. s. 63 (2).

Abwab, &c., illegal.

124. Every tenant from whom, except under any special enactment for the time being in force, any sum of money or any portion of the produce of his land is exacted by his landlord in excess of the rent lawfully payable, may, within six months from the date of the exaction, institute a suit to recover from the landlord, in addition to the amount or value of what is so exacted, such sum by way of penalty as the Court thinks fit, not exceeding five hundred rupees; or, when double the amount or value of what is so exacted exceeds five hundred rupees, not exceeding double that amount or value. D. s. 64. B. B. ss. 63 (2), 64 (a), 93.]

Penalty for exaction by landlord from tenant of sum in excess of the rent payable.

125. (*1*) The rent of a tenure, occupancy-holding or bastu holding shall be a first charge on the same. [C. B. s. 64. B. B. s. 56.]

Rent first charge on tenures, occupancyholdings and bastu holdings.

(*2*) If the right, title and interest of the tenant is brought to sale in execution of a decree for money obtained by a person other than the landlord, the landlord shall be entitled to be first paid out of the sale proceeds any rent which may be due to him by the tenant.

CHAPTER X.

OTHER PROVISIONS APPLICABLE TO SEVERAL CLASSES OF TENANTS.

A.—Of improvements on raiyats' holdings and compensation therefor.

126. (*1*) For the purposes of this chapter the term "improvement," used with reference to a raiyat's holding, shall mean any work which adds to the letting-value of the holding, which is suitable to the holding and consistent with the purpose for which it was let, and which, if not executed on the holding, is either executed directly for its benefit, or is, after execution, made directly beneficial to it. [B. B. s. 69.]

"Improvement."

(*2*) It shall include for those purposes—

(*a*) the construction of wells, tanks and other works for the storage, supply or distribution of water for the purposes of agriculture, or for the use of men and cattle employed in agriculture;

(*b*) the preparation of land for irrigation;

(*c*) the drainage, reclamation from rivers or other waters, or protection from floods, or from erosion or other damage by water, of land used for agricultural

Bengal Tenancy Bill.

(Chapter X.—Other Provisions applicable to several classes of Tenants. Secs. 127—132.)

purposes, or waste-land which is culturable;

(*d*) the reclamation, clearance, enclosure or permanent improvement of land for agricultural purposes;

(*e*) the renewal or re-construction of any of the foregoing works, or alterations therein, or additions thereto; and

(*f*) the erection of a dwelling-house suitable for the raiyat and his family, together with all necessary out-offices.

But no work executed by the raiyat of a holding shall be deemed to be an improvement for the purposes of this chapter if it substantially diminishes the value of any other part of the estate or tenure of his landlord.

(*3*) A work which benefits several holdings shall for the purposes of this chapter be deemed to be, with respect to each of them, an improvement.

B B. s. 69.] **127.** (*1*) The landlord of an occupancy-raiyat shall not be entitled as such to prevent the raiyat making an improvement in respect of his holding, and shall not, except as next hereinafter provided, be entitled to make an improvement in respect of the holding without the permission of the raiyat.

Right to make improvements in case of occupancy-holding.

(*2*) A landlord of an occupancy-holding who would, but for the want of his raiyat's permission, be entitled to make an improvement in respect of the holding, may, if he desires that any improvement, other than an improvement of the description mentioned in section 126, clause (*f*), be made, deliver or cause to be delivered to the raiyat a request in writing calling upon him to make the improvement within a reasonable time; and, if the raiyat is unable or neglects to comply with that request, may make the improvement himself.

B B. s. 69.] **128.** (*1*) An ordinary raiyat shall not, except as next hereinafter provided, be entitled to make in respect of his holding without his landlord's permission any improvement other than an improvement of the description mentioned in section 126, clause (*f*).

Right to make improvements in case of ordinary raiyat's holding.

(*2*) An ordinary raiyat, who would, but for the want of his landlord's permission, be entitled to make an improvement in respect of his holding, may, if he desires that the improvement be made, deliver, or cause to be delivered, to his landlord a request in writing calling upon him to make the improvement within a reasonable time; and, if the landlord is unable or neglects to comply with that request, may make the improvement himself.

129. (*1*) Every raiyat who is ejected from his holding shall be entitled to compensation for improvements which have been made in accordance with this Act by him, or by his predecessor in interest, and for which compensation has not already been made.

Compensation for improvements payable to raiyat on ejectment.

(*2*) Whenever a Court makes a decree or order for the ejectment of a raiyat, it shall determine the amount of compensation (if any) due under this section to the raiyat for improvements, and shall make the decree or order of ejectment conditional on the payment of that amount to the raiyat.

(*3*) No compensation under this section for an improvement shall be claimable where the raiyat has made the improvement in pursuance of a contract or under a lease binding him, in consideration of some substantial advantage to be obtained by him, to make the improvement without compensation, and he has obtained that advantage.

(*4*) Improvements made by a raiyat before the commencement of this Act shall be deemed to have been made in accordance with this Act, unless it is shown that the landlord forbade the raiyat to make the improvement and was ready to make it himself.

130. The Local Government may, from time to time, by notification in the official Gazette, make rules requiring the Court to associate with itself, for the purpose of estimating the compensation to be awarded under section 129, for an improvement, such number of assessors as the Local Government thinks fit, and determining the qualifications of those assessors and the mode of selecting them.

Power to make rules for appointment of assessors.

131. (*1*) In estimating the compensation to be awarded under section 129 for an improvement, regard shall be had—

Principle on which compensation is to be estimated.

(*a*) to the amount by which the letting-value, or the produce, of the holding, or the value of that produce, is increased by the improvement;

(*b*) to the labour and capital required for the making of such an improvement; and

(*c*) to any reduction or remission of rent or any other advantage given by the landlord to the raiyat in consideration of the improvement.

(*2*) When the amount of the compensation has been assessed, the landlord and raiyat may, if they think fit, agree that, instead of being paid wholly in money, it shall be made wholly or partly in some other way.

132. A stipulation in a contract providing—

Certain stipulations in contracts to be void.

(*a*) that a landlord shall be entitled to prevent a raiyat from making, or to eject him for making, such improvements on his holding as he is entitled to make under this Act, or

(*b*) that a raiyat ejected from his holding shall not be entitled to compensation for improvements

Bengal Tenancy Bill.

(Chapter X.—Other Provisions applicable to several classes of Tenants. Secs. 133—140.)

in any case in which he would, under this Act, be entitled to such compensation,

shall be void.

B.—Of the landlord's right to measure land.

[D. s. 58. C. B. s. 75. B. B. s. 67.]

Landlord entitled to measure land unless restrained by contract.

133. Subject to the provisions of any contract, a landlord may, by himself or by any person authorized by him in this behalf, enter upon and measure all land comprised in any estate or tenure, of the rents of which he is in receipt, except land entered in the general register of revenue-free lands prepared under the Land Registration Act, 1876 (VII (B. C.) of 1876):

Provided that, when any land has been measured by a landlord, whether before or after the passing of this Act, it shall not, without the written permission of the Collector, be again measured by the landlord within the ten years next following the date on which it was so measured.

Illustration.

A., a proprietor, grants a portion of his estate in patní to B, to whom the raiyats pay rent. Both A and B are entitled to make a general survey and measurement of the lands comprised in the patní lease.

[D. s. 94. B. B. s. 176.]

Tenant bound to point out boundaries.

134. When a landlord desires to measure, under section 133, any land held by his tenant, the tenant shall, if the landlord requires him to do so, attend and point out the boundaries of the land.

[D. s. 94. B. B. s. 176.]

Remedy when landlord is obstructed or tenant does not point out boundaries.

135. (*1*) When a landlord desires to measure any land under section 133, and any person occupying the land obstructs him in so doing, or any tenant, bound under section 134 to attend and point out the boundaries of his land, refuses or neglects so to do, the landlord may apply to the Court which would have jurisdiction to hear a suit for the recovery of the land, to make an order directing such person to permit the measurement, or such tenant to attend and point out the boundaries, as the case may be.

(*2*) The Court may, on receiving an application under this section, cause a notice to be served on the occupant or tenant, as the case may be, requiring him to show cause, at a time and place specified therein, why the order applied for should not be made.

(*3*) If the person on whom a notice is served under sub-section (2) does not show cause as aforesaid, the Court may make the order applied for.

[D. s. 94. B. B. s. 177.]

Presumption against tenant not attending to point out boundaries.

136. If a tenant ordered under section 135 to attend and point out the boundaries of the land held by him refuses or neglects to do so, a map or other record of the boundaries and measurements of the land prepared under the direction of the landlord, at the time the tenant was ordered to attend, shall be presumed to be correct until the contrary is shown.

Measurement in suits between landlord and tenant to be made according to Government measure.

137. (*1*) Every measurement of land made by order of a Civil Court, or of a Revenue-officer, in any suit or proceeding between a landlord and tenant, shall be made according to the Government measure of 14,400 square feet to one standard bighá. [D. s. 94. C. B. s. 37 (a) B. B. s. 68 (a).]

(*2*) If the rights of the parties are regulated by any different local measure, the Government measure shall be converted into the local measure for the purposes of the suit.

Determination of the length of the standard in case of dispute.

138. (*1*) If any dispute as to the length of a standard used in a local measure arises in any suit under this Act, the Collector shall, on a reference made to him for this purpose by the Court, determine the proper length thereof. [D. s. 98. C. B. s. 76 (b) B. B. s. 68 (b).]

(*2*) An appeal shall lie from the Collector's decision to the District Judge.

(*3*) If no such appeal be preferred, the decision of the Collector, or, if an appeal be preferred, the decision of the District Judge thereon, shall be conclusive.

C.—Of surrender and abandonment.

Surrender by raiyat.

139. (*1*) A raiyat not bound by a lease or other agreement for a fixed period may, at the end of any agricultural year, surrender his holding; but notwithstanding the surrender he shall continue to be liable for the rent of the holding for the agricultural year next following the date of the surrender, unless— [D. s. 12 (3) C. B. s. 79 (3) B. B. s. 7 (3).]

(*a*) he gives to his landlord, at least three months before he surrenders, notice in writing of his intention to surrender; or

(*b*) the holding is let to another person for a agricultural year following the surrender.

(*2*) If the landlord refuses to receive a notice, tendered to him under clause (*a*), or to sign a receipt for the same, the raiyat may apply to the Court within the jurisdiction of which the holding or any portion of it is situate, and the Court shall thereupon cause the notice to be served on the landlord.

Non-transferable holding in certain cases to be deemed surrendered.

140. Any tenant of a holding which is not transferable, who leaves his holding uncultivated and the rent of it unpaid for a period of one year, shall, at the expiration of that period, be deemed to have surrendered the holding: [D. s. 12 (4) C. B. s. 79 (4) B. B. s. 7 (4).]

Bengal Tenancy Bill.

(Chapter X.—Other Provisions applicable to several classes of Tenants. Secs. 141—145.)

Provided that, in reckoning that period, any time during which, owing to an inundation or any other accident to the land beyond the tenant's control, it may have been impossible to cultivate the land, shall be excluded.

D.—Of Merger.

[C. B. ss. 43 & 44. B. B. ss. 34 & 35.]

Merger of tenant's interest in landlord's interest.

141. (*1*) When in the case of any tenancy the interest of the landlord and that of the tenant become, by transfer, succession or otherwise, united in the same person, so as to be owned by him in the same right, the interest of the tenant shall—

(*a*) during the period of three months mentioned in sub-section (*2*) be presumed to be merged in the interest of the landlord and extinguished, unless the person proves that he has not intended it to be merged, and

(*b*) after the expiration of that period be deemed to be so merged and extinguished, unless within that period the person executes an instrument declaring his intention that a merger shall not take place, and the instrument is registered under the Indian Registration Act, 1877 and is published in the prescribed manner.

II of 877.

(*2*) The period of three months referred to in sub-section (*1*) shall, when the interests become united after the commencement of this Act, begin to run from the date on which they become united, and, when they have become united before the commencement of this Act, begin to run from the commencement of this Act:

Provided that, when, at the time the interests become united, the person in whom they become united has not attained his age of majority or is of unsound mind, the period shall not begin to run before he has attained that age or become of sound mind, as the case may be.

(*3*) A merger under this section shall not operate to the prejudice of any person having a lien upon the interest merged.

(*4*) When, at the time of a merger taking place in respect of a tenancy under this section, a sub-tenancy exists immediately under that tenancy, the person who becomes the owner of the consolidated interests shall, subject to the provisions of the law for the time being in force relating to sales of land for arrears of Government revenue and to the provisions of this Act as to sales for arrears of rent, have the same rights against, and be subject to the same obligations towards, the sub-tenants, as the owner of the tenant's interest had, and was subject to, before the merger.

E.—Of the appointment of a Manager on behalf of co-owners of an estate or tenure.

Power to call upon co-owners to show cause why they should not appoint a common manager.

142. When co-owners of an estate or tenure disagree as to the management thereof, and in consequence there has ensued, or is likely to ensue, D. s. 16. C. B. s. 65 (1). B. B. s. 57 (1).

(*a*) inconvenience to the public, or

(*b*) injury to private rights,

the District Judge may, upon the application in case (*a*) of the Collector, and in case (*b*) of any one having an interest in the estate or tenure, direct a notice to be served upon all the co-owners, calling upon them to show cause why they should not appoint a common manager:

Provided that a co-owner of an estate or tenure shall not be entitled to apply under this section unless he is actually in possession of the interest he claims and, if he is a co-owner of an estate, unless his name and the extent of his interest are registered under Act VII of 1876 passed by the Lieutenant-Governor of Bengal in Council.

Power to order them to appoint a manager if cause is not shown.

143. If the co-owners fail to show cause as aforesaid within one month after service of a notice under section 142, the District Judge may make an order directing them to appoint a common manager, and a copy of the order shall be served upon any co-owner who did not appear before it was made. C. B. s. 65 (2). B. B. s. 57 (2).

Power to appoint manager if order is not obeyed.

144. If the co-owners do not, within one month after the making of an order under section 143, or, where the order has been served as directed by that section, within one month after such service, appoint a common manager and report the appointment for the information of the District Judge, the District Judge may— C. B. s. 66 (1) B. B. s.

(*a*) direct that the estate or tenure be managed by the Court of Wards in any case in which the Court of Wards assents to undertake the management thereof; or

(*b*) in any case appoint a manager.

Power to nominate person to act in all cases under section 144(*b*).

145. The Lieutenant-Governor of Bengal may nominate a person for any local area to manage all estates and tenures within that local area for which it may be necessary to appoint a manager under section 144, clause (*b*); and, when any person has been so nominated, no other person shall be appointed manager under that clause by the District Judge, unless in the case of any estate the Judge thinks fit to appoint one of the co-owners themselves as manager. C. B. s. 66 (2). B. B. s. 58 (2).

Bengal Tenancy Bill.
(Chapter XI.—Settlement of Rents. Secs. 146—155.)

C. B. s. 66 (3). B. B. s. 58 (3).

The Court of Wards Act, 1879, applicable to management by Court of Wards under section 144 (a).

IX (B. C.) of 1879.

146. In any case in which the Court of Wards undertakes the management of an estate or tenure under section 144, so much of the provisions of the Court of Wards Act, 1879, as relates to the management of immoveable property shall apply to the management.

C. B. s. 67. B. B. s. 59.

Provisions applicable to manager appointed under section 144(b).

147. (*1*) A manager appointed under section 144, clause (*b*), shall receive by way of remuneration such fixed salary or percentage of the money collected by him as manager as the District Judge from time to time directs.

(*2*) He shall give such security for the proper discharge of his duties as the District Judge directs.

(*3*) He shall, subject to the control of the District Judge, have, for the purposes of management, the same powers as the co-owners jointly might but for his appointment have exercised.

(*4*) He shall keep regular accounts, and allow the co-owners or any of them to inspect and take copies of those accounts; and

(*5*) He shall be removeable by the order of the District Judge, and not otherwise.

C. B. s. 68. B. B. s. 60.

Power to restore management to co-owners.

148. When an estate or tenure has been placed under the management of the Court of Wards, or a manager has been appointed for the same under section 144, the District Judge may at any time direct that the management of it be restored to the co-owners if he is satisfied that such management will be conducted by them jointly without inconvenience to the public or injury to private rights.

F.—Miscellaneous.

[B. B., s. 72 (5), (6) and (7).]

No ejectment except in execution of decree.

149. No tenant shall be ejected from his holding except in execution of a decree.

[B. B. ss. 21 (*b*), 37.]

Portion of holding not transferable.

150. Nothing in this Act shall entitle a tenant whose holding is transferable to transfer or bequeath, without the consent of his landlord, a portion only of the land comprised in the holding so that it may be held from the landlord by the transferee as a separate holding.

CHAPTER XI.

OF THE SETTLEMENT OF RENTS BY A REVENUE-OFFICER.

Power to order Revenue-officers to settle rents.

151. (*1*) The Local Government may, if it thinks fit, in any of the cases next hereinafter mentioned, make an order directing that the rents of all tenants or of any class of tenants in any local area shall be settled by Revenue-officers to be from time to time appointed by the Local Government in this behalf.

(*2*) The cases in which an order may be made under this section are the following, namely:—

(*a*) where a large proportion of the tenants or of the landlords applies for such an order, and deposits for the payment of expenses such amount as the Local Government directs:

(*b*) where the making of such an order is calculated to settle or avert a serious dispute existing, or likely to arise, between the tenants and their landlords generally:

(*c*) where a settlement of revenue is being made in respect of the local area, or the local area is comprised in an estate or tenure owned or managed by the Government or the Court of Wards.

(*3*) A notification in the official Gazette of an order under this section shall be conclusive evidence that the order has been duly made, and an order so notified shall continue in force until it is rescinded by an order notified in like manner.

Bar to jurisdiction of Civil Courts while order is in force.

152. While an order under section 151 continues in force in respect of any tenants, a Civil Court shall not, except as provided by section 155, clause (*b*), entertain a suit for the enhancement or reduction of the rents of those tenants under this Act.

Rents of certain tenants to be fixed.

153. (*1*) When the rents of any tenants to whom an order under section 151 applies are subject to alteration by order of a Court, the officer appointed to settle the rents of those tenants under this chapter shall, without any application being made to him in this behalf, fix those rents in accordance with the principles embodied in this Act, and so that no rent fixed under this section shall exceed the maximum prescribed by this Act in cases of enhancement.

(*2*) Where the Local Government has, under this chapter, directed a settlement of the rents of the occupancy-raiyats of any local area, and a table of rates and produce has not been prepared under Chapter VI for that local area, it may further direct the officer appointed to settle the rents to prepare such a table before proceeding to fix the rents of those raiyats.

Rents of other tenants to be ascertained and recorded.

154. When the rents of any tenants to whom an order under section 151 applies are not subject to alteration as aforesaid, the officer appointed to settle the rents of those tenants shall, without any application being made to him in this behalf, ascertain and record the rents payable by them.

Power to refer question to Civil Court or leave case to be dealt with by Civil Court.

155. (*1*) If in the course of the proceedings taken for fixing the rent of a tenant under section 153 any question arises which, in the opinion of the officer conducting

Bengal Tenancy Bill.

(Chapter XI.—Settlement of Rents. Secs. 156—161)

those proceedings, would be more properly decided by a Civil Court, the officer may in his discretion, but subject to any rules made by the Local Government in this behalf,

(*a*) refer the question for decision to the Civil Court which would, but for section 152, have had jurisdiction to try a suit for the enhancement or reduction of the rent, or

(*b*) by order in writing direct that the tenant's case be excluded from the operation of this chapter and be left to be disposed of by suit in a Civil Court, as if the order under section 151 did not apply to it.

(*2*) When a Revenue-officer makes a reference under clause (*a*) of this section in respect of a tenant, he may either stay his proceedings in respect of that tenant, or, if the nature of the case admits of his doing so, pass an order in alternative form or otherwise fixing the rent contingent upon the decision of the Civil Court.

Preparation of jamabandí.

156. (*1*) A Revenue-officer settling rents under this chapter shall prepare, in the prescribed form, one or more jamabandís, comprising all or such numbers of the tenants whose rents he is appointed to settle as the Board of Revenue may direct.

(*2*) Every jamabandí prepared under this section shall show in respect of each tenant comprised therein—

(*a*) the class to which he belongs, that is to say, whether he is a tenure-holder, occupancy-raiyat, tenant of a bastu holding, ordinary raiyat or under-raiyat;

(*b*) the land held by him;

(*c*) the name of his landlord;

(*d*) whether the rent has been fixed under section 153 or ascertained under section 154;

(*e*) the amount of the rent fixed or ascertained, and, when the rent is a gradually increasing one, the time at which, and the steps by which, it increases.

Publication of jamabandí and objections thereto.

157. Every jamabandí prepared under section 156 shall be published in the prescribed manner, and any person objecting to any entry therein may, within one month from the date of the publication, present to the Revenue-officer, for transmission to the Commissioner of the Division, a petition stating his objection to the entry.

Submission of jamabandí and petitions of objection to the Commissioner and Board.

158. (*1*) On the expiration of the said period of one month, the Revenue-officer shall submit to the Commissioner of the Division a copy of the jamabandí, with a report setting forth the grounds on which it has been prepared, and the petitions of objection (if any) which he may have received under section 157.

(*2*) The Commissioner shall consider the jamabandí and report, and the objections (if any), and, after allowing the objectors (if any) an opportunity of being heard, shall forward the papers to the Board of Revenue with his opinion regarding the same.

Sanction to and final publication of jamabandí, and date from which it comes into force.

159. (*1*) The Board of Revenue may return the papers for further inquiry, or may submit the jamabandí with or without modifications to the Local Government for sanction.

(*2*) The Local Government may return for further inquiry the papers received under sub-section (*1*) or may sanction the jamabandí with or without modification.

(*3*) When a jamabandí has been sanctioned by the Local Government under this section, it shall be published in the prescribed manner.

(*4*) A jamabandí published under this section shall come into force from the commencement of the agricultural year next following the publication.

Rent fixed under foregoing provisions to be deemed the rent payable.

160. When a jamabandí has come into force under section 159, a tenant's rent shown therein as fixed under section 153 shall be deemed to be the rent payable by him, and shall not, during the period of ten years next following the date on which the jamabandí comes into force, be enhanced in a suit instituted under this Act, except on the ground that since the jamabandí came into force an improvement has been made by the landlord which, but for this section, would entitle him to an enhancement:

Provided that—

(*1*) such rent may from time to time be altered in any other manner permitted by law: and

(*2*) nothing in this section shall prevent the rent shown in a jamabandí in respect of a tenancy from being called in question on any of the following grounds, namely:—

(*a*) that the tenancy does not exist or that the tenant is not liable to pay rent;

(*b*) that the tenant belongs to a class different from that to which he is shown in the jamabandí to belong;

(*c*) that the land comprised in the tenancy is different from, or more or less than, that shown in the jamabandí;

(*d*) that a rent different from that shown in the jamabandí has been fixed by a contract legally binding on the parties, and which has been brought to the notice of the officer preparing the jamabandí.

Rent ascertained under foregoing provisions to be presumed to be the rent payable.

161. When a jamabandí has been published under section 159 a tenant's rent shown therein as, ascertained under section 154, shall be presumed to be the

Bengal Tenancy Bill.

(Chapter XII.—Preparation of Record-of-rights by a Revenue-officer and Chapter XIII.—Recovery of Rents. Secs. 162—166.)

rent payable by that tenant until the contrary is shown.

Certain other entries in jamabandi to be presumed to be correct.

162. An entry made in a jamabandí under clause (*a*), clause (*b*) or clause (*c*) of section 156 shall, after the jamabandí has been published under section 159, be presumed for all purposes to be correct until the contrary is shown.

Expenses incurred in proceedings under this chapter how defrayed.

163. All expenses incurred by the Government in carrying out the provisions of this chapter in any local area, in any case mentioned in section 151, clause (*a*) or clause (*b*), including the salaries of all officers employed exclusively in carrying out those provisions therein, and such portions as the Local Government may from time to time fix of the salaries of officers employed in carrying out those provisions therein in addition to their other public duties, shall be defrayed by the landlords and tenants in that local area whose rents are fixed or ascertained under this chapter, in such proportions as the Local Government, having regard to all the circumstances of each case, may determine; and the proportion of those expenses so to be defrayed by any person shall be recoverable from him as if it were an arrear of revenue due by him.

CHAPTER XII.

OF THE PREPARATION OF A RECORD-OF-RIGHTS BY A REVENUE-OFFICER.

Power to order preparation of record-of-rights.

164. (*1*) The Local Government may, in any case with the previous sanction of the Governor General in Council, and may, if it thinks fit, without such sanction in any of the cases next hereinafter mentioned, make an order directing that a record-of-rights shall be prepared for all tenancies or any class of tenancies in a local area by Revenue-officers to be from time to time appointed by the Local Government.

(*2*) The cases in which an order may be made under this section without the previous sanction of the Governor General in Council are the following, namely:—

(*a*) where a large proportion of the landlords or of the tenants applies for such an order and deposits for the payment of expenses such amount as the Local Government directs;

(*b*) where the preparation of such a record is calculated to settle or avert a serious dispute existing or likely to arise between the tenants and their landlords generally; and

(*c*) where the local area is comprised in an estate or tenure which belongs to or is managed by the Government or the Court of Wards.

(*3*) The Local Government shall, in any order made by it under this section, specify the particulars to be included in the record-of-rights to be prepared under that order.

(*4*) The particulars so specified may be all or some of the following, namely:—

(*a*) the name of each tenant;

(*b*) the class to which he belongs, that is to say, whether he is a tenure-holder, occupancy-raiyat, tenant of a bastu holding, ordinary raiyat or under-raiyat;

(*c*) the land held by him;

(*d*) the name of his landlord; [B. B. s. 181.

(*e*) the rent payable;

(*f*) the mode in which that rent has been fixed, whether by contract, by order of a Court or otherwise.

(*5*) A notification in the official Gazette of an order under this section shall be conclusive evidence that the order has been duly made.

Presumption as to entries in record.

165. Every entry in a record-of-rights prepared under section 164 shall be presumed to be correct until the contrary is proved.

CHAPTER XIII.

OF THE RECOVERY OF RENTS FROM RAIYATS AND UNDER-RAIYATS BY DISTRAINING THE PRODUCE OF THE HOLDING.

Cases in which an application for distraint may be made.

166. Where an arrear of rent is due to the landlord of a raiyat or under-raiyat, and has not been due for more than a year, and no security has been accepted therefor by the landlord, the landlord may, in addition to any other remedy to which he is entitled by law, present an application to the Court, having jurisdiction to entertain a suit for the recovery of the arrear, requesting the Court to recover the arrear by distraining, while in the possession of the cultivator, [B. B. ss. 101, 104, 123.]

(*a*) any crops or other products of the earth standing or ungathered on the holding;

(*b*) any crops or other products of the earth which have been grown on the holding and have been reaped or gathered and are deposited on the holding, on a threshing-floor, or place for treading out grain or the like (whether in the fields or within a homestead) or in a storehouse.

Provided that an application shall not be made under this section—

(*1*) by a proprietor or manager as defined under the Bengal Land Registration Act, 1876, or a VII (B. C.) of 1876.

Bengal Tenancy Bill.

(*Chapter XIII.—Recovery of Rents. Secs. 167—172.*)

mortgagee of such a proprietor or manager, unless his name and the extent of his interest in the land in respect of which the arrear is due have been registered under the provisions of that Act; or

(2) for the recovery of any sum in excess of the rent payable for the holding in the preceding agricultural year, unless that sum is payable under a written contract or in consequence of a proceeding under this Act or an enactment hereby repealed; or

[B. B. ss. 71, 25.] (3) in respect of the produce of any part of the holding which the tenant has sublet with the written consent of the landlord.

[B. B. ss. 104-5.] Form of application and fee payable.

167. (1) Every application under section 166 shall specify—

(a) the holding in respect of which the arrear is claimed, and the boundaries thereof, or such other particulars as may suffice for its identification;

(b) the name of the tenant;

(c) the period in respect of which the arrear is claimed;

(d) the amount of the arrear, with the interest, if any, claimed thereon, and, when an amount in excess of the rent payable by the tenant in the last preceding agricultural year is claimed, the contract, or proceeding as the case may be, under which that amount is payable;

(e) the nature and approximate value of the produce to be distrained; and

(f) the place where it is to be found, or such other particulars as may suffice for its identification.

(2) Every such application shall be liable to the court-fee which would be payable in a suit instituted for the recovery of the arrear therein claimed.

(3) Every such application shall be signed and verified in the manner prescribed by the Code of Civil Procedure for the signing and verification of plaints; and, if the application so verified contains any averment which the person making the verification knows or believes to be false, or does not know or believe to be true, that person shall be subject to punishment according to the provisions of the law for the time being in force for the punishment of giving or fabricating false evidence.

B. B. ss. 105 106.] Procedure on receipt of application.

168. (1) The applicant shall, at the time of filing an application under section 166, or as soon after as the Court permits, file in Court such documentary evidence (if any) as he may consider necessary for the purposes of the application.

(2) The Court may examine the applicant, and may admit the application or reject it, or permit the applicant to furnish additional evidence in support of it.

[B.B.s. 107. Procedure if application is admitted.

169. If the application is admitted, the Court shall depute an officer to distrain the produce specified therein, or such portion of that produce as it thinks fit; and the officer shall proceed to the place where the produce is, and distrain the produce by taking charge of it himself or placing some other person in charge of it in his behalf, and publishing a notification of the distraint in accordance with rules to that effect to be made by the High Court:

Provided that produce, which from its nature does not admit of being stored, shall not be distrained under this section at any time less than twenty days before the time when it would be fit for reaping or gathering. D. s. 111.

[B.B. s. 108.] Service of demand and account.

170. (1) The distraining officer shall, at the time of making the distraint, serve on the defaulter a written demand for the arrear due, and the costs incurred in making the distraint, together with an account exhibiting the grounds on which the distraint is made.

(2) Where the distraining officer has reason to believe that a person other than the defaulter is the owner of the property distrained, he shall serve copies of the demand and account on that person likewise.

(3) The demand and account shall, if practicable, be served personally; but if a person on whom they are to be served absconds or conceals himself, or cannot otherwise be found, the officer shall affix copies of the demand and account on the outer door of the house in which he usually resides.

[B. B. ss. and 110 Right to reap, &c., produce.

171. (1) A distraint under this chapter shall not prevent any person from reaping, gathering or storing any produce, or doing any other act necessary for its due preservation.

(2) In default of the person entitled to do so, the distraining officer shall cause any standing crops or ungathered products distrained to be reaped or gathered when ripe, and shall store the same in such granaries or other places as are commonly used for the purpose, or in some other convenient place in the neighbourhood.

(3) In either case the distrained property shall be placed in the charge of the distraining officer, or of some other person appointed by him in this behalf.

[B.B. s. 112 Sale proclamation to be issued unless demand is satisfied.

172. (1) Unless the demand, with all costs of the application for distraint, be immediately satisfied, an officer distraining property

Bengal Tenancy Bill.

(Chapter XIII.—Recovery of Rents. Secs. 173—182.)

under section 169 shall issue a proclamation specifying the particulars of the property distrained and demand for which it is distrained, and notifying that he will, at a place and on a specified day, not being less than three or more than seven days after the time of making the distraint, sell the distrained property by public auction.

(2) The proclamation shall be stuck up on a conspicuous place in the village in which the land is situate for which the arrears of rent are claimed.

[B.B. s. 114.] **173.** The sale shall be held at the place where the distrained property is, or at the nearest place of public resort, if the distraining officer is of opinion that it is likely to sell there to better advantage.

Place of sale.

[D. s. III.] **174.** Crops or products which from their nature do not admit of being stored may be sold before they are reaped or gathered, and the purchaser shall be entitled to enter upon the land by himself, or by any person appointed by him in this behalf, and do all that is necessary for the purpose of tending and reaping or gathering them.

Power to sell produce before it is reaped or gathered.

[B. B. s. 115.] **175.** The property shall be sold by public auction in one or more lots, as the officer holding the sale may think advisable; and if the demand, with the costs of distraint and sale, is satisfied by the sale of a portion of the property, the distraint shall be immediately withdrawn with respect to the remainder.

Manner of sale.

[B.B. s. 116.] **176.** If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) is not offered for it, and if the owner of the property, or a person authorised to act in his behalf, applies to have the sale postponed till the next day or (if a market be held at the place of sale) the next market-day, the sale shall be postponed until such day, and shall be then completed, whatever price may be offered for the property.

Postponement of sale.

[B.B. s. 117.] **177.** The price of every lot shall be paid in ready money at the time of sale, or as soon thereafter as the officer holding the sale thinks necessary, and in default of such payment the property shall be put up again and sold.

Payment of purchase-money.

[B.B. s. 118.] **178.** When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate describing the property purchased by him and the price paid.

Certificate to be given to purchaser.

[B. B. s. 119.] **179.** (1) From the proceeds of every sale of distrained property under this chapter, the officer holding the sale shall pay to the applicant for distraint the expenses incurred by him on account of the distraint, calculated on a scale of charges prescribed by rules to be made by the Board of Revenue in this behalf.

Proceeds of sale how to be applied.

(2) The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale, and the surplus (if any) shall be paid to the person whose property has been sold.

[B. B. s. 120.] **180.** Officers holding sales of property under this Act, and all persons employed by, or subordinate to, such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Certain officers may not purchase.

[B. B. ss. 111. & 123.] **181.** (1) If at any time after a distraint has been made under this chapter, and before the sale of the distrained property, the defaulter, or the owner of the distrained property where he is not the defaulter, deposits in the Court issuing the order of distraint, or in the hands of the distraining officer, the amount specified in the demand served under section 170, together with all costs which may have been incurred after the service of the demand, the Court or officer, as the case may be, shall grant a receipt for the same and the distraint shall forthwith be withdrawn.

Procedure where demand is paid before the sale.

(2) When the distraining officer receives the deposit, he shall forthwith pay the same into the Court.

(3) A receipt granted under this section to an owner of distrained property not being the defaulter shall afford a full protection to him against any subsequent claim for the arrears of rent on account of which the distraint was made.

(4) After the expiration of one month from the date of a deposit being made under this section, the Court shall pay over the same to the applicant for distraint, unless in the meanwhile the owner of the property distrained has instituted a suit against the applicant contesting the legality of the distraint and claiming compensation in respect of the same.

[B. B. s. 124.] **182.** (1) When an inferior tenant, on his property being lawfully distrained under this chapter for the default of a superior tenant, makes any payment under section 181, he shall be entitled to deduct the amount of that payment from any rent payable by him to his immediate landlord, and, if that landlord is not the defaulter, he shall in like manner be entitled to deduct the amount so deducted from any rent payable by him to his immediate landlord and so on until the defaulter is reached.

Amount paid by under-tenant for his lessor may be deducted from rent.

(2) Nothing in this section shall affect the right of an inferior tenant making a payment under section 181 to institute a suit for the recovery from

Bengal Tenancy Bill.
(Chapter XIII.—Recovery of Rents. Secs. 183—192.)

the defaulter of any portion of the amount paid which he has not deducted under this section.

126.] **183.** When land is sublet, and any conflict arises under this chapter between the rights of a superior and of an inferior landlord who distrain the same property, the right of the superior landlord shall prevail.

Conflict between rights of superior and inferior landlords.

184. When any conflict arises between an order for distraint issued under this chapter and an order issued by a Civil Court for the attachment or sale of the property which is the subject of the distraint, the order for distraint shall prevail, but, if the property is sold under that order, the surplus proceeds of the sale shall not be paid to the owner of the property under section 179 without the sanction of the Court by which the order of attachment or sale was issued.

Distraint of property which is under attachment.

B. ss. 91, **185.** Any person who, otherwise than in accordance with this Act or some other enactment for the time being in force, distrains or attempts to distrain the produce of a tenant's holding, or prevents or attempts to prevent any person from reaping, gathering, storing, removing or otherwise dealing with any produce of the holding, shall be deemed to have committed criminal trespass within the meaning of the Indian Penal Code.

of 1860.

Penalty for illegal distraint.

186. When any offence punishable under section 185 is committed for the benefit of, or in behalf of, any person owning or claiming any interest in the land in respect of which the offence is committed, or having or claiming any interest in a dispute which has led to the commission of the offence, or when any person has accepted or derived any benefit from the commission of any such offence, he shall be punished with imprisonment which may extend to three months, or with fine which may extend to two hundred rupees, or with both, if, having reason to believe that the offence was likely to be committed, he has not used all lawful means in his power to prevent its commission.

Persons benefiting, &c., by offences under section 185 liable to punishment.

187. (*1*) The Local Government may, by an order published in the official Gazette, suspend the provisions of sections 166 to 184 (both inclusive) in any local area for such time as it thinks proper.

Power to suspend provisions of sections 166 to 184.

(*2*) So long as an order under this section continues in force, in respect of any local area, no Court shall receive an application for distraint for arrears of rent due on lands situate within that local area.

CHAPTER XIV.

SPECIAL RULES OF PROCEDURE APPLICABLE TO SUITS BETWEEN LANDLORD AND TENANT.

A.—Rules applicable to suits between landlord and tenant generally.

188. The cause of action in all suits between landlord and tenant as such shall, for the purposes of the Code of Civil Procedure, be deemed to have arisen within the local limits of the jurisdiction of the Civil Court which would have jurisdiction to entertain a suit for the recovery of the land in respect of which the relation of landlord and tenant exists between the parties.

D. s. 174. C. B. s. 148. B. B. s. 165. XIV of 1882

Place of suing.

189. Every náib or gumáshta of a landlord empowered in this behalf by a written authority under the hand of the landlord shall, for the purposes of every such suit, be deemed to be the recognized agent of the landlord within the meaning of the Code of Civil Procedure, notwithstanding that the landlord may reside within the local limits of the jurisdiction of the Court in which the suit is to be instituted or is pending.

D. s. 169. C. B. s. 150. B.B. s. 167(*a*).

Náibs or gumáshtas to be authorised agents.

190. The particulars referred to in section 58 of the Code of Civil Procedure shall, in the case of such suits, instead of being entered in the register of civil suits prescribed by that section, be entered in a special register to be kept by each Civil Court, in such form as the Local Government may from time to time prescribe in this behalf.

D. s. 173. C. B. s. 147. B. B. s. 164. XIV of 1882

Special register of suits.

B.—Rules applicable to particular classes of suits between landlord and tenant.

191. Sections 121 to 127 (both inclusive), 129, 194 to 197 (both inclusive), 305, and 320 to 325C (both inclusive) of the Code of Civil Procedure shall not apply in any suits of the following classes between landlord and tenant as such, namely:—

C. B. s. 165. B. B. s. 167. XIV of 1882

Sections 121 to 127, 129, 194 to 197, 305, and 320 to 325C of Code not to apply in suits for possession, rent or damages.

(*a*) suits for the recovery of rent:

(*b*) suits for penalties claimable under any provision of this Act:

(*c*) suits to recover possession of the land.

192. The plaint in every suit of a description mentioned in section 191 shall contain, in addition to the particulars specified in section 50 of the Code of Civil Procedure, a statement of the extent, situation, designation and boundaries of the land held by the tenant; or, where the plaintiff is unable to give the boundaries, in lieu thereof a description sufficient for identification.

D. s. 185. C. B. s. 167. B. B. s. 189. XIV of 1882.

Particulars to be specified in plaint in such suits.

Bengal Tenancy Bill.

(Chapter XIV—Procedure in Suits between Landlord and Tenant. Secs. 193—202.)

D. s. 192. C. B. s. 173. B. B. s. 195.

Summons in such suits to be for final disposal.

193. The summons shall in every such suit be for the final disposal of the suit, unless the Court is of opinion that the summons should be for the settlement of issues only.

Service of summons in such suits by registered letter.

194. The service of a summons on a defendant in any such suit may, if the Court so directs, be effected by forwarding the summons by post in a letter addressed to the defendant and registered under Part III of the Indian Post, Office Act, 1866. XIV of 1866.

D. s. 108. C B. s. 184. B. B. s. 206.

Written statements not to be filed in such suits without leave.

195. A written statement shall not be filed in any such suit without the leave of the Court.

B. B. s. 214. XIV of 1882.

Mode of recording evidence in such suits.

196. The rules for recording the evidence of witnesses prescribed by section 189 of the Code of Civil Procedure shall apply in all such suits whether an appeal is allowed in them or not.

D. ss. 177 & 223. C. B. ss. 155 & 197. B. B. ss. 171 & 219.

Execution in such suits on oral application.

197. When a decree, not being a decree of the description referred to in section 111, sub-section (*2*), is passed in any such suit, the Court may, when passing the decree, order on the oral application of the decree-holder the execution thereof.

D. s. 179. C. B. ss. 157 & 220. B. B. ss. 173 & 242.

No appeal in certain suits for arrears and penalties.

198. An appeal shall not lie from any decree or order passed, whether in the first instance or on appeal in any suit instituted by a landlord, for arrears or by a tenant for a penalty claimable under any provision of this Act where—

(*a*) the decree or order is passed by a District Judge, Additional Judge or Subordinate Judge, and the amount claimed in the suit does not exceed one hundred rupees, or

(*b*) the decree or order is passed by any other judicial officer specially empowered by the Local Government to exercise final jurisdiction under this section, and the amount claimed in the suit does not exceed fifty rupees;

unless in either case the decree or order has decided a question relating to title to land or to some interest in land as between parties having conflicting claims thereto, or a question of a right to enhance or vary the rent of a tenant:

Provided that the District Judge may call for the record of any case in which a judicial officer as aforesaid has passed a decree or order to which this section applies, and, if he is satisfied that a failure of justice has been caused by a substantial error, defect or irregularity in the proceedings or in the decision, may pass such order as he thinks fit.

[New.]

Defendant in suit for arrear admitting arrear is due, but disputing plaintiff's title, to pay into Court.

199. (*1*) When, in a suit for an arrear of rent instituted against a tenant, the defendant admits that the arrear is due by him, but pleads that it is due to a person other than the plaintiff, the Court may, if it thinks fit, refuse to take cognizance of the plea until the defendant has paid the amount of the arrear into Court.

(*2*) When the amount of an arrear has been paid into Court under this section, the Court shall give the defendant a receipt for the same, and the receipt so given shall operate as an acquittance for the arrear, in the same manner and to the same extent as if it had been paid to the person entitled to it.

(*3*) The Court shall forward the amount paid in to the officer to whom an application to deposit the rent would be made under section 103 and it shall thereupon be deemed to be a deposit received under clause (*c*) of that section.

[C. B. s. B. B. s.

When assignee of decree for arrears may apply for execution.

200. Notwithstanding anything contained in section 232 of the Code of Civil Procedure, an application for the execution of a decree for arrears obtained by a landlord shall not be made by an assignee of the decree unless the landlord's interest in the land has become, and is vested in him.

[B. B. s. & 130, cl.

Date from which decree for enhancement takes effect.

201. (*1*) A decree for enhancement of rent under this Act, if passed in a suit instituted in the first eight months of an agricultural year, shall not take effect before the commencement of the agricultural year next following, and, if passed in a suit instituted in the last four months of the agricultural year, shall not take effect before the commencement of the agricultural year next but one following.

(*2*) Subject to the provisions of sub-section (*1*), it shall be in the discretion of the Court to fix the date from which any such decree shall take effect.

[B. B. s. (*e*). 31, 45 Vic. c. s. 14.]

Relief against forfeitures.

202. (*1*) A suit for the ejectment of a tenant, on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition on breach of which he is, under the terms of a contract between him and the landlord, liable to ejectment, shall not be entertained unless the landlord has requested the tenant, where the damage or breach is capable of remedy, to remedy the same, and, in any case, to pay reasonable compensation for the damage or breach, and the tenant has failed to comply within a reasonable time with that request.

(*2*) A decree passed in favour of a landlord in any such suit shall declare the amount of compensation which would reasonably be payable to the plaintiff for the damage or breach, and whether, in

Bengal Tenancy Bill.

(Chapters XIV, XV.—Procedure in Suits between Landlord and Tenant. Sale of Transferable Holdings in Execution, &c. Secs. 203—208.)

the opinion of the Court, the damage or breach is capable of remedy, and shall fix a period during which it shall be open to the defendant to pay that amount to the plaintiff, and, where the damage or breach is declared to be capable of remedy, to remedy the same.

(3) The Court may from time to time extend a period fixed by it under sub-section (2) for remedying a damage or breach.

(4) If the defendant, within the period or extended period (as the case may be) fixed by the Court under this section, pays the compensation mentioned in the decree, and, where the damage or breach is declared by the Court to be capable of remedy, remedies the damage or breach to the satisfaction of the Court, the decree shall not be executed.

B. s. 80. B. s. 73.] Rights of ejected raiyats in respect of crops and land prepared for sowing.

203. The following rules shall be applicable in the case of every raiyat ejected from a holding:—

(a) When the raiyat has, before the date of his ejectment, sown or planted crops in any land comprised in the holding, he shall be entitled, at the option of the landlord, either to retain possession of that land and to use it for the purpose of tending and gathering in the crops, or to receive from the landlord the value of the crops as estimated by the Court executing the decree for ejectment.

(b) When the raiyat has, before the date of his ejectment, prepared for sowing any land comprised in his holding, but has not sown or planted crops in that land, he shall be entitled to receive from the landlord the value of the labour and capital expended by him in so preparing the land, as estimated by the Court executing the decree for ejectment, together with reasonable interest on that value:

Provided that a raiyat shall not be entitled to retain possession of any land or receive any sum in respect thereof under this section when, after the commencement of proceedings by the landlord for his ejectment, he has cultivated or prepared the land contrary to local usage.

B. s. 80. B. s. 73.] Payment by raiyat for occupation of land under section 203.

204. When a landlord elects, under section 203, clause (a), to allow a raiyat to retain possession of any land for the purpose specified in that clause, the raiyat shall pay to the landlord, for the use and occupation of the land during the period for which he is allowed to retain possession of the same, such rent as the Court executing the decree for ejectment may deem reasonable.

[New.] All claims between landlord and tenant to be determined in ejectment-proceedings.

205. In all suits and proceedings for ejectment, the Court shall inquire into and determine all claims under this Act by the landlord against the tenant as such, or by the tenant against the landlord as such.

Procedure when, on ejectment, money is due by the landlord to the tenant.

206. (1) When it appears to a Court making an inquiry under section 205 that the amount payable by the landlord to the tenant as such exceeds the amount payable by the tenant to the landlord as such, the decree or order for ejectment (if any) shall, unless the landlord and tenant come to an arrangement regarding the payment of the excess sum, specify a time within which it must be paid into Court.

(2) If it is so paid within the time specified, the Court shall eject the tenant; and

if it is not so paid, the Court shall refuse to eject the tenant.

C.—Suit to determine status, &c., of tenant.

[C.B s. 151. B. B. s. 168.] Suit to determine status, &c., of tenant.

207. Every landlord may institute a suit against his tenant, and every tenant against his landlord, for the determination of all or any of the following matters, namely:—

(a) the land held by the tenant;

(b) the class to which he belongs, that is to say, whether he is a tenure-holder, occupancy-raiyat, tenant of a bastu holding, ordinary raiyat, or under-raiyat, and, if he is a tenure-holder, whether his rent is liable to enhancement; and

(c) the rent payable by him at the time the suit is instituted.

CHAPTER XV.

OF THE SALE OF TRANSFERABLE HOLDINGS IN EXECUTION OF DECREES FOR ARREARS DUE ON THEM.

D. s. 155. C. B. ss. 206 Expl. & 210. B. B. ss. 228 Expl. & 232. Definitions.

208. (1). "Incumbrance" in this chapter, used with reference to a tenancy, means any lien, sub-tenancy, easement or other right or interest created upon the holding by the tenant in limitation of his own interest therein, except—

(a) a tenure existing from the time of the permanent settlement;

(b) a tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

(c) a tenure of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, plantations, tanks, canals.

Bengal Tenancy Bill.

(Chapter XV.—Sale of Transferable Holdings in Execution, &c. Secs. 209—214.)

places of worship or burning or burying grounds have been made;

(*d*) a right of occupancy;

(*e*) a right conferred on an occupancy-raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

(*f*) any right or interest which the landlord has expressly and in writing given the tenant permission to create.

[C. B. s. 206 Expl. B. B. s. 228 Expl.]

(*2*) "Registered incumbrance" in this chapter, used with reference to a tenancy on which an arrear of rent is due, means any incumbrance which the defaulter or his predecessor in interest has created by an instrument registered under the Registration Act for the time being in force, and of which, after it has been registered, a copy has been served on the landlord under section 223, not less than six months before the arrear became due.

[C. B. s. 201. B. B. s. 223.]

Application for sale of holding.

209. (*1*) When a decree has been passed for an arrear of rent due for a transferable holding, and the decree-holder applies under section 235 of the Code of Civil Procedure for the attachment and sale of the holding in execution of the decree, his application shall contain, in addition to the particulars specified in that section and section 237 of the said Code, a statement of the annual rent of the holding. XIV of 1882.

(*2*) When the holding is a permanent tenure, there shall be filed with the application a copy of so much of the register kept under Chapter III as relates to the tenure.

[D. s. 152. C. B. s. 203. B. B. s. 225.]

Proclamation announcing sale.

210. (*1*) When an order has been passed for the sale of a holding upon an application made under section 209, the proclamation made under section 287 of the Code of Civil Procedure shall, in addition to stating and specifying the particulars mentioned in that section, announce— XIV of 1882.

(*a*) in the case of a tenure, that the tenure will first be put up to auction subject to the registered incumbrances and will be sold subject to those incumbrances if the sum bid is sufficient to liquidate the amount of the decree and costs, and that otherwise it will, if the decree-holder so desires, be sold on a subsequent day of which due notice will be given with power to annul all incumbrances; and

(*b*) in the case of an occupancy-holding, or bastu holding, that the holding will be sold with power to annul all incumbrances.

(*2*) The proclamation shall, besides being made in the manner prescribed by section 289 of the said Code, be published in such manner as the Local Government may, from time to time, direct in this behalf.

Sale of tenure subject to registered incumbrances and effect thereof.

211. (*1*) When a tenure has been advertised for sale under section 210, it shall be put up to auction, subject to registered incumbrances; and, if the bidding reaches a sum sufficient to liquidate the amount of the decree and costs, including the costs of sale, the tenure shall be sold subject to such incumbrances. C. B. s. 206. B. B. s. 228(*a*) and Expl.

(*2*) The purchaser at a sale under this section may, in manner provided by section 214, and not otherwise, annul any incumbrance upon the tenure not being a registered incumbrance.

Sale of tenure with power to avoid all incumbrances and effect thereof.

212. (*1*) If the bidding for a tenure put up to auction under section 211 does not reach a sum sufficient to liquidate the amount of the decree and costs as aforesaid, and if the decree holder thereupon desires that the tenure be sold with power to avoid all incumbrances, the officer holding the sale shall adjourn the sale and make a fresh proclamation under section 289 of the Code of Civil Procedure, announcing that the tenure will be put up to auction and sold with power to avoid all incumbrances upon a future day specified therein, not less than fifteen or more than thirty days from the date of the postponement; and upon that day the tenure shall be put up to auction and sold with power to avoid all incumbrances. C. B. s. 207(*a*) B. B. s. 229(*a*) XIV of 1882.

(*2*) The purchaser at a sale under this section may, in manner provided by section 214, and not otherwise, annul any incumbrance on the tenure. D. s. 155. C. B. s. 210. B. B. s. 232.

Sale of occupancy-holding with power to avoid all incumbrances and effect thereof.

213. (*1*) When an occupancy-holding or bastu holding has been advertized for sale under section 210, it shall be put up to auction and sold with power to avoid all incumbrances. B. B. s. 228(*b*)

(*2*) The purchaser at a sale under this section may, in manner provided by section 214, and not otherwise, annul any incumbrance on the holding.

Procedure for annulling incumbrances under the foregoing sections.

214. (*1*) A purchaser having power to annul an incumbrance under section 211, section 212, or section 213, and desiring to avoid the same, may within one year from the date on which he first has notice of the incumbrance, present to the Collector an application in writing, requesting him to serve on the incumbrancer a notice declaring that the incumbrance is annulled.

(*2*) Every such application must be accompanied by such fee for the service of the notice as the Board of Revenue may fix in this behalf.

(*3*) When an application for a service of a notice is made to the Collector in manner prescribed by this section, he shall cause the notice to be served in compliance therewith, and the incumbrance shall be deemed to be annulled from the date on which it is so served.

Bengal Tenancy Bill.

(*Chapter XV.—Sale of Transferable Holdings in Execution, &c. Secs. 215—222.*)

B. s. 225(c).

Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.

215 (*1*) The Local Government may, from time to time, by notification in the official Gazette, direct that occupancy-holdings in any local area put up for sale in execution of decrees for rent due on them shall, before being put up with power to avoid all incumbrances, be put up subject to registered incumbrances, and may by like notification rescind any such direction.

(*2*) While any such direction remains in force in respect of any local area, all occupancy-holdings in that local area shall, for the purposes of sale under the foregoing sections of this chapter, be treated in all respects as if they were tenures.

s. 246. B. s. 211. B. s. 233.

Rules for disposal of the sale-proceeds.

216. (*1*) In disposing of the proceeds of a sale under this chapter, the following rules, instead of those prescribed by section 295 of the Code of Civil Procedure, shall be observed, that is to say :— V of 1882.

(*a*) There shall first be paid to the decree-holder the costs incurred by him in bringing the holding to sale.

(*b*) There shall, in the next place, be paid to the decree-holder the amount due to him under the decree in execution of which the sale was made.

(*c*) If there remains a balance after these sums have been paid, there shall be paid to the decree-holder therefrom any rent which may have fallen due to him in respect of the holding between the institution of the suit and the date of the sale, but not more than six months after the date of the final decree.

(*d*) The balance (if any) remaining after the payment of the rent mentioned in clause (*c*) shall, upon the expiration of two months from the confirmation of the sale, be paid to the judgment-debtor upon his application.

(*2*) If the judgment-debtor disputes the decree-holder's right to receive any sum on account of rent under clause (*c*), the Court shall determine the dispute, and the determination shall have the force of a decree.

s. 153. B. s. 204. B. s. 226. V of 1882.

Holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.

217. (*1*) Sections 278 to 283 (both inclusive) of the Code of Civil Procedure shall not apply to a holding attached in execution of a decree for arrears due thereon.

(*2*) When an order for the sale of a holding in execution of such a decree has been made, the holding shall not be released from attachment unless, before it is knocked down to the auction-purchaser, the amount of the decree, including the costs decreed, together with the costs incurred in order to the sale, is paid into Court, or the decree-holder makes an application for the release of the holding on the ground that the decree has been satisfied out of Court.

(*3*) Nothing in this section shall affect the right of any person to institute a suit to set aside the sale of a holding under this chapter.

D. ss. 35, 36, 154. C. B. s. 205. B. B. s. 227.

Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the holding.

218. (*1*) When any person having, in a holding advertized for sale under this chapter, an interest which would be voidable upon such sale, pays into Court the amount requisite to prevent the sale,

(*a*) the amount so paid by him shall be deemed to be a debt bearing interest at twelve per cent. per annum and secured by a mortgage of the holding to him ;

(*b*) his mortgage shall, subject to the provisions of section 125, be deemed to be the first charge on the holding ; and

(*c*) he shall be entitled to take possession of the holding as mortgagee, and retain possession of it as such until the debt, with the interest due thereon, has been discharged.

(*2*) Nothing in this section shall affect any other remedy to which any such person would be entitled.

D. ss. 35, 36, 154. C. B. B. s. 227.

Inferior tenant paying into Court may deduct from rent.

219. When a holding is advertised for sale under this chapter in execution of a decree against a superior tenant defaulting, and an inferior tenant, whose interest would be voidable upon the sale, pays money into Court in order to prevent the sale, he may, in addition to any other remedy provided for him by law, deduct the whole or any portion of the amount so paid from any rent payable by him to his immediate landlord ; and, if that landlord is not the defaulter, he may in like manner deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

C. B. s. 205(1). B. B. s. 230(1). XIV of 1882.

Decree-holder may bid at sale ; judgment-debtor may not.

220. (*1*) Notwithstanding anything contained in section 294 of the Code of Civil Procedure, the holder of a decree in execution of which a holding is sold under this chapter may without the permission of the Court bid for or purchase the holding.

(*2*) The judgment-debtor shall not bid for or purchase a holding so sold.

XIV of 1882.

Operation of sections 313 and 326 of Code of Civil Procedure excluded.

221. Sections 313 and 326 of the Code of Civil Procedure shall not apply to any sale under this chapter.

New. III of 1877.

Registration of certain instruments creating incumbrances.

222. Notwithstanding anything contained in Part IV of the Indian Registration Act, 1877, an instrument creating an incumbrance upon any transferable holding which has been executed before the commencement of this Act, and is not required by section 17 of the said Registration Act to be registered, shall be accepted for registration under that Act if it is presented for that purpose to the proper officer within one year from the commencement of this Act.

C. B. s. 206 Expl. B. B. s. 228 Expl.

Registration-officers to serve copies of instruments creating incumbrances.

223. Every officer who has, whether before or after the passing of this Act, registered an instrument executed by a tenant of a transferable holding and creating an incumbrance on the holding, shall, at the request

Bengal Tenancy Bill.

(Chapter XVII.—Supplementary. (Schedule I.—Repeal of Enactments.)

of the tenant or of the person in whose favour the incumbrance is created, and on payment by him of such fee as the Local Government may fix in this behalf, cause a copy of the instrument to be served on the landlord in the manner prescribed in Part VII of the Indian Registration Act, 1877, for the service of summons.

III of 1877.

CHAPTER XVI.

OF LIMITATION.

Limitation in suits, appeals and applications in Schedule IV.

224. The suits, appeals and applications specified in Schedule IV annexed to this Act shall be instituted and made within the time prescribed in that schedule for them respectively; and every such suit or appeal instituted, and application made, after the period of limitation so prescribed, shall be dismissed, although limitation has not been pleaded.

XV of 1877.

Portions of the Indian Limitation Act not applicable to such suits, &c.

225. Sections 7, 8 and 9 of the Indian Limitation Act, 1877, shall not apply to the suits and applications mentioned in section 224.

CHAPTER XVII.

SUPPLEMENTARY.

Saving as to service-tenures.

226. Nothing in this Act shall confer a right to transfer or bequeath a service-tenure which, before the passing of this Act, was not capable of being transferred or bequeathed.

Power to make rules regarding procedure and powers of officers.

227. The Local Government may, from time to time, by notification in the official Gazette, make rules consistent with this Act to regulate the procedure to be followed by Revenue-officers in the discharge of any duty imposed upon them by or under this Act, and may by such rules confer upon any such officer—

(*a*) any power exercised by a Civil Court in the trial of suits;

(*b*) power to enter upon any land, and to survey, demarcate and make a map of the same; and

(*c*) power to cut and thresh the crops on any land and weigh the produce, with a view to estimating the capabilities of the soil.

Procedure for making, publication and confirmation of rules.

228. (*1*) Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) The publication shall be made, in the case of rules made by the Local Government or High Court, in such manner as may in its opinion be sufficient for giving information to persons interested, and in the case of rules made by any other authority, in the prescribed manner.

(*3*) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(*4*) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*5*) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive evidence that it has been duly made.

Náibs and gumáshtas of landlords.

229. Any appearance, application or act in, before, or to, any Court or other authority required or authorized by this Act to be made or done by a landlord may, unless the Court or authority otherwise directs, be made or done also by a náib or gumáshta of the landlord empowered in this behalf by a written authority under the hand of the landlord; and every notice required by this Act to be served on, or given to, a landlord shall, if served on, or given to, a náib or gumáshta of the landlord empowered as aforesaid to accept service of or receive the same, be as effectual for the purposes of this Act as if it had been served on, or given to, the landlord in person.

Rights of pasturage, forest-rights, &c.

230. The provisions of this Act applicable to suits for the recovery of arrears of rent shall, as far as may be, apply to suits for the recovery of anything payable or deliverable in respect of any rights of pasturage, forest-rights, rights over fisheries and the like.

SCHEDULE I.

(See Section 2.)

REPEAL OF ENACTMENTS.

Regulations of the Bengal Code.

Number and year.	Subject of Regulation.	Extent of repeal.
VIII of 1793 .	A Regulation for re-enacting with modifications and amendments the rules for the Decennial Settlement of the Public Revenue payable from the lands of the zemindars, independent talukdars, and other actual proprietors of land in Bengal, Behar, and Orissa, passed for those Provinces respectively on the 18th September 1789, the 25th November 1789, and the 10th February 1790, and subsequent dates.	Sections 51, 52, 53, 54, 55, 64, and 65.
XII of 1805 .	A Regulation for the settlement and collection of the Public Revenue in the zila of Cuttack, including the parganas of Pattáspur, Kummadichour, and Bagrao, at present included in the zila of Midnapur.	Section 7.
V of 1812 .	A Regulation for amending some of the rules at present in force for the collection of the Land-revenue.	Sections 2, 3, 4, 26 and 27.

Bengal Tenancy Bill.

(*Schedule I.—Repeal of Enactments, and Schedule II.—Extract from Preamble to Regulation VIII of 1819.*)

SCHEDULE I—*contd.*

Number and year.	Subject of Regulation.	Extent of repeal.
XVIII of 1812 .	A Regulation for explaining Section 2, Regulation V, 1812, and rescinding Sections 3 and 4, Regulation XLIV, 1793, and Sections 3 and 4, Regulation L, 1795, and enacting other rules in lieu thereof.	Preamble and Sections 2 and 3.
VIII of 1819 .	A Regulation to declare the validity of certain tenures, and to define the relative rights of zamíndárs and patní taluqdárs; also to establish a process for the sale of such taluqs in satisfaction of the zamíndár's demand of rent, and to explain and modify other parts of the system established for the collection of rents generally throughout Bengal.	The whole Regulation.
I of 1820 .	A Regulation for providing that all sales of certain taluqs, made answerable by sale for arrears of the zamíndár's rent, shall be conducted in the mode prescribed by Regulation VIII, 1819, for the sales therein described.	The whole Regution.
XI of 1825 .	A Regulation for declaring the rules to be observed in determining claims to lands gained by alluvion or by dereliction of a river or the sea.	In Clause 1 of Section 4, from and including the words "nor if annexed to a subordinate tenure" to the end of the Clause.

Acts of the Bengal Council.

Number and year.	Subject of Act.	Extent of repeal.
VI of 1862 .	An Act to amend Act X of 1859 (to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal).	The whole Act.
VIII of 1865 .	An Act to amend the law for the sale of such undertenures as by the title-deeds or established usage of the country are transferable by sale or otherwise for the recovery of arrears of rent due in respect thereof.	The whole Act.
IV of 1867 .	An Act to explain and amend Act VI of 1862, passed by the Lieutenant-Governor of Bengal in Council, and to give validity to certain judgments.	The whole Act.
VIII of 1869 .	An Act to amend the Procedure in suits between Landlords and Tenants.	The whole Act.
VIII of 1879 .	An Act to define and limit the powers of Settlement-officers.	The whole Act.

Acts of the Governor General in Council.

Number and year.	Subject of Act.	Extent of repeal.
XXV of 1850 .	An Act for the forfeiture to Government of deposits made on incomplete sales of land under Regulation VIII, 1819, and Act IV, 1846.	So much a is unrepealed.
XXXIII of 1850 .	An Act for amending the forms necessary for the sale of patní tenures in Bengal.	The whole Act.
VI of 1853 .	An Act relating to summary suits for arrears of rent, to sales of pátní taluqs and other saleable Tenures, and to sales of land in satisfaction of summary decrees for rent.	The whole Act.
X of 1859 .	An Act to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal.	The whole Act.

SCHEDULE II.

(*See Section 36.*)

Extract from Preamble to Regulation VIII of 1819.

"In the exercise of the privilege * * * conceded to zamíndárs under direct engagements with Government, there has been created a tenure which had its origin on the estates of the Rájá of Bardwán, but has since been extended to other zamíndáris; the character of which tenure is, that it is a taluq created by the zamíndár, to be held at a rent fixed in perpetuity, by the lessee and his heirs for ever; the tenant is called upon to furnish collateral security for the rent, and for his conduct generally, or he is excused from this obligation at the zamíndár's discretion; but even if the original tenant be excused, still, in case of sale for arrears, or other operation leading to the introduction of another tenant, such new incumbent has always in practice been liable to be so called upon at the option of the zamíndár.

Bengal Tenancy Bill.
(*Schedule III.—Summary Sale of Patní Tenures.*)

"By the terms also of the engagements interchanged, it is, amongst other stipulations, provided that, in case of an arrear occurring, the tenure may be brought to sale by the zamíndár, and if the sale do not yield a sufficient amount to make good the balance of rent at the time due, the remaining property of the defaulter shall be further answerable for the demand.

"These tenures have usually been denominated patní taluqs, and it has been a common practice of the holders of them to underlet on precisely similar terms to other persons who, on taking such leases, went by the name of darpatní taluqdárs: these, again, sometimes similarly underlet to bepatnídárs; and the conditions of all the title-deeds vary in nothing material from the original engagements executed by the first holder."

SCHEDULE III.

SUMMARY SALE OF PATNÍ TENURES.

(See section 42.)

Extract from Regulation VIII of 1819, amended in accordance with subsequent enactments.

Zamíndárs allowed sales of tenures, in which right to sell for arrears is reserved.

8. *First.*—Zamíndárs, that is, proprietors under direct engagements with the Government, shall be entitled to apply in the manner following for periodical sales of any tenures upon which the right of selling or bringing to sale for an arrear of rent may have been specially reserved by stipulation in the engagements interchanged on the creation of the tenure.

The exercise of this power shall not be confined to cases in which the stipulation for sale may have been unrestricted in regard to time, but shall apply equally to tenures held under engagements stipulating merely for a sale at the end of the year, in conformity with the practice heretofore allowed by the Regulations in force.

First sale to be applied for on first Baisákh.

Second.—On the first day of Baisákh, that is, at the commencement of the following year from that of which the rent is due, the zamíndár shall present a petition to the Collector, containing a specification of any balances that may be due to him on account of the expired year, from all or any taluqdárs or other holders of an interest of the nature described in the preceding clause of this section.

The same shall then be stuck up in some conspicuous part of the kachahrí, with a notice that if the amount claimed be not paid before the first of Jeth following, the tenures of the defaulters will on that day be sold by public sale in liquidation.

Should, however, the first of Jeth fall on a Sunday or holiday, the next subsequent day, not a holiday, shall be selected instead; a similar notice shall be stuck up at the sadr kachahrí of the zamíndár himself, and a copy or extract of such part of the notice as may apply to the individual case shall be by him sent to be similarly published at the kachahrí or at the principal town or village upon the land of the defaulter.

The zamíndár shall be exclusively answerable for the observance of the forms above prescribed, and the notice required to be sent into the mufassal shall be served by a single peon, who shall bring back the receipt of the defaulter, or of his manager, for the same; or in the event of inability to procure this, the signatures of three substantial persons residing in the neighbourhood, in attestation of the notice having been brought and published on the spot.

If it shall appear from the tenor of the receipt or attestation in question that the notice has been published at any time previous to the fifteenth of the month of Baisákh, it shall be a sufficient warrant for the sale to proceed upon the day appointed.

In case the people of the village should object or refuse to sign their names in attestation, the peon shall go to the kachahrí of the nearest munsif, or if there should be no munsif, to the nearest tháná, and there make voluntary oath of the same having been duly published; certificate to which effect shall be signed and sealed by the said officers and delivered to the peon.

Mid year sale to be applied for on first of Kártik.

Third.—On the first day of Kártik, in the middle of the year, the zamíndár shall be at liberty to present a similar petition, with a statement of any balances that may be due on account of the rent of the current year, up to the end of the month of Asin, and to cause similar publication to be made of a sale of the tenures of defaulters, to take place on the first of Aghan, unless the whole of the advertised balance shall be paid before the date in question, or so much of it as shall reduce the arrear, including any intermediate demand for the month of Kártik, to less than one-fourth or a four-anna proportion of the total demand of the zamíndár, according to the kistbandí, calculated from the commencement of the year to the last day of Kártik.

Sales how conducted.

9. All sales of saleable tenures applied for under the rules of this Regulation shall be made in public kachahrí; the land shall be sold to the highest bidder, and every one not the actual defaulter shall be free to bid, not excepting the person in satisfaction of whose demand the sale may be made, nor the under-tenants of the defaulter; fifteen per cent. of the purchase-money shall be paid immediately the lot is knocked down, and the officer conducting the sale shall be competent to refuse to accept a bid, or to knock down a lot to any bidder, unless he has assurance to his satisfaction that the amount

Bengal Tenancy Bill.
(*Schedule III.—Summary sale of Patní Tenures.*)

required to be deposited is in hand for the purpose, or will be produced within two hours.

If the fifteen per cent. be not paid in cash, * * * * * * * * * within two hours of the sale, or an equivalent amount in Government securities be not lodged, the lot shall be resold on the same day, and if the remainder of the purchase-money be not paid by noon of the eighth day, notice shall be given of resale on the following day, that is, on the ninth from the first sale, by proclaiming the same by beat of drum through the bázár of the sadr station of the zila, after which the lot shall be resold at the appointed time at the risk of the first purchaser, who shall forfeit the advance of fifteen per cent. already made, and be further answerable for any sum in which the proceeds of the second sale may fall short of the antecedent one; such deficiency to be levied by the process for the execution of decrees of the Civil Courts.

The forfeited deposit shall be applied to defray the expenses of the sale, and the surplus shall be credited to Government.

Forms to be observed in selling.

10. At the time of the sale, the notice previously stuck up in the kachahrí shall be taken down, and the lots be called up successively in the order in which they may be found in that notice.

A person shall attend on the part of the zamíndár, with a particular statement of the payments made up to the day of sale, on account of the balance of each advertised lot, together with the receipt for, or certificate of, the notice directed to be published in the mufassal, nor shall any lot be put up to sale until the statement produced shall have been inspected, and the existence of a balance for the year ascertained therefrom, nor until the receipt for the notice shall have been read; the observance of which forms shall be recorded in a separate rubakárí to be held upon each lot sold.

If the sale be of the description provided for in the third clause of section 8 of this Regulation, the kistbandí of the defaulter shall likewise be produced, in order that it may be seen that the balance remaining unpaid exceeds a four-anna proportion of the demand up to the date of sale; nor shall the sale take place unless this be ascertained.

The zamíndár shall be exclusively responsible for the correctness and authenticity of the papers to be thus exhibited, nor shall the public officer making the sale be answerable in any respect, except for its fairness and publicity, and for the observance of the rules prescribed for his guidance in this Regulation.

Tenure to be sold free of incumbrance by act of defaulter.

11. *First.*—It is hereby declared, that any taluq or saleable tenure that may be disposed of at a public sale, under the rules of this Regulation, for arrears of rent due on account of it, is sold free of all incumbrances that may have accrued upon it by act of the defaulting proprietor, his representatives or assignees, unless the right of making such incumbrances shall have been expressly vested in the holder by a stipulation to that effect in the written engagements under which the said taluq may have been held.

No transfer by sale, gift or otherwise, no mortgage or other limited assignment, shall be permitted to bar the indefeasible right of the zamíndár to hold the tenure of his creation answerable, in the state in which he created it, for the rent which is in fact his reserved property in the tenure, except the transfer or assignment should have been made with a condition to that effect, under express authority obtained from such zamíndár.

No under-lease to stand after sale.

Second.—In like manner, on sale of a taluq for arrears, all leases originating with the holder of the former tenure, if creative of a middle interest between the resident cultivators and the late proprietor, must be considered to be cancelled, except the authority to grant them should have been specially transferred; the possessors of such interests must consequently lose the right to hold possession of the land and to collect the rents of the raiyats; this having been enjoyed merely in consequence of the defaulter's assignment of a certain portion of his own interest, the whole of which was liable for the rent.

* * * * *

Reason for allowing under-tenants means of staying sale.

13. *First.*—With reference to the injury that may be brought upon the holder of a taluq of the second degree by the operation of the preceding rules, in case the proprietor of the superior tenure purposely withholds the rent due from himself to the zamíndár, after having realised his own dues from the inferior tenantry, it is deemed necessary to allow such taluqdárs the means of saving their tenures from the ruin that must attend such a sale; and the following rules have accordingly been enacted for this purpose.

How under-tenants may stay sale.

Second.—Whenever the tenure of a taluqdár of the first degree may be advertised for sale in the manner required by the second and third clauses of section 8 of this Regulation, for arrears of rent due to the zamíndár, the taluqdárs of the second degree, or any number of them, shall be entitled to stay the final sale, by paying into the Collectorate the amount of balance that may be declared due by the person attending on the part of the zamíndár on the day appointed for sale; in like manner they shall be entitled to lodge money antecedently, for the purpose of eventually answering any demand that may remain due on the day fixed for the sale, and should the amount lodged be sufficient, the sale shall not proceed, but after

Bengal Tenancy Bill.
(*Schedule III.—Summary sale of Patní Tenures.*)

making good to the zamíndár the amount of his demand, any excess shall be paid back to the person or persons who may have lodged it.

Procedure in case of amount lodged being rent due from under-tenant;

Third.—If the amount so lodged shall be rent due by the inferior taluqdár to the holder of the advertised tenure, the same shall be stated at the time of making the deposit, and the amount shall be carried to the account of the tenant or tenants lodging it, and be deducted from any claim of rent that may at the time be pending, or be thereafter brought forward against him or them by the proprietor of the advertised tenure, on account of the year or months for which the notice of sale may have been published.

and in case of amount lodged being advanced from private funds.

Fourth.—If the person or persons making such a deposit, in order to stay the sale of the superior tenure, shall have already paid the whole of the rent due from himself or themselves, so that the amount lodged is an advance from private funds, and not a disbursement on account of the said rent, such deposit shall not be carried to credit in, or set against, future demands for rent, but shall be considered as a loan made to the proprietor of the tenure preserved from sale by such means, and the taluq so preserved shall be the security to the person or persons making the advance, who shall be considered to have a lien thereupon, in the same manner as if the loan had been made upon mortgage, and he or they shall be entitled, on applying for the same, to obtain immediate possession of the tenure of the defaulter, in order to recover the amount so advanced from any profits belonging thereto.

If the defaulter shall desire to recover his tenure from the hands of the person or persons who, by making the advance, may have acquired such an interest therein, and entered on possession in consequence, he shall not be entitled to do so, except upon repayment of the entire sum advanced, with interest at the rate of twelve per cent. per annum up to the date of possession having been given as above, or upon exhibiting proof, in a regular suit to be instituted for the purpose, that the full amount so advanced, with interest, has been realised from the usufruct of the tenure.

Sale not to be stayed unless arrear claim be lodged.

14. *First.*—Should the balance claimed by a zamíndár on account of the rent of any under-tenure remain unpaid upon the day fixed for the sale of the tenure, the sale shall be made without reserve, in the manner provided for in sections 9 and 10 of this Regulation; nor shall it be stayed or postponed on any account, unless the amount of the demand be lodged.

But suit to lie for its reversal.

It shall, however, be competent to any party desirous of contesting the right of the zamíndár to make the sale, whether on the ground of there having been no balance due, or on any other ground, to sue the zamíndár for the reversal of the same, and upon establishing a sufficient plea, to obtain a decree with full costs and damages.

The purchaser shall be made a party in such suits, and upon decree passing for reversal of the sale, the Court shall be careful to indemnify him against all loss, at the charge of the zamíndár or person at whose suit the sale may have been made.

Defaulter may apply for summary investigation.

Second.—In cases also in which a taluqdár may contest the zamíndár's demand of any arrear, as specified in the notice advertised, such taluqdár shall be competent to apply for a summary investigation at any time within the period of notice; the zamíndár shall then be called upon to furnish his kabuliyat and other proofs at the shortest convenient notice, in order that the award may, if possible, be made before the day appointed for sale.

Sale not to be stayed unless amount claimed be deposited.

Such award, if so made, will of course regulate the ulterior process; but if the case be still pending, the lot shall be called up in its turn, notwithstanding the suit; and if the zamíndár or his agent in attendance insist on the demand, the sale shall be made on his responsibility, nor shall it be stayed, or the summary suit be allowed to proceed, unless the amount claimed be lodged in cash, * * * * * * * * or in Government securities, by the taluqdár contesting the demand; and if such deposit be not made, the alleged defaulter will have no remedy, but by a regular action for damages and for a reversal of the sale.

Delivery of possession to purchaser.

15. *First.*—So soon as the entire amount of the purchase-money shall have been paid in by the purchaser at any sale made under this Regulation, such purchaser shall receive from the officers conducting the sale a certificate of such payment.

The purchaser shall then proceed with the certificate in question to procure a transfer to his name in the kachahrí of the zamíndár, and upon furnishing security, if required, to the extent of half the jama or annual rent, he shall receive the usual 'amaldastak' or order for possession, together with the notice to the raiyats and others to attend and pay their rents henceforward to him.

The zamíndár shall also be bound to furnish access to any papers connected with the tenure purchased, that may be forthcoming in his kachahrí; and should he in any manner delay the transfer in his office, or refuse to give the orders for possession, notwithstanding that good and substantial security shall have been furnished or tendered on requisition, the new purchaser shall be entitled to apply direct to the Collector; and he shall receive the orders for possession, and shall be

Bengal Tenancy Bill.

(Schedule III.—Summary sale of Patní Tenures.)

put in possession, of the lands by means of the názir, in the same manner as possession is obtained under a decree of Court; * * *

* * * * * *

Procedure in case of opposition to purchaser.

Second.—When the new purchaser shall proceed to take possession of the lands of his purchase, if the late incumbent himself, or the holders of tenures or assignments derived from the late incumbent, and intermediate between him and the actual cultivators, shall attempt to offer opposition, or to interfere with the collections of the new purchaser, from the lands composing his purchase, the latter shall be at liberty to apply immediately to the Collector for the aid of the public officers in obtaining possession of his just rights.

A proclamation shall then issue under the seal and signature of the Collector declaring that the new incumbent having, by purchase at a sale for arrears of rent due to the zamíndár, acquired the entire rights and privileges attaching to the tenure of the late taluqdár, in the state in which it was originally derived by him from the zamíndár, he alone will be recognized as entitled to make the zamíndárí collections in the mufassal, and no payments made to any other individual will on any account be credited to the raiyats or others in any suit for rent or on any other occasion whatever when the same may be pleaded.

Procedure in case of continued opposition.

Third.—Should the late incumbent or his late under-tenants continue to oppose the entry of the new purchaser, notwithstanding the issuing of such a proclamation, or should there be reason to apprehend a breach of the peace on the part of any one, the aid of the Police-officers and of all other public officers who may be at hand and capable of affording assistance shall be given to the new purchaser, on his presenting a written application for the same; and in the event of any affray or breach of the peace occurring, the entire responsibility shall rest with the party opposing the lawful attempt of the purchaser to assume his rights.

* * * * *

Disposal of proceeds of sales.

17. *First.*—The following rules have been enacted for the disposal of the proceeds of any sale made under the rules of this Regulation.

Deduction on account Government.

Second.—One per cent. shall first be deducted from the nett proceeds realised, and shall be carried to the account of Government, for the purpose of meeting the expense of any extra establishments which it may be necessary to maintain for carrying into effect the provisions of this Regulation.

Payment to zamíndárs.

Third.—The balance on account of which the sale may have been made shall next be made good in full (with interest and all charges incurred in bringing the taluq to sale) to the zamíndár or other person to whom the same may be due; provided, however, that no former balances, beyond those of the current year (or of that immediately expired, if the sale be at the commencement of the following year), shall be included in the demand to be thus satisfied.

Such antecedent balances, if the zamíndár shall have omitted to avail himself of the process within his reach for having them satisfied at the time, will have become in fact mere personal debts of the individual taluqdár, and must be recovered in the same way as other debts by a regular suit in the Court.

Disposal of remainder.

Fourth.—Any excess that may remain after satisfying the demand of the zamíndár, in the manner above described, shall be forthwith sent by the officer conducting the sale to the treasury of the Collector or Assistant Collector of the district, to be there held in deposit to answer the claims of the taluqdárs of the second degree, or of others who, by assignment of the defaulter, may be at the time in possession of a valuable interest on the land composing the taluq sold, or on any part of it.

Under-tenants free to prosecute for price of their interest or compensation.

Fifth.—It shall be competent to any one conceiving himself to possess such an interest to bring forward his claim to the price he may have paid for the same, or for a just compensation for the loss sustained by him in consequence of the sale, by instituting a regular suit at any time within two months from the date of sale.

If the Court shall, on investigation, consider the plaintiff's claim to be an equitable one, the Court will award to the claimant either the price he may have originally paid, or the value of the interest at the time of sale, or any other amount that may be deemed just and equitable under all the circumstances.

If there be more claimants than one, payment shall not be made from the deposit, until the whole of the claims be settled; and in case the value assessed upon the whole should exceed the amount in deposit, such amount shall be divided proportionately, and the remainder stand as a personal debt against the defaulter, to be realised from him by the usual process for the execution of decrees.

Suit not to lie if under tenant be himself in arrear at time of sale.

Sixth.—Provided, however, that no taluqdár of the second degree or other possessor of an assigned interest upon the land of the tenure sold, who may

Bengal Tenancy Bill.
(Schedule IV.—Limitation.)

be holding under a stipulation for the payment of an annual amount in the way of rent, shall be entitled to recover compensation for the loss of such tenure or assignment upon its becoming cancelled by sale of the superior taluq, except after exhibiting proof that the whole amount of the rent demandable from himself has been paid or lodged for the purpose prior to the date of sale.

When defaulter to receive excess unclaimed.

Seventh.—Should no claims upon the purchase-money of a taluq sold as above be brought forward by any under-tenants or assignees, within the period of two months from the date of sale, or should the amount claimed by those who may have sued not equal the entire deposit, the defaulter whose tenure may have been sold shall be at liberty to petition the Court for the amount so held in deposit, or for the excess thereof, as the case may be, and he shall receive a certificate under the seal of the Court, of there being no claims to afford ground of detention for the whole or any part of the deposit; and upon exhibiting such certificate to the Collector, the amount set free thereby shall be paid to his receipt.

In the same manner, upon executing a decree passed in favour of any under-tenants or assignees, they shall receive certificates under the seal of the Court, declaring the amount adjudged to them out of the deposit; and upon exhibiting these certificates, the amount shall be paid severally to their receipts by the Collector.

Substitution of Government securities for cash in deposit.

Eighth.—It shall be competent to any party interested in a deposit, to withdraw the whole or any part thereof, on substituting Government securities, bearing interest, in lieu of the money so held in deposit; such securities to be taken at the rate of discount or premium of the day, as shown by the Government Gazette last received.

SCHEDULE IV.

(*See Section 224.*)

PART I.—*Suits.*

Description of suit.	Period of Limitation.	Time from which period begins to run.
1. To eject any tenure-holder or raiyat on account of any breach of a condition in respect of which there is a contract expressly providing that ejectment shall be the penalty of such breach.	One year .	The date of the breach.

SCHEDULE IV—continued.

PART I.—*Suits.*—concluded.

Description of Suit.	Period of Limitation.	Time from which period begins to run.
2. For the recovery of an arrear of rent—		
(a) when the arrear fell due before a deposit was made on account of the rent of the same holding under section 103.	Six months .	The date of the deposit.
(b) in other cases .	Three years .	The last day of the Bengali year in which the arrear fell due, where that year prevails, and the last day of the month of Jeyt of the Amli or Fasli year in which the arrear fell due, where either of those years prevails.

PART II.—*Appeals.*

Description of Appeal.	Period of Limitation.	Time from which period begins to run.
3. From any decree or order under this Act to the Court of a District Judge.	Thirty days .	The date of the decree or order appealed against.
4. From any order of a Collector under this Act to the Commissioner.	Thirty days .	The date of the order appealed against.

PART III.—*Applications.*

Description of Application.	Period of Limitation.	Time from which period begins to run.
5. For the execution of a decree or order made under this Act, or any Act repealed by this Act, and not being a decree for a sum of money exceeding Rs. 500, exclusive of any interest which may have accrued after decree upon the sum decreed, but inclusive of the costs of executing such decree, except where the judgment-debtor has by fraud or force prevented the execution of the decree.	Three years .	(1) The date of the decree of order; or (2) where there has been an appeal, the date of the final decree or order of the Appellate Court; or (3) where there has been a review of judgment, the date of the decision passed on the review.

STATEMENT OF OBJECTS AND REASONS.

THE history of landlord and tenant legislation in Bengal, and of the circumstances which have led to the preparation of the present Bill, is given in full detail in the papers which have been published. A very brief summary of it must suffice here.

Immediately before the Permanent Settlement was made, the Court of Directors, in conveying instructions to the Government here regarding it, wrote as follows*:—

"In order to leave no room for our intentions being at any time misunderstood, we direct you to be accurate in the terms in which our determination is announced. * * * * You will, in a particular manner, be cautious so to express yourselves as to leave no ambiguity as to our right to interfere, from time to time, as it may be necessary, for the protection of the raiyats and subordinate landlords, it being our intention, in the whole of this measure, effectually to limit our own demands, but not to depart from our inherent right as sovereigns of being the guardians and protectors of every class of persons living under our Government."

2. In conformity with these instructions, an article was inserted in section 8 of Regulation I of 1793, by which the Permanent Settlement was effected, expressly saving the right of the Government to legislate for the protection of persons having interests in the soil below those of the zamíndárs. It need hardly be said that any such saving was, strictly speaking, superfluous, inasmuch as the Government of an agricultural country like India would, apart altogether from it, be entitled, or rather bound, to legislate from time to time, as occasion might require, for the protection of the inferior occupants of the soil. But the article is important as showing that the view taken of the relations between the Government, the zamíndárs and the inferior landholders under the Permanent Settlement was the same in 1793 as it is to-day.

The article runs as follows:—

"To prevent any misconstruction of the foregoing articles" (fixing the Government revenue for ever) "the Governor General in Council thinks it necessary to make the following declarations to the zamíndárs, independent taluqdárs and other actual proprietors of land:— *First*, it being the duty of the ruling power to protect all classes of people, and more particularly those who, from their situation, are most helpless, the Governor General in Council will, whenever he may deem it proper, enact such regulations as he may think necessary for the protection and welfare of the dependent taluqdárs, raiyats and other cultivators of the soil; and no zamíndár, independent taluqdár or other actual proprietor of land shall be entitled on this account to make any objection to the discharge of the fixed assessment which they have respectively agreed to pay."

3. Again, it was enacted by section 67 of Regulation VIII of 1793 (a Regulation re-enacting, with modifications, the rules for the Decennial Settlement) that proprietors should be bound by the restrictions in their kabuliyats, and the 9th of these, as stated by Harington (Vol. II, page 255), was "that implicit obedience be shown to all regulations which have been or may be prescribed by Government concerning the rents of the raiyats and the collections from undertenants and agents of every description, as well as from all other persons whatever."

4. The most important enactment passed in pursuance of these provisions is Act X of 1859, the substantive provisions of which, either in their original form or as re-enacted in Act VIII of 1869† (of the Bengal Council), still govern the relations of landlord and tenant in Bengal.

The effect of Act X of 1859 is admitted to have been on the whole beneficial; but on certain important points it cannot be considered a success. In particular, as will presently be explained at greater length, it placed the right of occupancy, which it recognized in the tenant, and the right to enhance rent, which it recognized in the landlord, on a most precarious footing. The result of this has been that, as usually happens with a law which is uncertain in its operation, it has added strength to the strong and further weakened those who were already weak. In Bihár, where the social and economical conditions of the country tend to give the landlords the upper hand, we hear of tenants rack-rented, subjected to *quasi*-feudal oppressions and arbitrarily ousted from their holdings; in Eastern Bengal, on the contrary, where circumstances favour the tenants, we hear of landlords who not only cannot obtain the enhancements of rent to which they are entitled, but at times, when tenants combine against them, cannot even recover what is admitted to be due at existing rates.

5. The difficulties connected with Act X of 1859 began to be felt at an early period. It received the assent of the Governor General on the 29th of April, 1859, and before the end of 1863 its amendment had been suggested by Sir Barnes Peacock, the Chief Justice of Bengal, and by the Revenue-authorities of the North-Western Provinces. Of late years, successive Lieutenant-Governors of Bengal have borne witness to the existence of chronic evils, which nothing short of comprehensive legislation could cure. In 1873, Sir George Campbell had no

* Harington II, pp. 191-92.

† Throughout this Statement Act X of 1859 only will be referred to. It will be understood that what is said regarding it applies equally to Act VIII of 1869.

doubt that the Government would be eventually compelled to deal with the whole question of the relations of landlords and raiyats in Bengal. In 1876, in the course of the debates on the Agrarian Disputes Act, a measure devised to meet the difficulties between landlords and tenants in Eastern Bengal, the Hon'ble Kristodás Pál, a representative of the zamíndárs, urged that the indefiniteness of the principles of Act X of 1859 had brought suits for the adjustment of rents to a dead-lock. Sir R. Temple concurred in the opinion that some principle for determining rates of rent should be fixed by legislation, and in August, 1876, proposed to introduce a Bill to define the principles on which the rights of occupancy-raiyats and tenure-holders should be fixed, to simplify the procedure for realizing arrears of rent in undisputed cases, to extend the definition of "occupancy-raiyat," and to render the interest of a raiyat of that class liable to sale for default in paying rent and transferable by private agreement.

These proposals had not, however, been fully considered when Sir R. Temple, early in 1877, made over charge of the Lieutenant-Governorship to Sir Ashley Eden; and it was then arranged that the larger amendment of the law should be deferred, and a Bill providing only for the realization of undisputed arrears introduced at once.

6. It was, however, found, when the Bill was introduced, that it was impracticable to limit its scope in this way. The discussion as to the transferability of the right of occupancy had materially advanced, and it had been recognized that the legislature would have to alter the law with reference to ejectment, distraint, instalments and deposits of rent, and possibly sub-letting. It began to be apparent that many of the proposed provisions would eventually prove to be intimately connected with other portions of the existing law not ostensibly affected by them; and in February, 1879, a majority of the Select Committee on the Bill recommended that the whole subject of a revision of the Rent Law should be once for all fairly faced. This proposal was supported by Sir Ashley Eden; and in April, 1879, the Government of India sanctioned the formation of a Commission to prepare a digest of the existing statute and case law, and to frame the draft of a consolidating Bill.

7. Meanwhile, a separate discussion had been proceeding with reference to the abuses already mentioned as prevailing in the relations between landlords and tenants in Bihár. As far back as the year 1868, Lord Lawrence, then Governor General, had recorded a minute relating to the depressed state of the peasantry in Bihár, in which he had said that he believed "that it would be necessary for the Government sooner or later to interfere and pass a law which should thoroughly protect the raiyat and make him—what he is now only in name—a free man, a cultivator with the right to cultivate the land he holds, provided he pays a fair rent for it." Again, in the years 1875 and 1876, when the condition of Bihár came under consideration, it was acknowledged that some remedies must be applied. Two years later, the Lieutenant-Governor appointed a committee of experienced Bihár officials to advise upon the matter; and on the 8th March, 1879, they submitted their report, proposing so many changes of the existing law that they did not consider that the requirements of the case would be properly met by a mere amending Bill. They were of opinion that the whole rent law should be recast.

8. Thus, two independent committees arrived simultaneously at the same conclusion, namely, that the time for a complete revision of the existing law had arrived.

The report of the Bihár committee was referred to the Rent Law Commission, which was appointed under the sanction referred to above (paragraph 6), and that Commission, on the 19th June, 1880, submitted its report with a draft Landlord and Tenant Bill, which, having been revised by the Government of Bengal, has furnished the basis of the present Bill.

9. Before proceeding to give the explanations usual in a statement of this description, it should be mentioned, first, that these explanations will, as far as possible, be confined to points on which it is proposed to alter the existing law, and secondly, that the Bill is no more than it purports to be, namely, a Bill to amend and consolidate existing enactments.

10. With reference to this latter remark, it will be observed that the Bill prepared by the Rent Commission was intended to be in some sense a code of the law relating to agricultural tenancies. It, in many instances, incorporated portions of the common law or case law which have not hitherto been embodied in any legislative enactment in this country. In this respect the present Bill does not follow that of the Rent Commission; but it must not be inferred from this that the views of the Government of India on the important subject of codification have undergone any change. It may be desirable, at some future time, to carry out the design of the Rent Commission in its integrity, and make the Bengal Tenancy Act a complete and self-contained statement of the whole law; but it has been considered that the work of codification is one to be undertaken at a season of leisure, and not at a time like the present, when those, who are responsible for the framing of our legislative measures, are absorbed in the consideration of important substantive amendments of particular portions of the existing law, and are consequently unable to devote to the law as a whole that amount of attention, which would be required in order to carry out the work of codification with any prospect of success.

In the following portions of this Statement the order of the Bill will, as far as possible, be adhered to.

CHAPTER I.—*Preliminary.*

11. The Bill, it will be observed (section 1), extends by its own vigour to the whole of the territories under the administration of the Lieutenant-Governor of Bengal, except the town of Calcutta, the Division of Orissa and the Scheduled Districts.

The Lieutenant-Governor is specially empowered by section 1 to extend the whole Bill, or any portion of it, to the Orissa Division, with the sanction of the Governor General in Council, and he can, with like sanction, extend the whole, or any portion of it, to any Scheduled District under the power conferred on him by the Scheduled Districts Act.

12. The classes of tenants, to which the provisions of the Bill apply, are (section 3 (8)) tenure-holders, raiyats, under-raiyats and persons having a certain interest in *bastu* land, which will be found explained further on under the head of Chapter VII.

13. The term "tenure-holder" as used in the Bill is defined (section 3 (3) and (4)) to include what are commonly known as undertenure-holders, that is to say, darpatnídárs, sepatní-dárs, darijaradárs and such like; and also tenants of the class hitherto known as raiyats at fixed rates. The inclusion of tenants of this latter class in the definition is convenient from the draftsman's point of view, but is, it is believed, otherwise of little importance, inasmuch as the incidents which are attached to their holdings place them to all practical intents and purposes on the same footing as tenure-holders.

14. The term "raiyat" has, following the Bill prepared by the Rent Law Commission, been limited to tenants holding land for purposes of agriculture, horticulture or pasture, or who have come into possession for such purposes, except where *bastu* or homestead land is included in a raiyat's agricultural holding, in which case it will be treated in the same way as the rest of the holding, and he will be deemed to hold it as a raiyat.

15. Except as just stated, no attempt has been made to define the terms "tenure-holder" and "raiyat," or to settle the distinction between these two classes of tenants.

The importance of this distinction for the purposes of the Bill has not been overlooked, nor has the possibility that cases may occur near the line of separation between the two classes, in which a doubt will arise as to whether the tenant is a tenure-holder or a raiyat; but it is believed that the distinction is generally well understood, and that, save in exceptional cases, no difficulty will arise. However this may be, no complete definition has as yet been suggested which would not be certain to give rise to difficulties greater than those which it is intended to remove.

16. Under-raiyat, as defined in the Bill, includes all tenants holding whether immediately or mediately below a raiyat.

17. Section 4, besides saving certain special laws which would, as a matter of course, be saved in a general enactment of this description, provides that nothing in the Bill "shall affect any custom or customary right not inconsistent with, or not expressly or by necessary implication modified or abolished by, its provisions."

A saving of this description is unavoidable in a measure which, as already observed, does not purport to be an exhaustive code, and its importance will be seen from the illustration appended, which shows that it will protect such rights as rights of occupancy enjoyed under a custom by under-raiyats, a class of tenants protected only to a limited extent by the Bill.

CHAPTER II.—*Of the distinction between khámár and raiyatí land.*

18. The second chapter of the Bill deals with the distinction between "khámár land," or the private land of the proprietor, and raiyatí land, or the land destined for occupation by raiyats. The importance of this distinction arises chiefly from the circumstance that raiyats occupying land of the latter class will, under the Bill, enjoy a much larger measure of protection than those occupying land of the former class. Bearing this in mind, and having regard to the efforts made by landlords in some parts of the country, under the existing law, to get into their own hands as large an amount of the raiyatí land as possible and convert it into khámár land, it has been thought necessary to make it clear by the definition that the existing stock of khamar land cannot hereafter be increased, and further to enact (section 6) that all land which is not khamar land shall be deemed to be raiyatí land, and that all land shall be presumed to be raiyatí land until the contrary is proved.

19. In Bihár, owing to the large extent of the khámár, or, as it is there termed, "zeraat", land, and the persistent efforts made by the landlords and their lessees to increase its extent, the question is one of cardinal importance; and there may be other exceptional tracts where the necessity of distinguishing clearly and finally between khámár and raiyatí land may prove to be pressing. To meet such cases, it is further thought necessary to provide (sections 7 to 13)

for making a complete survey and record of the existing khámár or zeraat, and thus preclude all possibility of future disputes on the point.

CHAPTER III.—*Of Tenure-holders generally.*

20. The alterations which it is proposed to make in the existing law regarding tenures, are not of great importance.

Section 14 converts the present raiyats at fixed rates into tenure-holders, but, as already explained (*supra*, paragraph 13), the change is unimportant.

21. Section 20, which saves to a landlord in a temporarily-settled tract a right to raise the rent of any tenure when a new settlement of the revenue is made, is new; but it may be defended as being in accordance with the views that prevail as to the relative position of the landlord, the tenant and the Government in such tracts. The Government has an undoubted right to raise its revenue on the occasion of a fresh settlement. Of this right no act of the landlord can deprive it; and accordingly, if the landlord were to be bound by a grant at fixed rates, made by him so as to extend beyond the term of the settlement, the result would be that, on the occasion of a new settlement, he might be exposed to the risk of having to pay an enhanced revenue without the possibility of recovering it from his tenant.

22. The Rent Commissioners observe that there are in the existing law no express provisions for the enhancement of the rents of tenures, and that the want of a definite enactment on the point has given rise to much expensive litigation. The sections of the Bill relating to this matter are based on those drafted by the Commissioners, and the grounds on which they rest will be best seen from the following extract from the Commissioners' report:—

"We have," they say, "provided for the enhancement of the rent of tenures and under-tenures, by enacting that, in any case in which such rent is liable to enhancement,—there are cases in which it is not so liable,—it may be enhanced up to the limit of the customary rate payable by persons holding similar tenures or undertenures in the vicinity, or, where no such customary rate exists, up to such limit as to the Court shall appear fair and equitable, but so that the profit of the tenure-holder or undertenure-holder shall not (in the absence of certain special circumstances, to be noticed hereafter) exceed thirty per centum of the balance which remains after deducting, from the gross rents payable to him, the expenses of collecting such rents. It may be observed that, according to the rule contained in section 8 of Regulation V of 1812, ten per cent. of the balance just mentioned was allowed to the tenure-holder. This section was repealed by Act X of 1859, but, by some oversight, no provision was substituted by this Act, though the principle, as being fair and equitable in itself, and usual by reason of the provisions of the Regulation, was, on several occasions, acted upon by the Courts after that Act was passed. It appears to a majority of us, after careful consideration, that the limit of *ten* per cent. is too low, and we have accordingly allowed a higher limit, namely, that of a maximum not exceeding *thirty* per cent. in ordinary cases.* We have provided for the special and well-known case of *jangálbari* holdings by enacting that, when more than one hundred bighás of land have been demised for reclamation purposes, more than half being at the time unreclaimed, and the whole having been subsequently reclaimed, the rent of the tenant may not be enhanced so as to leave him a profit of less than twenty per cent. of the net balance above-mentioned, and the Court may allow him such profit in excess of twenty per cent. as to it appears fair and equitable. In order to prevent these new provisions from working hardship by any sudden and great change, we have annexed the following checks:—(*a*) the enhanced rent shall not in any case be more than double the previous rent: (*b*) the Court may direct that the enhancement shall take effect gradually, or, in other words, that the rent shall increase yearly during any number of years not exceeding five, until the limit of the enhancement allowed has been reached: and (*c*) that rent once enhanced shall not be altered for ten years unless on account of alluvion or diluvion."

23. The only further points calling for notice in connection with these sections are, that it has been provided that the tenure-holder's profits shall never be less than 10 per cent. of the net balance, that the provision regarding jangalburi tenures has been made applicable to all such tenures irrespective of the area comprised in them, and that a clause has been added providing that, when a tenure-holder has made improvements other than those referred to by the Commissioners, the Court may allow him such amount, by way of profit, as it thinks fit, provided it be not less than 10 per cent.

* Mr. Justice Levinge mentions, in his Minute on Act X, a case in which *two-thirds* (he does not say, whether of the gross or net collections) were given to the landlord and the residue to the middleman. If the calculation was here made on the net collections, the collection expenses being at ten per cent., the middleman got 30 per cent., being $100-\frac{2}{3}(100-10)-10$.

24. In section 26, it is enacted that a permanent tenure-holder shall not be ejected by his landlord except under a decree of Court passed on the ground that he has broken a condition, on breach of which he is, under a written contract between him and his landlord, liable to be ejected.

25. The alterations which are made in the existing law by sections 27 to 35, relating to the registration in the landlord's serishta of transfers of, and successions to, permanent tenures, are (so far as they seem to call for notice) as follows :—

(*a*) A fee is made payable in respect of the registration of every succession and every transfer other than a transfer on a sale for arrears of rent.

(*b*) An application for the registration of a voluntary transfer or a succession may, instead of being made to the landlord, be made to a Revenue-officer, who will serve a notice on the landlord requiring him to register.

(*c*) Where a tenure is sold in execution of a decree other than a decree for arrears of rent, the Court will cause a notice to be served on the landlord requiring him to register the transfer.

(*d*) If a landlord refuses or neglects to register for one month after he is bound to do so, the persons interested may apply to the Civil Court to compel him to register.

(*e*) Similarly, if the party or parties concerned do not apply for registration within six months from the date of a voluntary transfer or a succession, the landlord may apply to have him or them compelled to allow the registration and pay the requisite fee.

(*f*) The landlord is required to give to the parties concerned copies of entries in his register; the first copy to be given free of charge, subsequent copies on payment.

(*g*) The Board of Revenue is empowered to make rules regulating registration.

26. The proposal of the Rent Commission to extend the registration system to occupancy-holdings has not been adopted, as it is feared that there would be great difficulty in bringing home to persons of the raiyat class the details of such a system.

CHAPTER IV.—*Of Patní Tenures.*

27. The law relating to patní tenures is left substantially unchanged. The various proposals which have been made for the amendment of the summary sale procedure have not been overlooked; but it is thought that, as they touch only matters of detail relating to an institution of a very special nature, they would be best considered at the Select Committee stage of the Bill, when it is hoped it may be found possible to simplify the form of the law very much without materially changing its substance. Meantime, the existing enactments have been thrown into Schedule III of the Act, and are made operative by section 42.

CHAPTER V.—*Of Raiyats with a Right of Occupancy.*

28. Chapter V, which treats of the acquisition of the occupancy-right and of the incidents generally of that right, is one of the most important chapters in the Bill.

It will be seen, from the papers that have been published in connection with this measure, that a controversy has arisen, and has been conducted on both sides with much ability and research, as to whether some such right as that which we usually term a right of occupancy did not originally belong, and ought not now to be recognized as belonging, to all raiyats in Bengal except those whose occupation of the land is of a merely transitory nature. It is unnecessary now to enter upon the merits of that question, inasmuch as, after a full consideration of the position, it has been determined that the legislation to be undertaken by the Government shall proceed on the assumption that the occupancy-right is to be recognized as appertaining only to such tenants as may be shown to be in some special sense settled or permanent. But the problem of defining the class of tenants in whom such a right should be recognized is, when limited by this assumption, one of considerable difficulty.

29. The conditions requisite to confer the status of the "khudkásht raiyat," so frequently referred to in our revenue enactments and records, may in earlier times, and especially when thoroughly organized village-communities prevailed, have been to a certain extent definite and ascertainable; but, in spite of all the learning and research which have been brought to bear, they are not now to be discovered. The probability is that they were always very vague; that, notwithstanding their vagueness, no difficulty arose so long as land was abundant, the pressure of the Government revenue heavy and the status of a privileged cultivator of little value; and that it was only with the progress of agriculture, the increase in the value of landed property and the consequent disputes regarding interests in land, that the need of some more precise definition came to be felt.

30. A definition framed under such circumstances would necessarily be to a great extent artificial, and in moulding its details there would necessarily be a good deal of room left for considerations of equity and expediency. We find accordingly, on referring to the proceedings connected with Act X of 1859, that those who framed that Act assumed a considerable latitude in settling the conditions on which the occupancy-status should be acquired. In the Bill

as read a first time, they proposed to confer on every "resident" raiyat a right of occupancy in the "land held by him," and they justified this on the ground that the word "khudkásht," as used in the Regulations, seemed to be synonymous with "resident"; but subsequently, it having been pointed out to them by the Revenue-authorities of the North-Western Provinces that "residence was not always a condition of occupancy," they adopted the rule embodied by them in the Act, namely, that twelve years' holding of the same land shall give a right of occupancy in that land. This rule, which was obviously to a large extent artificial, was copied by them from a similar rule which was issued by the North-Western Provinces Government, apparently as a mere executive suggestion to its officers, in the year 1836, as that "most consistent with the existing practice and recognized rights" in those provinces. The only feature common to the two rules is that of a raiyat in some sense permanent in, or settled in, the locality, and it would seem that the persons who framed those rules considered that as long as they maintained this feature, they were at liberty to define, in such manner as they might think equitable and expedient, the circumstances which should be taken to constitute the requisite degree of permanency or settlement. This is quite intelligible in the view above suggested, that, though the status of the khudkásht raiyat was still a recognized institution, the conditions requisite to establish it were so vague that they could not be described otherwise than as resting on a certain ill-defined degree of permanency in a particular locality.

31. Act X of 1859 is admitted to have done much towards improving the relations between landlord and tenant, but, in this particular matter of defining the conditions requisite to the establishment of a right of occupancy, it cannot be pronounced a success. It would be unjust to charge this want of success altogether against the Act itself. It has been held by the highest judicial authority that the provisions of the Act with respect to the establishment of the right of occupancy should be construed as cumulative and not as exhaustive or exclusive of all other modes of establishing that right; but, as a matter of fact, the Act has come to be regarded as a Code complete in itself, and as superseding all other modes of establishing the right. Its effect has consequently been to injure seriously the rights of the old established raiyats, by throwing upon them the burden of proving, not merely that they have held for twelve years in the village or estate, but further that they have so held in every one of the particular fields or plots, in respect of which they claim to have rights of occupancy, a burden which, it need hardly be said, it is impossible for them, in the absence of any trustworthy agricultural records, to discharge. And, as regards the acquisition of rights of occupancy by new comers,—a matter which is always regarded as absolutely necessary for the prosperity of the agriculturist class in this country,—it becomes almost impossible under a law which enables the landlord to prevent it by the simple device of shifting the tenant from one holding to another before the period of twelve years has run out.

32. It is unnecessary to state here the various remedies which have been proposed for these evils. They will be found described and discussed in paragraph 61 of the letter of the Government of India to the Secretary of State, No. 6, dated 4th March, 1882. It is enough to state the amendment of the law which the Government, after a very full discussion of the question, has resolved to propose. That amendment follows with certain modifications a suggestion of the Famine Commissioners, and consists in making the acquisition of the status of the khudkásht raiyat, or, as he is termed in the Bill, the "settled raiyat," depend not on the holding of one and the same plot of land for twelve years, but (section 45) on the holding of any raiyatí land (whether the same or not it does not matter) in the same village or estate for a period of twelve years whether before or after the passing of the Act. The raiyat may, by ceasing for one year to hold land as a raiyat in the village or estate (section 46), lose the status so acquired, but while it continues to adhere to him, he will, notwithstanding any contract to the contrary, be deemed to have acquired a right of occupancy in any raiyatí land held by him as a raiyat in the village or estate after the 2nd March, 1883, the date on which it is proposed to introduce the Bill. It should be added that, in order to obviate the effect which the minute partitions of estates, so common of late in certain parts of the country, would have in reducing the area in respect of which a settled raiyat of an estate would enjoy his status as such, it is in effect provided by section 43 that the estate shall, for the purposes of this portion of the Act, be taken to be the estate as it would have existed if no partition had taken place since the 1st of January, 1853.

33. It will be observed from the above that a right of occupancy is acquired by a settled raiyat holding raiyatí land "*notwithstanding any contract to the contrary.*" It is considered essential to carry the enactment to this extent. As observed by the Government of India in paragraph 85 of their letter No. 6 of the 21st March, 1882, "such is the power of the zamíndárs, so numerous and effective are the means possessed by most of them for inducing the raiyats to accept agreements which, if history, custom and expediency be regarded, are wrongful and contrary to good policy, that to uphold contracts in contravention of the main purpose of the Bill would be, in our belief, to condemn it to defeat and failure. It is absolutely necessary that such contracts should be disallowed, and in this conclusion we have the support not only of the Bengal Government but also of the almost unanimous opinions of the Bengal officers."

34. These provisions apply only to raiyatí land. The acquisition of a right of occupancy in the landlord's khamar land is, by section 49, kept on the same footing as under the existing law

35. It is only necessary to add, as regards the acquisition of the right, that it is provided by section 44 of the Bill that every raiyat, who immediately before the commencement of the Act has, by the operation of any enactment, by custom or otherwise, a right of occupancy in any land, shall, when the Act comes into force, become an occupancy-raiyat of that land for the purposes of the Act, and that (section 48) a right of occupancy may be acquired by a grant from he landlord.

36. As regards the probable effect of the new provisions regarding the acquisition of the right of occupancy, it should be stated that no great increase of the area at present subject to that right is looked for from them; indeed, if the statement which has been made by a high authority, that 90 per cent. of the raiyats in Bengal already have that right, is correct, any such increase would scarcely be possible; but what is hoped for is, first, that a stop may be put to the vigorous efforts, which are at present being made by landlords in some parts of the country, to withdraw land from the operation of the right by preventing the natural growth of a fresh occupancy-right in the place of an old right which has determined; and secondly, that, where occupancy-rights do as a matter of fact exist, the proof of their existence may be a matter of less difficulty than it is at present to the ignorant and helpless raiyat.

37. Section 50 states in general terms the more important incidents of the occupancy-right. They attach to the tenancy notwithstanding any contract between the landlord and raiyat, and are briefly as follows:—

(1) the raiyat may use the land in any manner which does not render it unfit for the purposes of the tenancy;

(2) he may make improvements on it as provided by the Bill;

(3) he must pay rent at fair and equitable rates as determined by the Bill;

(4) he cannot be ejected except under a decree passed for breach of certain conditions, or for using the land in such a way as to render it unfit for the purposes of the tenancy;

(5) he may sublet the land;

(6) his interest is to be transferable subject to certain rights reserved to the landlord; and

(7) his interest is to descend as if it were land.

38. Several of these incidents will be referred to at greater length in connection with the portions of the Bill specially relating to them. The sixth falls to be considered here, inasmuch as most of the remaining sections of the chapter are occupied with the rules regulating the rights reserved to the landlord when an occupancy-holding is transferred by sale, mortgage, gift or bequest.

The question whether the right of occupancy should be made by express enactment freely transferable everywhere, as it is at present held to be by custom throughout a very large portion of the area to which the Bill applies, has been most fully and carefully considered. It has to be looked at from two points of view, namely, first, from the point of view of the landlord, and secondly, in the interests of the tenant.

39. From the former point of view the question presents comparatively little difficulty. The landlord is concerned only to see that we do not allow an objectionable tenant to be forced on him against his will, and this we can readily guard against by giving him a right of pre-emption, or something equivalent thereto, in every case of transfer. It has accordingly been provided that, in cases of voluntary sale, gift or bequest, the landlord shall have a right to purchase at a price to be fixed by the Civil Court; that in the case of a sale in execution of a decree, when the landlord and any other person bid the same amount, the landlord shall have the right of pre-emption; and that, when an order is passed for foreclosing a mortgage of an occupancy-right, the landlord shall be allowed an opportunity of paying in the amount of the mortgage-debt and taking the place of the mortgagee. The only doubt that has been felt about these provisions is whether, in the case of a voluntary sale, the landlord should not be required, if he exercised his right of pre-emption, to pay the price at which the raiyat has actually agreed to sell the occupancy, right instead of a price to be fixed by the Court; but, on considering the difficulties, by which the right of pre-emption would be clogged in cases of collusion between the vendor and purchaser, and in cases in which a spiteful neighbour might be willing to pay an exorbitant sum for an occupancy-right with a view to harassing the landlord, it has been thought best to put the case of voluntary sale on the same footing as those of gift and bequest.

40. Looking at the question of transferability next from the point of view of the occupancy-raiyat's interest, the Local Government and the Government of India have come to the conclusion that, in the absence of evidence of any evil consequences which have already followed from such transfers, or which may be anticipated as likely to occur in the near future, it would be unwise to oppose the growth of the very strong tendency towards transferability, which the prevailing customs show to existin rights of this class in almost all parts of the country.

The existence of such a tendency indicates—what, indeed, is clear from other evidence—that those most concerned regard the quality of transferability as an important incident of the right; and it cannot be doubted that the enactment of a law absolutely forbidding transfer would, even if it saved existing customs, be regarded as a hardship. It may be added that, if the custom of transferability is so widely established as is stated by some very competent authorities, the operation of a law of this sort would be so limited as to be of but little importance.

41. That the powers of transferring and sub-letting which the Bill recognizes may in time lead to a state of things, in which the great bulk of the actual cultivators would be not occupancy-raiyats but under-raiyats with but little protection from the law, is indeed within the range of possibility; but, if such a state of things should ever arise, we may rest assured that the Government of the day will know how to deal with it. There is nothing in the present Bill which ought in any way to hamper them in doing so—nothing to affect the principle that, in an agricultural country like India, the great mass of the actual cultivators of the soil whoever they may be, and however they may have come into the possession of the land, must be protected by the law.

42. The only other provision of Chapter V which appears to call for notice here is that contained in section 56, and is to the effect that, where a landlord, by way of pre-emption under the foregoing sections or otherwise, acquires an occupancy-right in his own land, any tenant, who subsequently takes the land from him, shall have a right of occupancy in it, and if the rent of the land was previously payable in money, shall be entitled to hold it at a money-rent to be fixed under the Act. There is nothing in the Bill to prevent a landlord, so acquiring an occupancy-right in land, from keeping the land in his own hands and cultivating it by his servants or by hired labourers. All the section would enact is that, if he chooses to let it to a tenant, that tenant shall at once acquire an occupancy-right. This seems necessary in order to guard against the possibility of a landlord buying up on a great scale the occupancy-rights existing on his estate or tenure with a view to locating ordinary raiyats on the land. To a landlord, who buys an occupancy-right, as contemplated by the pre-emption sections of the Bill, merely with a view to excluding an intending purchaser whom he objects to have as his tenant, there would be no appreciable hardship in the restriction.

CHAPTER VI.—*Of the Rent payable by Occupancy-raiyats.*

43. Chapter VI is devoted to the important subject of the rents payable by occupancy-raiyats. In regard to this particular matter, as in regard to that of the acquisition of the right of occupancy, Act X of 1859, whether owing to its inherent defects or to the peculiar construction put upon it by the Courts it is unnecessary now to enquire, has not proved a success. Leaving out of consideration the matter of additions to the rent of a holding on account of an increase of its area, a matter which is relegated to a completely separate division of the present Bill, Act X of 1859 provided by its 17th section that the rent payable by an occupancy-raiyat should be liable to enhancement only where—

1st—its rate was below the prevailing rate payable by the same class of raiyats for land of a similar description and with similar advantages in places adjacent, or

2nd—the value of the produce or the productive powers of the land had been increased otherwise than by the agency or at the expense of the raiyat.

44. Having thus stated the cases in which the rent was to be liable to enhancement, the Act stopped, giving no indication, except such as might be gathered from the statement of those cases, as to the extent to which the Courts were to enhance the rent. In the first of the two cases, no difficulty would arise from this, as the intention of the Act in respect of that case was clear enough; but in the second of the two cases, the question as to the limit of enhancement gave rise to an important discussion, which was at length brought to a close in what is known as "the great rent case." The rule laid down in that case is commonly spoken of as "the rule of proportion," and is to the effect that the enhanced rent should bear to the previous rent the same ratio as the increased value of the produce or increased productive power bears to the value or productive power at the time the previous rent was fixed.

45. This rule, whatever may be said for it on theoretical grounds, has proved to be absolutely unworkable by the Courts in practice, inasmuch as it throws on them the necessity of undertaking elaborate and laborious inquiries into economical questions, with which they are altogether incompetent to deal, and which have reference not merely to the present time but also to past and possibly very remote times, for which no such evidence as could be acted on by a Court of justice is likely to be forthcoming. Moreover, it necessitates enquiries, which are of such a nature that they could with advantage be undertaken only generally, on a great scale, and once for all, being, instead of this, undertaken over and over again in a most imperfect and unsatisfactory manner in individual cases.

46. The result of this is that, though the right of the landlord to enhance is distinctly recognized by the law, and though definite rules are laid down for its enforcement, the law has become to a great extent a dead letter.

The most important object of the chapter we are now considering is, while guarding and limiting the right to enhance in certain respects, which will be presently noticed, to put it on such a footing that it will be readily enforceable in practice; and the chief means adopted for attaining this object is that of separating off the statistical and economical inquiries of a general nature, which have just been referred to, and providing for their being undertaken once for all on a large scale by Revenue-officers.

47. Passing from these preliminary observations to the details of Chapter VI of the Bill, it will be seen that section 60 provides that, except on account of an addition to the area of the holding by alluvion or otherwise, a money-rent payable by an occupancy-tenant shall not be enhanced except by a decree of a Civil Court under the Bill, or by a contract of the nature described in the foregoing section.

48. It is considered, for reasons similar to those stated above in paragraph 33, that it would be destructive of the objects of the Bill if occupancy-raiyats were left perfectly free to deprive themselves by their contracts of the right to hold at fair and equitable rates secured to them by the law. But, on the other hand, absolutely to prevent such contracts would, it is thought, involve too great an interference with the freedom of the parties. A middle course has accordingly been adopted in section 59, which provides that a money-rent payable by an occupancy-raiyat may be enhanced by a contract in writing, approved of and registered by a Revenue-officer appointed by the Local Government in this behalf, and which goes on in its second sub-section to enact that a Revenue-officer shall not approve or register such a contract until he has satisfied himself that it is fair and equitable, and that he shall be absolutely debarred from registering any contract, by which a raiyat engages to pay a rent more than six annas in the rupee higher than the existing rent, or more than one-fifth* of the estimated annual value of the gross produce of the land.

49. This 59th section, which, it will be remembered, relates only to the enhancement of the rents of existing tenancies, is supplemented in section 61 by a somewhat similar provision applicable to cases in which a settled raiyat comes in as a new tenant on land previously held by another tenant at a money-rent. Here, too, it is considered that the objects of the law might be defeated if the parties were left absolutely free to contract; and it is accordingly provided that a settled raiyat, taking land under the circumstances referred to, shall not be bound to pay for it a higher rent than that paid by the previous tenant, unless that higher rent has been fixed by a contract registered and approved as already described.

50. Turning now to the matter of enhancement by a decree of the Civil Court, the sub-divisions of Chapter VI which are marked B and C proceed on the assumption that there are, at least in some parts of the country, certain rates of rent generally recognized as the rates payable by occupancy-tenants for the various classes of land held by them. Where this is so, it would, it is presumed, be not very difficult for a Revenue-officer to ascertain those rates, and then, starting from them as a basis, and taking into account such changes in the productive powers of the soil and in the prices of produce as may have occurred since they were fixed, to prepare tables of the enhanced rates, which, subject to allowance in exceptional cases, might fairly and equitably be demanded by the landlord for each class of land under the existing conditions. The Revenue officer, it is thought, might further show in his tables the average gross produce of each class of land and its estimated value. Supposing this to be done, the Civil Courts would be relieved almost entirely of those economical and statistical enquiries, which at present are involved in enhancement-suits. They would accept the rates and produce-statistics shown in the tables as *primâ facie* correct for lands of the classes to which the tables referred, and might restrict themselves to considering the comparatively simple and limited questions as to whether the particular lands in question in the suit belonged to the class alleged, and whether there were any exceptional circumstances connected with them which would require the rent to be fixed at a different rate from that set down in the table.

51. It is, of course, well understood that there would be many parts of the country for nohich, owing to the non-existence of recognized rates of rent or to the great varieties of the soil, ta such tables could be prepared, and further that, even where it is possible to prepare such hables, their preparation must be a work of time. With a view to these considerations, the Bill ms been so drawn as to provide, first, in sub-division B of Chapter VI, for suits to enhance woney-rents where a table of rates has been prepared, and secondly, in sub-division C, for such suits where a table of rates has not been prepared.

52. It will be convenient, in explaining the details of these portions of the Bill, to begin with the latter set of provisions. The cases, in which a suit may be brought to enhance the money-

* See as to this limitation, para. 54 *infra*.

rent of an occupancy-holding situated in a tract, for which a table of rates has not been prepared, are stated in section 74. They will be found to be in the main the same as those provided for in the section of Act X of 1859 referred to in paragraph 43, the only difference of sufficient importance to call for notice here being, that, for the purpose of estimating the increase in the productive powers of the land or in prices, on which a right to enhance depends, the Court is not compelled, as under the present law, to look to the time at which the rent was fixed, but, when that time cannot be ascertained (as it frequently cannot), or when the productive power and the prices prevailing at that time are undiscoverable, may take, for the purposes of comparison, any other time which may appear to it fair and equitable.

53. Section 75, supplying the defect in Act X of 1859 referred to above (paragraph 44), fixes the limits up to which the Court is to enhance in cases, in which the enhancement is claimed on the ground of an increase in the productive powers of the land or of prices. It provides that, if the increase has been effected wholly by the agency or at the expense of the landlord, he shall be entitled to the whole benefit of it; that, if it has been effected partly by the agency or at the expense of the landlord and partly by the agency or at the expense of the tenant, the benefit shall be divided between them in such shares as, having regard to all the circumstances of the case, the Court thinks fair and equitable; and that, if it is not proved that the increase has been effected by the agency or at the expense either of the landlord or of the tenant, each of them shall be entitled to one-half the benefit: provided in this last case that the enhanced rent shall not bear to the previous rent a higher proportion than the increased productive powers or increased prices bear to the former productive powers or former prices, as the case may be. Thus the rule of proportion, instead of being, as it is at present, under the decision in the "great rent case," the measure of enhancement in all cases, will merely supply a maximum limit in one of the three cases dealt with by section 75; and, as it is not apprehended that landlords will often seek to press their rights of enhancement to the full extent, it seems unlikely that it will give rise to any considerable difficulty.

54. The only other rule relating to the limit of enhancement contained in section 75 is the concluding provision. that the enhanced rent shall not in any case exceed one-fifth of the estimated average annual value of the gross produce of the land in staple crops calculated at the price at which raiyats sell at harvest-time. This limit has been substituted for that of one-fourth originally proposed, as the present Lieutenant-Governor of Bengal considers that one-fourth of the value of the average crop would be too high a limit. It is to be understood, however, that the point is still under the consideration of the Government.

55. Coming next to the scheme for enhancement by means of a table of rates, it will be seen that section 62 empowers the Local Government to direct a Revenue-officer to prepare for any local area, with the aid of assessors, a table showing, for each class of land comprised in that area, the rate of rent fairly and equitably payable by occupancy-raiyats, the average gross produce of the land, and the average value of that produce. The land is to be classified (section 63 (*a*)) according to the nature of the soil, situation, means of irrigation and other like considerations, and section 64 enacts that, in fixing the rates for each class, regard is to be had—

(*a*) to the rates of rent ordinarily payable by occupancy-raiyats for land of that class at the time the table is prepared;

(*b*) to the value of the average gross produce of land of that class, and the cost of raising that produce, about the time those rates were fixed, or, where these matters cannot be ascertained for that time, about such other time as it may be fair and equitable to take for the purpose of comparison;

(*c*) to the value of the average gross produce and the cost of raising that produce at the time the table is prepared; and

(*d*) to the following rule, namely, that, where the rate of rent for any class of land is raised on account of an increase in the value of the produce, the new rate shall not bear to the old rate a higher proportion than the increased value of the produce bears to the former value.

The section concludes with a proviso, corresponding to that mentioned above in connection with section 75, limiting the enhanced rate of rent fixed for land of any class to one-fifth of the average gross produce of land of that class.

56. Sections 65 to 69 provide for a preliminary publication in the vernacular language of the table prepared by the Revenue-officer; for the consideration of objections urged against it by those interested; for the submission to the higher Revenue authorities, and by them to the Government, of the table, with a report setting forth the grounds of the Revenue-officer's decision on each point, and of all objections preferred; and for the further publication of the table when finally settled and approved of.

A table prepared under these provisions will remain in force for such period, not less

than ten years or more than thirty years, as the Local Government may direct, and while it remains in force it will (section 71) be conclusive evidence—

(*a*) that, except as provided by certain clauses to be presently referred to, the rates shown in it for each class of land are the fair and equitable rates payable for land of that class by occupancy-raiyats within the local area to which the table applies; and

(*b*) that the statistics of gross produce and value given in the table are correct.

58. Section 72 empowers the Local Government to charge the expenses connected with the preparation of a table for any local area to the raiyats and their landlords in that local area in such proportions as it thinks fit.

59. Section 73 contains the rules for the guidance of a Court in suits instituted to enhance the rent of an occupancy-raiyat in a local area, for which a table of rates has been prepared, and a glance at it will show what an important simplification of the work of the Court will be effected by the table. The general rule is that the Court shall enhance up to the rate shown in the table for the class of land in question, or, where maximum and minimum rates are shown for land of that class (as will occasionally be the case) to such rate, not higher than the maximum or lower than the minimum, as it thinks fit. It is only in certain exceptional cases that the Court will be required to go behind the rates. Those exceptional cases are of two classes.

60. The first class comprises cases, which may be described with sufficient accuracy for our present purpose as cases in which, owing to some improvement having been effected or having taken place in reference to the land since the commencement of the tenancy, the land has been raised from a lower to a higher class of the table. The rules laid down for cases of this class by the first clause of the proviso to section 73 closely follow the corresponding rules laid down in section 75 and referred to above, paragraph 53. They are to the effect that, if the improvement has been effected solely by the agency or at the expense of the raiyat, the rent shall be fixed as if the land belonged to the lower class; that if the improvement has been effected partly by the agency or at the expense of the landlord, and partly by the agency or at the expense of the raiyat, the rent shall be fixed at such rate intermediate between that of the higher class and that of the lower class as the Court, having regard to all the circumstances of the case, thinks fair and equitable; and that, if it is not proved that the improvement has been effected by the agency or at the expense either of the landlord or of the raiyat, the rent shall be fixed at a rate half-way between the rate of the higher and that of the lower class.

The effect of these rules will be best seen from the illustrations appended to section 73 of the Bill, which are as follows:—

Illustrations.

(*a*) The rates shown in the table for land of a certain description are—

When the land is irrigated from a well	Rs. 4	per acre.
When the land is not so irrigated	„ 2	„

The holdings of A, B, C and D, occupancy-raiyats, are composed of land of that description irrigated from wells constructed on these holdings respectively.

The well on A's holding is an ancient one, existing from a time anterior to the tenancy: that on B's holding has been constructed by the landlord since the commencement of the tenancy: that on C's holding has been constructed by the raiyat: that on D's holding has been constructed by the landlord and raiyat, each contributing some portion of the labour and materials. The rents of the holdings of A and B must be fixed at Rs. 4 per acre, that of C's holding at Rs. 2 per acre, that of D's holding at such rate intermediate between Rs. 2 and Rs. 4 as the Court thinks fair and equitable.

(*b*) The rates shown in the table for land of a certain description are as follows:—

When such land is irrigated from a branch of a river . . .	Rs. 4	per acre.
When such land is not so irrigated	„ 2	„

The holdings of E and F, occupancy-raiyats, are composed of land of that description, and were not irrigable until 40 years ago, when, owing to a change in the course of a neighbouring river, a new branch established itself contiguous to them. E has been in occupation of his holding 50 years, F only 30; the rent of E's holding must be fixed at Rs. 3, that of F's holding at Rs. 4.

61. The other class of exceptional cases in which the Court will have to go behind the rates is that referred to in the second clause of the proviso to section 73, where the raiyat proves that by contract, or by custom, or on some equitable ground, he is entitled to hold at a rate lower than that fixed by the table for land of the class to which his land belongs; and in cases of this class, the Court is required to fix the rent at the lower rate at which the raiyat proves that he is entitled to hold.

62. To complete this portion of the subject it is only necessary to add that all suits for enhancement, whether under a table of rates or otherwise, are by sections 76 to 78 of the Bill made subject to the three rules already referred to under the head of tenures, namely, that a rent shall not be enhanced so as to be more than double the previous rent; that the Court may

order the enhancement to take effect by degrees for any number of years not exceeding five; and that, when rent has been enhanced, it shall not be again enhanced for 10 years.

63. How far it will be possible to give effect to the provisions of this chapter regarding the preparation of a table of rates it would be difficult to predict. The members of the Rent Law Commission entertained hopes of those provisions being largely used, and they appear to have thought that, in some cases, if the rates were once settled by authority, landlords and tenants would soon be able to adjust their differences. On the other hand, the result of recent inquiries would seem to show that, in some parts of the country, the rates vary so much from holding to holding as to render the preparation of a table impossible or practically useless. It must, however, be pointed out that it will not follow that, because a table of rates has not been, or cannot be, prepared for a local area, the landlords of that area will necessarily be reduced to the ordinary procedure by civil suit. They will, in many cases, be able to invoke the aid of a Revenue-officer for the settlement of their rents under the provisions of Chapter XI, which will be noticed in their proper place.

64. Section 79 contains the provisions relating to the reduction of money-rents payable by occupancy-tenants. The cases, in which a claim for reduction is allowed are, with certain modifications in detail, which it is unnecessary to notice here, the same as under the existing law, that is to say, a reduction can be claimed only where there has been a decrease of productive power or of prices; and such cases are so rare that it has been thought unnecessary to lay down any elaborate rules for their treatment. Section 79 therefore simply provides that, when a case for reduction is made out, the Court may direct such reduction as it thinks fair and equitable.

65. The case of rents payable for pasture lands, which is provided for in section 80, is likewise one of no great practical importance, inasmuch as such lands are but rarely let to a tenant in this country. Accordingly, no provision for the reduction of rent has here been considered necessary, and it has been thought sufficient, as regards enhancement, to provide that a suit to enhance may be instituted on the ground that the rent is below the prevailing rate paid by raiyats of the same class for similar lands in the vicinity, or that, having regard to the increase of rent on arable land in the vicinity, an enhancement would be reasonable. In either of these cases, the Court is empowered to fix the rent at such rate as it thinks fair and equitable.

66. The next sub-division of the chapter relates to rents payable in kind or varying with the crop, and is of greater importance. Section 81 provides that, when the rent is of this nature, the following rules shall apply, namely :—

(*a*) notwithstanding any contract or custom to the contrary, the landlord shall not be entitled to recover, in respect of any portion of the holding on which staple crops (such as rice, wheat, and so forth) are grown, more than half the gross produce or its value; and

(*b*) the landlord shall not, except under a contract in writing, be entitled to recover, in respect of any portion of the holding, on which other crops are grown, any other description or any greater amount of rent than a sum equal to one-half of the estimated average value of the produce of that portion of the holding, supposing staple crops to be grown on it.

67. The only objection which it is apprehended might be taken to these provisions is that in some cases a landlord, whose rent is payable in kind, contributes in the shape of seed, labour or otherwise, towards the production of the crop, recovering the price of his assistance in the form of an additional rent, and that, in such cases, the limits which it is proposed to fix might be too low. To meet this, a sub-section has been added, providing that nothing in the section shall prevent a landlord recovering from the tenant the value of assistance so rendered. The result accordingly will be that, though the landlord can no longer include the value of such assistance in the rent, where, by so doing, he would bring the rent above the prescribed limit, he can recover the same amount under another name.

68. Section 82 provides for the commutation into fixed money-rents of rents payable in kind or consisting of the value of a certain share of the actual gross produce.

It provides that an occupancy-raiyat, paying such a rent may, notwithstanding any contract to the contrary, sue to have his rent commuted, and that the Court shall fix the money-rent at its discretion either—

(*a*) according to the prevailing money-rent payable by raiyats of the same class for similar land in the vicinity, or

(*b*) according to the average value of the rent actually received by the landlord during the preceding five years, subject, however, in this latter case, to a deduction of such

amount as the Court thinks reasonable, in consideration of the whole risk of cultivation being taken by the raiyat.

69. The remaining provisions of Chapter VI are merely of a supplementary or subsidiary nature. Section 83 provides for the preparation of price-lists, which, when published with the sanction of the Board of Revenue, will be deemed to be conclusive evidence in proceedings under Chapter VI, and will thus save the Courts a certain amount of work, for the performance of which they are but ill-suited.

Section 84 empowers the Board to make rules for the guidance of officers and (as regards certain matters) of Courts acting under Chapter VI, in particular for determining what crops are to be deemed staple crops for the purposes of the chapter.

CHAPTER VII.—*Of the Right of a settled Raiyat in Bastu Land.*

70. The Bill prepared by the Rent Commission contained elaborate provisions regarding the use of land for building purposes, which were justified at length in paragraphs 108—113 of their Report. It is unnecessary here to discuss those provisions on their merits. It is enough to say that the present measure is strictly confined to the amendment of the law regarding agricultural tenancies, and can properly deal with the holding of land for building purposes only where the holding of such land is in some sense ancillary to an agricultural tenancy, as *e.g.*, where an occupancy-raiyat has built himself a house in a village with a view to living near his agricultural holding. In such a case there is so close a connection between his house and his agricultural holding that it would in many cases be vain to protect him in the possession of the holding without, at the same time, protecting him in the possession of the house. Besides the inconvenience he might be put to in being ejected from his house and compelled to reside at a distance from his work, it is clear that, if he were left at the landlord's mercy as regards the house, he would be liable at any time to have pressure brought upon him in regard to the holding also, which he might be unable to resist.

71. When the site of the house is included in an occupancy-holding, the raiyat is sufficiently protected under Chapters V and VI, but, when it is a separate holding, some special provision seems necessary; and it is thought that the requirements of the case will be best met by enacting that every settled raiyat of a village or estate shall, notwithstanding any contract to the contrary, have a permanent heritable and transferable right in any *bastu* or other homestead land in that village or estate which is held by him as the site of a dwelling-house for himself and his family; that a person having such a right shall not be ejected except under a decree of the Civil Court for breach of a condition; that, if so ejected, he shall be entitled to compensation; and that his rent may be enhanced at intervals of ten years, so that it may be equal to the rent paid for similar lands in the neighbourhood, or, at the option of the landlord, so that it may be equal to five per centum of the market-value of the land.

CHAPTER VIII.—*Of Ordinary Raiyats.*

72. Chapter VIII deals with ordinary raiyats, that is to say (section 88) raiyats holding raiyatí land but not having a right of occupancy in respect of it. The principle on which this chapter is based is that, while it is desirable to interfere as little as possible between tenants of this class and their landlords, they should not be exposed to arbitrary rack-renting and eviction at the hands of their landlords, and, further, that the acquisition by them of the status of settled raiyat should in every reasonable way be promoted.

73. Section 89 accordingly provides that, subject to a certain maximum fixed for the rents of all raiyats and under-raiyats, which will be presently referred to, an ordinary raiyat shall pay such rent as may from time to time be fixed by agreement between him and his landlord; but, in order to check extravagant enhancements by the landlord, it is provided in the following sections that, if the landlord proposes an enhancement of the rent, to which the raiyat does not agree, the landlord shall not eject him without paying him, besides any amount that may be due to him as compensation for improvements under the provisions of the Bill, a further sum, by way of compensation for disturbance, equal to a certain multiple of the yearly increase of rent demanded. *Ten* times the increase is the amount provided for in the Bill as it stands; but it need hardly be said that a figure of this sort is, at this stage of a Bill, entered only tentatively and subject to future consideration. The object in view, it will be understood, is to fix a multiple of the increase high enough to deter the landlord from making an extravagant demand, but not so high that the raiyat would be induced by the prospect of obtaining it to refuse to accede to a reasonable enhancement.

74. The details of the procedure requisite to give effect to this important provision occupy the greater part of the chapter, but they are not such as to call for notice here. The only other provision of the chapter to which it seems necessary to refer is the rule in section 90

limiting the landlord's right to eject, and which is to the effect that a landlord shall not eject an ordinary raiyat except—

(*a*) for arrears of rent;

(*b*) on the ground that the raiyat has used the land in a manner, which renders it unfit for the purposes of the tenancy, or that he has broken some condition, on breach of which he is, under the terms of a written contract, liable to be ejected; or

(*c*) that he has refused to agree to an enhancement of rent on which the landlord insists.

It is in this last case that the provision as to compensation for disturbance will apply.

CHAPTER IX.—*Provisions regarding Rent applicable to several classes of Tenants.*

75. We now pass from the chapters dealing with particular classes of tenants to those dealing with matters common to several classes. Chapter IX, which is the first of these, contains most of the general provisions of the Bill regarding rent. It begins with a section (96) providing for such additions to, and deductions from, the rents of tenure-holders and occupancy-tenants as are made on account of an alteration in the area of the holding by alluvion or diluvion, by encroachment, eviction by title paramount to that of the landlord, and so forth. This section applies, in the case of a tenure-holder, only in the absence of a contract to the contrary, but, in the case of an occupancy-raiyat, it overrides any such contract.

76. In the case of land being added to the area of a holding, it provides that the amount added to the rent shall be calculated on the rates payable by occupancy-raiyats for land of a similar description, less a deduction, in the case of a tenure-holder, of thirty per cent. for profits, risk and cost of collection. This seems to be the fairest rule to apply in such a case, and it is, moreover, as observed by the Government of Bengal, in harmony with the law regulating additions to the Government revenue in alluvion cases.

77. On the other hand, in the case of a loss of a portion of an area, for the whole of which a single rent has been payable, the only equitable principle to adopt seems to be that the abatement from the rent should bear to the rent previously payable the same proportion as the yearly value of the land lost bears to the yearly value of the holding prior to the loss, and this is what sub-section (3) of section 96 enacts, adding, however, that, when the yearly value of the land lost cannot be satisfactorily proved, the abatement shall bear to the previous rent the same proportion as the area lost bears to the area of the holding prior to the loss.

78. Sections 97 to 99 give power to the Board of Revenue to fix the instalments in which rents are to be paid. The power is of little importance in the case of tenures, inasmuch as it can be exercised in respect of them only in the absence of any agreement or custom regulating the matter. In the case of raiyats' holdings, however, it is of considerable importance. Much of the harassment, to which the raiyats are subjected, is said to arise from the number of instalments in which their rents are payable, and, to remedy this, the Board is empowered, subject to certain reservations regarding agreements entered into and customs prevailing before the commencement of the Act, to fix the instalments, in which the rents of raiyats are to be payable, so that there may not be more than four in each year.

79. Section 100 requires every landlord to give to a tenant paying him rent a receipt, containing much fuller details than those prescribed by the existing law, and to keep a counterpart of every receipt so given. It also provides that, when a receipt does not contain the requisite particulars, it shall be deemed to be an acquittance in full up to date.

Section 101 requires every landlord to furnish to his tenant, for each agricultural year, a detailed statement of the account between them for that year, and to keep a counterpart of every statement so furnished.

Section 102, following the existing law regarding receipts, imposes penal damages for refusal or neglect to give receipts or furnish accounts, and further makes it an offence punishable with a fine, not exceeding fifty rupees, to neglect to keep a counterpart as required by the preceding sections.

It is believed that, if these provisions are fully enforced, much advantage will result to both parties. Not only will the tenants be supplied with proper evidence of the payments made by them and of the state of their accounts, but the landlords, if they keep their counterpart statements in a proper manner, will find them useful as evidence before the Courts.

80. Under the existing law, there is but one case, in which a tenant can deposit his rent in a public office, so that the deposit may operate as a payment to his landlord, namely, when he is prepared to declare solemnly that he has tendered the rent to his landlord, and that the landlord has refused to receive it.

It has been found that this declaration has become a mere form, and it is thought better to allow the tenant to deposit his rent whenever he has reason to believe that the landlord will not receive it and grant a receipt. It is also thought advisable that a tenant should be allowed to deposit his rent in two other cases, namely :—

(1) when it is payable to co-sharers jointly, and he is unable to obtain their joint receipt, and no person has been empowered to receive the rent on their behalf; and

(2) when the tenant entertains a *bonâ fide* doubt as to who is entitled to receive the rent.

81. This extension of the right to deposit rent necessitates our conferring on the officer empowered to receive deposits a certain discretion not allowed by the present law. He is accordingly given by section 104 a discretion to refuse the deposit, if he does not think the circumstances of the case warrant its being made, and he is further given by section 106 a discretion to pay away the deposit, if he thinks fit, to such one of several rival claimants as may seem to be entitled to it, but subject, of course, to the right of any person actually entitled to it to recover the amount from the person, to whom it is so paid. As regards this last point, however, it will be seen that the officer will have power to retain the deposit if he thinks fit, pending the decision of the Civil Court as to the person entitled to it; and this latter course is doubtless that which he would adopt in all cases in which there might be any reasonable doubt as to the person entitled.

82. The provisions, contained in sections 112 to 116, for the division or appraisement of a crop by a public officer in cases, where the rent is paid in kind or is the value of a certain share of the gross produce, and a dispute arises between the parties, are based on the proposals made for Bihár by the Bihár Committee and the Rent Law Commission; but they are made generally applicable, and their details are taken, for the most part, from enactments in force in Upper India, where rent is very commonly paid in kind or in appraisement of the crops. They enact that, if either party neglects to attend at the proper time for making the division or appraisement, or if there is a dispute regarding the division or appraisement, the Collector may, on application made to him, issue a commission to such person as he thinks fit, directing him to divide or appraise the crop, and may further direct him to associate with himself any other persons as assessors for this purpose. If, in a division made in this way, either party receives less than his proper share, he may, within three months from the date of the division, sue the other party to recover the value of the additional portion of the crop due to him, and, if he does not so sue, the division will be deemed to have been rightly made. When the case is one of appraisement, the commissioner is required to submit his appraisement in writing to the Collector, who shall, after such hearing and enquiry as he thinks necessary, pass an order either confirming or varying it, and that order will be final.

It will be seen that these provisions proceed upon the principle, already referred to in connection with the subject of enhancement, of entrusting to the Revenue authorities the duty of inquiring into, and adjusting, matters, which they are presumably more competent to deal with than the Civil Courts. It is, it will be observed, only the mechanical act of division and the mere framing of the estimate of the crops that, in the cases now in question, are to be entrusted to the Collector and the persons appointed by him, all questions of right being reserved for the Civil Court.

83. Section 117 provides that, if the landlord of any land, of which the rent is payable by division or appraisement of the crop, or any other person, interferes in any way, without the tenant's consent, with the cutting or harvesting of a crop, except by an application to the Collector, under the provisions just referred to, he shall be deemed to have committed criminal trespass within the meaning of the Penal Code. This is considered necessary in order to put a stop to the oppressive action of landlords in certain parts of the country, who are found to assume a power to prevent the cutting or harvesting of the crops, and to use it as an engine of extortion against their tenants.

84. Section 118, which applies only to Bihár, provides that all danabandi papers shall, within 15 days after the making of an appraisement, be filed in the Collector's office.

85. Section 119 provides that, notwithstanding any contract made after the 2nd March, 1883, the date on which it is proposed to introduce the Bill, a raiyat or under-raiyat shall not, in any case, be bound to pay a money-rent exceeding five-sixteenths of the estimated gross produce of his holding. The limit originally proposed was thirty-five per cent. It has now been lowered at the suggestion of the Lieutenant-Governor; but the figures must be regarded as merely provisional and subject to reconsideration.

86. Section 120 in effect enacts that contracts fixing rents shall, in temporarily-settled tracts hold good only until a fresh settlement is made. The reasons for this provision are similar to those stated above (paragraph 21) in connection with section 20.

87. Section 124 makes the rent of a transferable holding the first charge on that holding.

CHAPTER X.—*Other provisions applicable to several classes of Tenants.*

88. The question as to the right of a raiyat to make improvements, and to claim compensation therefor on ejectment will, if the proposal to make occupancy-rights freely saleable in execution

of a decree is adopted, be of less importance in Bengal than in some other parts of British India. The great mass of the raiyats having a right of occupancy, and not being liable to be ejected except under peculiar circumstances of rare occurrence, and the question of compensation adjusting itself when an occupancy-right is sold in execution of a decree, claims for compensation for improvements will be comparatively few. But the importance, from an economical point of view, of encouraging improvements is so great in this country, that special provision has been made for the matter to meet the case of ordinary raiyats, and such cases as may, from time to time, occur of occupancy-raiyats being ejected from their holdings.

The principle on which the sections of the Bill relating to this subject proceed is that that party to a tenancy whose interest in the land preponderates should have the preferential right to improve and take the full benefit of his improvements; but that, if the party having this preferential right is unable or unwilling to avail himself of it, it should be open to the other party to make an improvement and reap the benefit of it.

Section 127 accordingly confers upon an occupancy-raiyat the preferential right to improve, and provides (subject to one exception to be presently noticed) that, if he does not avail himself of this right and the landlord desires to have any improvement made, he may call upon the raiyat to make it, and that, if the raiyat does not within a reasonable time comply with the request, the landlord may make the improvement himself. Section 128 enacts what may be termed the inverse of these provisions for the case of the ordinary raiyat, that is to say, it gives the preferential right to the landlord, and allows the raiyat to improve only if the landlord, upon being requested by the raiyat to make an improvement, neglects to do so within a reasonable time.

89. There is however, as has been intimated, an exception made to these rules in the case of one sort of improvement, namely, a dwelling-house for the raiyat and his family. This, it is considered, is an improvement which every raiyat, an ordinary as well as an occupancy-raiyat, should be entitled to make; and it is further considered that it is not an improvement, which a landlord should be empowered to force on a raiyat against his will. As regards this improvement, accordingly, it is provided simply that any raiyat may make it; no right to make it, whether preferential or otherwise, being conferred on the landlord.

90. When a landlord makes an improvement under these sections, he will be entitled to reap the full benefit of it in the shape of an enhancement of the rent under the provisions of the Bill relating to that subject. When a raiyat makes an improvement under these sections, he will, if ejected, be entitled, under section 129 of the Bill, subject to certain exceptions which it is unnecessary to notice here, to receive compensation for it. An occupancy-raiyat will further, while he continues to hold, reap the full benefit of his improvements, inasmuch as his rent cannot, under Chapter VI, be enhanced on account of an improvement made by him. An ordinary raiyat under similar circumstances may possibly not be able, in all cases, to retain the full benefit of his improvements, but the check placed on the landlord by the provisions of Chapter VIII will, as a rule, amply protect him in the enjoyment of that benefit.

91. The only other provisions of the Bill, relating to improvements, which seem to call for notice here, are the last clause of section 129, which enacts that improvements made by a raiyat before the commencement of the Act shall be deemed to have been made in accordance with the Act (and therefore to give a claim to compensation), unless it is shown that the landlord forbade the raiyat to make them and was ready to make them himself, and section 132, which makes void all stipulations in contracts providing (*a*) that a landlord may prevent a raiyat from improving or eject him for improving, or (*b*) that a raiyat when ejected shall not be entitled to compensation for improvements.

92. In section 133, providing for the landlord's right to measure lands comprised within an estate or tenure the rents of which are payable to him, the existing law has been modified so as to give a landlord the right to measure all lands lying within the estate or tenure, whether rent-paying or not. As observed by the Government of Bengal, "a landlord has at present no right to measure lákhiráj, and a rent-free holder may, in virtue of a valid grant of ten bíghás, be holding double as much or more. The mere measuring by the landlord cannot harm him, as he could not be ousted from possession save through the Civil Court. But the landlord seems entitled to make a complete survey of his estate." (*Letter from Government of Bengal, No. 849T, dated 27th July, 1881, page 25.*)

93. The proviso to section 133 enacts that, when land has been measured under that section, it shall not again be measured for ten years without the written permission of the Collector. This seems but reasonable, a right to measure once in ten years being sufficient in all ordinary cases.

94. The only other provisions of this sub-division of the chapter, which deviate in any material respect from the existing law, are those of sections 137 and 138, relating to the standards of measurement. They adhere so closely to the corresponding provisions of the Bill prepared by the Rent Law Commission that the following extract from the Commission's Report (para. 140) will best explain them :—

"The length of the local standard pole, with which a measurement of land should be made, is a fertile subject of dispute and litigation. It is not uncommon for a land-

lord, to make a measurement of his lands with a pole of his own selection, the actual length of which must be a subject of doubt upon the evidence, while the raiyats concerned aver not only that the standard pole of the pargana is different, but that during the measurement a third pole has occasionally been substituted for that which the landlord claims to be the standard. In order to remedy these difficulties as far as possible, we have enacted that all measurements made by order of the Civil Court or Collector shall be made according to the Government measure of 14,400 square feet to one standard bíghá. It it be shown that the rights of the parties to the suit are regulated by any different local measure depending upon a pargana standard pole, the Government measure shall be converted into local measure for the purposes of the suit. In case of dispute as to the standard pole, the Collector shall, in any suit before himself, or in any suit before a Civil Court, on a reference made for this purpose by such Court, determine the proper length of such pole. We have followed the present law, as settled by the decisions, in enacting that an appeal shall lie from the Collector's decision to the District Judge, but that, if no such appeal be preferred, the decision of the Collector shall be final."

95. It is stated in Mr. Field's digest, section 12 (4), as the result of decided cases, that a raiyat's interest in the land determines when he ceases to cultivate the land and leaves the neighbourhood without arranging for the payment of the rent. Mr. Field observes that the cases leave the matter thus indefinite, and that, if the proposition is adopted by the legislature, it should be made more precise. Section 140 of the Bill, following this suggestion, provides that, when a tenant of a non-transferable holding leaves the holding uncultivated and the rent of it unpaid for a period of one year, he shall be deemed to have surrendered, except in cases in which, owing to an inundation or any other accident to the land beyond his control, it may have been impossible for him to cultivate.

96. Section 141, relating to the doctrine of merger, follows the corresponding provisions (sections 43 and 44) of the Bill prepared by the Rent Commissioners, who state in their Report that some such enactment is needed to settle the law in Bengal. It provides, subject to certain exceptions and qualifications which it is unnecessary to specify here, that, when, in the case of any tenancy, the interest of the landlord and that of the tenant become by transfer, succession or otherwise united in the same person, so as to be owned by him in the same right, the interest of the tenant shall, during the three months following, be presumed to be merged in that of the landlord, unless the person shows that he has not intended it to be so, and shall, after the expiration of the three months, be conclusively deemed to be so merged, unless, within the three months, the person has executed an instrument declaring his intention that a merger should not take place, and the instrument has been registered and published in a certain prescribed manner.

97. Sections 142 to 148, relating to the appointment of a manager on behalf of co-owners of an estate or tenure, are taken, with slight alterations in the drafting, from the Bill framed by the Rent Law Commission. Their history and the nature of the provisions they contain will be best seen by an extract from the Commission's report. After describing at some length (paragraph 134) the complications, litigation and even riots which arise when co-owners of an estate or tenure (or, as they are sometimes termed, coparceners) quarrel among themselves, and the grievous harassment, to which the tenants are exposed, in such cases, the report proceeds as follows:—

"135. The necessity of a remedy for this state of things was felt at an early period of British administration, and in 1812 it was enacted that, inasmuch as inconvenience to the public and injury to private rights had been experienced in certain cases from disputes subsisting among the proprietors of joint undivided estates, whenever sufficient cause shall be shown by the Revenue-authorities, or by any of the individuals holding an interest in such estates, for the interposition of the Courts of Judicature, it shall be competent to the Zila Judges to appoint a person duly qualified and under proper security to manage the estate; that is, to collect the rents and discharge the public revenue, and provide for the cultivation and future improvement of the estate (Regulation V of 1812, section 26). The Judge was also competent, upon the representation of the Revenue-authorities, or of any such person as aforesaid, to remove any manager so appointed (*ib.*, section 27). A subsequent Regulation (V of 1827) enacted that, when the Zilla Court thought it just and proper under the provision of that Regulation to provide for the administration or management of landed property, it should issue a precept to the Collector, directing him to hold the estate in attachment and appoint a person for the due care and management thereof, under good and adequate security for the faithful discharge of the trust in a sum proportionate to the extent thereof. The reference in Regulation V of 1827 to Regulation V of 1812 was repealed by Act XVI of 1874, so that it is not now competent to a District Judge to send a precept to the Collector directing him to provide for the management of an estate belonging to a joint undivided family. The fragment of Regulation V of 1812 which is still in force is incomplete, and in consequence almost inoperative.

"136. Such being the present state of the law, a majority of us have thought that this fragment might well be repealed and a complete set of effective provisions substituted

therefor. We have accordingly enacted that, when coparceners, who jointly own an estate, tenure or under-tenure, disagree as to the joint management thereof, and in consequence there has ensued, or is likely to ensue, (*a*) inconvenience to the public, (*b*) injury to private rights, the District Judge may, upon the application in case (*a*) of the Collector, and in case (*b*) of any one having an interest in such estate, tenure or under-tenure, direct a notice to be served upon the coparceners, calling upon them to show cause why they should not appoint a common manager. If the coparceners do not, within a month, show cause why they should not appoint a common manager, the District Judge may direct them to do so. If they fail to obey that direction, the District Judge may either appoint a manager, or direct that the estate, tenure or under-tenure be managed by the Court of Wards, if it is willing to undertake the charge. We have thought it advisable to give the coparceners an opportunity of appointing a manager of their own selecting, before the District Judge proceeds virtually to depose them. When the Court of Wards undertakes the charge, it will govern itself by the provisions of *the Court of Wards Act*, IX (B.C.) of 1879. It is discretionary with the Court of Wards to undertake the charge or not. A majority of us have thought it advisable to render this system of management possible, as there may be cases in which no other management will be available. Mr. O'Kinealy doubts if it is advisable to extend the exceptional jurisdiction of the Court of Wards and empower it to manage the estates of persons who happen to disagree amongst themselves. When the District Judge appoints a manager, he is empowered to settle his remuneration, and the manner of it, whether, that is to say, by a fixed salary or a percentage of the collections. He is also empowered to require reasonable security for the proper discharge of the duties of the office. The manager is authorized to exercise the same powers as the coparceners jointly might, but for his appointment, have exercised. He is required to keep regular accounts and to allow the coparceners to inspect and take copies of them. He may be removed upon the application of the Collector, or of any person interested in the estate, tenure or under-tenure. The District Judge may at any time direct that the management be restored to the coparceners, if he is satisfied that they will conduct it without inconvenience to the public or injury to private rights."

98. The only other section in this chapter which calls for notice is section 149, which enacts that no tenant shall be ejected from his holding except in execution of a decree.

CHAPTER XI.—*Of the Settlement of Rents by a Revenue-officer.*

99. It has been stated, in the remarks above made on Chapter VI, that it is apprehended that, in many parts of the country, the framing of a table of rates will be impossible. It should be added that, in many instances, the mere framing of a table of rates will not suffice to settle the disputes between landlords and tenants. In either case the only satisfactory remedy may be a settlement of individual rents by a Revenue-officer, conducted somewhat in the same manner as in a Government estate at present; and it is with a view to providing such a remedy that Chapter XI has been framed.

100. There is, however, one cardinal difference between the provisions of this chapter and those of the existing settlement law which should be noted at the outset. Under the existing settlement law, when a Settlement-officer has, after the most careful and protracted inquiry, settled the rents of an estate, and his proceedings have been scrutinized and checked by the superior Revenue-authorities, every individual rent fixed by him is liable to be called in question in the Civil Courts, and that not merely on the ground of error in respect of some matter, such as the status of a tenant or the validity of an alleged lease, falling most appropriately within the cognizance of a Civil Court, but also on the ground of an error in regard to the quality of the soil, the estimated amount of the produce, or some other such matter with which the Revenue-authorities, conducting their inquiries on a great scale, are far more competent to deal than any Civil Court trying a suit relating to a single holding can possibly be; in other words, an important portion of the work, after being done by those authorities, who are most competent to perform it, is liable to be pulled to pieces by another set of authorities, who are far less competent to perform it. The enormous amount of unnecessary expense, trouble and vexation, which this system entails on all concerned can be estimated from the fact, stated by the Board of Revenue in referring to a recent settlement, that out of 2,391 decisions in suits brought to contest the Settlement-officer's rates, 2,202 were absolutely adverse to the plaintiffs. An attempt has been made to avoid this in Chapter XI of the Bill by distinguishing, among the various questions which may arise in a settlement of rents, those which the Revenue-authorities are most competent to determine, and those which a Civil Court is most competent to determine, making the decision of the Revenue-authorities final on the former, and providing that the latter may ultimately be brought for decision before the Civil Court.

101. The procedure of this chapter, besides being available for the purpose of Government settlements, may be made applicable by the Local Government—

(*a*) when a large proportion of the tenants or of the landlords desires that it should be applied, and

(*b*) when a resort to it is likely to settle or avert a serious dispute, existing or likely to arise, between landlords and tenants generally.

It is applicable to tenants of any class, but would probably be made use of chiefly for settling the rents of occupancy-tenants.

102. When the rents to be settled are rents, which are subject to alteration by order of a Court, they will be *fixed* according to the principles embodied in the Bill, and so that they shall not exceed the maximum prescribed by the Bill in cases of enhancement. When, on the contrary, the rents are not of this description, they will be merely ascertained and recorded as rents are under Regulation VII of 1822.

103. The Revenue-officer, having settled the rents, will prepare a jamabandi, showing the status of each tenant, the land held by him, the name of his landlord, whether the rent has been fixed or ascertained, and the amount of the rent fixed or ascertained. This jamabandí will be published, and, after an opportunity for urging objections against it has been allowed, will be submitted to the higher Revenue-authorities with the objections and a report setting forth the grounds, on which the Revenue-officer has proceeded. If ultimately sanctioned by the Local Government, it will be again published, and will then continue in force for 10 years.

104. While it remains in force it will be conclusive (except as will be presently explained) as to the rents payable by those tenants, whose rents are shown in it as fixed. As regards rents shown in it merely as ascertained, and as regards all other matters contained in it, it will be merely presumed to be correct until the contrary is proved.

105. It will be observed that, in thus empowering a Revenue-officer to fix rents so as to bind the parties, we necessarily empower him to decide certain questions (as, *e. g.*, that of the status of a tenant) which more properly appertain to the jurisdiction of the Civil Courts and ought not to be finally decided by any other authority. It is not, however, intended that the Revenue-officer should finally decide such questions. He may, if he thinks fit, when such a question arises, abstain altogether from deciding it, and, under section 155, refer it to a Civil Court, or leave it to be raised before a Civil Court in a suit instituted by any party interested.

In most cases, he would probably decide the question on such evidence as might be readily available; but, whenever he takes this course, his decision will be liable to be challenged in a Civil Court under section 160, which provides that nothing contained in it shall prevent the rent fixed being called in question on the ground—

(*a*) that the tenancy does not exist, or that the tenant is not liable to pay rent, or

(*b*) that the tenant belongs to a class different from that to which he is shown in the jamabandi to belong, or

(*c*) that the land comprised in the tenancy is different from, or more or less than, that shown in the jamabandí, or

(*d*) that a rent different from that shown in the jamabandi has been fixed by contract.

It is believed that the above list exhausts all the matters, in regard to which a Civil Court may be regarded as a better tribunal than the Revenue-authorities, and, if this is so, the determinations of the Revenue-authorities in regard to all other matters may safely be made final and conclusive.

106. It only remains to add that, by section 163, the Local Government is empowered to charge the expenses of all proceedings, other than Government settlements, under this chapter to the landlords and tenants concerned, in such shares as it thinks fit.

CHAPTER XII.—*Of the Preparation of a Record-of-rights by a Revenue-officer.*

107. The provisions of Chapter XII are somewhat similar to those of Chapter XI, and have been introduced into the Bill with a similar object, but are more limited in their scope, inasmuch as the operations to be undertaken under them do not, like those under Chapter XI, embrace the *fixing* of rents, but are confined to the ascertaining and recording of existing rights and existing rates of rent. Moreover, as existing rights and existing rates of rent are matters the determination of which properly belongs to the Civil Courts, an entry in the record-of-rights prepared by a Revenue-officer under this chapter, is in every case merely to be presumed to be true until the contrary is proved.

108. The only other points calling for notice under this chapter are, first, that the Local Government may apply its provisions not only in the cases, in which it is empowered to apply those of Chapter XI, but also in any other case, in which the Governor General in Council may sanction their being applied, and secondly, that the provisions of this chapter being considered a sufficient substitute for those contained in Act VIII (B. C.) of 1869, sections 38-40, these latter are not reproduced in the present Bill.

CHAPTER XIII.—*Of the Recovery of Rents from Raiyats and Under-raiyats by distraining the produce of the Holding.*

109. This chapter may be said to be the result of a compromise. The Rent Commission, concurring with the Bihár Rent Committee, proposed to abolish the existing law of distraint as an offset of English law, of which the efficacy was impaired by the legislation of 1859, and which had been abused in Bihár and not always applied in a regular manner in other parts of the country. To this strong objections were urged, and the procedure provided by this chapter was then devised by the Government of Bengal, as being likely to secure to the landlords most of the advantages afforded by the existing law, without exposing their tenants to the evils now complained of.

110. The modified power of distraint, which it is now proposed to allow, can be used by any landlord of a raiyat or under-raiyat for the recovery of an arrear of rent, which has not been due for more than a year. It extends, as a rule, to all the produce of the holding, including what may have been grown by, and be the property of, a sub-lessee of the tenant, and it may be exercised though the produce has been stored, provided it has not passed out of the possession of the cultivator. The landlord cannot himself interfere with the produce to be distrained, but must apply to a Civil Court to distrain it. The Court, after a brief examination of the case, will depute an officer to distrain and sell the produce, and nothing will stay the sale except the payment into court of the amount of the demand. Any sum paid into court will be retained for one month, with a view to the possibility of the owner of the distrained property claiming compensation as for a wrongful distraint, and on the expiration of that period it will be paid to the landlord.

111. Sections 185 and 186 are directed against illegal distraint and interference with crops. Section 185 provides, in effect, that any person who, otherwise than in accordance with the provisions of the Bill, or some other enactment for the time being in force, distrains any produce of a tenant's holding, or interferes with the harvesting of a crop, shall be deemed to have committed criminal trespass within the meaning of the Penal Code; and section 186 imposes a penalty which may extend to three months' imprisonment, or two hundred rupees fine, upon any person who benefits by, or is interested in, the commission of an offence under section 185 if, having reason to believe that the offence was likely to be committed, he has not used all lawful means in his power to prevent its commission.

112. Section 187 empowers the Local Government to suspend in any local area, for such time as it thinks proper, the sections which entitle a landlord to distrain.

CHAPTER XIV.—*Special rules of procedure applicable to Suits between Landlord and Tenant.*

113. Sections 191 to 198 are intended to embody all those modifications of the ordinary procedure proposed by the Rent Commission and the Government of Bengal, which seem likely to expedite, in any material way, the disposal of suits between landlords and tenants.

Sections 191 to 197 apply to—

(*a*) suits for recovery of rent;
(*b*) suits for penalties claimable under any provision of the Bill; and
(*c*) suits to recover possession of land.

They provide that, in such suits, the summons shall, as a rule, be issued for the final disposal of the case; that the summons may be served by a registered letter; that no written statement shall be filed without the leave of the Court; that the provisions of the Code of Civil Procedure relating to interrogatories, discovery and affidavits shall not apply; that, whether an appeal lies or not, a simple memorandum of the substance of the evidence, such as is prescribed by the Code for unappealable cases, shall suffice; that, as a rule, execution may issue on the oral application of the decreeholder at the time the decree is passed; and that section 305 of the Code, which enables a judgment-debtor to obtain a suspension of an order made for the sale of his immoveable property, and sections 320 to 325C, which provide for the transfer of decrees to the Collector for execution, shall not apply.

114. A further simplification of the procedure is effected in suits for arrears of rent and for penalties (involving no question of title or of a right to enhance or vary rent) by taking away (section 198) the appeal in such cases from—

(*a*) a decree or order passed by a District Judge, Additional Judge or Subordinate Judge, where the amount claimed does not exceed Rs. 100; and

(*b*) a decree or order passed by any other judicial officer specially empowered by the Local Government, where the amount claimed does not exceed Rs. 50.

In so far as regards the class of cases marked (*a*), the Bill merely reproduces the existing law, with this difference, that it extends the rule to decrees and orders of Subordinate Judges, who, it is thought, may now safely be entrusted with final jurisdiction in cases of this class.

The extension of the provision to the class of cases marked (*b*) is based on a proposal of the Rent Law Commissioners supported by the Local Government. The Rent Commissioners would have fixed the limit of value in such cases at Rs. 10, but the Lieutenant-Governor, who must be regarded as the best judge of the qualifications of his officers, has recommended that it should be raised to Rs. 50, the limit fixed by the present Bill.

115. It will be observed that the final jurisdiction in this class of cases will be exercised only by specially selected officers, and that a power of revision is reserved to the District Judge by the proviso to the section.

116. Section 199 is completely new. It is intended for the benefit of a landlord in a suit for an arrear of rent, when, as sometimes happens, the defendant admits that the arrear is due, but pleads that it is due not to the plaintiff but to some rival claimant. In such a case, it seems only reasonable that the tenant should pay the amount of the rent into court; and the Bill accordingly provides that the Court shall refuse to take cognizance of his plea unless he does so.

117. It is hoped that, when the measure comes to be fully discussed, other expedients for simplifying the procedure in rent-suits may be discovered, but, with the exception of those above referred to, none have hitherto been suggested which the Government of India would be prepared to accept. As regards the possibility of devising any effectual procedure analogous to that on negotiable instruments under Chapter XXXIX of the Code of Civil Procedure, or any other form of summary or provisional remedy, the whole history of such remedies both in this country and elsewhere is against it.

A summary form of procedure can scarcely help a plaintiff unless his case is of the simplest description, admitting of being answered only in the simplest way, and he comes into court armed with documentary evidence of so reliable a character that the presumption against any defence being possible is extremely strong. In such cases the Court may very properly, and with great advantage to the plaintiff, be empowered to decline to hear the defendant, and to decide against him summarily and provisionally, unless he pays the amount of the claim into court or gives security for it. But what advantage could be hoped for from a procedure of this description in rent-suits in Bengal, which admit of the most varied and complicated defences, in which the evidence on both sides is usually of the most worthless character, and charges of forgery and perjury almost common forms in the pleadings? If the legislature consented to provide such a procedure for rent-suits, it would probably feel bound to surround it with so many safeguards that the plaintiff would gain nothing by adopting it; and, even if such safeguards were dispensed with in the Act, the Courts would naturally be so cautious about refusing leave to defend or requiring security from a penniless raiyat, that the so-called summary remedy would cease to be summary, and, like the summary suits of former days in some parts of India, become as lengthy and complicated as an ordinary suit, with the further disadvantage of not being final.

118. The truth would seem to be that facilities for recovering rents in Bengal should be sought for, not so much in novel forms of procedure as in a reliable record of tenancies and their incidents, and a simple mode of adjusting rents; in other words, by going to the root of the disputes which, though they may not always come to the surface, are believed to underlie a very large proportion of the contested rent-suits. If this view is correct, the provisions of the Bill regarding the preparation of tables of rates, settlement of rents and framing of records-of-rights, and those regarding receipts and accounts, may reasonably be expected to remove most of the difficulties of which the landlords now complain.

119. Section 200, following the Bill proposed by the Rent Law Commission, enacts that an application for the execution of a decree for arrears obtained by a landlord shall not be made by an assignee of the decree, unless the landlord's interest in the land has become vested in that assignee.

120. Section 202, relating to relief against forfeitures, is based on section 14 of the Conveyancing and Law of Property Act, 1881. It enacts that a suit for ejectment of a tenant, on the ground of his having forfeited his interest by breach of a condition, or the like, shall not be entertained unless the landlord has given the tenant an opportunity of paying compensation and remedying the breach when it admits of remedy, and that, when a decree is passed in such a suit, it shall not be executed until the defendant is allowed a similar opportunity of repairing or atoning for his wrongful act.

121. The Rent Law Commissioners observe that "there are in the existing law no provisions regarding the away-going crop, and, as a natural consequence, when a tenant is ejected while the crop is on the ground, the right to this crop is a constant source of dispute and litigation." Sections 203 and 204 of the Bill have been framed to meet such cases. They provide, in effect, that it shall be in the option of the landlord to purchase the crop from the raiyat at a valuation, or to allow him to retain possession of the land at a reasonable rent till he gathers the crop. Similarly, when the raiyat has prepared the land for sowing before the date on which he is ejected, section 203 provides that he shall be entitled to receive from the landlord the esti-

mated value of the labour and capital expended by him in preparing the land, together with reasonable interest on the same. These sections are, however, guarded by a proviso that a raiyat shall have no claim under them when, after the commencement of the ejectment-proceedings, he has cultivated or prepared the land contrary to local usage.

122. Sections 205 and 206 require the Court in all suits and proceedings for ejectment to inquire into and adjust all claims between the landlord and the tenant. This provision will, it is believed, be found useful as tending to prevent a multiplicity of suits.

123. The origin and object of section 207, which provides for the institution of suits to determine the status of a tenant or the incidents of a tenancy, will be best explained by an extract from the report of the Rent Commissioners. After referring to the provisions of the existing law regarding suits for pattás and kabuliyuts, they thus continue :—

"We have just observed that very little use has been made of these provisions by those for whose benefit they were intended. This observation was more particularly concerned with their use as a means of reducing to writing the conditions regulating the relation of landlord and tenant. There is, however, another purpose for which they might have been used, that is, as a means to obtain an authoritative settlement of some essential question connected with the tenancy and in dispute between the parties thereto; the rate of rent, for example, or the quantity of land held by the tenant. The landlord may contend that the raiyat holds twenty bíghás of land, while the raiyat declares that he has but fifteen. Year after year the contention is renewed The landlord threatens a measurement, which the raiyat, afraid of a venal *amín* and a varying pole, desires to avoid. A bribe to the *gomáshta*, or compliance with some petty cess, defers the final settlement of the question for a year: and the following year it arises again, perhaps deterring the raiyat from going to his landlord's *kachahrí* to pay his rent, lest he should be subjected to a demand, the justice of which he will not admit. Or, some fields in the raiyat's holding are by him maintained to be second class rice-land and assessable with the prevailing or usual rate for land of this class, whilst the landlord avers that they are first class rice-land and should pay a higher rent. At every rent-day the point is discussed; and in a country where any discussion is prone to beget a wrangle, seldom conducted with a seemly choice of expressions, an amount of irritation is kept up, which is not in harmony with the friendly relations which should exist between a landlord and his tenantry. It is very desirable that facility be afforded for the ready settlement of questions like these, which are constantly arising in this country, more specially in consequence of the absence of boundaries and fences, and the want of an exact survey upon an uniform standard. It might have been thought that the landlord in the first case could easily have the questions settled by tendering a pattá and demanding a kabuliyat for twenty bíghás; and the landlord, in the second case, by tendering a pattá and demanding a kabuliyat for the field, as first class rice-land: but if the land turned out to be nineteen and a half bíghás instead of twenty, or one of the fields was found to be of some middle class kind of land, the suit, according to the decision of the highest tribunal in India, must fail, and the parties be sent away, the real question in dispute unsettled, and their feelings roused and embittered by litigation.'

"Thus these provisions of the existing law have become ineffectual for the only purpose for which the people cared to use them, and for which they might have been beneficially used. While omitting what has been found useless in practice, we have endeavoured to supply the want thus indicated by experience. Section 151 of the draft Bill accordingly allows either landlord or tenant to sue for the determination of any such questions which may arise between them. A copy of the decree passed in the case will have all the effect of a pattá or kabuliyat upon the point which the parties themselves wish to have determined."

CHAPTER XV.—*Sale of transferable Holdings in execution of Decrees for Arrears due on them.*

124. The provisions of this chapter are made applicable to all transferable holdings, including such tenures as are transferable, occupancy-holdings, and bastu holdings under Chapter VII, and involve, in certain other respects, substantive changes in the existing law.

The most important of those changes will be best explained in the words of the Rent Commissioners, with whom it originated :—

"The object," they say, "of making sub-leases and incumbrances voidable upon the sale of a tenure for arrears of rent is, that the superior landlord's security for his rent may not be impaired. If the sub-leases and incumbrances of a tenure have not absorbed so much of the tenure-holder's profits as to render the interest left him insufficient to meet the rent which he pays to the proprietor of whom he holds his tenure; if the tenure, subject to these sub-leases and incumbrances, will sell for a sum sufficient to satisfy any decree that can be passed for arrears of the rent payable by the tenure-holder, it cannot be said that the proprietor-landlord's security for his rent has been impaired so far as to bring the case within the above object. The right of sub-letting and creating incumbrances belongs to every tenure-holder: such is the common law

of the country. So long as the landlord is certain of the rent to which he is entitled, he cannot justly complain of the exercise of this right, or claim to interfere with it. When, however, the exercise of the right extends so far as to endanger the landlord's rent, to impair the security for such rent afforded by the sale of the tenure by public auction, the case is altered, and the landlord may reasonably demand that these sub-leases and incumbrances be avoided, which have rendered the remaining interest of the tenure-holder an insufficient security for the rent payable by him.

"In this view of the matter, we have enacted that a tenure, under-tenure or occupancy-holding, about to be sold in execution of a decree for arrears of its own rent, shall first be put up to auction subject to certain incumbrances, and, if the sum bid is sufficient to liquidate the amount of the decree and costs, shall be sold subject to such incumbrances. If the highest amount bid is not sufficient to liquidate the decree, the decree-holder, that is, the landlord, may then claim to have the tenure, &c., sold free of incumbrances. Such sale is not to be had immediately, but upon a subsequent sale-day not less than fifteen or more than thirty days afterwards; and a notification of such tenure being about to be offered for sale free of incumbrances must be posted upon some conspicuous place upon the land of the tenure. The effect of these provisions will be that persons who hold sub-leases and incumbrances will not be endamaged if the bidding on the first sale-day reaches an amount sufficient to satisfy the decree and the tenure is in consequence sold subject to incumbrances. If, on the other hand, the bidding on the first sale-day does not reach an amount sufficient to satisfy the decree, such persons will have time to protect themselves from injury by paying in the amount of the decree (which they can subsequently recover from the defaulter), and so preventing such a sale of the tenure as will avoid incumbrances."

125. Among the objections to the scheme thus propounded by the Commissioners was one to the effect that it was unsuited to the case of occupancy-holdings. This objection is admitted by Mr. Reynolds and by the Government of Bengal to be as a rule well-founded, inasmuch as an ordinary-occupancy-holding is not likely to be saddled with incumbrances which should be respected at a sale. It appears, however, that there are, in some parts of the country, occupancy-holdings of large extent, the land of which is sub-let on such terms that the interest of the lessee is of considerable value. Under these circumstances, the proper course appears to be that proposed by the Government of Bengal, namely, that occupancy-holdings should as a rule be sold at once with power to annul all incumbrances, but that the Local Government should have power to direct that the occupancy-holdings in any local area should be in the first instance put up subject to incumbrances as if they were tenures; and it is on these lines that the present Bill is drawn.

126. The general outline of the chapter will be clear from what has been said, but there are certain details of sufficient importance to call for further explanation. In the first place, it should be stated that the word "incumbrance" is used throughout in a special sense. When it is said that a holding will be sold "free of incumbrances," or as the Bill puts it, "with power to avoid incumbrances," it is not meant that it will be discharged free of everything that might in the wide sense of the word be termed an "incumbrance."

The following interests, which might be termed incumbrances, will not be affected by any sale under this chapter:—

(*a*) a tenure existing from the time of the permanent settlement;

(*b*) a tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

(*c*) a tenure of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, plantations, tanks, canals, places of worship or burning or burying grounds have been made;

(*d*) a right of occupancy;

(*e*) a right conferred on an occupancy-tenant to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

(*f*) any right or interest which the landlord has expressly and in writing given the tenant permission to create.

The last three of these are protected in similar sales under the existing law, and the first three have been added, because such interests, being protected under a sale for arrears of revenue, would seem to be *à fortiori* entitled to protection under a sale for rent.

127. Again, when the Commissioners propose that the holding shall be put up in the first instance subject to incumbrances, they do not mean that it should be sold subject to all incumbrances, but only to such incumbrances as have been created by a registered instrument of which a copy has been served on the landlord. This limitation they considered necessary to prevent sham incumbrances being fraudulently set up after the sale.

128. The Bill has been drawn in accordance with these views, and accordingly, if it becomes law, the result will be—

(*a*) that the interests referred to in paragraph 126 will be protected in the case of all sales;

(*b*) that, in the case of sales subject to encumbrances, the protection will extend also to incumbrances created by registered instruments of which a copy has been served on the landlord; and

(*c*) that, except as stated in (*a*) and (*b*), the holding will be sold with power to avoid all liens, sub-tenancies, easements and other rights or interests created upon it by the tenant in limitation of his own interest.

129. An incumbrance will not become void *ipso facto* on a sale under this chapter. It must be annulled by a notice served on the incumbrancer through the Collector within one year after the purchaser first has knowledge of the incumbrance. It may be added that it is proposed, by separate legislation, to apply a similar rule to the case of sales for arrears of revenue.

130. When an order for the sale of a holding is passed under this chapter, nothing will stop the sale, unless the amount due is paid into court or the decree-holder acknowledges that his claim has been satisfied.

131. When any person, having in a holding advertized for sale under this chapter an interest which would be voidable upon the sale, pays into court the amount requisite to prevent the sale, he will, with a view to the recovery of his money, be placed by section 218 in the position of a mortgagee of the holding with a first charge and a right to possession. If he is an inferior tenant of the holding, he will have a further remedy under section 219 which entitles him to deduct the amount from his rent.

132. The only other provision of this chapter which need be mentioned is section 220, which permits the decree-holder to bid at the sale without the permission of the Court, and precludes the judgment-debtor from bidding.

CHAPTER XVI.—*Limitation.*

133. The only provision of this chapter calling for notice is section 225, under which disability will not be recognised as affecting the running of limitation in suits for the recovery of rent. This is in accordance with the recommendation of the Rent Law Commissioners.

"We think," they say, "that a minor ought not to be competent on coming of age to sue a raiyat for rent, which had accumulated during the whole period of his minority; that this kind of debt, which a poor man usually discharges year by year out of the produce of the year, ought not to be allowed to accumulate; and that, if the manager of a minor's estate neglects his duty of realizing rents as they fall due, the minor's remedy ought to be in an action for damages against such manager."

C. P. ILBERT.

The 2nd March, 1883.

D. FITZPATRICK,
Secy. to the Govt. of India.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 7, 1882.

Schedules of Estates under charge of the Administrator-General of Bengal,

PREPARED FROM 1ST JANUARY TO 30TH JUNE 1882, UNDER SECTION 44 OF ACT II OF 1874.

INDEX.

A.—SCHEDULE of all Administrations whereof the FINAL BALANCES have been PAID TO THE PERSONS ENTITLED to the same, specifying the amount of such BALANCES and the persons to whom paid, prepared from 1st January to 30th June 1882, under Section 44 of Act II of 1874.

B.—SCHEDULE of all Sums of Money, Bonds, and other Securities RECEIVED by the Administrator-General on account of ESTATES, NOT being HINDOO OR MAHOMEDAN, remaining under his charge, together with the PAYMENTS made thereout, and the BALANCES, prepared up to the 30th June 1882, under Section 44 of Act II of 1874.

C.—SCHEDULE of all Sums of Money, Bonds, and other Securities RECEIVED by the Administrator-General on account of HINDOO OR MAHOMEDAN ESTATES remaining under his charge, together with the PAYMENTS made thereout and the BALANCES, prepared up to the 30th June 1882, under Section 32 of Act II of 1874.

D.—SCHEDULE of BALANCES in the hands of the Administrator-General on the 30th June 1882, set apart to meet the ADMITTED CLAIMS of CREDITORS against the Estates therein mentioned.

SCHEDULE A of all administrations, whereof the final balances have been paid to the persons entitled to the same, specifying the amount of such balances and the persons to whom paid, prepared from 1st January to 30th June 1882, under section 44 of Act II of 1874.

ANNUAL REPORT ON THE EMPLOYMENT OF NATIVES AS ENGINE-DRIVERS AND SHUNTERS ON THE STATE RAILWAYS IN BENGAL DURING 1882.

No. 1023RE.

Dated Calcutta, the 28th February 1883.

READ—

Government of Bengal, Public Works Department, Railway, No. 243T—RE, dated 29th June 1882.

Government of India, Public Works Department, Railway, No. 625RE, dated 11th September 1882.

Read also—

No. 32E of 8th January 1883, from Manager, Northern Bengal State Railway.

No. 118E of 9th January 1883, from Manager, Calcutta and South-Eastern and Nalhati State Railways.

No. 562 of 20th January 1883, from Manager, Tirhoot and Patna-Gya State Railways.

OBSERVATIONS.—In Resolution No. 243T—RE of the 29th June 1882, noted above, it was stated—"Every effort should therefore be made to induce natives of a fairly good social standing to join the Locomotive Department of the State Railways in this province, with a view to their eventually becoming drivers; and as none should be chosen who cannot read and write, an incentive should be given by granting higher pay to those who are proficient in that respect. Night schools should also be started wherever practicable, and they will receive the cordial support of Government."

2. The reports for the year 1882 shew that some progress has been made in the employment of native drivers on the railways under the orders of this Government.

Northern Bengal State Railway.—Comparing the years 1881 to 1883, the following are the numbers of native drivers, shunters, and assistant shunters employed :—

			1881.	1882.	1883.
Drivers	...	...	3	5	7
Shunters	...	...	1	7	9
Assistant shunters	...	...	7	1	1

The number of men thus employed has increased from 11 in 1881 to 17 in 1883, the rates of salary per month being for shunters Rs. 14 to Rs. 22, and for drivers Rs. 22 to Rs. 38. These men are at first engaged as cleaners and khalassees and are promoted to firemen as vacancies occur; inducements are also held out to them to attend the night school established at Saidpore. When they have had sufficient experience in firing they are promoted to assistant shunters, shunters and drivers, provided they pass an examination in reading and writing, in the rules of the service, and in the technical management of an engine. The Locomotive Superintendent reports that all the men now employed are regular in attendance and careful in the performance of their duties. The attendance at the night school is not so satisfactory as was expected, but steps are being taken to make it more regular in future.

Tirhoot and Patna-Gya State Railways.—Two drivers, three shunters, and one assistant shunter were employed during 1882, against four shunters in 1881. Thus the number of men employed has increased from four in 1881 to six in 1882. The rate of pay averages from Rs. 15 to Rs. 25 for shunters, and Rs. 25 to Rs. 40 for drivers. No proper system had been adopted for training these men, but arrangements have now been made to start a night school at Somastipore, the head-quarters of the Assistant Locomotive Superintendent of the Railway. Natives are at first employed as cleaners and khalassees and promoted to firemen, and when they have passed a satisfactory examination in reading, writing, and technical knowledge of an engine, and have proved themselves fit for promotion, they are promoted to shunters and drivers. The Assistant Locomotive Superintendent reports that they have worked very well and with but few accidents, the chief fault being that they burn excess of coal; steps have, however, been taken to rectify this as far as possible.

Calcutta and South-Eastern and Nalhati State Railways.—All the drivers on these lines are natives, and there are now seven so employed, the rates paid being Rs. 20 to Rs. 40 a month. They are at first tried as firemen, and when they have had sufficient experience in firing they are promoted to shunters and afterwards to drivers, provided they can pass an examination in reading and writing and in the technical management of an engine. The Locomotive Superintendent reports that all these men are working in a fairly satisfactory manner.

RESOLUTION.—The progress made in the employment of native drivers and shunters is considered on the whole satisfactory, the real difficulty still is to obtain men with the necessary qualifications, and to overcome the aversion the men have to attend the night schools provided for them. As a further inducement in this direction, a system of granting prizes for regular attendance at the schools should be introduced. Experience has shewn that, while the employment of native drivers results in a large saving in wages, they are more wasteful of fuel than Europeans, and they have yet to shew that in positions of danger their judgment and presence of mind will stand them in good stead; it is therefore still considered premature to employ them on fast mail trains. They should, however, be employed to the fullest extent on goods trains, and the Lieutenant-Governor trusts that the officers in charge of lines will not relax their efforts to see that this order is carried into effect.

ORDER.—Ordered that copy of this Resolution be forwarded to the Secretary to the Government of India, Public Works Department, for information; also to the Managers of the Northern Bengal, Tirhoot, and the Calcutta and South-Eastern and Nalhati State Railways, for information and guidance.

Ordered also that this Resolution be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

H. C. LEVINGE,

Secretary to the Govt. of Bengal,
P. W. Dept.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 3rd March 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan, Mar. 3 '83	0·9	Weather—hotter. Sugarcane and *rubbee* crops being cut. Public health indifferent.
	Cutwa ...	0·02	
2	Bankoora, „ 3 „	0·14	Weather—fine, with passing clouds. Sugar or *gur* is being manufactured all over the district. Cotton, wheat and gram doing well. General health improving.
	Bishenpore ...	0·49	
	Maliara ...	0·12	
	Khatra ...	0·17	
3	Beerbhoom. „ 3 „	0·01	Weather—seasonable. Cold-weather crops being harvested. Sugar manufacture going on. Price of rice has risen. Public health good.
4	Midnapore „ 3 „	0·52	Weather—cloudy and sometimes foggy at morning. Prospects of *rubbee* crops bettered by the rain generally. Cholera reported from Khorar in the Ghattal sub-division. Public health good in other parts of the district.
	Contai ...	4·73	
	Tumlook .	2·00	
	Ghattal ...	0·80	
5	Hooghly, „ 3 „	0·66	Weather—cloudy and foggy throughout the week. Rain will injure mango crop. Outturn of sugarcane good. A few cases of cholera reported. Public health otherwise good.
	Howrah „ 5 „	2·02*	Unusually heavy rain for the time of year; mornings still cool. Agricultural reports favourable.
	Oolooberia ...	3·38	
	Central Districts.		
PRESIDENCY DIVN. 6	24-Pergunnahs, Mar. 5 „	2·18*	Weather—cool and cloudy, with occasional showers of rain. *Rubbee* crops being gathered, and sugarcane pressed. Public health good.
7	Nuddea, „ 3 „	0·78	Weather—getting warm. Slight clouds with occasional rain. Some of the winter crops are being harvested. Prospects of spring crops favourable. Fever decreasing. Cholera reported in a few places.
	Kooshtea ...	0·04	
	Meherpore ..	0·07	
	Chooadanga ...	0·01	
	Bongong ..	1·30	
8	Khoolna, „ 3 „	2·10	Weather—cloudy, with occasional drizzling. State and prospects of standing crops improved by late rain, which will also enable cultivators to prepare lands for *aus* crop and sugarcane Public health continues to be good.
9	Jessore, „ 3 „	0·72	Weather—cloudy and warmer. Harvesting of winter crops nearly finished. Spring sowings going on. General health good.
	Magura ..	0·07	
	Narail ...	0·72	
10	Moorshedabad, „ 3 „	0·02	Weather—warm and cloudy at times Winter crops continue to be satisfactory. They are being cut in some places. *Boro* rice cultivation going on, and land being prepared for *bhadoi* rice. A few cases of small-pox reported in some places, and cholera still lingers in thana Shahanagore.
RAJSHAHYE AND COOCH BEHAR DIVN. 11	Dinagepore, Mar. 2 '83	0·03	Weather—cloudy at intervals. Pulses doing well. Sugarcane still being cut. Transplanting of *boro* paddy still continues Rice selling at from 20 to 28 seers per rupee.
12	Rajshahye, „ 3 „	0·03	Weather—cloudy and slight showers in parts of district. Ploughing now being vigorously carried on. Outturn of spring crops fair.
13	Rungpore „ 2 „	0·08	Weather—yet uncertain and at times cloudy. Prospects of tobacco, wheat, *kaon*, and *cheena* good. Early rice being sown in some places. Public health good.
14	Bogra, „ 3 „	0·16	A couple of showers made the weather quite cold for a few days. Crops doing fairly well. Public health generally good. Cholera and chicken-pox reported from Bogra thana, and a few cases of fever from Sharinkandi and Panchbibi thanas.
15	Pubna, „ 3 „	0·12	Slight rain all over district. Mornings misty. Weather continues cool. State of crops good.
16	Darjeeling, „ 3 „	Slight rain.	Weather—fine in early part of week. Cloudy during the last few days. Wheat and barley coming on well. Prospects good.
17	Julpigoree, „ 3 „	0·12	Weather—clear at the beginning of week. Cloudy towards the end, with generally a strong wind during the day. Land being ploughed for *bhadoi* paddy. Standing crops doing well.
	Cooch Behar. „ 2 „	0·02	Weather—warmer. Cloudy towards end of week. Prospects of all crops continue good. Cattle-disease appears prevalent in Dinhatta. Public health good.
	Eastern Districts.		
DACCA DIVN. 18	Dacca Mar. 3 '83	0·19	Weather—growing warm. Sugarcane-pressing in full progress. Harvesting of mustard-seed continues. Prospects of other standing crops good.
	Manickgunge ...	0·01	
	Munshigunge ...	0·16	
19	Furreedpore, „ 3 „	1·83	Weather—cloudy. Copious showers of rain on 1st and 2nd. *Aus* and *til* being sown. Rain has done good to standing crops. General health good.
	Goalundo ...	1·16	
	Madaripore ...	0·54	
20	Backergunge. „ 1 „	1·70	Weather—cooler than last week. Cloudy and rainy occasionally. Outturn of *amun* rice good. General health good.
21	Mymensingh. „ 2 „	0·35	Weather—cloudy and warm. Slight rain fell on 25th and 26th ultimo. State and prospects of crops good. Public health generally good. A few cases of small-pox reported from Jamalpore.
	Jamalpore ...	0·15	
	Kishoregunge ...	0·04	
	Atten ...	0·08	
	Netrokona ...	0·60	

* For week ending 3rd instant.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—*concld.*			
Eastern Districts—concld.			
CHITTAGONG DIVN. 22	Chittagong, Mar. 6 '83	6·22	Heavy rain on 3rd instant, with storm damaging spring crops. Prices steady. Cow-pox still continues. A few cases of cattle-disease reported.
23	Noakholly, " 1 "	1·41	Weather—cool again owing to rain during latter part of week. Cloudy still at times Late rain has done much good to winter crops which now look promising. It has also rendered the fields fit for ploughing.
24	Tipperah, " 2 "	0·42*	Weather—showery and changeful. Heavy rain this morning (2nd). State and prospects of crops good.
	Chandpore ..	0·30	
25	Chittagong Hill Tracts. Feb. 27 "	0·55	Weather—changeable. Rain on 26th February. *Jhums* nearly all cut. Sugarcane still being cut. Tobacco doing well.
	Hill Tipperah. " 28 "	Nil	Weather—gradually getting warm. Prospects of chillies and tobacco good. No other important crop on the field Public health good.
BEHAR.			
PATNA DIVN. 26	Patna, Mar. 3 '83	Nil	Weather—cloudy, with west wind during the day. Prospects of *rubbee* crops continue good with the exception of poppy. Pressing of sugarcane going on. Public health good.
27	Gya, " 3 "	Nil	Weather—pleasent. Thrashing of paddy almost finished. *Rubbee* crops good. Wheat being cut. General health good.
28	Shahabad, " 3 "	0·07	Weather—hot in the day and cloudy at intervals. Harvesting of peas nearly over, and that of early *rubbee* has commenced. Cloudy weather has slightly injured prospects of *rubbee* crops. Chicken-pox reported Sasseram town.
29	Durbhunga, " 3 "	Nil	Weather—cloudy. *Rubbee* crops are being harvested. Prices almost stationary. Public health good
30	Mozufferpore, " 3 "	Nil	Weather—fine and cloudy alternately. *Rubbee* ready for reaping, and harvesting commenced in some places. Slight injury done to standing crops by late rain. Fever still reported from Seetamurhee and elsewhe e; otherwise public health good.
	Seetamurhee ...	0·23	
31	Sarun, " 3 "	Nil	Weather—cool and occasionally cloudy. Mustard and peas being harvested. Pressing of sugarcane going on. Prospects of other *rubbee* crops continue favourable. *Cheena* being grown on poppy lands. Sporadic cases of small-pox reported; general health otherwise good.
	Sewan ...	0·05	
32	Chumparun, " 3 "	Nil	Weather—cloudy. Westerly wind blowing. Prospects of all crops, with the exception of poppy, continue favourable. Public health generally good.
BHAGULPORE DIVN. 33	Monghyr. Mar. 3 '83	Nil	Weather—dull and cloudy. In Beguserai sub-division prospects of *rubbee* continue good; in Jamui they are not favourable; in Sudder sub-division recent rain has slightly damaged the crops; but on the whole prospects favourable. Public health good.
34	Bhagulpore, " 3 "	Nil	Weather—cloudy and unsettled Warm in day, but still cold at night. Prospects good. *Rubbee* harvest has commenced in places. Lands are being prepared for early sowings of paddy.
35	Purneah, " 3 "	0·02	Weather—cloudy, with cold westerly wind for last three days. Prospects of crops good. Health good.
36	Maldah, " 3 "	0·11	Weather—clear and cool and occasionally cloudy. Cold season is being pleasantly protracted. Mornings and evenings still continue very cool, but heat in the day is steadily increasing. Prospects of standing crops fair. Prices of food-grains stationary. The rain has injured the mango-blossoms, but prospects of the mango-season still continue fair. Public health good.
37	Sonthal Perghs. " 3 "	Nil	A slight rainfall brought another return of cold weather. *Rubbee* crops doing well. Public health good.
	Deoghur ...	0·34	
ORISSA.			
ORISSA DIVN. 38	Cuttack, Mar. 2 '83	0·18	Weather—hot, but sometimes cloudy. *Sarad* rice being thrashed. *Dalua* rice and wheat promising. Sugarcane being pressed. Price of rice unchanged Public health generally good. Cholera reported to have appeared in some places of the Kendrapara sub-division.
39	Pooree, " 1 "	0·19	Weather—hot and cloudy. Miscellaneous crops doing well. Ploughing going on. Common rice selling at from 30 to 39 Calcutta seers per rupee. Cholera still reported.
	Khoorda ...	0·40	
40	Balasore, " 2 "	4·37	Weather—cloudy and damp. *Rubbee* crops still being reaped. Sugarcane being cultivated. Small-pox and cholera reported at places.
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh, Mar. 2 '83	Nil	Weather—seasonable. Wheat, barley and other crops are being cut in places. Fever and small-pox cases still prevalent in certain thanas. General health good.
42	Lohardugga, " 3 "	0·10	Weather—cloudy towards the end of week. More rain wanted for springs ploughing *Rubbee* harvest progressing; outturn good. Prices stationary. Public health fair, but cattle-disease still increasing in Palamow.
43	Singbhoom, " 2 "	0·10	Weather—cloudy and hot. Cold-weather crops doing well. Small-pox continue in the district, but has much decreased.
44	Manbhoom, " 3 "	0·17	Weather—getting gradually warmer. Sugarcane-pressing continues. Wheat and other dry-weather crops getting on well. Mango and *mohwa* trees blossoming. Small-pox reported from Roghunathpore and Baghmoondee chicken-pox and cattle-disease from Purulia.

The total fall from 1st January to 3rd March 1883	2·16
The average fall of the corresponding period for 24 years, S. G. Office	1·78

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, t thunder, ⊂ lightning, p passing temporary showers, K thunderstorm, ≡ fog, ⌓ dew.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

Dated 6th March 1883.

C. W. Odling,
Asst. Secy. to the Govt. of Bengal, P. W. D.

Report on the Fluctuations in Traffic on the Northern Bengal State Railway for the month of January 1883.

GENERAL REMARKS.

Although, as will be seen on reference to the comparative statement at foot, there has been a falling off during the month under one or two heads noteably food-grain, salt, and all other goods, the total weight lifted for the period shews an increase over last January's traffic of 1,01,731 maunds or 21·69 per cent.

INCREASES.

Gunny-bags ... ... Mds. 24,316

In spite of a dull market at the port despatches are keeping up, and there is every appearance of this continuing for some time to come.

Jute ... ... Mds. 94,608

In the beginning of the month a very unlooked for and sudden cessation in despatches of this staple occurred, and it was not till the middle of the month that a reaction took place. This was due to an advance of 1 to 2 annas in the Calcutta quotation, and led to large quantities being offered for carriage, but too late to make the month's working a bumper one.

Piece-goods ... ... Mds. 2,826

Increased despatches may be soon be looked for to meet the spring demands.

Railway material ... ... Mds. 51,572

This increase is principally made up of Locomotive, coal and rails, &c. for the Dinagepore extension.

Tea ... ... Mds. 6,424

Although the end of the season, it is satisfactory to note that forward despatches are much in excess of last year's deliveries.

DECREASES.

Ale ... ... Mds 519

The despatches for the depôt at Darjeeling have not yet commenced, and this will account for this decrease.

Food-grain ... ... Mds. 7,526

The remarks made in the last report will explain this steady falling off, but there is every appearance of a revival of this traffic, a demand has sprung up for the hill districts which it is hoped will be lasting.

Ginger ... ... Mds. 35

There is little or nothing of this article now cultivated owing, it is said, to cultivators preferring the more paying crop of jute.

Salt ... ... Mds. 12,732

This decrease appears to be a mere trade fluctuation, and will no doubt be met by a corresponding increase next month.

Sugar ... ... Mds. 457

This is entirely for local consumption and is subject to trade fluctuations.

Tobacco ... ... Mds. 1,054

This decrease is expected, as it is the end of the tobacco season.

All other goods ... ... Mds. 55,692

The very large increased weight carried under this head for the past six months will account for this decrease.

Statement shewing the Increases and Decreases in Maundage of Staples carried over the Line during the month of January 1883.

Details of increases and decreases in the passenger traffic at stations are given below :—

Coaching Traffic during four weeks and last 8 days ending 31st December 1882.

Stations.	No.	Rs.	Remarks.
Increases.			
Calcutta	500	4,500	Upwards local passenger.
Howrah	18,800	20	Special train to Hathras Road for H. H. Maharaja of Tipperah.
Serampore	4,000	800	3rd class passengers to Patna, Bankipore, and Benares.
Hooghly	4,800	3,500	Up-country passengers.
Raneegunge	4,600	4,700	Passengers from Juggeruath pilgrimage.
Baidyanath	2,300	900	Gya passengers
Patna City	6,500	5,200	Passengers returning from Sonepore Fair.
Bankipore	4,700	14,900	Sonepore Fair and horse traffic.
Dinapore	1,000	2,500	Troops, special, and horse carriage and dogs to Howrah.
Cawnpore	3,100	.....	Reduction of 3rd class fares.
Shikohabad	2,700	2,800	Buttesur Fair.
Aligarh	1,700	200	Government treasures to Agra Fort and foreign line pilgrims.
Allahabad	3,800	.....	Extra troops to Meerut and reduction of 3rd class fares.
Luckieserai	2,400	2,000	Up and down 3rd class passengers.
Barh Ghât	200	3,100	Nepal General's special and reserved accommodation for the Maharaja of Durbhunga.
Arrah	3,300	1,300	Coolly emigrants and 3rd class passengers to Howrah.
Doemraon	2,600	2,000	3rd class passengers.
Mirzapore	2,000	500	Pilgrims and traders.
Bhagulpore	1,600	.....	Reduction of 3rd class fares.
Mokameh	1,700	2,300	Re-booking passengers to Howrah.
Buxar	2,800	800	Raja of Munda halted here, and then re-booked to his destination, and 3rd class passengers to Howrah and Bhagulpore.
Etawah	1,300	400	Troops and parcels to Meerut Cantonment.
Fatehpur	1,800	400	Up and down passengers.
Seoraphuli	2,700	500	3rd class passengers.
Konnagar	2,400	700	Ditto to Bankipore and Gya and local passengers.
Baidyabati	3,700	600	Ditto.
Bhuddressur	1,800	400	Ditto.
Pundooah	1,900	300	Ditto.
Boinchee	2,100	500	Up and down ditto.
Memari	2,200	200	3rd class passengers to Howrah and Burdwan.
Jamalpur	2,400	500	Ditto up and down passengers.
Asansole	1,700	900	3rd class passengers.
Jamooee	1,400	1,200	Ditto to Howrah.
Futwah	800	1,000	Ditto.
Raghunathpur	1,200	900	Ditto.
Chunar	3,300	1,000	Ditto to Howrah, Mirzapore and Benares and Annocote Fair.
Manhar	1,200	600	3rd class long distance passengers.
Delhi Shadera	3,200	100	
Total Increase ...	110,800	62,220	

DECREASES.

Cawnpore	.....	700	Reduction of 3rd class fares.
Allahabad	.....	1,000	Ditto.
Bhagulpore	.....	700	Ditto.
Benares	100	5,300	Eclipse of the moon and ditto.
Jubbulpore	1,000	7,600	Mecca pilgrims.
Agra Fort	600	30,400	Extra troops, Viceroy's special and his body-guards.
Delhi	500	5,800	Magh Mēla and 3rd class passengers to Cawnpore, Benares and Allahabad.
Total Decrease ...	2,200	51,500	

NET INCREASE.

No.	Rs.
108,600	10,720

In the goods traffic there is a decrease of 10 per cent. chiefly attributable to the decline of the export trade in wheat and cotton.

The principal staples in which fluctuations appear are as follow:—

INCREASES.

Coal, downwards.
Gunny.
Seeds.
Roots.
Salt.

DECREASES.

Coal, upwards.
Cotton.
Government Commissariat stores.
Rice.
Wheat.
Other grain.
Pulses.
Jaggree.
Railway material (Foreign).
Sugar.

REMARKS.

Increases.

Coal, downwards ... ... Mds. 4,07,370 Rs. 58,570

The increase is attributable to the improved condition of the coal market in Calcutta leading to a brisk demand.

Gunny ... ... Mds. 16,540 Rs. 15,710

Larger despatches than usual this month.

Roots ... ... Mds. 18,090 Rs. 11,220

Consisted of potatoes booked from Patna, Bankipore, and D'napore principally for the Calcutta market.

Salt ... ... Mds 50,340 Rs. 11,540

The largest increase is in Liverpool salt despatched from Howrah.

Seeds ... ... Mds. 1,27,610 Rs. 40,900

The increase is chiefly in mustard, poppy, linseed, and teel seeds.

Decreases.

Coal, upwards ... ... Mds. 93,810 Rs. 67,710

This falling off is observable at Giridih.

Cotton ... ... Mds. 42,600 Rs. 97,690

Prices were low in Calcutta and business is said to have been at a stand-still.

Government Commissariat stores ... . Mds. 11,010 Rs. 16,960

There was a large increase in 1881 over the previous year.

Rice ... ... Mds. 27,770 Rs. 53,950

The Calcutta market does not appear to have been brisk during the period.

Wheat ... ... Mds. 4,73,700 Rs. 1,95,180

This is a serious loss to the revenue, but it arises from cau es beyond our control.

Other grains ... ... Mds. 2,26,040 Rs. 70,860

The traffic this year has been nominal.

Pulses ... ... Mds. 86,940 Rs. 13,340

There has been a large falling off from last year's figures.

	Mds.	Rs.
Jaggree	65,720	16,540
Sugar	46,150	28,800

There appears to have been an unusually large demand in Rajputana and the Central Provinces during December 1881, as supplies were greatly in excess during that period over both 1880 and 1882.

Railway material, Foreign ... ... Mds. 18,160 Rs 10,530

Materials were going up from Howrah to Benares for the Ganges bridge and to Barh Ghât for the extension of the Tirhoot State Railway, and despatches this year were limited

The train mileage for the period has been, excluding maintenance and locomotive coal train mileage—

	Coaching.	Goods.	Total.
1882	3,41,015	5,75,506	9,16,521
1881	2,50,819	5,57,938	8,08,757
Increase	90,196	17,568	1,07,764
Decrease	...	...	...

Earnings per train mile, excluding materials carried on maintenance and revenue account—

	Coaching	Goods.	Total
	Rs. A. P.	Rs. A. P.	Rs. A. P.
1882	3 9 11	5 10 4	4 14 3
1881	4 12 7	6 8 1	5 15 7
Increase	.....	.....	.....
Decrease	1 2 8	0 13 9	1 1 4

Shunting mileage increase, hours 1,382. Particulars annexed.

EAST INDIAN RAILWAY.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 1228A.

GENERAL.—*The 7th March* 1883.—Mr. G. Toynbee, C.S., reported his departure from India, on leave, on the 23rd February 1883.

The 8th March 1883.—Mr. J. C. Price, Magistrate and Collector, Chumparun, has been granted by Her Majesty's Secretary of State for India an extension of furlough for eight months.

The 9th March 1883.—Mr. G. A. Grierson, Assistant Magistrate and Collector and Munsif, is appointed to act in the first grade of Joint Magistrates and Deputy Collectors, in the district of Durbhunga, with effect from the afternoon of the 5th instant.

Mr. R. Carstairs, Assistant Magistrate and Collector and Munsif, is appointed to act, until further orders, in the first grade of Joint Magistrates and Deputy Collectors, and is posted to the district of the 24-Pergunnahs, with effect from the date on which he joined.

The order of the 9th July 1880, granting two months' medical leave to Mr. J. C. Lloyd, Sub-Deputy Collector, Hooghly, is cancelled.

Baboo Bonomali Pramanick, Temporary Sub-Deputy Collector, Satkhira, Khoolna, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from the date on which he may avail himself of it.

Baboo Bhuban Mohan Gupta is appointed to act as Sub-Deputy Collector, Satkhira, Khoolna, during the absence, on leave, of Baboo Bonomali Pramanick, or until further orders.

The 12th March 1883.—Baboo Haradhun Ghose, Tehsildar, Khondmals, Cuttack, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code.

Baboo Nadiar Chand Dutt, Temporary Sub-Deputy Collector, on land registration work, Balasore, is appointed to act as Tehsildar, Khondmals, Cuttack, during the absence, on leave, of Baboo Haradhun Ghose, or until further orders.

In supersession of the order of the 16th January 1883, Baboo Umesh Chunder Batabyal, Deputy Magistrate and Deputy Collector, Tumlook, Midnapore, is allowed leave for one month and fifteen days, under Section 71, Chapter V of the Civil Leave Code, with effect from the 13th April next, or any subsequent date on which he may avail himself of it.

Baboo Gour Das Bysack, Deputy Magistrate and Deputy Collector, Midnapore, is appointed to have charge of the Tumlook sub-division of that district, during the absence, on leave, of Baboo Umesh Chunder Batabyal, or until further orders.

Mr. J. U. Cockburn, Officiating Deputy Magistrate and Deputy Collector, Pubna, is allowed leave for six weeks, under Rule 2, Section 136, Chapter X of the Civil Leave Code, with effect from the 15th instant.

Baboo Kalipuddo Mookerjee, Deputy Magistrate and Deputy Collector, Rajshahye, is transferred to Pubna, and is posted to the sudder station of that district, during the absence, on leave, of Mr. J. U. Cockburn, or until further orders.

Baboo Gobind Mohun Ghose, Deputy Magistrate and Deputy Collector, Gya, is transferred to Chumparun, and is posted to the sudder station of that district.

The services of Mr. W. Macpherson, Officiating Additional District and Sessions Judge, 24-Pergunnahs and Hooghly, are placed at the disposal of the Government of India, in the Home Department.

The services of Baboo Tarini Kumar Ghose, Deputy Magistrate and Deputy Collector, Nuddea, are placed temporarily at the disposal of the Board of Revenue for employment on land registration work in Calcutta.

Mr. H. S. Beadon, Magistrate and Collector, Balasore, is allowed furlough for eighteen months, under Section 49, Chapter V of the Civil Leave Code, with effect from the 4th May next.

Mr. A. C. Tute, Officiating Joint Magistrate and Deputy Collector, Dinagepore, is appointed to act, until further orders, as Magistrate and Collector of that district, with effect from the afternoon of the 2nd instant.

This cancels the order of the 13th ultimo, appointing Mr. J. C. Price to act as Magistrate and Collector of Dinagepore.

The 13th March 1883.—The order of the 6th instant, granting furlough for one year to Baboo Hurro Kali Mookerjee, Deputy Magistrate and Deputy Collector, Khoolna, is cancelled.

Baboo Gossain Das Dutt, Deputy Magistrate and Deputy Collector, Kissengunge, Purneah, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from the date on which he may be relieved.

Baboo Komalnath Ghose, Deputy Magistrate and Deputy Collector, Pooree, on leave, is transferred to the district of Purneah, and is appointed to have charge of the Kissengunge division of that district, during the absence, on leave, of Baboo Gossain Das Dutt, or until further orders.

Baboo Anund Chunder Sen, Deputy Magistrate and Deputy Collector, Backergunge, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from the 15th April next.

Baboo Shama Churn Mitter, Deputy Magistrate and Deputy Collector, Fenny, Noakholly, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from such date as he may be relieved.

Baboo Satya Taran Mookerjee, Temporary Sub-Deputy Collector, Hazaribagh, is allowed leave for two months and twenty days, under Section 136, Rule 2, Chapter X of the Civil Leave Code, with effect from the date on which he may be relieved.

Baboo Doorga Churn Ghose, Sub-Deputy Collector, Kutubdia, Chittagong, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from the date on which he may avail himself of it.

Baboo Grish Chunder Dass is appointed to act as Sub-Deputy Collector in the Chittagong Division, and is posted to Kutubdia, during the absence, on leave, of Baboo Doorga Churn Ghose, or until further orders.

Baboo Bemola Churn Bhuttacharjee, Deputy Magistrate and Deputy Collector, Hooghly, is transferred to Pubna, and is posted to the sudder station of that district.

This cancels the order of the 27th ultimo, transferring Deputy Magistrate and Deputy Collector Baboo Koomud Nath Mookerjee to Pubna.

POLICE.—*The 12th March* 1883.—Colonel W. T. Fagan, Deputy Inspector-General of Police, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code, with effect from the 16th April next, or from such subsequent date as he may be relieved.

REGISTRATION.—*The 12th March* 1883.—Baboo Dwarka Nath Sen, Rural Sub-Registrar of Syedpore, in the district of Furreedpore, is transferred to Madaripore, in the same district. The Sub-Divisional Officer of Madaripore will cease to have charge of the Sub-Registry Office at that place from the date on which he is relieved by Baboo Dwarka Nath Sen.

ECCLESIASTICAL.—*The 13th March* 1883.—The Revd. W. J. Burdett, Chaplain of Bankipore, is appointed to officiate as Chaplain of Dinapore, in addition to his own duties, with effect from the date on which he received charge of the chaplaincy.

EDUCATION.—*The 13th March* 1883.—Baboo Kedar Nath Biswas, Temporary Deputy Magistrate and Deputy Collector, Pooree, is appointed to be a member of the District School Committee of that district, *vice* Baboo Komalnath Ghose, transferred.

Mr. R. H. Greaves, Joint Magistrate and Deputy Collector, is appointed to be Secretary to the District School Committee of Shahabad.

MARINE.—*The 13th March* 1883.—Lieutenant A. W. Stiffe, Port Officer, Calcutta, is allowed furlough for one year, under Section 49, Chapter V of the Civil Leave Code, with effect from the 1st April next.

MEDICAL.—*The 10th March* 1883.—Dr. R. A. Barker, Civil Medical Officer, Sonthal Pergunnahs, is allowed leave for 15 days, under Section 71, Chapter V of the Civil Leave Code, with effect from the 20th instant.

The 12th March 1883.—Surgeon J. Moorhead, Civil Surgeon, Mymensingh, is allowed leave for 30 days, under Section 71, Chapter V of the Civil Leave Code, with effect from the 29th instant, or such subsequent date as he may avail himself of it.

Assistant Surgeon Sonatun Bysack, attached to the Mymensingh Dispensary, is appointed to have temporary medical charge of the civil station of Mymensingh, during the absence, on leave, of Surgeon J. Moorhead, or until further orders.

MUNICIPAL.—*The 9th March* 1883.—Baboo Kailash Chundra Sarkar is appointed to be a Commissioner of the Municipality of Sherepore, in the district of Mymensingh.

F. B. PEACOCK,
Offg. Secretary to the Govt. of Bengal.

ERRATUM.

The 10th March 1883.—In the notice, dated the 2nd instant, published in the *Calcutta Gazette* of the 7th idem, declaring the rates of subscription to, and postage for, the *Behar Hindi Gazette*, for "entire Gazette, Rs. 10 per annum" read "entire Gazette, Rs. 6 per annum;" and for "postage, Rs. 2-8 per annum" read "postage Re. 1-8 per annum."

E. N. BAKER,
Offg. Under-Secy to the Govt. of Bengal.

NOTIFICATION.

The 13th March 1883.—The following are published for general information :—

NOTICE TO MARINERS.—(No. 10.)

INDIA—WEST COAST.

MALABAR—CALICUT.

Disappearance of Anchorage Buoy.

The Port Officer, Madras, has reported that the Calicut anchorage buoy has disappeared. Great caution is therefore necessary when navigating in this vicinity.

By direction of the Government of Bengal,
A. W. STIFFE, *Lieut., late* I N.,
Port Officer, Calcutta.

NOTICE TO MARINERS.—(No. 11.)

BAY OF BENGAL—CHITTAGONG COAST.

Position of Automatic Buoy.

Notice is hereby given that an Automatic Sound buoy, painted red, has been laid in ten fathoms of water, about a quarter of a mile from the reef called South Patches. The shoalest portion of the reef bears from it due East. The South Patches lie from the Kutubdea light in a South-Easterly direction, and are distant 23 miles.

Position :—Latitude 21° 32′ N., and Longitude 91° 38′ E.

By direction of the Government of Bengal,
A. W. STIFFE, *Lieut, late* I N.,
Port Officer, Calcutta.

FORT WILLIAM, PORT OFFICE, CALCUTTA, *the 7th March* 1883.

A. P. MACDONNELL,
Offg. Secretary to the Government of Bengal.

NOTIFICATION.

The 12th March 1883.—Whereas a notification was published at page 1021, Part I of the *Calcutta Gazette* of the 20th December 1882, declaring the intention of Government to extend the provisions of the Bengal Vaccination Act, V (B.C.) of 1880, to the Municipality of Utterparah, in the district of Hooghly, and whereas no valid objections to such extension have been made within six weeks of such publication, the Lieutenant-Governor, in the exercise of the power conferred on him by Section I of the said Act, directs that the said Act shall be extended to the Municipality of Utterparah with effect from the 1st April 1883.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 2nd March 1883.—With reference to the rules under the Petroleum Act, 1881 published under the notification dated the 18th July 1882, at pages 617-18, Part I of the *Calcutta Gazette* of the 19th idem, the Lieutenant-Governor is pleased, with the previous sanction of the Governor-General in Council, to notify that, for a period of six months from this date, the declaration required in Rule 2 of the said rules may be submitted to the Port Officer by the agents or consignees of the vessels.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[Second Publication.]

[Second Publication.]

NOTIFICATION.

The 6th March 1883.—It is hereby notified for general information that the Lieutenant-Governor proposes to issue the following revised rule as rule 16 of the rules regarding salt, on which duty has not been paid, conveyed under bond from Chittagong to Naraingunge.

Revised Rule 16.

IT is to be understood also that before permission can be given to transport salt to Naraingunge under bond, the bonder will be required to construct a suitable warehouse at Naraingunge, to be approved and licensed by the Collector, together with suitable accommodation for the warehouse establishment, also to be approved by the Collector. He will also be required to enter into an engagement with the Collector to defray the cost to Government of the establishment noted in the margin, which will be appointed by the Collector for the guard and supervision of the warehouse.

	Rs.
1 Darogah on	50
2 Peons at Rs. 6 each ...	12
Cost per mensem ...	62

The rules contained in paragraphs 5, 11, and 13 of section II of the Salt Manual shall apply generally to the appointment and payment of this establishment, and to the construction and repair of the warehouse and establishment accommodation.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 6th March 1883.—Notification dated the 28th October 1863, published in the *Calcutta Gazette* of the 7th November 1863, which declares that no inward bound vessel, wind and weather permitting, shall pass Diamond Harbour without delivering to the pilot, Customs officer, or other person duly authorized to receive it, the manifest or report required by section 33 of the Customs Act, VI of 1863 (corresponding with section 53 of Act VIII of 1878), is hereby withdrawn.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 2nd March 1883.—In supersession of the Notification dated the 8th January 1883, published at page 22, Part I of the *Calcutta Gazette*, dated the 10th idem, the following amended order, issued by His Excellency the Governor in Council of the Straits Settlements, dated the 2nd February 1883, is republished for general information :—

GOVERNMENT NOTIFICATION—No. 56.

THE following Order by His Excellency the Governor in Council, in substitution for the similar Order dated the 8th September 1882, and published as Government Notification No. 474 in the *Government Gazette* of the 10th of November 1882, is published for general information.

By His Excellency's command,
C. J. IRVING,
Acting Colonial Secretary.

COLONIAL SECRETARY'S OFFICE, *Singapore, 2nd February* 1883.

WHEREAS by Indian Act No. XIII of 1854 it was, among other things, enacted that it shall be lawful for the Governor-General of India in Council, from time to time, to reduce the tolls payable under the said Act in respect of all vessels passing "The Straits Lights: And Whereas by Ordinance No. II of 1867 the powers vested by the said Act in the Governor-General of India in Council were vested in the Governor in Council of the Straits Settlements: And Whereas it is expedient to reduce the tolls payable under the said Indian Act:

It is hereby ordered by the Governor in Council, that on and after the 1st day of January 1883, the tolls payable in respect of all vessels liable, under the said Indian Act, to pay tolls for passing the Straits Lights shall be as follows :—

1.—If the voyage be one in the ordinary course whereof such vessel would pass the whole of the said Lights, at the rate of two cents of a dollar or eight pies of a rupee for every ton of her burden.

2.—If the voyage be one in the ordinary course of which she would pass any one or more of the said Lights, but not all of them, at the rate of one cent of a dollar or four pies of a rupee for every ton of her burden.

By His Excellency's command,
A. P. TALBOT,
Clerk of Councils.

COUNCIL CHAMBER, *Singapore, 2nd February* 1883.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 24th February 1883.—The following additional Port Rule under section 7 of Act XII of 1875, fixing the scale of charges for mooring, &c., in the port of Chandbally, having been approved by the Lieutenant-Governor, is notified for general information :—

Rule.

THE charge for the use of buoys Nos. 1, 2, and 3, laid in mid-stream, and off the jetties of the India General Steam Navigation Company and the Orissa Steam Packet Company, and of Messrs. Macneill and Company, shall be at the rate of Rs. 15 per mensem.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 26th February 1883.—The following notice is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

BAY OF BENGAL.

Hooghly River Notice.

THE Port Commissioners of Calcutta hereby notify that in consequence of the extension of the Middleton Sand, a temporary light vessel will be moored in the following position from the 15th March to the 10th November, both days inclusive:—

Gasper light-vessels, in line N. W. ½ N.
Saugor light-house, N. E. by N., distance 4 $\frac{3}{10}$ miles.
Long Sand Spit Buoy, N. by W., distance 1 mile.
Middleton Spit Buoy, S. E. ¼ E., distance 2¼ miles.

In 22 feet of water at lowest low-water spring tides.

The light is a fixed white light elevated 21 feet above the sea, and should be visible in clear weather from a distance of six miles.

During the day this light-vessel will exhibit from the mainmast head a small black ball over a larger one, the hull painted red, and "Long Sand" painted in white letters upon her side.

By order of the Commissioners,
E. W. PETLEY,
Deputy Conservator, Port Approaches.

PORT COMMISSIONER'S OFFICE, *the 27th January* 1883.

[Third Publication.]

NOTIFICATION.

The 27th February 1883.—The following notice is published for general information:—

KRISHNA SHOAL LIGHT VESSEL.

PORT OF RANGOON.

Notice to Masters of Vessels.

THE light ship *Colombo* having been sent to Calcutta for repairs, her place has been taken by the schooner *Alguada*, which vessel will show the usual lights. Her masthead light is not so bright as the *Colombo's*, consisting of only four instead of eight lanterns placed horizontally.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Third Publication.]

JUDICIAL DEPARTMENT.

No. 1229A.

The 7th March 1883.—The Lieutenant-Governor accepts the resignation tendered by Pundit Loharam Shorma of his appointment of Honorary Magistrate of the Kishnaghur Bench, in the district of Nuddea.

Baboo Rajkrishna Poramanick is appointed to be an Honorary Magistrate for the Santipore Bench, in the district of Nuddea, and is vested with the powers of a Magistrate of the third class. This cancels the notification of the 8th February 1883, which was published in the *Calcutta Gazette* of the 14th idem.

The 9th March 1883.—Baboo Mohendro Nath Mitter, Subordinate Judge, Moorshedabad, is allowed leave for three months, under Rule 1 (*a*), Section 72, Chapter V of the Civil Leave Code, with effect from the date on which he may avail himself of it.

Baboo Juggobundhoo Gangooly, Munsif of Meherpore, Nuddea, is appointed to act as Subordinate Judge of Moorshedabad, during the absence, on leave, of Baboo Mohendro Nath Mitter, or until further orders.

In supersession of the orders of the 13th February last, Baboo Suresh Chunder Ghose, Additional Munsif of Dinagepore, is appointed to be a Munsif in the district of Nuddea, and to be ordinarily stationed at Meherpore, during the absence, on deputation, of Baboo Juggobundhoo Gangooly, or until further orders.

Moulvie Faizuddeen Hossein, Deputy Magistrate and Deputy Collector, Rungpore, is vested with the powers of a Magistrate of the first class.

Mr. R. Carstairs, Officiating Joint Magistrate and Deputy Collector, 24-Pergunnahs, is vested with the powers of a Magistrate of the first class, and with powers under Section 260 of the Code of Criminal Procedure.

Mr. G. A. Grierson, Officiating Joint Magistrate and Deputy Collector, Durbhunga, is vested with the powers of a Magistrate of the first class, and with powers under Sections 260 and 133 of the Code of Criminal Procedure.

The 12th March 1883.—Mr. A. S. Crabbe is appointed to be an Honorary Magistrate for the Municipal Bench at Boidyabatti, in the district of Hooghly, and is vested with the powers of a Magistrate of the third class.

The undermentioned gentlemen are appointed to be Honorary Magistrates for the benches, in the Patna district, mentioned opposite their names, and are vested with the powers of a Magistrate of the third class :—

Moulvie Mohamed Yahia	...	...	For the Sadikpore Bench.
Mr. F. Collinson	...	...	For the Jhowgunge Bench.

Baboo Haro Krishna Chatterjee, Munsif of Cuttack, is confirmed in the first grade of Munsifs, *vice* Baboo Ambica Churn Ghose, deceased.

Baboo Upendra Chandra Ghose, Munsif of Midnapore, is confirmed in the second grade of Munsifs, *vice* Baboo Haro Krishna Chatterjee.

Baboo Hari Nath Roy, Munsif of Bazitpore, Mymensingh, is confirmed in the third grade of Munsifs, *vice* Baboo Upendra Chandra Ghose.

Baboo Shoshi Bhusan Bose, Munsif of Sherepore, Mymensingh, is confirmed in the fourth grade of Munsifs, *vice* Baboo Hari Nath Roy.

Moulvie Abdul Kureem, Junior, Munsif of Begooserai, Bhagulpore, is appointed temporarily to be a Munsif of the first grade, *vice* Baboo Haro Krishna Chatterjee.

Baboo Jogendro Chandra Mullik, Munsif of Narail, Jessore, is appointed temporarily to be a Munsif of the second grade, *vice* Baboo Upendra Chandra Ghose.

Baboo Jogendro Nath Mookerjee, Senior, Munsif of Ghosegong, Mymensingh, is appointed temporarily to be a Munsif of the third grade, *vice* Baboo Hari Nath Roy.

Baboo Nilmadhub De, Officiating Munsif of Brahmunberiah, Tipperah, is appointed temporarily to be a Munsif of the fourth grade, *vice* Baboo Shoshi Bhusan Bose.

Baboo Sarat Chandra Mookerjee, Munsif of Sasseram, Shahabad, is appointed to be a Munsif of the second grade, *vice* Baboo Kamikha Nath Mookerjee, resigned.

Baboo Annada Prasad Bagchi, Munsif of Manickgunge, Dacca, is appointed to be a Munsif of the third grade, *vice* Baboo Sarat Chandra Mookerjee

Baboo Rajani Nath Mitter, Officiating Munsif of Sonamgunge, Sylhet, is appointed to be a Munsif of the fourth grade, *vice* Baboo Annada Prasad Bagchi.

Baboo Rajani Nath Mitter is also appointed to be a Munsif in the district of Rungpore, and to be ordinarily stationed at Gyebanda, but will continue to officiate, until further orders, as Munsif of Sonamgunge.

Baboo Jogendro Nath Mookerjee, Junior, M. A., B. L., is appointed to act as a Munsif in the district of Rungpore, and to be ordinarily stationed at Gyebanda.

The 13th March 1883.—Baboo Medni Prosad Sing, Deputy Magistrate and Deputy Collector, Patna, is vested with powers under section 32 of Act X of 1882.

Baboo Raj Kissore Narain, Officiating Deputy Magistrate and Deputy Collector, Gya, is vested with the powers of a Magistrate of the second class.

In supersession of the order of the 19th December 1882, Baboo Prasanna Kumar Sen, First Munsif of Serampore, Hooghly, is allowed privilege leave for seven days on full pay, and for three days on half pay, with effect from the afternoon of the 8th idem.

GRANT OF LEAVE TO MUNSIFS.—*The 9th March* 1883.—Baboo Bimola Charan Mozumdar, First Munsif of Lukhipore, in the district of Noakholly, is allowed privilege leave for one month, under Section 72, Rule 1 (*a*), Chapter V of the Civil Leave Code, with effect from the 12th March 1883.

The 12th March 1883.—Baboo Aswini Kumar Guha, Second Munsif of Baraset, in the district of the 24-Pergunnahs, is allowed privilege leave for seven days, with effect from the 23rd February, under Section 72, Rule 1 (*a*), Chapter V of the Civil Leave Code, in extension of the leave granted him on the 23rd January last.

F. B. PEACOCK,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 12th March 1883.—It is hereby notified that the Lieutenant-Governor sanctions the extension of the provisions of section 34 of Act V of 1861 to the Municipality of Sitamurhee, in the Mozufferpore district.

F. B. PEACOCK,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

CIVIL LEAVE CODE.

Page 189.

Section 133*A*.

Rule. 1.

Add the following to the Rule :—

"But a Lower Subordinate in the Forest Survey, or a Forest Subordinate in Kumaun and Garhwal, who is prevented from availing himself of leave during recess, may be allowed to take privilege leave under the ordinary rules, service towards such leave counting from

the date of return from recess leave. Privilege leave will not be granted except upon a certificate from the head of the party to which the officer is attached that he was prevented from availing himself of the recess leave in consequence of the exigencies of the service."

The following orders, issued by the Government of India in the Military Department, are republished for general information :—

Fort William, the 9th March 1883.

APPOINTMENTS.

No. 126.—The Governor-General in Council is pleased to notify that the following arrangements for the conduct of business in the Military Department will have effect during the absence this season of His Excellency and the Council from Calcutta :—

Captain E. H. H. Collen, First Assistant Secretary and Officiating Deputy Secretary, will officiate as Secretary to the Government of India, in the Military Department, at the Presidency.

Lieutenant-Colonel A. C. W. Crookshank, Second Assistant Secretary, and Officiating First Assistant Secretary, will officiate as Deputy Secretary.

Communications on the following subjects (unless of a very urgent nature) are to be addressed to the Officiating Secretary at Calcutta :—

(1) *Furlough and Leave,* including all questions relating to the furlough regulations, and all applications for furlough, reports of departure and of return to duty, &c., &c.
